News for Nerds. Stuff That Matters.

VMSK/2 Promises 5 Times More Bandwidth

A articles article from the "that's-a-lot-of-howard-stern"
department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/154223>

ksan writes "Acoring to this article in EDN Magazine; VMSK/2, a new modulation technique may improve modem, FM, AM and other types of transmission. They say that its possible to transmit 100 channels of 128kbps MP3 over an FM channel. Anyone can say more about this?"

Tidings From Swagland: An LWCE Wrap-Up

A articles article from the "thanks-for-the-memories-and-yo-yos"
department

sent by timothy

<http://slashdot.org/article.pl?sid=00/08/21/1245205>

With a planned move to San Francisco next summer, last week saw San Jose's last Linux World Expo, at least for now. The future as always is stubbornly

uncertain, but it's impressive that the serendipitous combination of Free tools (from GNU) and a Free kernel (from Linus) has inspired enough interest and prosperity to excite a larger group of people each year. If you've not had the chance to attend one of these expositions, we hope this article will give you a flavor of what it's like. Note: Here are a few pictures from the floor (Day 1 & Day 2) contributed by Sensei^); do you have any cool shots to link to in comments? First, the prelude: If you've worked on the pre-show aspects of anything from a high-school play to a LAN party, you know all those booths, displays, people and computers don't materialize by themselves. For several days before the show floor opened on Tuesday, forklift crews zipped cargos of wooden, fiberglass, plastic, aluminum and steel cases from moving trucks to exhibit spaces. These contained banners, snap-together modules, computers, lighted signs -- and Yes, more gratis logo-imprinted toys than you can wave a TuxTops LED light at. Spiderwebs of CAT-5 and electric cord (run beneath the show floor) sprouted from the centerpoints of many booths, with strands for each computer to be connected to the Net during the show. Rolls of padding and carpet came next, then the slow assembly of display booths. These ranged from no-nonsense fabric partitions that housed companies like TuxTops and Sendmail (and legions of volunteers from PerlMonks, the Simple End User Linux project, Flightgear, and many others), to elaborate constructions with motorized signs, projected lasers and huge illuminated logos. Note: Slashdot (the site) was put together last week mostly from the comfy chairs of the PerlMonks booth. The "C" (as in conference) part of LWCE got started on Monday, and for the days that followed, attendees got instruction -- on everything from Linux security to evangelizing Free software to their bosses-- in half-day doses. Meanwhile, the setup work continued into the wee hours, as exhibitors raced the clock to make sure that at least their signs, if not their networks, were up for the next day. And at the OSDN booth (home of the red-carpeted Slashdot stage and beanbags), prep work included stacking thousands of boxed

distributions of Debian, and attempted to pawn a few copies off on every passer by. Tuesday morning, at a shade before 10:00, visitors willing to miss Michael Dell's keynote began to stream into the halls, on a quest to find new distros, old friends, and swag. It's amazing what companies will give away in order to snag a little nook in your brain. Besides the usual trinkets (keychains, T-shirts, stickers) and the distributions that a Linux show would be empty without, booth visitors were handed everything from knives (Sendmail) to cute monkeys (Helixcode) to embarrassing pictures of themselves (BSDi), as well as too many toys with embedded LEDs to bother counting. Rather than a full swag accounting (which would only annoy those unable to attend), let me just say that you won't hurt for toys when the chance presents itself. (CT:I just wanted to note that VA gave away 2300 pounds of shrink-wrapped boxed Debian. Like 5000 copies. It was beautiful) The things on display around the LWCE floor were more interesting than the toys, though. (And unlike a museum, most were available for hands-on demonstration, not hidden behind glass.) Indrema showed a prototype player (not in the sleek black box you see on their Web site, but still sporting that cool blue LED) hooked up to a HDTV display, playing a very fast game of Quake. (CT:Actually it was an HDTV demo, they promised the real deal will be less vaporous before I have children) In the Intel booth were server clusters populated with quad Itanium processors, demonstrating failover when one system was rudely but intentionally shut down. The amazing-like-emacs-is-amazing Flightgear project showed a really nice looking demo which is enough incentive by itself to invest in a better video card for my system so I can play with it. Both Helixcode and Eazel made their first LWCE appearance this time around, exciting for those filling their anti-FUD cannon for the perpetual "Linux is tough to use" argument. The Eazel folks showing off Nautilus seemed to be all but cackling as they showed off the smoothness of the zooming information available for documents and the cool music-integration abilities it contains. It would have been cool if they'd had some sample CDs, but

they promise a developers' release soon. (CT:They also promised .deb's, but I'll believe it when I see it. The UI was awesome, I just hope that someone hacks in something like the GUI command line in EFM) Considering that Sun was showing off the GNOME desktop on Solaris (hinting at its inclusion in stock Solaris systems sometime very soon, too) and that the GNOME project itself was not only in one of the small booths against the wall but the subject of a big announcement -- about the advent of the GNOME Foundation -- it looks it's showing up everywhere. Happily, there seems to be no shortage of room for window managers right now: the KDE folks were also there not only in their own booth, but showing up in software demonstrations all over the floor, as SuSE, Caldera and others demonstrated the very slick KDE 2.0. (Can't we all just get along, anyhow?) SuSE, by the way, was the only distributor I noticed showing off Linux on Apple hardware, and their current distro was sweet and fast on a G4. Beyond the curious lack of Apples, and the obvious ubiquity of x86 machines, there were machines based on everything from microcontrollers to StrongArm, MIPS, Alpha, Itanium ... even the IBM S/390s which have gotten attention for the ridiculous number of concurrent Linux systems they can support. For all the cool hardware and cusp-of-reality, bleeding-edge distros, it's interesting that the announcement which seemed to generate the most buzz of the entire show was the long-awaited release of Debian's Potato. Considering the reputation that Debian has for intelligent upgrading, stability, and diligence in guarding the license of the software which makes it up, it's not as surprising as it might otherwise be that Debian's new release made people sit up a bit more than the newest offerings from the large commercial distros. (CT: Also extremely impressive was the Pocket Linux booth, where they actually had iPaq's running Linux. The first dude that demoed the box to me was very nice, but what I really wanted to see was X11 running on it ... oddly enough, I encountered one of his cohorts in the bar later that night who showed it to me: X, xeyes, xterm, and twm running

on an iPaq. When they get the wireless action going on these things I'm totally there ... I'll just need to hack minimalist interfaces onto pronto and my MP3 player software and use the thing as a portable X terminal on the local 802.11 wireless lan.

MP3.com Pays Damages to Sony

A articles article from the "the-music-juggernaut-keeps-rolling" department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1238206>

Spudley writes "According to this story on the BBC MP3.com have agreed an out-of-court settlement to pay Sony music \$20 million in damages for their past copyright infringements. The deal also covers the future - MP3.com will from now on pay royalties to Sony. However, the judge has ruled that the trial must still take place, in order to make a ruling on other copyright cases against them."

Nintendo's Dolphin Becomes The N-Cube

A articles article from the "to-the-nth-degree" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1322252>

Xenex writes "Nintendo's next next-generation console, formerly know as 'Project Dolphin' now has an official name - the 'Nintendo Game Cube', or 'N-Cube' for short. Info about the name can be found on IGN's new N-Cube site here. Also a N-Cube FAQ is here, specs here (400mhz PowerPC based), and there is a quick editorial about why the N-Cube will succeed here."

GNU/Linux For Dummies: A Brief Survey

A books article from the "I'd-like-to-consider-myself-"a-dummy" department

sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/1645259>

chromatic is back with a mini-compendium of introductory Linux texts -- and yes, they have the famously protected "Dummies" trademark. Don't scoff at the nature of these books, though; the skill of translating the arcana of any computer topic (and boy are they all arcane to the uninitiated!) into language that mom, kids and the guy down the street can understand is not a common one. If you don't know what a root prompt (or an editor) is, or why you might want one, it's hard to do much else with your system. [TABLE NOT SHOWN]

AOL Sued for Creating Gnutella

A articles article from the "lawsuits-are-the-business-of-the-future" department

sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/1823236>

Greyfox writes "In yet another twist in the current IP debate surrounding free music downloads, mp3board.com has filed suit against AOL for helping consumers locate and download copyrighted materials by creating gnutella. The story is here on USA Today's site." Ok, I'm officially confused.

Sybase to Open Souce Watcom C/C++ & Fortran Compiler

A articles article from the "opening-it-to-the-world" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1852241>

Kendall Bennett writes "Rumours have been running around for some time, but now it is official.

Sybase has announced that it will be releasing the full source code to the Watcom C/C++ and Fortran compilers under an Open Source license. For more information see the new Open Watcom website." The press release states as well that the license will comply with an OSI approved license.

Kursk Destroyed By Cavitation Missiles?

A radio article from the "bad-test" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1857222>

A reader submitted: "One of Russia's biggest independent TV networks, NTV, broadcast at about 22:20pm that the developers of the Shkval torpedo system (which was discussed here on July 23rd) claim that Kursk was testing their torpedoes, and one of them accidentally homed on the sub itself. It was also mentioned that the torpedo can travel at the speed of 200 knots. What could it mean to the development of the supersonic underwater devices? It seems that even before corporations get to science, blood does." I just saw this on the news as well, and a number of readers submitted this over the last few days.

Open Source Library Card-Catalog Apps?

A askslashdot article from the "and-make-half-price-books-use-it,-too!" department
sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/2040245>

dmd writes: "Does there exist Open Source software for maintaining a small to medium sized library card-catalog? It seems all the tools are available: a perl module for working with MARC records, several for working with Z39.50 and XML, and even a web site apparently devoted to nearly this exact topic. An actual, working, catalog, however, seems to be missing. Is this something

that would be valuable? I, for one, have nearly 5k volumes in my collection, and they're begging for some discipline." I'm sure cash-strapped public libraries and schools would like to be able to use free / Free tools for this, since paper books aren't going away anytime soon. Not to mention for CDs, videos, charts, museum holdings ... any ideas out there? Turnkey solutions?

Neil Stephenson on Batman Beyond Project?

A articles article from the "speculation-rumor-and-probably-nots" department

sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/1951245>

Alkaiser writes "Hey, get this. According to Altavista, who got it from Variety, Neal Stephenson is negotiations to work on Fox's Batman Beyond movie. " This is a whole lotta rumor and speculation, but its still worth a thought. I mean batman and stephenson? Yum.

Amiga Allies With Red Hat

A articles article from the "getting-to-know-you-getting-to-know-about-yr-SDK" department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/0012225>

Mike Bouma writes "Amiga and Red Hat are working together to provide the foundation for exciting games and consumer content for the desktop, set-top-box, game console, and handheld market. This announcement follows monts after the disclosure of Amiga`s relationship with the Corel Corporation. The Amiga SDK can now also be bought at Redhat.com. Also take a look at this review which includes benchmark comparisons of the Java performance of the Amiga SDK running hosted on Redhat 6.1 and native Linux Java implementations."

Slashback: Suffrage, Product, Broadcasting

A articles article from the "welcome-back-ms.-lee" department sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/2343232>

Ah, there you are! You must have come to hear the details about selling your vote online? No, perhaps then you'd like to know what LinuxWorld thought was coolest at LWCE, or what words ESR has added to the infamous Jargon File. All below, folks, all below. Good thing politicians are in such strong ethical trim. In case you were thinking of selling your vote (early and often) in the next national election, it seems that there are legal barriers. Sort of like at least certain other activities which are legal if you do them for fun, but illegal if you take cash, the lawmakers seem to like the prostitution on their side of the castle wall. Or do they always vote their consciences? GMontag writes: "This Wired story tells how Voteauction.com has shut itself down after public pressure and threats from various bureaucrats. A telling quote by Doug Kellner, a Manhattan representative on the New York City Board of Elections: 'The message to get out to the public is that posting (intent to sell votes) to a website even in jest is a serious matter. It could subject you to prosecution, or in New York you could forfeit your vote,' Kellner said, referring to a New York state law that imposes a one-year forfeiture on vote buyers and sellers. So, this is more political speech that is 'illegal'? So far, it has been nothing but a discussion of vote auctioning and a college paper. Amazing that the bureaucrats what to 'do something' about this, but rounding up car thieves keeps 'slipping through the cracks.'" Note to non-U.S. citizens: since this law probably doesn't apply to you, feel free to sell your votes online. Radio Radio it's a sad salvation. wodelltech writes "With regard to the recent VMSK article/comments, readers might find the announcement at <http://ibiquitydigital.com>

interesting." Basically, this is an announcement of the merger of Lucent Digital Radio (which, little did I know, is just a few miles from my present dwelling) and USA Digital Radio, which sounds like an interesting step toward better choices in local radio. (Can't someone please give me good talk, all day?) Here's a snippet: Today, radio in the United States is broadcast using analog signals. iBiquity Digital will enable broadcasters to send a digital signal, capable of containing CD-quality audio with crystal clear reception and additional wireless data for a variety of consumer applications such as station and program content, stock and news information, local traffic and weather, and much more, over existing radio frequencies, without denigrating transmission of current analog programming. But is there a downloadable palm module? A Klingon translation? Anomie-ous Cow-ard writes "The ever-popular Jargon File has been updated to version 4.2.2." So if you want to correctly use terms like "smoot," "ANSI standard pizza," and "dirty genitals," make sure to arm yourself with ESR's help. And you can look at the file's change log here. Buzzword compliance is certainly a mission-critical optimization <ahem, mumble> ... Captain_Carnage writes "The LinuxWorld website has an article about itstop five productstoday. Featured are a rollable rubber keyboard from Broumand (only an e-mail address given), a user resource allocation/accounting tool from Aurema, an IDE-based RAID card from 3ware, a Linux-based router/VPN box from Linux Wizardry, and a High-Availability clustering product from Mission Critical Linux." These all seem like cool products, but slashdot readers have known about the rubber keyboard for months. As for the others, any other nominations for the coolest products recently released? If the field is open, I have to say the pneumatic chair at the Loki booth, even if it isn't yet available and will cost 5 or 10 grand, and Slackware folding frisbees.

Is UNIX An OS?

A articles article from the "bleeding-six-colors" department
sent by emmett

<http://slashdot.org/article.pl?sid=00/08/22/2258255>

gwernol writes: "David Every has an interesting article over at MacWeek that asks the question: is UNIX an OS? Before you jump off the deep end, read the article. It's actually a pretty good discussion of what components a modern OS needs beyond a kernel and a shell. It also discusses Mac OS X, the forthcoming 'UNIX++' from Apple." At the very least, it should inspire some decent conversation.

Free Barcode Reader From Radio Shack

A articles article from the "free-and-hackable" department
sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/2140248>

Skyhawk128 writes: "I was in my local Radio Shack yesterday, and as I was checking out, the manager offered me a free barcode scanner to use with their new catalog. By hooking up the scanner to your PS2 keyboard port and installing their software (Windows only) you can scan the bar codes found on most pages and be taken a web page with expanded information about that product. They claim to be able to scan the bar code on all sorts of things (i.e.- UPC codes on food, etc.) I have been too busy playing with the scanner in Notepad to install the software, but I thought this gadget might be of interest to other geeks." Several folks have confirmed that you can get a free barcode reader if you're into it. P'raps a SANE module shall soon follow? [Note from timothy:] Not all RS locations are giving them out yet -- the nearest one to me, despite telling me otherwise on the phone, refused to give me one until they had the new (bar-coded) catalogs in stock. That's at Chatham Station shopping center in Howard County, MD.

The Computer of 2010

A articles article from the "possibly-could-be" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1731232>

nostriluu writes " With the assistance of award-winning firm frogdesign (the geniuses behind the look of the early Apple and many of today's supercomputers and workstations), Forbes ASAP has designed and built (virtually, of course) the computer of 2010."

Sony VP On Stopping Napster

A articles article from the "smash-crash-bushwhack" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/0212232>

akira-x writes "I spotted a link to an interesting (and disturbing) article on Gnutella News regarding some comments that were made by Steve Heckler, senior vice president of Sony Pictures Entertainment Inc. According to him, Napster WILL lose, because "The [music] industry will take whatever steps it needs to protect itself and protect its revenue streams. It will not lose that revenue stream, no matter what." The disturbing part is what Heckler says Sony will attempt to do to help them win: "Sony is going to take aggressive steps to stop this," Heckler told the Summer Forty-Niner. "We will develop technology that transcends the individual user. We will firewall Napster at source -- we will block it at your cable company, we will block it at your phone company, we will block it at your [Internet-service provider]. We will firewall it at your PC." "

The World's Most Secure OS (?)

A bsd article from the "Certainly-has-a-cool-mascot" department
sent by nik

<http://slashdot.org/article.pl?sid=00/08/23/093207>

Anonymous Coward writes "Titled The World's Most Secure OS, this article in The Standard talks about what is needed to be "Secure by Default" Probably the best OpenBSD article I've read in recent months. Theo doesn't pull his punches (then again, he never does), in particular, discounting the "more eyes means better security" philosophy. Then again, he's probably right.

Dell Offering 1600x1200 Laptops

A articles article from the "pixels-to-size-of-dust" department
sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/2145201>

Fervent writes "Dell has started offering laptops today with the new UXGA screens. These higher-res LCD screens propert better, clearer graphics at no extra power cost. Details on the new laptops are available at CNet." They don't say how big the actual screen is, but ya gotta be scared... I can see 1280x1024 on a 15" screen, but 1600x1200 is pretty scary... I find a lot of things to small at that res on a 21" monitor. Then again, just pump up the font size and everything is crisper... of course those icons on web pages sure don't get any more legible.

2Ghz P4 Shown Off

A articles article from the "flaunt-it-girlfriend!" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/013235>

mduell writes "Intel showed off their newest, fastest chip ever. The Pentium 4, running at 2 Ghz uses 400MHz Rambus Direct RAM(ugh). They also

demo'd an Itanium server cluster running Linux with failover protection (what does this have to do with the chip?). Additionally, a 1Ghz P3-Xeon and a new 500Mhz mobile P3 that uses just 850 milliwatts when running most applications (5.5W max) were shown."

Censorware Blocking Methods Using Akamai

A yro article from the "censorship-is-damage-route-around-it" department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/1219216>

Snatch Freedom writes "Peacefire has discovered a way to block censorware using Akamai's servers. For example you can see Yahoo! using <http://a1.g.akamaitech.net/6/6/6/6/www.yahoo.com/>. C|Net had a story about. Censorware cannot block akamai; that will piss off all the advertising people. Akamai says (in the cnet story) that they are not in the filtering business and they won't block anything. The makers of ``Bess'' wan't Akamai to filter it but Akamai says no. "

SCO Change Their Name to Tarantella

A articles article from the "you-gotta-be-kidding" department sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/23/136213>

GoodPint sent in a story so bizarre that you'll swear I made it up because nothing interesting is happening 'cuz its august and everyone is on vacation... Whats left of SCO is now renaming itself. The best name they could come up with was Tarantella... conjuring up warm fuzzy images for countless investors, as well as limitless mock fodder for folks like me. Reminds of an old Onion story... "New Corporate Logo Changes Everything".

The info is Rob Malda's
The code is mine

Slashdot Daily Report (<http://slashdot.org/>)

News for Nerds. Stuff That Matters.

VMSK/2 Promisses 5 Times More Bandwidth

A articles article from the "that's-a-lot-of-howard-stern" department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/154223>

ksan writes "Acording to this article in EDN Magazine; VMSK/2, a new modulation technique may

improve modem, FM, AM and other types of transmission. They say that its possible to transmit 100 channels of 128kbps MP3 over an FM channel. Anyone can say more about this?"

Tidings From Swagland: An LWCE Wrap-Up

A articles article from the "thanks-for-the-memories-and-yo-yos" department

sent by timothy

<http://slashdot.org/article.pl?sid=00/08/21/1245205>

With a planned move to San Francisco next summer, last week saw San Jose's last Linux World Expo, at least for now. The future as always is stubbornly uncertain, but it's impressive that the serendipitous combination of Free tools (from GNU) and a Free kernel (from Linus) has inspired enough interest and prosperity to excite a larger group of people each year. If you've not had the chance to attend one of these expositions, we hope this article will give you a flavor of what it's like. Note: Here are a few pictures from the floor (Day 1 & Day 2) contributed by Sensei^); do you have any cool shots to link to in comments? First, the prelude: If you've worked on the pre-show aspects of anything from a high-school play to a LAN party, you know all those booths, displays, people and computers don't materialize by themselves. For several days before the show floor opened on Tuesday, forklift crews zipped cargos of wooden, fiberglass, plastic, aluminum and steel cases from moving trucks to exhibit spaces. These contained banners, snap-together modules, computers, lighted signs -- and Yes, more gratis logo-imprinted toys than you can wave a TuxTops LED light at. Spiderwebs of CAT-5 and electric cord (run beneath the show floor) sprouted from the centerpoints of many booths, with strands for each computer to be connected to the Net during the show. Rolls of padding and carpet came next, then the slow assembly of display booths. These ranged from no-nonsense fabric partitions that housed companies like TuxTops and Sendmail (and legions

of volunteers from PerlMonks, the Simple End User Linux project, Flightgear, and many others), to elaborate constructions with motorized signs, projected lasers and huge illuminated logos. Note: Slashdot (the site) was put together last week mostly from the comfy chairs of the PerlMonks booth. The "C" (as in conference) part of LWCE got started on Monday, and for the days that followed, attendees got instruction -- on everything from Linux security to evangelizing Free software to their bosses-- in half-day doses. Meanwhile, the setup work continued into the wee hours, as exhibitors raced the clock to make sure that at least their signs, if not their networks, were up for the next day. And at the OSDN booth (home of the red-carpeted Slashdot stage and beanbags), prep work included stacking thousands of boxed distributions of Debian, and attempted to pawn a few copies off on every passer by. Tuesday morning, at a shade before 10:00, visitors willing to miss Michael Dell's keynote began to stream into the halls, on a quest to find new distros, old friends, and swag. It's amazing what companies will give away in order to snag a little nook in your brain. Besides the usual trinkets (keychains, T-shirts, stickers) and the distributions that a Linux show would be empty without, booth visitors were handed everything from knives (Sendmail) to cute monkeys (Helixcode) to embarrassing pictures of themselves (BSDi), as well as too many toys with embedded LEDs to bother counting. Rather than a full swag accounting (which would only annoy those unable to attend), let me just say that you won't hurt for toys when the chance presents itself. (CT:I just wanted to note that VA gave away 2300 pounds of shrink-wrapped boxed Debian. Like 5000 copies. It was beautiful) The things on display around the LWCE floor were more interesting than the toys, though. (And unlike a museum, most were available for hands-on demonstration, not hidden behind glass.) Indrema showed a prototype player (not in the sleek black box you see on their Web site, but still sporting that cool blue LED) hooked up to a HDTV display, playing a very fast game of Quake. (CT:Actually it was an HDTV demo, they promised the real deal will

be less vaporous before I have children) In the Intel booth were server clusters populated with quad Itanium processors, demonstrating failover when one system was rudely but intentionally shut down. The amazing-like-emacs-is-amazing Flightgear project showed a really nice looking demo which is enough incentive by itself to invest in a better video card for my system so I can play with it. Both Helixcode and Eazel made their first LWCE appearance this time around, exciting for those filling their anti-FUD cannon for the perpetual "Linux is tough to use" argument. The Eazel folks showing off Nautilus seemed to be all but cackling as they showed off the smoothness of the zooming information available for documents and the cool music-integration abilities it contains. It would have been cool if they'd had some sample CDs, but they promise a developers' release soon. (CT:They also promised .deb's, but I'll believe it when I see it. The UI was awesome, I just hope that someone hacks in something like the GUI command line in EFM) Considering that Sun was showing off the GNOME desktop on Solaris (hinting at its inclusion in stock Solaris systems sometime very soon, too) and that the GNOME project itself was not only in one of the small booths against the wall but the subject of a big announcement -- about the advent of the GNOME Foundation -- it looks it's showing up everywhere. Happily, there seems to be no shortage of room for window managers right now: the KDE folks were also there not only in their own booth, but showing up in software demonstrations all over the floor, as SuSE, Caldera and others demonstrated the very slick KDE 2.0. (Can't we all just get along, anyhow?) SuSE, by the way, was the only distributor I noticed showing off Linux on Apple hardware, and their current distro was sweet and fast on a G4. Beyond the curious lack of Apples, and the obvious ubiquity of x86 machines, there were machines based on everything from microcontrollers to StrongArm, MIPS, Alpha, Itanium ... even the IBM S/390s which have gotten attention for the ridiculous number of concurrent Linux systems they can support. For all the cool hardware and cusp-of-reality, bleeding-edge

distros, it's interesting that the announcement which seemed to generate the most buzz of the entire show was the long-awaited release of Debian's Potato. Considering the reputation that Debian has for intelligent upgrading, stability, and diligence in guarding the license of the software which makes it up, it's not as surprising as it might otherwise be that Debian's new release made people sit up a bit more than the newest offerings from the large commercial distros. (CT: Also extremely impressive was the Pocket Linux booth, where they actually had iPaq's running Linux. The first dude that demoed the box to me was very nice, but what I really wanted to see was X11 running on it ... oddly enough, I encountered one of his cohorts in the bar later that night who showed it to me: X, xeyes, xterm, and twm running on an iPaq. When they get the wireless action going on these things I'm totally there ... I'll just need to hack minimalist interfaces onto pronto and my MP3 player software and use the thing as a portable X terminal on the local 802.11 wireless lan.

MP3.com Pays Damages to Sony

A articles article from the "the-music-juggernaut-keeps-rolling" department

sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1238206>

Spudley writes "According to this story on the BBC MP3.com have agreed an out-of-court settlement to pay Sony music \$20 million in damages for their past copyright infringements. The deal also covers the future - MP3.com will from now on pay royalties to Sony. However, the judge has ruled that the trial must still take place, in order to make a ruling on other copyright cases against them."

Nintendo's Dolphin Becomes The N-Cube

A articles article from the "to-the-nth-degree" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1322252>

Xenex writes "Nintendo's next next-generation console, formerly know as 'Project Dolphin' now has an official name - the 'Nintendo Game Cube', or 'N-Cube' for short. Info about the name can be found on IGN's new N-Cube site here. Also a N-Cube FAQ is here, specs here (400mhz PowerPC based), and there is a quick editorial about why the N-Cube will succeed here."

GNU/Linux For Dummies: A Brief Survey

A books article from the "I'd-like-to-consider-myself-"a-dummy"" department
sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/1645259>

chromatic is back with a mini-compendium of introductory Linux texts -- and yes, they have the famously protected "Dummies" trademark. Don't scoff at the nature of these books, though; the skill of translating the arcana of any computer topic (and boy are they all arcane to the uninitiated!) into language that mom, kids and the guy down the street can understand is not a common one. If you don't know what a root prompt (or an editor) is, or why you might want one, it's hard to do much else with your system. [TABLE NOT SHOWN]

AOL Sued for Creating Gnutella

A articles article from the "lawsuits-are-the-business-of-the-future" department
sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/1823236>

Greyfox writes "In yet another twist in the

current IP debate surrounding free music downloads, mp3board.com has filed suit against AOL for helping consumers locate and download copyrighted materials by creating gnutella. The story is here on USA Today's site." Ok, I'm officially confused.

Sybase to Open Souce Watcom C/C++ & Fortran Compiler
A articles article from the "opening-it-to-the-world" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1852241>

Kendall Bennett writes "Rumours have been running around for some time, but now it is official. Sybase has announced that it will be releasing the full source code to the Watcom C/C++ and Fortran compilers under an Open Source license. For more information see the new Open Watcom website." The press release states as well that the license will comply with an OSI approved license.

Kursk Destroyed By Cavitation Missles?
A radio article from the "bad-test" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1857222>

A reader submitted: "One of Russia's biggest independent TV networks, NTV, broadcast at about 22:20pm that the developers of the Shkval torpedo system (which was discussed here on July 23rd) claim that Kursk was testing their torpedoes, and one of them accidentally homed on the sub itself. It was also mentioned that the torpedo can travel at the speed of 200 knots. What could it mean to the development of the supersonic underwater devices? It seems that even before corporations get to science, blood does." I just saw this on the news as well, and a number of readers submitted this over the last few days.

Open Source Library Card-Catalog Apps?

A askslashdot article from the "and-make-half-price-books-use-it,-too!" department
sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/2040245>

dmd writes: "Does there exist Open Source software for maintaining a small to medium sized library card-catalog? It seems all the tools are available: a perl module for working with MARC records, several for working with Z39.50 and XML, and even a web site apparently devoted to nearly this exact topic. An actual, working, catalog, however, seems to be missing. Is this something that would be valuable? I, for one, have nearly 5k volumes in my collection, and they're begging for some discipline." I'm sure cash-strapped public libraries and schools would like to be able to use free / Free tools for this, since paper books aren't going away anytime soon. Not to mention for CDs, videos, charts, museum holdings ... any ideas out there? Turnkey solutions?

Neil Stephenson on Batman Beyond Project?

A articles article from the "speculation-rumor-and-probably-nots" department
sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/1951245>

Alkaiser writes "Hey, get this. According to Altavista, who got it from Variety, Neal Stephenson is negotiations to work on Fox's Batman Beyond movie. " This is a whole lotta rumor and speculation, but its still worth a thought. I mean batman and stephenson? Yum.

Amiga Allies With Red Hat

A articles article from the "getting-to-know-you-getting-to-know-

about-yr-SDK" department
sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/0012225>

Mike Bouma writes "Amiga and Red Hat are working together to provide the foundation for exciting games and consumer content for the desktop, set-top-box, game console, and handheld market. This announcement follows monts after the disclosure of Amiga`s relationship with the Corel Corporation. The Amiga SDK can now also be bought at Redhat.com. Also take a look at this review which includes benchmark comparisons of the Java performance of the Amiga SDK running hosted on Redhat 6.1 and native Linux Java implementations."

Slashback: Suffrage, Product, Broadcasting
A articles article from the "welcome-back-ms.-lee" department
sent by timothy

<http://slashdot.org/article.pl?sid=00/08/22/2343232>

Ah, there you are! You must have come to hear the details about selling your vote online? No, perhaps then you'd like to know what LinuxWorld thought was coolest at LWCE, or what words ESR has added to the infamous Jargon File. All below, folks, all below. Good thing politicians are in such strong ethical trim. In case you were thinking of selling your vote (early and often) in the next national election, it seems that there are legal barriers. Sort of like at least certain other activities which are legal if you do them for fun, but illegal if you take cash, the lawmakers seem to like the prostitution on their side of the castle wall. Or do they always vote their consciences? GMontag writes: "This Wired story tells how **Voteauction**.com has shut itself down after public pressure and threats from various bureaucrats. A telling quote by Doug Kellner, a Manhattan representative on the New York City Board of Elections: 'The message to get out to the public is that posting (intent to sell

votes) to a website even in jest is a serious matter. It could subject you to prosecution, or in New York you could forfeit your vote,' Kellner said, referring to a New York state law that imposes a one-year forfeiture on vote buyers and sellers. So, this is more political speech that is 'illegal'? So far, it has been nothing but a discussion of vote auctioning and a college paper. Amazing that the bureaucrats what to 'do something' about this, but rounding up car thieves keeps 'slipping through the cracks.'" Note to non-U.S. citizens: since this law probably doesn't apply to you, feel free to sell your votes online. Radio Radio it's a sad salvation. wodelitech writes "With regard to the recent VMSK article/comments, readers might find the announcement at <http://ibiquitydigital.com> interesting." Basically, this is an announcement of the merger of Lucent Digital Radio (which, little did I know, is just a few miles from my present dwelling) and USA Digital Radio, which sounds like an interesting step toward better choices in local radio. (Can't someone please give me good talk, all day?) Here's a snippet: Today, radio in the United States is broadcast using analog signals. iBiquity Digital will enable broadcasters to send a digital signal, capable of containing CD-quality audio with crystal clear reception and additional wireless data for a variety of consumer applications such as station and program content, stock and news information, local traffic and weather, and much more, over existing radio frequencies, without denigrating transmission of current analog programming. But is there a downloadable palm module? A Klingon translation? Anomie-ous Cow-ard writes "The ever-popular Jargon File has been updated to version 4.2.2." So if you want to correctly use terms like "smoot," "ANSI standard pizza," and "dirty genitals," make sure to arm yourself with ESR's help. And you can look at the file's change log here. Buzzword compliance is certainly a mission-critical optimization <ahem, mumble> ... Captain_Carnage writes "The LinuxWorld website has an article about itstop five productstoday. Featured are a rollable rubber keyboard from

Broumand (only an e-mail address given), a user resource allocation/accounting tool from Aurema, an IDE-based RAID card from 3ware, a Linux-based router/VPN box from Linux Wizardry, and a High-Availability clustering product from Mission Critical Linux." These all seem like cool products, but slashdot readers have known about the rubber keyboard for months. As for the others, any other nominations for the coolest products recently released? If the field is open, I have to say the pneumatic chair at the Loki booth, even if it isn't yet available and will cost 5 or 10 grand, and Slackware folding frisbees.

Is UNIX An OS?

A articles article from the "bleeding-six-colors" department sent by emmett

<http://slashdot.org/article.pl?sid=00/08/22/2258255>

gwernol writes: "David Every has an interesting article over at MacWeek that asks the question: is UNIX an OS? Before you jump off the deep end, read the article. It's actually a pretty good discussion of what components a modern OS needs beyond a kernel and a shell. It also discusses Mac OS X, the forthcoming 'UNIX++' from Apple." At the very least, it should inspire some decent conversation.

Free Barcode Reader From Radio Shack

A articles article from the "free-and-hackable" department sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/2140248>

Skyhawk128 writes: "I was in my local Radio Shack yesterday, and as I was checking out, the manager offered me a free barcode scanner to use with their new catalog. By hooking up the scanner to your PS2 keyboard port and installing their software (Windows only) you can scan the bar codes

found on most pages and be taken a web page with expanded information about that product. They claim to be able to scan the bar code on all sorts of things (i.e.- UPC codes on food, etc.) I have been too busy playing with the scanner in Notepad to install the software, but I thought this gadget might be of interest to other geeks." Several folks have confirmed that you can get a free barcode reader if you're into it. P'raps a SANE module shall soon follow? [Note from timothy:] Not all RS locations are giving them out yet -- the nearest one to me, despite telling me otherwise on the phone, refused to give me one until they had the new (bar-coded) catalogs in stock. That's at Chatham Station shopping center in Howard County, MD.

The Computer of 2010

A articles article from the "possibly-could-be" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/22/1731232>

nostriluu writes " With the assistance of award-winning firm frogdesign (the geniuses behind the look of the early Apple and many of today's supercomputers and workstations), Forbes ASAP has designed and built (virtually, of course) the computer of 2010."

Sony VP On Stopping Napster

A articles article from the "smash-crash-bushwhack" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/0212232>

akira-x writes "I spotted a link to an interesting (and disturbing) article on Gnutella News regarding some comments that were made by Steve Heckler, senior vice president of Sony Pictures Entertainment Inc. According to him, Napster WILL lose, because "The [music] industry

will take whatever steps it needs to protect itself and protect its revenue streams. It will not lose that revenue stream, no matter what." The disturbing part is what Heckler says Sony will attempt to do to help them win: "Sony is going to take aggressive steps to stop this," Heckler told the Summer Forty-Niner. "We will develop technology that transcends the individual user. We will firewall Napster at source -- we will block it at your cable company, we will block it at your phone company, we will block it at your [Internet-service provider]. We will firewall it at your PC." "

The World's Most Secure OS (?)

A bsd article from the "Certainly-has-a-cool-mascot" department sent by nik

<http://slashdot.org/article.pl?sid=00/08/23/093207>

Anonymous Coward writes "Titled The World's Most Secure OS, this article in The Standard talks about what is needed to be "Secure by Default" Probably the best OpenBSD article I've read in recent months. Theo doesn't pull his punches (then again, he never does), in particular, discounting the "more eyes means better security" philosophy. Then again, he's probably right.

Dell Offering 1600x1200 Laptops

A articles article from the "pixels-to-size-of-dust" department sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/22/2145201>

Fervent writes "Dell has started offering laptops today with the new UXGA screens. These higher-res LCD screens proport better, clearer graphics at no extra power cost. Details on the new laptops are available at CNet." They don't say how big the actual screen is, but ya gotta be scared... I can see 1280x1024 on a 15" screen, but 1600x1200 is

pretty scary... I find a lot of things to small at that res on a 21" monitor. Then again, just pump up the font size and everything is crisper... of course those icons on web pages sure don't get any more legible.

2Ghz P4 Shown Off

A articles article from the "flaunt-it-girlfriend!" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/013235>

mduell writes "Intel showed off their newest, fastest chip ever. The Pentium 4, running at 2 Ghz uses 400MHz Rambus Direct RAM(ugh). They also demo'd an Itanium server cluster running Linux with failover protection (what does this have to do with the chip?). Additionally, a 1Ghz P3-Xeon and a new 500Mhz mobile P3 that uses just 850 milliwatts when running most applications (5.5W max) were shown."

Censorware Blocking Methods Using Akamai

A yro article from the "censorship-is-damage-route-around-it" department sent by Hemos

<http://slashdot.org/article.pl?sid=00/08/23/1219216>

Snatch Freedom writes "Peacefire has discovered a way to block censorware using Akamai's servers. For example you can see Yahoo! using <http://a1.g.akamaitech.net/6/6/6/6/www.yahoo.com/>. C|Net had a story about. Censorware cannot block akamai; that will piss off all the advertising people. Akamai says (in the cnet story) that they are not in the filtering business and they won't block anything. The makers of ``Bess'' wan't Akamai to filter it but Akamai says no. "

SCO Change Their Name to Tarantella

A articles article from the "you-gotta-be-kidding" department sent by CmdrTaco

<http://slashdot.org/article.pl?sid=00/08/23/136213>

GoodPint sent in a story so bizarre that you'll swear I made it up because nothing interesting is happening 'cuz its august and everyone is on vacation... Whats left of SCO is now renaming itself. The best name they could come up with was Tarantella... conjuring up warm fuzzy images for countless investors, as well as limitless mock fodder for folks like me. Reminds of an old Onion story... "New Corporate Logo Changes Everything".

The info is Rob Malda's

The code is mine

**PRODUÇÃO MUDIÁTICA
TRABALHO FINAL**

**RTMark.com
Acompanhamento de produção**

Érico Gonçalves de Assis

Trabalho de avaliação final da disciplina de Produção Mudiática, ministrada pelo professor Dr. Ronaldo Henn no segundo semestre de 2004.

Programa de Pós-Graduação em Ciências da Comunicação / Universidade do Vale do Rio dos Sinos / São Leopoldo-RS

Apresentado em dezembro de 2004.

RTMark.com

Acompanhamento de produção

Érico Gonçalves de Assis

Trabalho de avaliação final da disciplina de Produção Midiática, ministrada pelo professor Dr. Ronaldo Henn no segundo semestre de 2004.

Programa de Pós-Graduação em Ciências da Comunicação / Universidade do Vale do Rio dos Sinos / São Leopoldo-RS

Apresentado em novembro de 2004.

O presente trabalho tem por intento analisar os processos de produção que ocorrem a partir das ferramentas do website RTMark.com (<http://www.rtmark.com>). Este website é um espaço para ativistas, especialmente do viés anti-corporativo, reunirem-se para propor e discutir idéias de ação direta e protesto. Esta discussão é feita a partir de uma ferramenta que registra, armazena e cria os fóruns de discussão (*messsage boards*) específicos para cada idéia apresentada.

Dentro da proposta de trabalho final para a disciplina de Produção Midiática – o acompanhamento das pistas ou rastros do processo de produção de alguma realização midiática, com base na Crítica Genética (SALLES, 2000) –, minha intenção é encontrar tais registros de processo na criação das ações apresentadas no website RTMark.com.

Também é uma proposta, preliminar, de estudo da função deste website. Em que ele colabora para as ações de protesto? Que caminho costumam tomar as discussões nos fóruns e em que sentido estas discussões desenvolvem as idéias? Como esse processo de produção conjunta afeta o resultado final, a ação concreta?

Não era meu intento encontrar as respostas para todas estas perguntas ao longo do trabalho, mas sim iniciar uma problematização. Fica a sugestão de um objeto de pesquisa bastante rico e que merece aprofundamento maior.

Histórico

O website da RTMark¹ surgiu a partir de um coletivo de ativistas formado em 1991, que se apresentava como um fundo de financiamento de projetos de *culture jamming*², tal como um órgão filantrópico para as artes. Em 1993, o grupo fez sua transição para a web com um fórum de discussão. O fórum foi sofrendo alterações até transformar-se no website que se apresenta hoje em <http://www.rtmark.com/>.

O grupo reúne aproximadamente cinco pessoas, e tem como seu líder ou face mais aparente o ativista Frank Guerrero (nome fictício). Guerrero, em entrevista a MYERSON (2002), expõe sua visão do RTMark:

é um sistema sério que almeja, através de uma combinação de ações reais e teatrais, criticar e talvez enfraquecer o papel que as corporações têm tomado ao suplantar os processos democráticos ou sociais de governo. (...) Estamos aqui para desestabilizar o sistema de tal forma que as pessoas tenham um pouco de entretenimento e ao mesmo tempo esses projetos façam a elas algumas questões.³

Na declaração, já se percebe uma tendência da organização para privilegiar ações diretas com algum elemento cômico ou de brincadeira. Como será visto nos exemplos à frente, há um forte viés para a ironia e a subversão.

Este viés já se apresenta também pelo fato da RTMark ser uma organização anti-corporativa registrada como corporação. “Nossos investidores estão protegidos pela mesma regra de responsabilidade limitada que permite aos membros de outras corporações não ter responsabilidade pelo que suas empresas fazem de errado”⁴, expõe Guerrero (em entrevista a SMITH, 1999). “O objetivo máximo da RTMark é ser

¹ Utilizarei o nome “RTMark” ao longo do trabalho, embora o nome original do grupo seja grafado “®TMark”. A pronúncia correta do nome é “art mark”, o que remete a “mercado de arte”, já propondo uma visão das ações de protesto como expressão artística. Ao mesmo tempo, “RTMark” é uma alusão a “registrered trademark”, ou “marca registrada”.

² *Culture jamming*, ou “bagunçar com a cultura”, é uma tática de protesto relacionada à confusão de sinais – apropriando-se de elementos de uma marca, de uma pessoa, de uma mentalidade, o ativista subverte estes elementos contra seus próprios possuidores. O exemplo mais comum de *culture jamming* é o ataque a outdoors para retrabalhar seu sentido. Ver DERY, 1993.

³ Tradução minha de “*It is a serious system that means, through a combination of real actions and theater, to criticize and hopefully undermine the role that corporations are taking in supplanting democratic or social processes of government (...) We’re there to destabilize the system in such a way that people might get a little entertainment and at the same time have those projects ask a few questions of them.*”

⁴ Tradução minha de “*Our investors are protected by the same limited-liability status that lets officers of other corporations avoid responsibility for their companies’ wrongdoing.*”

processada, e usar este caso para levar o direito corporativo a julgamento. E ser condenada!”⁵ (idem).

O segundo viés importante da RTMark é sua preocupação com a repercussão midiática de suas ações. Como será a visto a seguir, é parte importante da discussão dos projetos descobrir como estes podem ser desenvolvidos de forma a alcançar máxima exposição no jornalismo.

A atenção dos meios é o principal fator que empregamos para avaliar o êxito de nossos projetos, mas há outros. Às vezes, um projeto pode ter muito êxito mesmo alcançando um público pequeno, se tiver uma certa ressonância poética. O aspecto poético é muito importante, pois produz dividendos culturais.⁶ (entrevista a VICENTE, 2000)

Este viés aparece com proeminência no pôster produzido pela organização (que pode ser visto em <http://www.rtmark.com/tactics.html>), o qual apresenta a RTMark e incita a criatividade dos leitores para o desenvolvimento de projetos. Um de seus textos busca mostrar, de forma resumida, qual deve ser o processo criativo:

Encontre um alvo (alguma corporação fazendo o que não devia) e pense em algo que deixaria este alvo irritado – algo que também seja engraçado.
Se lhe faltam idéias, imagine o alvo perdendo o controle ou agindo de forma estúpida. O que faria ele agir assim?
(DICA: jornalistas adoram histórias divertidas, como todo mundo. Quanto mais engraçada, mais chance sua história terá de ganhar cobertura.)
Tire proveito da reação do alvo. Escreva um press release e envie-o para centenas de jornalistas.⁷

Cada projeto importante realizado através da RTMark ganha um espaço próprio no site (<http://www.rtmark.com/history.html>), onde é dada proeminência a todas citações que o projeto recebeu na grande imprensa.

⁵ Tradução minha de “*The ultimate goal of RTMark is to be sued, and to use that case to put corporate rights on trial. And lose.*” (grifo do autor da declaração)

⁶ Tradução minha de “*La atención de los medios es el principal factor que empleamos para evaluar el éxito de nuestros proyectos, pero ha otros. A veces, un proyecto puede tener mucho éxito aunque llegue a poca gente, si posee una cierta resonancia poética. El aspecto poético es muy importante ya que produce dividendos culturales.*”

⁷ Tradução minha de “*Find a target (some entity running amok) and think of something sure to annoy them – something that’s also lots of fun. If you’re stumped, imagine the target losing control or acting stupidly. What would it take to make them do that? (Journalists love fun stories, just like everyone else. The more fun the story, the more likely it is to get covered.) Capitalize on the target’s reaction. Write a press release and e-mail it to hundreds of journalists.*”

Ações realizadas

Alguns dos projetos de maior relevância realizados a partir da RTMark:

Vote-auction.com (atualmente em <http://www.vote-auction.net/>): o website funcionou durante parte da campanha eleitoral dos EUA em 2000. Propunha que, como as eleições são sempre definidas por quem recebe maior apoio financeiro (de corporações e outras entidades), fosse construído um atalho entre um atalho entre eleitores e financiadores: todo eleitor poderia entrar no site e leiloar seu voto entre aqueles que dão apoio aos candidatos.

O website foi construído a partir da colaboração entre diversos programadores e designers, e ainda recebeu apoio de vários coletivos artísticos europeus.

O projeto recebeu vários ataques jurídicos durante o ano eleitoral, mas defendeu-se com base na cláusula de livre expressão da constituição norte-americana, identificando-se como obra de sátira. Os processos garantiram uma gigantesca cobertura da imprensa.⁸

Projeto Re-Code (<http://www.re-code.com/>): também funcionando a partir de um website, consistia na criação de um sistema que gerava códigos de barra para produtos de supermercado. O usuário do site poderia gerar seus próprios códigos, imprimi-los em papel adesivo, leva-los ao supermercado e cola-los nos produtos desejados.

O vídeo institucional (<http://www.re-code.com/videos/ricobarco.mov>) ensina, por exemplo, a selecionar produtos similares de marcas diferentes – imprime-se o código do produto mais barato, cola-se o mesmo no produto mais caro – para não ocasionar problemas no caixa de pagamento.

Também objeto de grande cobertura na mídia, o website foi processado pela rede de supermercados Wal Mart e está temporariamente desativado.

Projeto Arquimedes: apenas como exemplo de um projeto mais simples, o Projeto Arquimedes consistia na compra de centenas de espelhos de mão para serem

⁸ Ver mais detalhes em <http://www.rtmark.com/voteauction.html>

distribuídos durante os protestos de rua em Gênova, por ocasião da reunião do G8 em junho de 2001.

De acordo com a história grega, o filósofo Arquimedes propôs a utilização de gigantescos espelhos para refletir a luz do sol contra os navios romanos que planejavam invadir a cidade de Siracusa. Da mesma forma, os ativistas nas ruas de Gênova utilizariam os espelhos para refletir o sol contra helicópteros, tanques, carros da polícia e nos olhos dos próprios policiais.⁹

Organização pela Libertação da Barbie: um dos primeiros projetos realizados a partir dos fundos da RTMark, em 1993. Os ativistas compravam bonecas Barbie e bonecos G.I. Joe (no Brasil, *Comandos em Ação*) com chips de voz e trocavam os chips entre os bonecos. Desta forma, a boneca Barbie diria frases como “a vingança é minha!” e os bonecos G.I. Joe falariam “vamos planejar nosso lindo casamento!”. Os bonecos “cirurgicamente alterados” eram colocados de volta nas prateleiras das lojas.

Com isso, a organização propunha, de forma inovadora, uma discussão dos estereótipos de gênero que os brinquedos infantis estavam passando às crianças.¹⁰

Processos de sugestão e discussão

A dinâmica de apresentação e discussão de projetos nos fóruns da RTMark funciona da seguinte forma:

1) Qualquer pessoa cadastrada no site pode apresentar um projeto através do link “suggest a project” (<http://rtmark.com/f/get/funds.html>)¹¹.

2) Ao fazer sua sugestão, o usuário deve apontar se o projeto necessita de financiamento (*funds*) e/ou trabalhadores voluntários (*workers*) para sua realização.

3) O projeto deve entrar em um ou mais dos fundos de investimento (*Mutual Funds*), que agrupam os projetos por características similares. No momento, existem 18 fundos: Guerra, Fronteiras (relacionado à globalização), Lei Corporativa, Mercados Alternativos (relacionado a homossexualismo), Meio-Ambiente, Trabalho, França (há muitos projetos criados especificamente para realização na França), Educação, Saúde,

⁹ Ver mais detalhes em <http://www.rtmark.com/archimedes.html>

¹⁰ Ver mais detalhes em <http://www.rtmark.com/blo.html>

¹¹ No momento de redação deste trabalho, esta parte do website encontra-se desativada por motivos não-explicados. Aparentemente, todo o website está passando por problemas, pois outras seções – como a de discussão de projetos – estão desativadas.

Mídia, Propriedade Intelectual, Propriedade Biológica, Comunicações Emergentes (relacionado a novas tecnologias, como telefonia móvel e redes sem fio), Rede, “*Magic Christian*” (ações mais “bizarras”, por referência ao filme *Um Beatle no Paraíso*), Alto Risco e *QuickTips* (para realização imediata).

4) Feita a sugestão do projeto, este recebe uma identificação de 4 caracteres, como na bolsa de valores (a ironia e a subversão de elementos do mundo corporativo perpassa o website).

5) Para cada projeto é aberto, então, um fórum de discussão próprio, onde qualquer membro cadastrado pode apresentar comentários ou oferecer-se como voluntário.

6) As doações financeiras, que são feitas para cada projeto específico, são realizadas por e-mail em contato com os administradores de cada fundo de investimento.

Análise

Em meados do mês de novembro de 2004, o RTMark.com começou a apresentar problemas de acesso. Apesar do restante do website estar aparentemente ativo, os fóruns de discussão de cada projeto não estão acessíveis.

Meu processo de pesquisa teve início antes deste problema apresentar-se. Capturei no dia 7 de novembro as mensagens que compunham a discussão sobre a proposta que tinha a sigla MP3S. Apresento abaixo a proposta e os cinco comentários que ela gerou.

PROPOSTA MP3S

Criar um website que permita aos usuários selecionar de uma lista de MP3 aquelas que eles “roubaram”. O formulário deve permitir que eles escrevam um pequeno pedido de desculpas à RIAA [Associação de Indústrias Fonográficas da América] com seu nome e e-mail; o sistema então deverá anexar os arquivos de MP3 selecionados e mandá-los com o pedido de desculpas.

(usuário anônimo)

Assunto: Usuários do Napster Devem Arrepende-se

Os usuários do Napster deveriam arrepende-se por baixar ilegalmente mp3s retornando os arquivos às empresas fonográficas via e-mail. A natureza da mensagem de e-mail deveria ser de súplica pelo perdão.

(usuário anônimo)

Assunto: Re: Usuários do Napster...

Vejam <http://www.sendthemback.org/> [mande-as de volta.org]

(usuário Derek P. Moore)

Criar um website que contenha um catálogo de centenas de MP3. Não para permitir que as pessoas baixem as MP3s, mas apenas para que elas selecionem quais MP3 “roubaram”. Permita que elas escrevam um pequeno pedido de desculpas à RIAA com seu nome, e-mail etc. Quando acabarem o formulário, eles clicam “enviar” e o servidor faz todo trabalho de anexar os arquivos MP3 de seu próprio catálogo e enviá-los por e-mail à RIAA como se estivesse mandando de volta suas MP3 “roubadas”.

(usuário Fx99)

Ok! Organizem isso nas listas de chats sobre o Napster!

(usuário Weirdo)

Assunto: ótima idéia

Que ótima idéia. Se bastante gente usar, as caixas de correio eletrônico deles ficarão rapidamente lotadas com sua própria propriedade intelectual, tornando os sistemas de e-mail deles inúteis.

A discussão sobre MP3S representa bem, pela minha observação precedente do website, o tipo e o nível de discussão que os projetos recebem. Em torno de 10% dos projetos recebem algum comentário. E as mensagens geralmente são poucas, em torno de 5 ou 6. A proposta MP3s reúne diferentes tipos de comentários que se repetem em outros projetos.

A proposta em si já é carregada de ironia e entra na discussão de utilizar os elementos de uma corporação contra a própria. É amplamente divulgada na mídia, há anos, a batalha judicial entre as indústrias fonográficas e os mecanismos de troca de arquivos, como o Napster, através dos quais usuários da Internet compartilham músicas (no formato MP3) de forma ilegal. A proposta, então, é de ironizar esta batalha e ao mesmo tempo causar danos às indústrias fonográficas (enviar simultaneamente uma grande quantidade de arquivos que emperrariam os sistemas online das empresas).

O primeiro comentário visa aumentar o nível de ironia. Sugere que o pedido de desculpas deve demonstrar o “grande arrependimento” do usuário por agir ilegalmente.

O segundo comentário, aparentemente¹², faz referência a um projeto similar ou já à finalização da proposta MP3S. Mesmo se o segundo caso for verdadeiro, a discussão continua para aperfeiçoar o projeto.

O terceiro comentário faz uma proposta operacional bastante interessante. Enquanto a proposta inicial era de criação de um sistema que buscasse os arquivos no mp3 no computador do usuário (um processo bastante demorado, pois os arquivos são grandes), a sugestão é de que o próprio site já tenha estes arquivos. Desta forma,

¹² O website mencionado, <http://www.sendthemback.org/>, não estava funcionando durante a pesquisa.

diminui-se o tempo que o usuário levaria para utilizar o sistema, e provavelmente aumenta-se o número de usuários dispostos a utilizá-lo.

O quarto comentário também aponta uma questão operacional: a divulgação do projeto seria feita de forma ideal através das listas de discussão e conversa sobre o Napster, freqüentadas por um público potencialmente interessado em participar do projeto.

Por fim, o quinto e último comentário faz considerações óbvias, explicitando os propósitos do projeto e parabenizando os criadores pela idéia.

Até o momento, não tenho conhecimento da aplicação desta proposta.

Considerações finais

Levanto três considerações, preliminares, sobre os processos de discussão dos projetos apresentados no RTMark.com e sobre a importância do website para o ativismo contemporâneo.

- O propósito das discussões é de *aperfeiçoamento* das propostas. Os comentadores não se apresentam como um júri que vai julgar a pertinência de cada projeto, mas sim como analistas interessados em propor recortes ou adições que tornem o projeto mais operacionalizável e/ou que aumentem seu potencial de protesto. É um processo colaborativo, de críticas construtivas, e aparentemente auto-regulado.

- Pelo que foi observado, grande parte das discussões se dá fora dos fóruns. O próprio sistema de financiamento é feito de forma privativa, e não há exposição dos motivos de cada financiador. Porém, entende-se que o website é um *ponto intermediário* das ações – não é nem seu ponto de partida (a idéia criada por um indivíduo ou um grupo) nem seu ponto final (a realização efetiva). Por isto, não é possível acompanhar através todo o desenvolvimento de uma ação.

- A função do fórum é de *colaboração* e *fomento* do ativismo. Existe um movimento em nível mundial – o chamado “movimento de resistência global” – voltado para desenvolver táticas de protesto e apresentar alternativas ao sistema sócio-político-econômico existente. Há centenas de grupos espalhados pelo mundo agindo separadamente, mas com o mesmo intento. O fórum do RTMark.com serve como um dos “pontos de encontro” destes grupos, onde ocorre uma discussão coletiva e unificada do estado-da-arte em táticas de protesto. É um passo de grande importância para o

movimento como um todo, e ao mesmo tempo um exemplo do espírito de colaboração e horizontalidade que está no bojo das propostas sociais destes ativistas.

Companhamento de produção

*Érico Gonçalves de
Assis*

Trabalho de avaliação final da disciplina
de **Produção** Midiática, ministrada
pelo professor Dr. Ronaldo Henn no
segundo semestre de
2004.

Programa de Pós-Graduação em Ciências
de Comunicação / Universidade do Vale do
Rio Sinos / São Leopoldo-
RS

Apresentado em novembro de
2004.

O presente trabalho tem por intento analisar os processos de produção que ocorrem a partir das ferramentas do website RTMark.com (<http://www.rtmark.com>). Este website é um espaço para ativistas, especialmente do viés anti-corporativo, reunirem-se para propor e discutir idéias de ação direta e protesto. Esta discussão é feita a partir de uma ferramenta que registra, armazena e cria os fóruns de discussão (*message*

boards)
específicos para cada idéia
apresentada.

Dentro da proposta de trabalho final para a disciplina de Produção Midiática –
o
acompanhamento das pistas ou rastros do processo de produção de alguma
realização
midiática, com base na Crítica Genética (SALLES, 2000) –, minha intenção é
encontrar
tais registros de processo na criação das ações apresentadas no website RTMark.
com.

Também é uma proposta, preliminar, de estudo da função deste website. Em
que
ele colabora para as ações de protesto? Que caminho costumam tomar as discussões
nos
fóruns e em que sentido estas discussões desenvolvem as idéias? Como esse processo
de
produção conjunta afeta o resultado final, a ação
concreta?

Não era meu intento encontrar as respostas para todas estas perguntas ao
longo
do trabalho, mas sim iniciar uma problematização. Fica a sugestão de um objeto
de
pesquisa bastante rico e que merece aprofundamento
maior.

Histórico

O website da RTMark ¹ surgiu a partir de um coletivo de ativistas formado em
1991, que se apresentava como um fundo de financiamento de projetos de *culture*
jamming ², tal como um órgão filantrópico para as artes. Em 1993, o grupo fez
sua
transição para a web com um fórum de discussão. O fórum foi sofrendo alterações
até
transformar-se no website que se apresenta hoje em <http://www.rtmark.com/>.

O grupo reúne aproximadamente cinco pessoas, e tem como seu líder ou
face
mais aparente o ativista Frank Guerrero (nome fictício). Guerrero, em entrevista
a
MYERSON (2002), expõe sua visão do

RTMark:

é um sistema sério que almeja, através de uma combinação de ações reais e teatrais e talvez enfraquecer o papel que as corporações têm tomado ao suplantarem processos democráticos ou sociais de governo. (...) Estamos aqui para desestabilizar o sistema de tal forma que as pessoas tenham um pouco de entretenimento e ao mesmo tempo esses projetos façam a elas algumas questões. ³

Na declaração, já se percebe uma tendência da organização para privilegiar ações diretas com algum elemento cômico ou de brincadeira. Como será visto nos exemplos à frente, há um forte viés para a ironia e a subversão.

Este viés já se apresenta também pelo fato da RTMark ser uma organização anti-

corporativa registrada como corporação. “Nossos investidores estão protegidos pela mesma regra de responsabilidade limitada que permite aos membros de outras corporações não ter responsabilidade pelo que suas empresas fazem de errado”

Guerrero (em entrevista a SMITH, 1999). “O objetivo máximo da RTMark é ser

⁴
1
expõe

¹ Utilizarei o nome “RTMark” ao longo do trabalho, embora o nome original do grupo seja “@rtmark”. A pronúncia correta do nome é “art mark”, o que remete a “mercado de arte”, já uma referência às ações de protesto como expressão artística. Ao mesmo tempo, “RTMark” é uma alusão à “registered trademark”, ou “marca

registrada”, ou “bagunçar com a cultura”, é uma tática de protesto relacionada à confusão de sinais – apropriando-se de elementos de uma marca, de uma pessoa, de uma mentalidade, o ativista subverte elementos contra seus próprios possuidores. O exemplo mais comum de *culture jamming* é o *atque* para retrabalhar seu sentido. Ver DERY,

³ 1993. Introdução minha de “It is a serious system that means, through a combination of real actions theater, to criticize and hopefully undermine the role that corporations are taking in *deplanning* or social processes of government (...) We’re there to destabilize the system in such a way people might get a little entertainment and at the same time have those projects ask a few questions”

⁴ 1993. Introdução minha de “Our investors are protected by the same limited-liability status that lets officers of other corporations avoid responsibility for their companies’ wrongdoing.”

processada, e usar este caso para levar o direito corporativo a julgamento. E ser condenada!” ⁵ (idem).

O segundo viés importante da RTMark é sua preocupação com a

repercussão
 midiática de suas ações. Como será a visto a seguir, é parte importante da discussão
 dos
 projetos descobrir como estes podem ser desenvolvidos de forma a alcançar máxima
 exposição no
 jornalismo.

A atenção dos meios é o principal fator que empregamos para avaliar o êxito de
 projetos, mas há outros. Às vezes, um projeto pode ter muito êxito mesmo
 alcançando pouco, se tiver uma certa ressonância poética. O aspecto poético é
 importante, pois produz dividendos culturais. ⁶ (entrevista a VICENTE,
 2000)

Este viés aparece com proeminência no pôster produzido pela organização
 (que
 pode ser visto em <http://www.rtmk.com/tactics.html>), o qual apresenta a RTMark
 e
 incita a criatividade dos leitores para o desenvolvimento de projetos. Um de seus
 textos
 busca mostrar, de forma resumida, qual deve ser o processo
 criativo:

Encontre um alvo (alguma corporação fazendo o que não devia) e pense em algo
 que
 deixaria este alvo irritado – algo que também seja
 sagaz. Então
 sugira algumas idéias, imagine o alvo perdendo o controle ou agindo de forma estúpida.
 Que faria ele agir assim?
 (DICA: jornalistas adoram histórias divertidas, como todo mundo. Quanto
 mais
 engraçada, mais chance sua história terá de ganhar
 o prêmio)
 The purpose
 do
 jornalistas. ⁷

Cada projeto importante realizado através da RTMark ganha um espaço
 próprio
 no site (<http://www.rtmk.com/history.html>), onde é dada proeminência a
 todas
 citações que o projeto recebeu na grande
 imprensa.

⁵ Tradução minha de “*The ultimate goal of RTMark is to be sued, and to use that case to put
 rights on material. And lose.*” (grifo do autor da

⁶ Tradução minha de “*La atención de los medios es el principal factor que empleamos para evaluar el
 éxito de nuestros proyectos, pero ha otros. A veces, un proyecto puede tener mucho éxito aunque llegue

(usuário

Assunto): ótima

ideia ótima. Se bastante gente usar, as caixas de correio eletrônico deles ficarão rapidamente lotadas com sua própria propriedade intelectual, tornando os sistemas de e-mail deles inúteis.

A discussão sobre MP3S representa bem, pela minha observação precedente do website, o tipo e o nível de discussão que os projetos recebem. Em torno de 10% dos projetos recebem algum comentário. E as mensagens geralmente são poucas, em torno de 5 ou 6. A proposta MP3s reúne diferentes tipos de comentários que se repetem em outros projetos.

A proposta em si já é carregada de ironia e entra na discussão de utilizar os elementos de uma corporação contra a própria. É amplamente divulgada na mídia, há anos, a batalha judicial entre as indústrias fonográficas e os mecanismos de troca de arquivos, como o Napster, através dos quais usuários da Internet compartilham músicas (no formato MP3) de forma ilegal. A proposta, então, é de ironizar esta batalha e ao mesmo tempo causar danos às indústrias fonográficas (enviar simultaneamente uma grande quantidade de arquivos que emperrariam os sistemas online das empresas).

O primeiro comentário visa aumentar o nível de ironia. Sugere que o pedido de desculpas deve demonstrar o “grande arrependimento” do usuário por agir ilegalmente.

O segundo comentário, aparentemente ¹², faz referência a um projeto similar já à finalização da proposta MP3S. Mesmo se o segundo caso ^{OU} for verdadeiro, a discussão continua para aperfeiçoar o projeto.

O terceiro comentário faz uma proposta operacional bastante interessante. Enquanto a proposta inicial era de criação de um sistema que buscasse os arquivos mp3 no computador do usuário (um processo bastante demorado, pois os arquivos são grandes), a sugestão é de que o próprio site já tenha estes arquivos. Desta forma,

¹² O website mencionado, <http://www.sendthemback.org/>, não estava funcionando durante a pesquisa.

diminui-se o tempo que o usuário levaria para utilizar o sistema, e provavelmente aumenta-se o número de usuários dispostos a utilizá-lo.

O quarto comentário também aponta uma questão operacional: a divulgação do projeto seria feita de forma ideal através das listas de discussão e conversa sobre o Napster, freqüentadas por um público potencialmente interessado em participar do projeto.

Por fim, o quinto e último comentário faz considerações óbvias, explicitando os propósitos do projeto e parabenizando os criadores pela idéia.

Até o momento, não tenho conhecimento da aplicação desta proposta.

Considerações finais

Levanto três considerações, preliminares, sobre os processos de discussão dos projetos apresentados no RTMark.com e sobre a importância do website para o ativismo contemporâneo.

- O propósito das discussões é de *aperfeiçoamento* das propostas. Os comentadores não se apresentam como um júri que vai julgar a pertinência de cada projeto, mas sim como analistas interessados em propor recortes ou adições que tornem o projeto mais operacionalizável e/ou que aumentem seu potencial de protesto. É um processo colaborativo, de críticas construtivas, e aparentemente auto-regulado.

- Pelo que foi observado, grande parte das discussões se dá fora dos fóruns. O próprio sistema de financiamento é feito de forma privativa, e não há exposição dos motivos de cada financiador. Porém, entende-se que o website é um *ponto intermediário* das ações – não é nem seu ponto de partida (a idéia criada por um indivíduo ou um grupo) nem seu ponto final (a realização efetiva). Por isto, não é possível acompanhar através todo o desenvolvimento de uma ação.

- A função do fórum é de *colaboração e fomento* do ativismo. Existe um movimento em nível mundial – o chamado “movimento de resistência global” – voltado para desenvolver táticas de protesto e apresentar alternativas ao sistema sócio-político-econômico existente. Há centenas de grupos espalhados pelo mundo agindo separadamente, mas com o mesmo intento. O fórum do RTMark.com serve como um dos “pontos de encontro” destes grupos, onde ocorre uma discussão coletiva e unificada do estado-da-arte em táticas de protesto. É um passo de grande importância para

movimento como um todo, e ao mesmo tempo um exemplo do espírito de colaboração e horizontalidade que está no bojo das propostas sociais destes ativistas.

San Mateo County Elections Official Seeks State Investigation of Internet Vote-Buying Auction Site

REDWOOD CITY, CA

10/16/00 - Warren Slocum, San Mateo County's Chief Elections Officer, today requested the California Attorney General, Bill Lockyer, to investigate www.voteauction.com, an internet site that purports to facilitate the buying and selling of votes throughout the United States and California.

Slocum explained that his request was grounded on the cornerstone principle that trading in votes for money undermines our political system and weakens the integrity of the entire elections process. "It is an insult to all Americans and perverts our system of free and fair elections," Slocum stated.

Slocum stated that vote buying and vote selling are expressly prohibited by the California Elections Code sections 18500, 18521, 18522, and 18562, that classify such activities as serious felony crimes, carrying a maximum of three years in state prison for each violation. California Penal Code provisions relating to criminal conspiracy also may apply. Additionally, the site may be in violation of federal law, namely, Title 18, section 597, of the United States Code.

Slocum reports that Secretary of State Bill Jones' on-going investigation of the site has already resulted in the issuance of a "cease and desist" letter to the owner of the site, and other steps aimed at terminating the operation of the site and the use of its name. Secretary Jones has also asked the U.S. Attorney General to cooperate in his enforcement efforts. California is the first state to take such action against the site.

Slocum has urged Secretary Jones to include the California's attorney general in the investigation and shutdown effort. Further, he suggested that representatives of the enforcing agencies post a comment on the site's "bulletin/discussion board" in order to notify potential California users that this activity violates state law.

As of October 16, Slocum's review of the site revealed an alarming 1,836 posted offers from California voters to sell their votes to the highest bidder, and even a tool allowing corporations to buy blocs of votes.

"Even though this site might prove, in the end, to be a huge publicity stunt, even the appearance that votes are being bought and sold should be of concern to all citizens," Slocum said.

Slocum advised all voters who are approached regarding vote buying or selling or voter coercion to contact the Secretary of State's Office at 1-800-345-VOTE.

BANNERS IN DE BAN

De banner, het grafische balkje waarmee adverteerders zich op sites presenteren, verliest dramatisch aan effectiviteit.

Klikte voorheen circa 2 tot 3 procent van de bezoekers nog wel eens op een banner, tegenwoordig is dat aandeel gezakt naar minder dan een half procent. De ontwikkeling doet de vraag rijzen of publicaties die hun inkomsten louter uit advertenties halen, wat neerkomt op het gros van de internet-sites, ooit in staat zullen zijn voldoende omzet te halen. Banners zorgen thans voor zestig procent van alle advertentie-inkomsten op het net. Deskundigen voorzien echter een verschuiving naar andersoortige reclames die meer overeenkomsten vertonen met de direct mail uit de gewone wereld. Maar dat staat weer haaks op de toenemende bezorgdheid om privacy.

In Nederland kwakkelde de banner-advertentiemarkt ondertussen. Portal Ilse verkoopt slechts twintig procent van de capaciteit aan een relatief gering aantal adverteerders. Een populaire jongerensite als TMF kent niet meer dan een handvol adverteerders en de homepages van providers blijken inmiddels vrijwel volledig ontdaan te zijn van advertenties.

De nieuwste trend is de onzichtbare samenvoeging van reclame en redactie. Zo schotelt provider Planet Internet kinderen een 'informatief' spelletje over boerderijdieren voor. Nergens blijkt dat het gaat om een promotie van het Produktschap Vee, Vlees en Eieren, een belangenorganisatie van de bio-industrie. Zelfs het meest commerciële televisiestation zou daar niet mee weg komen.

de Volkskrant: Amper advertenties op populaire sites

DE WEEK IN LINKS

Een Amerikaanse [oplichter](#) heeft een half miljoen vergaard door een vervalst persbericht over tegenvallende resultaten van een bedrijf te sturen aan een internet-persbureau. Internet Wire nam het bericht ongecontroleerd over en veroorzaakte zo een dramatische koersval van het aandeel Emulex. De FBI heeft de man, een ex-medewerker van Internet Wire, gearresteerd. +++ In Kroatie wordt dinsdag het eerste [internet-concert](#) gegeven, verdeeld over drie steden. De lokale popster Gibonni treedt op in Rijeka, een gitarist neemt deel vanuit Zagreb en een mannelijke a cappella groep levert van uit Split een bijdrage. Het evenement is [live](#) te volgen. ++
+ De Amerikaanse versie van Airmiles zet de [spaarmijlen](#) om in virtueel geld dat online bij meer dan honderd bedrijven besteed kan worden. +++ De junta van Burma tracht met een online [lastercampagne](#) de democratische oppositie in diskrediet te brengen. +++ Daar gaan we weer: Microsoft brengt een nieuwe [versie](#) van de Internet Explorer uit die betere concurrentie met America Online moet leveren door diensten als Hotmail en Instant Messenger te integreren. Soortgelijke integratie leverde het bedrijf een aanklacht van justitie op. +++ Afrikaanse [oplichters](#) maken via e-mail Singapore onveilig. In berichten worden extreem aantrekkelijke zakelijke voorstellen gedaan die stevast uitmonden in een geplunderde bankrekening. Vroeger opereerden de bendes via fax

NIEUWE LULLETJES

"Wij (mannen) winkelen snel, doelgericht en efficiënt. Vrouwen hebben daar veel meer moeite mee."

In een wanhoopspoging het onfortuinlijke tij te keren zoekt de Nederlandse winkel Shop.nl - van onder meer Bernhard van Oranje jr. - toevlucht tot onverholen seksisme. Op [zowinkelenmannen.nl](#).

Bitse strijd om download-record

Twee koninginnen van het net vechten een gigabyte-strijd uit over de titel 'meest gedownloade vrouw van het net'. Tot nu kwam die titel toe aan de keurige actrice Cindy Margolis. Haar positie is echter aangevochten door de porno-ster Danni Ashe, een van de eersten die zelfgemaakte porno via internet begon te verspreiden. Het Guinness Book of World Records heeft de titel aan Ashe toegekend omdat ze minimaal 840 miljoen keer gedownload is, ongeveer tien keer zoveel als Margolis. Zij bestrijdt op haar beurt weer de claim van Ashe.

CNN: Claim of 'Most Downloaded Woman' heats up

HET ZWARTE GAT

de 'nieuwe economie' in praktijk

Van iedere 100 dollar die Amerikaanse consumenten in de detailhandel [besteden](#), gaat 68 cent via internet. Veel beter lijkt het niet te worden: Het percentage internet was in het tweede kwartaal van dit jaar gelijk aan het eerste. +++ Het Britse e-zine The Register vraagt zich af in hoeverre de [internet-economie](#) een grote nepperij is. Aanleiding is de praktijk om met behulp van software de 'kijkcijfers' voor advertenties op te drijven. +++ Het [verkopen](#) van auto's via internet werkt niet, constateert de Bovag. +++ De Nederlandse reissite Clicketing heeft al het personeel (20 medewerkers) [ontslagen](#) of laten vertrekken. Alleen de oprichters zelf zijn er nog werkzaam met nog immer ronkende functiebenamingen als Chief Executive Officer. +++ Het Britse filiaal van Worldonline [verliest](#) op sommige

vanuit Nigeria, tegenwoordig ook vanuit andere landen. +++ De eerste kraak van een mobiele telefoon is een feit. Via [SMS-berichten](#) zou het mogelijk zijn de telefoon van Nokia te laten crashen. +++ MP3Cafe, een populair IRC-kanaal voor het illegaal uitwisselen van muziek is [gesloten](#) na dreigementen van de muziekindustrie. Die ontkent overigens en zegt dat een particulier mogelijk in actie is gekomen. CNet constateert dat steeds meer gebruikers partij kiezen voor het standpunt van de muziekindustrie en op eigen houtje actie voeren tegen piraterij. +++ Mohammed Al Fayed, de miljardair wiens zoon tegelijk met prinses Diana verongelukte, heeft een website [gelanceerd](#) waarop hij zijn theorie uiteen zet dat er sprake was van een complot. +++ Voetballegende Pele opent een eigen [website](#). +++

Wetenschappers zijn er in geslaagd een [robot](#) te maken die zonder hulp van mensen in staat is andere robots te bouwen. ++ + Ongeduldige Duitse [fans](#) van Harry Potter die niet tot het najaar op de Duitse uitgave willen wachten zijn zelf maar een vertaling van het boek gaan maken. De uitgever is woest dat het vrijwilligerswerk [online](#) wordt gezet, er dreigt een boete van een half miljoen. +++ Europeanen kijken [minder](#) tv en lezen minder van papier als gevolg van internet-gebruik, wijst een enquête uit. Veel gesurfd wordt er trouwens ook niet, de meeste gebruikers bezoeken steeds dezelfde sites. + + MP3.com gaat gebruikers [spammen](#) om ze over te halen muziek af te nemen van de platenmaatschappijen. Volgende week bepaalt de rechter hoeveel schadevergoeding de site moet

gebruikers meer dan 3500 gulden per maand omdat ze gigantische hoeveelheden dataverkeer consumeren. ++ 'Content', het lege begrip dat staat voor inhoud, vormt weliswaar de ruggegraat van internet maar [levert](#) geen ene moer op. Zelfs de netversie van de Wall Street Journal, met een half miljoen betalende lezers, lijdt verlies. +++ Voter.com, een site die naam maakte met de verslaggeving van de Amerikaanse partijconventies, [ontslaat](#) 15 mensen. Voor het bedrijf werkt onder meer Carl Bernstein, de journalist die samen met Bob Woodward geschiedenis schreef door de Watergate-affaire te onthullen. +++ Onderzoeksbureau Forrester slaat de verwachting dat mobiele communicatie een [overheersende](#) rol gaat spelen in Europese e-commerce de grond in. Het zou om niet meer dan drie procent gaan. ++ DreamWorks, de filmstudio van Steven Spielberg, [verkoopt](#) zijn internet-dienst nog voor deze van start is gegaan. Online entertainment, tot voor kort gezien als winstmaker, lijdt zwaar onder tegenvallende verwachtingen. +++ Gratis providers hebben een [probleem](#) met het werven van advertenties, leert een onderzoek. De abonnees komen teveel uit economisch oninteressante - want weinig vermogende - doelgroepen. +++ Steeds meer bedrijven dumpen het achtervoegsel .com om [stigmatisering](#) te voorkomen. De toevoeging .net wint daarentegen aan populariteit, het zou staan voor een bredere zakelijke benadering. +++ De Amerikaanse beurswaakhond SEC gaat de kwakkelende site Tutor.net [vervolgen](#). De leiding van het bedrijf misleidde investeerders met kletspraatjes over belangrijke contracten die in werkelijkheid nooit gesloten werden. +++ Online apotheek Planetrx [ontslaat](#) 15 procent van de medewerkers, oftewel 40 mensen. ++ De Britse telefoonmaatschappij Orange heeft 40 medewerkers [ontslagen](#) wegens het verspreiden en bekijken van online porno. +++ Een topman van Altavista is [afgetreden](#) nadat journalisten ontdekten dat een van de diensten waar het bedrijf mee pronkte - gratis internet-toegang - in werkelijkheid helemaal niet bleek te

betalen aan de muziekindustrie wegens het maken van illegale kopieën. +++ Napster is een bedrijf dat gestolen goederen heelt, [constateert](#) een columnist van de Boston Globe in reactie op de protesten van een aantal technologische belangengroepen tegen het rechterlijk vonnis dat de mp3-ruilbeurs verbiedt. De protesteersers zijn bang dat het verbod implicaties heeft voor volkomen legale toepassingen van de gebruikte techniek. +++ Ruim een derde van de [universiteiten](#) in de VS weert Napster van de eigen netwerken. Oneigenlijk gebruik van datacapaciteit en angst voor juridische maatregelen zijn de belangrijkste motieven. +++ De Amerikaanse overheid dacht het wantrouwen onder UFO-fanaten weg te kunnen nemen door [onderzoekresultaten](#) naar buitenaardse bezoeken online vrij te geven. Conclusie is steeds dat er van bezoeken geen sprake is. De UFO-fanaten zijn echter niet zo makkelijk te overtuigen: "Als er niets is, waarom werden er dan onderzoeken gedaan? Zie je wel!" Zucht. +++ Een Amerikaanse [krant](#) heeft alle foto's die een fotograaf maakte van - vermoedelijke - plaatselijke drugshandel [online](#) gezet. De redactie wil zo voorkomen dat justitie een dagvaarding uitbrengt om het beeldmateriaal in handen te krijgen. +++ Weg met de democratie! Een site met de naam voteauction.com veilt tegen [betaling](#) de stemmen van Amerikaanse kiezers. +++ Dieper linken: Na de Nederlandse krant news.nl gaan ook Amerikaanse media over tot het massaal uitventen van [streepjescode-scannertjes](#) die de gebruiker naar aanvullende info op het web moeten voeren. +++ Na lang wachten [lanceert](#) Apple

bestaan. +++ Een topman van de financiële site thestreet.com houdt het na acht maanden alweer voor [gezien](#). De carrierestap bevestigt het beeld dat de top in de nieuwe economie even loyaal is aan hun eigen bedrijven als de gemiddelde uitzendkracht. +++ De president van het [superhippe](#) Razorfish hield het slechts drie maanden uit. +++ Augustus was dan ook de maand van het afscheid voor de [leidinggevend](#)en bij internet-bedrijven. Een record-aantal stapte op, meer dan in enig andere bedrijfssector. +++ In Nederland vertrokken onder meer de [hoofredacteur](#) van Zonnet, en de [directeuren](#) van de advertentiebureaus 24/7 en Doubleclick. +++ Tel uit je winst: MotherNature.com tracht de ondergang te voorkomen door zich te [verkopen](#) voor 1 gulden 85 per aandeel. Dat is beduidend minder dan de ruim dertig gulden die beleggers er in december voor neertelden. +++ Het asociale gedrag van lieden die bij [internetbedrijven](#) werken heeft tot een opstand onder bewoners in San Francisco, de internet-hoofdstad van de wereld, geleid. Steeds minder verhuurders zijn bereid hen van woonruimte voorzien. +++ Breedband, de jongste hype, lijkt alweer in te storten. De snelheid blijkt vooralsnog alleen in de [verkooppraatjes](#) te zitten.

DE REUS WANKELT

Amazon, het lichtend voorbeeld voor iedere 'nieuwe economie'-gelovige, komt in de Verenigde Staten steeds meer onder vuur te liggen en het zijn niet alleen meer de doorgewinterde skeptici die zich afvragen of het bedrijf gaat overleven.

Knowledge at Wharton, een tweewekelijkse uitgave van de gelijknamige business school aan de universiteit van Pennsylvania (de oudste van het land), gaat dieper in op de problemen waar de koning onder de internetbedrijven mee kampt. Het klantenbestand groeit weliswaar maar de klanten lopen net zo gemakkelijk weer weg, met het stijgen van de omzet nemen ook de kosten bijna evenredig toe (wat winst onmogelijk maakt) en het bedrijf loopt het risico dat door de voortdurende uitbreiding van het assortiment - auto's

deze maand eindelijk een nieuwe versie van het besturingssysteem: Mac OS X. Het zou crash-bestendig zijn. ++
+ Een bedrijf dat via e-mail [geldprijzen](#) van 10.000 dollar wilde uitdelen, raakte de prijzen niet kwijt. De winnaars hebben de mail vermoedelijk als 'spam' genegeerd. +++ Duitsland wil draconische [maatregelen](#) nemen tegen extreem-rechtse sites middels hoge boetes en bezoekverboden. +++ Oeps... Scholieren van de Lake Region High School die hun jaarboek de pakkende titel [www.LR2000.com](#) gaven, komen er nu achter dat het adres toebehoort aan een porno-site. +++ MP65+: The Doobie Brothers, een band die het goed deed in de jaren zeventig, zet 15 nieuwe [nummers](#) online. Gratis. +++ Word.com, een van de oudste experimentele media op het net, sluit [opnieuw](#) haar deuren. Eigenaar Zapata ziet geen mogelijkheden de site rendabel te maken. Zapata nam de site in 1998 over van Icon toen deze de site sloot wegens dezelfde redenen.

.nl: De ANWB publiceert online een lijst met [tankstations](#) die brandstof tegen lage prijzen verkopen. De lijst wordt samengesteld met hulp van het publiek. +++ Nederlandse bedrijven die online financiële adviezen geven, leveren broddelwerk [concludeert](#) de Consumentenbond na een onderzoek. Gebrek aan openheid en aan garanties aangaande de onafhankelijkheid zijn enkele van de kritiekpunten. +++ Webcams moet het afstandenprobleem op Zeeuwse scholen [oplossen](#). Via de camera's kunnen pedagogiedocenten in Breda de lespraktijken van hun studenten die stage lopen op de eilanden

bijvoorbeeld - uiteindelijk niemand meer weet wat het nu eigenlijk verkoopt. Bovendien meldde Amazon eind juli een stagnatie in de verkoopcijfers. Voeg daarbij dat Amazon geen onaantastbare solide positie bezit, het is weliswaar de bekendste online boekhandel maar dat hoeft niemand er van te weerhouden net zo'n boekhandel te beginnen. Dat is een belangrijk verschil met bijvoorbeeld stadscentra waar goede verkooppunten schaars en vaak al bezet zijn. Zoekmachines die prijzen vergelijken en dus geen enkele boodschap hebben aan een merknaam ondergraven de klantentrouw verder.

Amazon scoort als internetwinkel weliswaar hoog omdat maar liefs tien procent van de bezoekers ook daadwerkelijk iets koopt maar vertaalt naar de gewone wereld is dat nog steeds een dramatisch slecht resultaat. En de mensen die nu en masse online komen, bevinden zich meestal in de minder koopkrachtige groepen. Op z'n gunstigst beschouwd is het succes van Amazon twijfelachtig, concludeert het verhaal.

Voor mensen die rotsvast in het bestaan en succes van de 'nieuwe economie' geloven, zoals de Nederlander Ruud Smeets topman van het bedrijf Newconomy, is er echter geen vuiltje aan de lucht. Begin juli verklaarde hij in een column in het 'nieuwe economie'-magazine Emmerce.nl het volste vertorwen te hebben in Amazon. "Ik spreek de sceptici over een jaartje of twee nog wel eens." Die afspraak staat dus.

Alle in NIEUWSGIDS opgenomen links zijn gratis op te vragen. Sommige sites vereisen echter dat de gebruiker zich eerst - eenmalig - registreert.

DE OMMEZWAAI

De zaak kranten.com heeft de afgelopen maanden vrijwel onopgemerkt een verrassende wending gekregen. [Smallzine](#) ontdekte dat een van de belangrijkste pleitbezorgers van kranten.com, NRC-journaliste Marie-Jose Klaver, haar mening de afgelopen maanden ongemerkt 180 graden bijdraaide. In een [reactie](#) bij Emmerce bestempelde ze in maart kranten.com-kloon Linknews nog als 'jatwerk'. Ook andere journalisten, waar onder die van Emmerce zelf uitten in maart bedenkingen bij Linknews: "Vanuit de optiek van de contentprovider zijn er echter wel

vorig jaar vast laten leggen, precies een dag nadat Tryllian een demoversie van hun product [lanceerde](#). Ook [iles.nl](#), een variant op [ilse.nl](#) is 'gekaapt' door kranten.com. Deze praktijk heet [typosquatting](#), men kaapt als het ware de tikfout. De Amerikaanse overheid wil dit verschijnsel wettelijk verbieden. Of kranten.com nog meer van dergelijke namen heeft geregistreerd is niet bekend. De advocaat van kranten.com, mr. Dirk Visser, keurde de praktijk in een [interview](#) met TROS Radio Online af.

Metatags-diefstal: Metatags zijn trefwoorden die op een site aangebracht worden om zoekmachines te helpen. Voor de gebruiker zijn de metatags niet zichtbaar, ze zitten in de broncode van pagina's verwerkt. Kranten.com gebruikt de merknamen van alle Nederlandse kranten als meta-tag, ook van kranten die niet bij de site geïndexeerd zijn, zoals Het Financieele Dagblad. Op de dochtersite [nieuwscenter.nl](#) worden ook merknamen als 'Planet Internet', 'MTV' en 'Radio538' gebruikt. Het doel is de argeloze zoeker te lokken. Misbruik van metatags wordt beschouwd als misleiding en inbreuk op het merkenrecht.

Tellermisbruik: Kranten.com spreekt voortdurend over het 'win-win'-principe. Maar praktiseert dat zelf niet. Het bedrijf maakt gebruik van de gratis tellers van [NedStat](#) en [Stats4all](#), bedrijven die voor hun succes afhankelijk zijn van zichtbaarheid van hun buttons. Tegen de Algemene Gebruiksvoorwaarden in maakt kranten.com de buttons onzichtbaar door ze tot precies 1 pixel te verkleinen.

bezwaren te bedenken tegen deze vorm van systematisch 'linken'. Headlines worden vaak als ruilmiddel gebruikt en zijn dus waardevol." De enige bijval voor Linknews kwam van Martin Klerx van kranten.com.

Nog geen half jaar later blijkt de stemming onder journalisten volledig omgeslagen. Klaver bijvoorbeeld schreef een vurig [pleidooi](#) voor kranten.com. Niks meer jatwerk: "Wie is opgegroeid met internet, vindt hyperlinken zo vanzelfsprekend dat hij een bedrijf dat daar tegen is, zal mijden."

Twee factoren lijken bij de media-omslag een rol te spelen: de antipathie (ook onder journalisten) tegen uitgever PCM en de actie van advocaat mr. Dirk Visser om de eis van PCM te bestempelen tot een verbod op 'deeplinken' en een 'bedreiging voor internet'. Vooral dat laatste maakte veel indruk en werd klakkeloos overgenomen. De overeenkomst met de Amerikaanse [berichtgeving](#) over Napster is groot. Ook daarbij bleek het beeld van David versus Goliath en de begrijpelijke afkeer van de muziekindustrie een grotere - emotionele - rol te spelen dan een zuivere beoordeling en een kritische kijk op het bewuste bedrijf. PCM zelf gaat in dit geval evenmin vrijuit. Voor de uitgever geldt dat ze niet alleen haar zaak op krakkemikkige wijze heeft bepleit maar vooral de kracht van internet als pr-instrument heeft onderschat. Dat laatste bevestigt het beeld dat de uitgever niet veel van internet snapt.

BANNERS IN DE BAN

De banner, het grafische balkje waarmee adverteerders zich op sites presenteren, verliest dramatisch aan effectiviteit.

Klikte voorheen circa 2 tot 3 procent van de bezoekers nog wel eens op een banner, tegenwoordig is dat aandeel gezakt naar minder dan een half procent. De ontwikkeling doet de vraag rijzen of publicaties die hun inkomsten louter uit advertenties halen, wat neerkomt op het gros van de internet-sites, ooit in staat zullen zijn voldoende omzet te halen. Banners zorgen thans voor zestig procent van alle advertentie-inkomsten op het net. Deskundigen voorzien echter een verschuiving naar andersoortige reclames die meer overeenkomsten vertonen met de direct mail uit de gewone wereld. Maar dat staat weer haaks op de toenemende bezorgdheid om privacy.

In Nederland kwakkelde de banner-advertentiemarkt ondertussen. Portal Ilse verkoopt slechts twintig procent van de capaciteit aan een relatief gering aantal adverteerders. Een populaire jongerensite als TMF kent niet meer dan een handvol adverteerders en de homepages van providers blijken inmiddels vrijwel volledig ontdaan te zijn van advertenties.

De nieuwste trend is de onzichtbare samenvoeging van reclame en redactie. Zo schotelt provider Planet Internet kinderen een 'informatief' spelletje over boerderijdieren voor. Nergens blijkt dat het gaat om een promotie van het Produktschap Vee, Vlees en Eieren, een belangenorganisatie van de bio-industrie. Zelfs het

DE WEEK IN LINKS

Een Amerikaanse [oplichter](#) heeft een half miljoen vergaard door een vervalst persbericht over tegenvallende resultaten van een bedrijf te sturen aan een internet-persbureau. NIEUWE LULLETJES

"Wij (mannen) winkelen snel, doelgericht en efficiënt. Vrouwen hebben daar veel meer moeite mee."

In een wanhoopspoging het onfortuinlijke tij te keren zoekt de Nederlandse winkel Shop.nl - van onder meer Bernhard van Oranje jr. - toevlucht tot onverholen seksisme. Op [zowinkelenmannen.nl](#).

Bitse strijd om download-record

Twee koninginnen van het net vechten een gigabyte-strijd uit over de titel 'meest gedownloade vrouw van het net'. Tot nu kwam die titel toe aan de keurige actrice Cindy Margolis. Haar positie is echter aangevochten door de porno-ster Danni Ashe, een van de eersten die zelfgemaakte porno via internet begon te verspreiden. Het Guinness Book of World Records heeft de titel aan Ashe toegekend omdat ze minimaal 840 miljoen keer gedownload is, ongeveer tien keer zoveel als Margolis. Zij bestrijdt op haar beurt weer de claim van Ashe.

CNN: Claim of 'Most Downloaded Woman' heats up

HET ZWARTE GAT

de 'nieuwe economie' in praktijk

Van iedere 100 dollar die Amerikaanse consumenten in de detailhandel [besteden](#), gaat 68 cent via internet. Veel beter lijkt het niet te worden: Het percentage internet was in het tweede kwartaal van dit jaar gelijk aan het eerste. +++ Het Britse e-zine The Register vraagt zich af in hoeverre de [internet-economie](#) een grote nepperij is. Aanleiding is de praktijk om met behulp van software de 'kijkcijfers' voor advertenties op te drijven. +++ Het [verkoop](#) van auto's via internet werkt niet, constateert de Bovag. +++ De Nederlandse reissite Clicketing heeft al het

Internet Explorer uit die betere concurrentie met America Online moet leveren door diensten als Hotmail en Instant Messenger te integreren. Soortgelijke integratie leverde het bedrijf een aanklacht van justitie op. +++ Afrikaanse [oplichters](#) maken via e-mail Singapore onveilig. In berichten worden extreem aantrekkelijke zakelijke voorstellen gedaan die stevast uitmonden in een geplunderde bankrekening. Vroeger opereerden de bendes via fax vanuit Nigeria, tegenwoordig ook vanuit andere landen. +++ De eerste kraak van een mobiele telefoon is een feit. Via [SMS-berichten](#) zou het mogelijk zijn de telefoon van Nokia te laten crashen. +++ MP3Cafe, een populair IRC-kanaal voor het illegaal uitwisselen van muziek is [gesloten](#) na dreigementen van de muziekindustrie. Die ontkent overigens en zegt dat een particulier mogelijk in actie is gekomen. CNet constateert dat steeds meer gebruikers partij kiezen voor het standpunt van de muziekindustrie en op eigen houtje actie voeren tegen piraterij. +++ Mohammed Al Fayed, de miljardair wiens zoon tegelijk met prinses Diana verongelukte, heeft een website [gelanceerd](#) waarop hij zijn theorie uiteen zet dat er sprake was van een complot. +++ Voetballegende Pele opent een eigen [website](#). +++ Wetenschappers zijn er in geslaagd een [robot](#) te maken die zonder hulp van mensen in staat is andere robots te bouwen. ++ + Ongeduldige Duitse [fans](#) van Harry Potter die niet tot het najaar op de Duitse uitgave willen wachten zijn zelf maar een vertaling van het boek gaan maken. De uitgever is woest dat het vrijwilligerswerk [online](#) wordt gezet, er dreigt een boete van

personeel (20 medewerkers) **ontslagen** of laten vertrekken. Alleen de oprichters zelf zijn er nog werkzaam met nog immer ronkende functiebenamingen als Chief Executive Officer. +++ Het Britse filiaal van Worldonline **verliest** op sommige gebruikers meer dan 3500 gulden per maand omdat ze gigantische hoeveelheden dataverkeer consumeren. ++ 'Content', het lege begrip dat staat voor inhoud, vormt weliswaar de ruggegraat van internet maar **levert** geen ene moer op. Zelfs de netversie van de Wall Street Journal, met een half miljoen betalende lezers, lijdt verlies. +++ Voter.com, een site die naam maakte met de verslaggeving van de Amerikaanse partijconventies, **ontslaat** 15 mensen. Voor het bedrijf werkt onder meer Carl Bernstein, de journalist die samen met Bob Woodward geschiedenis schreef door de Watergate-affaire te onthullen. ++ Onderzoeksbureau Forrester slaat de verwachting dat mobiele communicatie een **overheersende** rol gaat spelen in Europese e-commerce de grond in. Het zou om niet meer dan drie procent gaan. ++ DreamWorks, de filmstudio van Steven Spielberg, **verkoopt** zijn internet-dienst nog voor deze van start is gegaan. Online entertainment, tot voor kort gezien als winstmaker, lijdt zwaar onder tegenvallende verwachtingen. +++ Gratis providers hebben een **probleem** met het werven van advertenties, leert een onderzoek. De abonnees komen teveel uit economisch oninteressante - want weinig vermogende - doelgroepen. +++ Steeds meer bedrijven dumpen het achtervoegsel .com om **stigmatisering** te voorkomen. De toevoeging .net wint daarentegen aan populariteit, het zou staan voor een bredere zakelijke benadering. +++ De Amerikaanse beurswaakhond SEC gaat de kwakkelende site Tutor.net.com **vervolgen**. De leiding van het bedrijf misleidde investeerders met kletspraatjes over belangrijke contracten die in werkelijkheid nooit gesloten werden. +++ Online apotheek Planetrx **ontslaat** 15 procent van de medewerkers, oftewel 40 mensen. ++ De Britse telefoonmaatschappij Orange heeft 40 medewerkers **ontslagen** wegens

een half miljoen. +++ Europeanen kijken **minder** tv en lezen minder van papier als gevolg van internet-gebruik, wijst een enquête uit. Veel gesurfd wordt er trouwens ook niet, de meeste gebruikers bezoeken steeds dezelfde sites. ++ MP3.com gaat gebruikers **spammen** om ze over te halen muziek af te nemen van de platenmaatschappijen. Volgende week bepaalt de rechter hoeveel schadevergoeding de site moet betalen aan de muziekindustrie wegens het maken van illegale kopieën. +++ Napster is een bedrijf dat gestolen goederen heelt, **constateert** een columnist van de Boston Globe in reactie op de protesten van een aantal technologische belangengroepen tegen het rechterlijk vonnis dat de mp3-ruilbeurs verbiedt. De protesteerders zijn bang dat het verbod implicaties heeft voor volkomen legale toepassingen van de gebruikte techniek. ++ Ruim een derde van de **universiteiten** in de VS weert Napster van de eigen netwerken. Oneigenlijk gebruik van datacapaciteit en angst voor juridische maatregelen zijn de belangrijkste motieven. +++ De Amerikaanse overheid dacht het wantrouwen onder UFO-fanaten weg te kunnen nemen door **onderzoekresultaten** naar buitenaardse bezoeken online vrij te geven. Conclusie is steeds dat er van bezoeken geen sprake is. De UFO-fanaten zijn echter niet zo makkelijk te overtuigen: "Als er niets is, waarom werden er dan onderzoeken gedaan? Zie je wel!" Zucht. +++ Een Amerikaanse **krant** heeft alle foto's die een fotograaf maakte van - vermoedelijke - plaatselijke drugshandel **online** gezet. De redactie wil zo voorkomen dat justitie een dagvaarding uitbrengt om het

het verspreiden en bekijken van online porno. +++ Een topman van Altavista is [afgetreden](#) nadat journalisten ontdekten dat een van de diensten waar het bedrijf mee pronkte - gratis internet-toegang - in werkelijkheid helemaal niet bleek te bestaan. +++ Een topman van de financiële site thestreet.com houdt het na acht maanden alweer voor [gezien](#). De carrierestap bevestigt het beeld dat de top in de nieuwe economie even loyaal is aan hun eigen bedrijven als de gemiddelde uitzendkracht. +++ De president van het [superhippe](#) Razorfish hield het slechts drie maanden uit. +++ Augustus was dan ook de maand van het afscheid voor de [leidinggevend](#)en bij internet-bedrijven. Een record-aantal stapte op, meer dan in enig andere bedrijfssector. +++ In Nederland vertrokken onder meer de [hoofredacteur](#) van Zonnet, en de [directeuren](#) van de advertentiebureaus 24/7 en Doubleclick. +++ Tel uit je winst: MotherNature.com tracht de ondergang te voorkomen door zich te [verkop](#)en voor 1 gulden 85 per aandeel. Dat is beduidend minder dan de ruim dertig gulden die beleggers er in december voor neertelden. +++ Het asociale gedrag van lieden die bij [internetbedrijven](#) werken heeft tot een opstand onder bewoners in San Francisco, de internet-hoofdstad van de wereld, geleid. Steeds minder verhuurders zijn bereid hen van woonruimte voorzien. +++ Breedband, de jongste hype, lijkt alweer in te storten. De snelheid blijkt vooralsnog alleen in de [verkooppraatjes](#) te zitten.

DE REUS WANKELT

Amazon, het lichtend voorbeeld voor iedere 'nieuwe economie'-gelovige, komt in de Verenigde Staten steeds meer onder vuur te liggen en het zijn niet alleen meer de doorgewinterde skeptici die zich afvragen of het bedrijf gaat overleven.

Knowledge at Wharton, een tweewekelijkse uitgave van de gelijknamige business school aan de universiteit van Pennsylvania (de oudste van het land), gaat dieper in op de problemen waar de koning onder de internetbedrijven mee kampt. Het

beeldmateriaal in handen te krijgen. +++ Weg met de democratie! Een site met de naam [voteauction.com](#) veilt tegen [betaling](#) de stemmen van Amerikaanse kiezers. +++ Dieper linken: Na de Nederlandse krant news.nl gaan ook Amerikaanse media over tot het massaal uitventen van [streepjescode-scannertjes](#) die de gebruiker naar aanvullende info op het web moeten voeren. +++ Na lang wachten [lanceert](#) Apple deze maand eindelijk een nieuwe versie van het besturingssysteem: Mac OS X. Het zou crash-bestendig zijn. ++ + Een bedrijf dat via e-mail [geldprijzen](#) van 10.000 dollar wilde uitdelen, raakte de prijzen niet kwijt. De winnaars hebben de mail vermoedelijk als 'spam' genegeerd. +++ Duitsland wil draconische [maatregelen](#) nemen tegen extreem-rechtse sites middels hoge boetes en bezoekverboden. +++ Oeps... Scholieren van de Lake Region High School die hun jaarboek de pakkende titel [www.LR2000.com](#) gaven, komen er nu achter dat het adres toebehoort aan een porno-site. +++ MP65+: The Doobie Brothers, een band die het goed deed in de jaren zeventig, zet 15 nieuwe [nummers](#) online. Gratis. +++ Word.com, een van de oudste experimentele media op het net, sluit [opnieuw](#) haar deuren. Eigenaar Zapata ziet geen mogelijkheden de site rendabel te maken. Zapata nam de site in 1998 over van Icon toen deze de site sloot wegens dezelfde redenen.

.nl: De ANWB publiceert online een lijst met [tankstations](#) die brandstof tegen lage prijzen verkopen. De lijst wordt samengesteld met hulp van het publiek. +++ Nederlandse

klantenbestand groeit weliswaar maar de klanten lopen net zo gemakkelijk weer weg, met het stijgen van de omzet nemen ook de kosten bijna evenredig toe (wat winst onmogelijk maakt) en het bedrijf loopt het risico dat door de voortdurende uitbreiding van het assortiment - auto's bijvoorbeeld - uiteindelijk niemand meer weet wat het nu eigenlijk verkoopt. Bovendien meldde Amazon eind juli een stagnatie in de verkoopcijfers. Voeg daarbij dat Amazon geen onaantastbare solide positie bezit, het is weliswaar de bekendste online boekhandel maar dat hoeft niemand er van te weerhouden net zo'n boekhandel te beginnen. Dat is een belangrijk verschil met bijvoorbeeld stadscentra waar goede verkooppunten schaars en vaak al bezet zijn. We were somewhere around Barstow on the edge of the desert when the drugs began to take hold. I remember saying something like "I feel a bit lightheaded; maybe you should drive...." And suddenly there was a terrible roar all around us and the sky was full of what looked like huge bats, all swooping and screeching and diving around the car, which was going about a hundred miles an hour with the top down to Las Vegas. And a voice was screaming: "Holy Jesus! What are these goddamn animals?"

Thus started a book I picked up by chance while perusing round a book shop in London, probably about ten years ago. I had stumbled across [Hunter S. Thompson](#), wierd really, because at the time you think you have discovered something only you know about it, [the book](#) subsequently did the round of my friends and actually managed to travel round the world with different people, until I got it back dog eared and faded.

Apart from the opening paragraph, the great thing about the book was the illustrations by [Ralph Steadman](#), the way they were integrated as part of the book, with ink drips across the page just seemed so radical but obviously fitting with the text.

And while, for me, Hunter S. Thompson never really did anything as good or as influential as Fear and Loathing, [Ralph Steadman](#), has done some great stuff, not least his work for my local off license.

The Money Shot

B2C slump? yeah, yeah but you never hear that 18 million US Internet users visited porn sites last April. Over three times as many than in April 1999. All this stuff I have to talk about all day - user tracking, new advertising techniques, credit payment systems, real-time chat, live web casts - all innovations from the world of internet pornography.

Has it reached its peak, climaxed so to speak?

According to [websense](#), the number of new pornographic websites has more than doubled every year since 1994, but this growth rate has now begun to slow down, with a rate of only 40% this year and a further slowdown expected over the next year or two. Futher to this [searchterms.com](#) says that 'sex' is relegated to third position, after 'travel' and 'mp3' as the most popular search term.

I guess this is probably due to the changing demographics of internet use and I expect there is still a few bob to be made in the B2C sector.

Spinal Tap

England's greatest rock band, [Spinal Tap](#) are back, infact 'Back from the Dead'

"We're putting it on the Internet because we want the people who really care that we're still alive to have it in their hands and their machinery and then in their ears," David St. Hubbins said. The song can be found at [Tapster](#).

A Federal judge on Wednesday barred the real company, Napster, from trading music online pending a trial. In a Spinal Tap news release, "Tufnel" said Napster simply offers too many songs.

"One of the brilliant things about Tapster is that there's only one song to choose from," Tufnel said.

[USA: Settlement Resolves First State Action under CAN-SPAM Act](#)

"Internet marketers should note that Massachusetts takes seriously federal and state laws meant to protect against unwanted and misleading e-mails,' AG Reilly said. 'These messages are the type of unwanted and annoying solicitations that have become the scourge of Internet users and threaten the credibility of companies using email for legitimate purposes.'"

AG Reilly, [Press Release](#), 2004-10-07

[USA: Reward for Arrest and Conviction of Mydoom Virus Author](#)

"SCO announced that it is offering a reward of up to a total of \$250,000 for information leading to the arrest and conviction of the individual or individuals responsible for creating the Mydoom virus."

SCO, [Press Release](#), 2004-01-27

Microsoft, [Press Release](#), 2004-01-29

[USA: Google vs. Booble](#)

"We have recently become aware of your website at <http://www.booble.com> (the Domain Name). This Domain Name is confusingly similar to the famous GOOGLE trademark. Your web site is a pornographic web site. Your web site improperly duplicates the distinctive and proprietary overall look and feel of Google's website."

Google Trademark Enforcement Team, [E-Mail](#), 2004-01-20

Booble, [E-Mail](#), 2004-01-28

2003

[USA: "RIAA v. Verizon"](#)

"Verizon declared victory for consumer safety and privacy today when the U.S. Court of Appeals for the District of Columbia announced it has struck down a controversial lower-court ruling that had forced Internet service providers to reveal the identity of any Internet subscriber accused of music piracy."

[District Court Decision](#) (PDF), 2003-01-21

[USA: Inappropriate Symbols from the Microsoft Office System](#)

"Microsoft has learned of a mistake in the Bookshelf Symbol 7 font included in the Microsoft Office System client applications. Due to an unintentional oversight, we failed to identify, prior to the release, the presence of two swastikas within the font."

MS, [Open Letter](#), 2003-12-12

[USA: Death Threats against Spammers \(The "Booher-Case"\)](#)

"During July 2003, subject Charles Booher, sent numerous email and telephonic death threats to an individual residing in Canada. Booher thought this individual was responsible for sending him spam email. The threatening messages sent by Booher were very explicit and graphic threatening to kill or maim the victim, as well as any employee at the victim's company. The Internet Service Provider (ISP) made numerous attempts to get him to stop, but he continued until his account was terminated."

Charles T. Booher, [E-Mail](#), 2003-07

[USA: L.A. County against "not acceptable" equipment identification](#)

"One such recent example included the manufacturer's labeling of equipment where the words "Master/Slave" appeared to identify the primary and secondary sources. Based on the cultural diversity and sensitivity of Los Angeles County, this is not an acceptable identification label."

L.A. County, [E-Mail](#), 2003-11-18

[USA: Operation CyberSweep - FBI against Auction Fraud](#)

"In what eBay and investigators believe may be the largest domestic eBay auction fraud case, Russell Dana Smith, aka John P. Leary, is charged in a 54-count indictment returned in the District of Utah with operating a scheme to defraud winning bidders of eBay auctions by failing to deliver equipment purchased by winning bidders."

FBI, [Press Release](#), 2003-11

Robert Mueller/eBay, [Letter](#), 2003-11-12

[USA: Cryptome received a visit from FBI Special Agents](#)

"Cryptome received a visit today from FBI Special Agents Todd Renner and Christopher Kelly from the FBI Counterterrorism Office in New York, 26 Federal Plaza, telephone (212) 384-1000. Both agents presented official ID and business cards."

[USA: Attorney General against AOL/CompuServe for Improper Billing](#)

"Attorney General Jim Petro today filed a complaint against America Online, Inc. (AOL) and its subsidiary CompuServe Interactive Services, Inc. The complaint alleges violations of the Consumer

Sales Practices Act and that AOL has failed to honor the terms of a previous agreement with the Attorney General."

[Complaint](#) (PDF), 2003-10-27

AG Jim Petro, [Press Release](#), 2003-10-27

[USA: California's first-ever anti-spam lawsuit won](#)

"Attorney General Bill Lockyer today won the State of California's first-ever anti-spam lawsuit when the Santa Clara County Superior Court ordered PW Marketing and owners Paul Willis and Claudia Griffin to pay \$2 million in civil penalties for violating state laws prohibiting unsolicited commercial email, false advertising and unfair business practices."

[Final Judgment and Permanent Injunction](#) (PDF), 2003-10-24

AG Lockyer, [Press Release](#), 2003-10-24

[USA: AOL and CompuServe Settle FTC Charges of Unfair Practices](#)

"America Online, Inc. (AOL) and its subsidiary, CompuServe Interactive Services, Inc. (CompuServe), today settled Federal Trade Commission charges that they engaged in two separate unfair practices. The first allegation involves AOL's continuing to bill AOL Internet service subscribers after they asked to cancel their subscriptions. The other allegation involves the late delivery of \$400 rebates to consumers who signed up for CompuServe Internet service."

[USA: "Blumenthal v. Drudge and America Online, Inc."](#)

"This lawsuit arises out of a story concerning one of the plaintiffs that defendant Matt Drudge ("Drudge") published in his electronic publication called the "Drudge Report" and out of oral statements that Drudge allegedly made to reporters about the story. In a 136-page, 21-count Complaint, plaintiffs Sidney and Jacqueline Blumenthal claim that what Drudge said in the story and to reporters constituted defamation, invasion of privacy, and intentional infliction of emotional distress."

[USA: Against the Federal Communications Commission's First Report and Order - "Iowa Utilities Board et.al. v. FCC"](#)

"Before the FCC published its regulations pursuant to the Act, several incumbent LECs, potential competitors, and state utility commissions were all working together to implement the local competition provisions of the Act. The Act's system of private negotiation backed by state-run arbitration was operating without the input from the FCC. A stay would preserve the continuity and stability of this regulatory system."

[Order](#), 1996-10-15

[USA: Flame Throwers - "Internet America, Inc. v. Kevin Massey"](#)

"Please take a moment to review the following text. There you will find a Temporary Restraining Order prohibiting you from, among other things, attacking Internet America, me, my wife, and our employees over the Internet."

Court Order, 1996-10-14

USA: "United States of America v. Kevin Mitnick"

"By running unauthorized 'hacking' programs, defendant MITNICK was able to obtain undetected 'Superuser' status on the computers of the victim companies, Internet Service Providers and educational institutions. 'Superuser' status permits a user to access all areas of a computer."

Indictment, 1996-09-26

USA: "Maritz, Inc. v. Cybergold, Inc."

"Viewed in the light most favorable to plaintiff, defendant's contacts with Missouri are as follows. CyberGold maintains an internet site on the World Wide Web. The server for the website is presumably in Berkeley, California. The website is at present continually accessible to every internet-connected computer in Missouri and the world. CyberGold's website can be accessed at 'www.cybergold.com' by any internet user. IT IS HEREBY ORDERED that the motion of defendant to dismiss for lack of personal jurisdiction and improper venue."

Memorandum and Order, 1996-08-19

USA: An Inline Linking Dispute - The "The Dilbert Hack Pages"

"I very carefully designed my Web page to avoid copyright problems. If you examine the HTML for my page, you will see it pulls images from the UnitedMedia server. I do not store any United Feature Syndicate intellectual property on my server."

Mails, 1996-07/08

USA: The Domain actmedia.com - "Actmedia v. Active Media International, Inc,"

"Defendant's reservation of the Domain Name violates 15 U.S.C. Section 1125 and Illinois common law."

Permanent Injunction, 1996-07-12

USA: Indecent Reporting - "Joe Shea v. Janet Reno"

"The technological impossibility of independent compliance with the affirmative defenses renders §223(d) unconstitutional as an overbroad prohibition on constitutionally protected indecent speech between adults."

Memorandum and Order, 1996-07-29

USA: AOL providing Users with free connect time as compensation for America Online billing practices

"America Online is hereby directed to post the following reference on the America Online Welcome Screen: 'Member billing: Know your rights and get free time. Read Steve Case's update.' By clicking on the icon on the Welcome Screen, there will be an immediate link to the Steve Case Community Update; by clicking on the Free Time button on the Steve Case Community Update, there will be an immediate link to the full text of the Online Notice. The Welcome Screen reference will be scheduled every other day for a 14-day period in a way reasonably calculated by America Online to produce 5.5 million impressions."

Settlement Notice and Hearing Order, 1996-07-01

USA: Long distance phone calls without paying - "Thrifty-Tel v. Bezenek et.al."

"A friend of the Bezeneks' children knew a confidential Thrifty-Tel access code. During a three-day period in November 1991, Ryan, Gerry and some friends, using the Bezeneks' home computer and modem, gained entry into Thrifty-Tel's system with the code and conducted manual random searches for a six-digit authorization code."

Appeal Court Decision, 1996-06-28

USA: The trademark "WirelessNOW" - "Malarkey-Taylor Associates, Inc. v. Cellular Telecommunications Industry Association"

"MTA's application for preliminary injunction is GRANTED. CTIA is enjoined from ... using MTA's trademark, WirelessNOW."

Court Order, 1996-06-21

USA: Must shrinkwrap licences be obeyed by buyers? - "ProCD, Inc. v. Matthew Zeidenberg and Silken Mountain"

"Licenses may have other benefits for consumers: many licenses permit users to make extra copies, to use the software on multiple computers, even to incorporate the software into the user's products. But whether a particular license is generous or restrictive, a simple two-party contract is not 'equivalent to any of the exclusive rights within the general scope of copyright' and therefore may be enforced."

Appeal Court Decision, 1996-06-20

USA: Unsolicited commercial Mail using bogus "aol.com" e-mail addresses - "AOL v. Cyber Promotions Inc."

"Cyber never requested or obtained any authorization from AOL to engage in this conduct nor has it compensated AOL in any manner for the use of AOL's equipment to route the millions of unsolicited messages which Cyber has sent. The forged return e-mail addresses used by Cyber have contained AOL's mark and domain name 'aol.com'."

Complaint, 1996-06-14

USA: Trademark Infringement with a Domain - "Giacalone v. Network Solutions Inc. and TY Inc."

"IT IS HEREBY ORDERED that a Preliminary Injunction be granted as prayed for in the motion, to the following effect: Defendant TY, INC and its agents and employees and all other persons acting in concert with it are hereby enjoined from interfering in any way with Plaintiff GIACALONE's right to use the Internet domain name 'ty.com'."

Complaint, 1996-05

Preliminary Injunction, 1996-06-13

USA: Forced to give up ones own name - "Clue Computing, Inc. v. NSI"

"Clue Computing prays for relief as follows: An Order enjoining NSI from placing the clue.com domain on hold as a result of enforcement of the New NSI Policy ... (and) a declaration that the New NSI Policy is not applicable to Clue Computing's pre-Policy domain name registration."

Spiegel+Staatsanwaltschaft fallen auf Fakewebsite zur Wahl herein

von Luther - 15.09.2002 15:29

Zum Kaputtlachen: Cashvote.com ist eine gelungene Kommunikationsguerilla-Website eines Kieler Untergrundkünstlers, auf der angeblich Stimmen für die Bundestagswahl gehandelt werden können ("Wählen lohnt sich wieder"). Nach wenigen Minuten dort merkt jeder einigermaßen intelligente Mensch, dass hier etwas nicht stimmt. Nicht so Spiegel und Staatsanwälte!

Bald verboten?

Noch steht dieser Artikel auf der Spiegel-Startseite (!), wahrscheinlich wird er aber bald ganz verschwunden oder korrigiert sein, deshalb hier zur Dokumentation im Wortlaut <http://www.spiegel.de/netzwelt/netzkultur/0,1518,214038,00.html>

14. September 2002
WAHLFÄLSCHUNG

"Staatsanwalt ermittelt gegen Stimmen-Händler"

Manche Nichtwähler lassen ihre Stimme einfach verfallen, andere verkaufen sie. Eine kleine Kieler Firma namens "Fortschritt" treibt den Handel auf die Spitze - und bietet Wahlstimmen im Zehntausender-Paket an. Frankfurt/Main - Wer Stimmen nicht klammheimlich unter Chiffre-Anzeigen oder in Chat-Foren, sondern gleich im Paket einkaufen will, kommt zu Cashvote.com. "Wählen lohnt sich wieder", heißt es da in dicken Lettern. Was damit gemeint ist, erfährt der Besucher im Nachsatz: "Ab sofort können Sie hier Ihre Stimme für die Bundestagswahl 2002 verkaufen sowie Wählervoten im Paket erwerben. Am 22. September sind Wahlen - machen Sie Ihre Stimme schon jetzt zu Geld!"

Da gibt es das "Ecopaket" mit 1000 Zweitstimmen für 6250 Euro. Wer die Partei seiner Wahl noch weiter nach vorn bringen will, kauft das "Powerpaket" mit 10.000 Zweitstimmen, das - die Menge macht's - schon für 59.900 Euro zu haben ist. Und Nachschub ist reichlich vorhanden, glaubt Cashvote-Betreiber "Fortschritt", ein Kieler Unternehmen, das sich im Mai dieses Jahres gegründet haben will. Auf 7,3 Millionen Stimmen beziffert "Fortschritt" das "jährliche Vermittlungspotenzial". Man sucht verzweifelt nach Anzeichen, dass Cashvote nur eine Satire ist. Allein, es finden sich keine.

Für wen die gekauften Stimmen abgegeben werden, bleibt ganz der Wahl des Käufers überlassen: Er kann jede Partei anklicken, die zur Bundestagswahl antritt - von der "Alternative spirituelle Politik im neuen Zeitalter", auch als "Die Violetten" bekannt, über SPD und CDU bis hin zur NPD. Auch im Internet-Auktionshaus eBay werden immer wieder Wählerstimmen angeboten, die nach eBay-Angaben gelöscht werden, sobald sie auftauchen.

Doch das Geschäft könnte für Stimmenkauf und -verkauf könnte die Beteiligten teuer zu stehen kommen: "Wer einem anderen dafür, dass er nicht oder in einem bestimmten Sinne wählt, Geschenke oder andere Vorteile anbietet, verspricht oder gewährt", heißt es im Strafgesetzbuch, "wird mit Freiheitsstrafe bis zu fünf Jahren oder Geldstrafe bestraft."

Eigentlich sollte mittlerweile bekannt sein, dass nur der seine Wahlstimme zum Kauf anbieten sollte, der keine Angst vor dem Staatsanwalt hat. Dennoch ermitteln derzeit gleich mehrere deutsche Anklagebehörden gegen Unvorsichtige, die im Internet und über Zeitungsanzeigen ihre Wählerstimme zum Kauf angeboten haben. Der Frankfurter Oberstaatsanwalt Job Tilmann hat einen entsprechenden Bericht der "Bild am Sonntag" jetzt bestätigt. "Mir sind mehrere Fälle aus dem Internet bekannt", sagte Bundeswahlleiter Johann Hahlen der Zeitung. "Wir haben sofort die Betreiber der betroffenen Foren angemahnt und die zuständigen Staatsanwaltschaften eingeschaltet. Diese haben sofort Ermittlungsverfahren eingeleitet." Perverse und hochkriminell sei diese Art, die Demokratie zu schädigen.

Deshalb droht jetzt gar der Frankfurter Rundschau Ungemach. In dem Blatt soll ein Arbeitsloser seine Stimme im Tausch gegen einen Job angeboten haben. Ermittler Tilmann will jetzt die Anzeigenabteilung der "Frankfurter Rundschau" durchsuchen lassen, um den Mann ausfindig zu machen. Ziel der Ermittlungen sei aber nicht die Zeitung, beteuerte Tilmann. Nur der Inserent.

Peinlich, peinlich, dass Spiegel und die Staatsanwaltschaft auf so eine Satireseite hereinfallen, nur weil dort nicht "Fake" beisteht. Eine kleine Recherche nach dem Domaininhaber und anschließender Suche bei einigen Suchmaschinen hätte doch schon gereicht, um Klarheit zu schaffen. Die Website gehört nämlich einem Kieler "Untergrund-Künstler".

Sie liegt auch nicht, wie zu erwarten wäre, auf einem US-Server sondern bei Schlund/Puretec in Deutschland. Der Eintrag ist vom 15.08.2002, die Website ist also allerhöchstens 1 Monat online und die "Verkaufsfrist" ist bis zum 15.09.2002 begrenzt, in so kurzer Zeit kann man wahrscheinlich nicht bekannt werden und großartige Geschäfte machen ...

Die Website <http://www.cashvote.com> sieht zwar perfekt gestylt aus, aber wer lesen kann und nicht völlig blöd ist ...:

Der Verkäufer bekommt nämlich 10 Euro für die Stimme, der Käufer zahlt aber z.B. nur 6 Euro pro Stimme! Wie soll die "Vermittlungsfirma" dann Gewinn machen?

Außerdem werden Erststimmen und Zweitstimmen durcheinandergebracht usw. und die Beschreibung der "Geschäftsidee" ist auch ziemlich eindeutig...

Schnell hin und lesen, vielleicht sperrt die humorlose Stasi, äh Staatsanwaltschaft die Seite ja doch noch: <http://www.cashvote.com>

ERGÄNZUNGEN

lol

Von: MrPizza 15.09.2002 15:51

am besten finde ich die Anteile der Verkauften Stimmen.

FDP: 18 % *g*

doch gewinn

15.09.2002 16:03

wenn cashvote auch erststimmen verkaufen wuerde (unwahrscheinlich), dann waere schon ein gewinn moeglich. allerdings ist im formular fuer die waehler/verkaefer (die ja 10 euro bekommen) nichts davon gesagt, dass sie auch die erststimme nach anweisung abgeben muessen.

Schade

15.09.2002 16:10

Schade, der Wahlfälschungs-Artikel steht ab jetzt nicht mehr ganz oben auf der Spiegel-Startseite, nur noch weiter unten bei Netzwelt...

Stimme abgegeben...

15.09.2002 17:22

So, ich habe jetzt meine Stimme "verkauft": Man kann im Prinzip ALLE Felder freilassen, es erscheint trotzdem immer die Erfolgsmeldung:

Vielen Dank, "Name" "Vorname"
Ihre Angaben wurden gespeichert.

Nicht einmal eine Partei muss angekreuzt werden! Spricht nicht unbedingt gegen ein Fake...

GEOUTET

Von: Luther 16.09.2002 10:55

SCHADE, bei Cashvote.com gibt es heute zwar noch die Originalseiten http://www.cashvote.com/index_.php zu sehen, auf der Startseite <http://www.cashvote.com> erscheint aber nun zunächst eine Klarstellung, dass es sich um ein Fake handelt.

Aus der Presseauswertung dort ergibt sich, dass nicht nur der Spiegel offensichtlich zu Deutschlands cleversten Medien gehört sondern ganz vorne natürlich die Bild am Sonntag sowie die FAZ, AP, n-tv, Stuttgarter Nachrichten und der Stern (Hitler-Tagebücher... genannt werden müssen! Alle entsprechenden Artikel sind heute (Montag 16.09.2002, 10:30) immer noch so im Netz, auf eine Satire wird nicht hingewiesen - schnell hin...

Interessant auch, dass Bundeswahlleiter Johann Hahlen voll auf ein so relativ einfaches Fake hereingefallen ist - aber deutsche Spitzenbeamte gelten im internationalen Vergleich ja bekanntlich als die mit Abstand Intelligentesten ...

Es bleibt zu befürchten, dass Hahlen und die Staatsanwaltschaft aus Rache dafür, dass ihre eigene Cleverness so deutlich herausgestellt wurde ;) jetzt weiterhin massiv gegen die Betreiber vorgehen. Es finden sich dafür sicher irgendwelche absurden Paragraphen (Vortäuschung oder Aufforderung zu Straftaten o.ä.) ...

Erste Entwarnung im Web

16.09.2002 11:05

Erste "Enthüllung" von Cashvote.com als Satire im Web

- nach Indymedia :) -

Ostsee-Zeitung

☞ http://www.ostsee-zeitung.de/po/start_148552.html

Einer der Initiatoren von Cashvote.com, Benno Peters, erklärte im Südwestrundfunk, die Aktion sei als Scherz gemeint gewesen. "Es wurde nie mit Stimmen gehandelt, noch bestand bei uns dazu die Absicht", sagte er laut SWR. Das Ganze sei ein politisches Experiment einer sich in der Gründungsphase befindenden Partei. "Wir wollten mit dieser Aktion den heruntergekommenen Stand der jetzigen Demokratie kritisieren", sagte Peters. Es sei für keine einzige Stimme Geld geflossen, allerdings habe es mehrere hundert Angebote gegeben.

dpa, AP etc. - alle reingefallen!!!

Von: fr-leser 16.09.2002 11:26

Offensichtlich sind auch die Presseagenturen dpa und AP voll auf das Fake hereingefallen und entsprechend berichten praktisch alle deutschen Zeitungen (siehe auch Paperball.de)!

Die Frankfurter Rundschau kapiert es allerdings beinahe - hier komplett zur Dokumentation wiedergegeben, da vermutlich auch diese Seite demnächst nicht mehr unverändert online bleiben dürfte:

☞ <http://www.fr-aktuell.de/fr/101/t101003.htm>

IM BLICKPUNKT

Wahlervoten im "Power-Paket" - Cashvote handelt mit Stimmen

Von Jörg Schindler (Berlin)

Kurz vor der Wahl sorgen geschäftstüchtige Menschen für Furore, die Wählerstimmen gegen Bares verhökern. Die Staatsanwälte ermitteln.

Das Angebot klingt verlockend, die Idee bestechend einfach. "Machen Sie Ihre Stimme zu barem Geld", heißt es auf der Internet-Seite von Cashvote. Die Voten würden nur an "seriöse Interessenten" abgegeben, ohne Aufwand, ohne Kleingedrucktes, zehn Euro das Stück. "Wählen", so das Fazit, "lohnt sich wieder."

Seit Mai 2002 kauft Cashvote, ein "junges, innovatives Unternehmen" mit Sitz in Kiel, Wählern ihre Stimme ab, um sie Gewinn bringend zu verhökern. Wer sich seinen Urnengang vergolden lassen will, muss lediglich eine "Selbstverpflichtung" unterschreiben. Kurz vor der Bundestagswahl erhält er zehn Euro und die Anweisung, wen er wählen soll. Auf diese Weise, so Cashvote selbstlos, "werden sogar Nichtwähler zu Wählern". Benno Peters, Sprecher des Unternehmens, sagte, man bewege sich in einer Grauzone zwischen "Satire und Ernst".

Die so gesammelten Stimmen schnürt das Unternehmen zu Paketen zusammen. 1000 Zweitstimmen sind für 6250 Euro zu haben, für das Zehnfache garantiert das "Power-Paket" Rabatt. Wirtschaft und Demokratie, lobt die Firma, würden so aufs Trefflichste miteinander verknüpft. Etliche Wähler scheinen das ähnlich zu sehen: Mehr als 70 000 Mal wurde die Web-Site von Cashvote mittlerweile aufgerufen.

Dabei ist die Idee, Wählerstimmen zu vermakeln, nicht wirklich neu. In den USA erdachte ein Kunststudent vor einigen Jahren eine Parodie auf das System der Wahlkampf-Finanzierung, aus der im Handumdrehen Ernst wurde. Kurz vor der Präsidentschaftswahl sorgte www.voteauction.com für erhebliches Aufsehen: Binnen kürzester Zeit meldeten sich dort 15 000 Wähler und etliche Bieter - Höchstsumme: knapp 200 000 US-Dollar. Auf vehemente Proteste reagierte der Betreiber der Seite gelassen: Immerhin sei es in den USA durchaus üblich, dass Lobbyisten die Parteien mit üppigem Geldsegen bedenken. Nicht einzusehen sei, warum dieselben Millionen nicht direkt an den Wähler ausgeschüttet werden sollen. Überall, wo Spenden Wahlen beeinflussen, sollten daher Stimmenkaufbörsen eingerichtet werden - auch in Deutschland.

Nun scheint es so weit zu sein. Und Cashvote ist dabei nicht das einzige Unternehmen, das ein Geschäft wittert. Auch beim Internet-Auktionshaus Ebay gingen schon dutzendfach Menschen online, die ihre politischen Präferenzen meistbietend versteigern wollten. Ob scherzhaft oder nicht: Inzwischen ist Ebay dazu übergegangen, die Angebote sofort zu streichen. Das Auktionshaus tut gut daran, denn der Verkauf und Ankauf von

Wählerstimmen ist gesetzlich verboten. Wer sich seines Wahlrechts auf monetäre Weise entledigt, dem drohen bis zu fünf Jahren Knast. Die ersten Staatsanwaltschaften haben daher bereits mit ihren Ermittlungen begonnen. Sie werden demnächst wohl auch in den Anzeigenabteilungen von Zeitungen vorstellig werden, darunter die FR. In deren Kleinanzeigenteil hatte ein besonders gewitzter Wähler jüngst Erst- und Zweitstimme gegen einen Arbeitsplatz angeboten. Egal, ob Satire oder tiefere Bedeutung: Der Mann hat nun ein Problem. Denn auf Drängen der Staatsanwaltschaft wird der Verlag die Adresse des Kunden herausgeben. Auch in anderen Fällen wollen die Ermittler hart durchgreifen.

Die Macher von Cashvote lassen sich davon bislang wenig beeindrucken. Nachdem die Testphase mit der Bundestagswahl erfolgreich abgeschlossen wurde, sollen bald schon auf Landes- und Kommunalebene Wählervoten vertickt werden. Dem Wachstum des neuen Marktes seien kaum Grenzen gesetzt: Allein in Deutschland gebe es ein "jährliches Vermittlungspotenzial" von 7,3 Millionen Stimmen

URL: <http://www.fr-aktuell.de/fr/101/t101003.htm>

Glückwunsch, super!

16.09.2002 11:59

Herzlichen Glückwunsch nach Kiel, perfekte Aktion! Geil. Nur warum hat jetzt die FDP statt 18 sogar 22%? Naja -- immerhin reicht es zusammen mit PBC (13%), PDS (9%) und Schill (9%) zu einer bequemen Mehrheit... Möllemann mit dem mobilen Guido, Schill, Jesus und Gysi, das wäre eine Regierung! Warum ist die CSU nicht aufgeführt, fällt die unter Sonstige?

Interessante Diskussion

Von: Heisianer 16.09.2002 13:11

Bei Heise diskutieren die Leute sehr interessant über cashvote.com und hirnlose Presse und Staatsapparat:

☞ <http://www.heise.de/newsticker/data/wst-16.09.02-002/>

Bei Indy ist dazu ja hier leider nicht viel los, dabei habt ihr das Fake doch als erstes geschnallt. BTW: Warum ist der Artikel nicht auf der Startseite?

URL: <http://www.heise.de/newsticker/data/wst-16.09.02-002/>

Eine Wählerstimme ist viel mehr Wert

Von: Gerhard 16.09.2002 13:37

Wer ist korrupter: Cashvote (wenn es echt wäre) oder Kanzler Schröder?

Herr Schröder kauft 5.500 Stimmen (die MobilCom-Leute) für 320 Millionen Euro. Das sind 58.181 Euro pro Wähler, also fast 6000x so viel wie bei Cashvote.com. Und das ist keine Satire, nur ermittelt hier kein Staatsanwalt .. Davon abgesehen ist die MobilCom-Bürgschaft (sowie bei Holzmann auch) strafrechtlich gesehen möglicherweise Untreue und eine Frechheit gegenüber den 550 kleinen Unternehmen mit je 10 Beschäftigten, die pro Woche Pleite machen und die keinen Cent bekommen.

lustig

Von: venceremos 16.09.2002 16:08

selten so gelacht. eine ganz klasse aktion.

und wenn die presseagenturen, spiegel und co darauf reinfallen, zeigen sie nur wie blöd sie sind.

sehr schön

Von: aargh 16.09.2002 22:50

Dieser Fake hat es sogar in den Videotext von CNN (S. 106) geschafft - grandios!

MEET AUTHORS AND ARTISTS AT OUR WEDNESDAY, MAY 30th ANIMATION BOOK FAIR. ED HOOKS, AUTHOR OF "ACTING FOR ANIMATORS" AND NIK PHELPS, CREATOR OF THE NEW CD "FETCH" TO SPEAK. OTHER LUMINARIES TO BE ON HAND TO MEET INFORMALLY WITH YOU, TO TALK ABOUT THEIR WORK AND TO SIGN COPIES FOR PEOPLE INTERESTED IN OBTAINING THEM. PLUS A LIVE PERFORMANCE OF THE "DAY ELMO AARDVARK MET VA VA LA VOOM" This should be a fascinating evening where you can meet the creators of "intellectual property" related to animation. The event features talks by Ed Hooks, teacher and author of *Acting for Animators* and Nik Phelps, head of The Sprocket Ensemble, who has just released a CD of their music for animated shorts.

You can meet and talk with Nina Paley (original art), Michaela Pavlatova (making available some cutouts from *Forever and Forever*), Russell Merritt (author of *Walt in Wonderland*, an important study of Disney's silent films), Karl Cohen (author of *Forbidden Animation: Censored Cartoons and Blacklisted Animators*), Arnaldo Laboy (creator of *The Adventures of Poyi and Ubo*) and Chris Lanier (author/illustrator of the graphic novel *Combustion*). All will bring things to sign.

Will Ryan, the creator of *Elmo Aardvark* and a former president of ASIFA-Hollywood, is coming up from Los Angeles with voice actress Diane Michelle to promote the great *Elmo Aardvark: Outer Space Detective* show, distributed by Mondo Media. Both are voice actors (Goofy, Daisy Duck, Tigger for Disney, Yosemite Sam, characters on *Batman*, etc.) Ryan will sign copies of his out-of-print

Elmo Aardvark CD and copies of *The Elmo Aardvark Miracle: How to Make a Movie with No Money* (if it is back from the publishers). They will also perform strange and unusual acts before your very eyes!

CONGRATULATIONS FILM ARTS FOUNDATION ON YOUR 25TH BIRTHDAY A big celebration party with live music by Papa and his Band, projections, etc. will take place May 17. For

details www.filmarts.org or 1 552-6350

ABOUT ED HOOKS AND "ACTING FOR ANIMATORS" A lot of animators in the Bay Area and around the world have studied with Hooks. His new book has been getting great reviews. Amazon.com writes "Until now, animators who have wanted to learn about acting have had no option but to study the subject side by side with stage and movie actors, a group that uses acting techniques in a wholly different way. Ed Hooks offers a better alternative with *Acting for Animators*, the first book about acting theory and technique written specifically for the animator. "

Amazon puts readers' comments about books on their site.. One person wrote, "This is a dense, thoughtful work, of lasting value, which will reward careful study. Hooks writes in an easily readable style, concisely and directly, about the most difficult and elusive portion of the art of character animation. Buy this book before you choose software or other animation tools. You will find that Hooks' advice will also improve your script and storyboard development. One of the problems with books about computer-based character animation, such as my own 'Character Animation In Depth', is that they lose value as the software they are written for becomes obsolete. Hooks' work will retain its value for a long time. Buy a copy, keep it handy, reread it frequently, and don't loan it to friends; you won't get it back. Give them one instead."

Another review concludes, "Overall, best money I've spent on an animation book in a long time! I don't care how long you've been in the industry, you'll learn something from this book!"

Brad Bird, director of *Iron Giant* and *Family Dog*, says "Hooks has made a valuable contribution toward deepening our understanding."

Hooks will be signing copies at tonight's event. This will be one of his last appearances in the Bay Area as he plans to live in Chicago part of the year and in Rome the rest of the year.

THE PACIFIC FILM ARCHIVE IN BERKELEY WILL PRESENT 9 EXTRAORDINARY PROGRAMS BY THE CZECH DIRECTOR KAREL ZEMAN, FOLLOWED BY 7 EVEN RARER PROGRAMS BY THE RUSSIAN DIRECTOR ALEXANDER PTUSKO, AND A NIGHT OF PUPPET ANIMATION BY LADISLAW STAREWICZ (WITH LIVE MUSIC BY THE TIN HAT TRIO) Can there be too much of a good thing? If you really love animation, especially Ray Harryhausen type fantasy films, do your best to see all or most of these unusual programs. Most of the works to be shown combine stop-motion and special effects with live action. Most have never been seen in the Bay Area, or if they were shown it was decades ago.

The Zeman series begins Friday and Saturday, May 4 and 5 and continues on Fri. - Sunday May 11, 12 & 13. Karel Zeman's work created astonishing visions of ancient and modern worlds. His fantasy films include *Barron Munchausen* (Grand Prix, Cannes, 1964), *The Stolen Airship* (1960, a Jules Verne tale of boys who meet Captain Nemo, 35mm, color), *Journey to the Beginning of Time* (1954, boys venture to the age of dinosaurs, 35mm color), and *The Fabulous World of Jules Verne* (1958, it combines moments from the books *20,000 Leagues Under the Sea* and *An Invention for Destruction*, 35mm, b/w).

There is also a program of funny Zeman shorts that feature his animated alter ego Mr. Prokouk. The program also includes his first film, *The Christmas Dream*, 1946 and a short that sounds simply amazing. *Inspiration*, 1948, "is a love story set in a single drop of water, which Zeman animated by heating and bending fragile blown-glass figures!" .

The Starewicz program on Saturday, May 19 at 3:30 & 7:30 includes several of his unusual puppet films including 3 made in Russia in 1911 (*Cameraman's Revenge*, *Insect's Christmas*, and *The Ant and the Grasshopper*). His stop-motion work using real insect parts on armatures and other techniques still amazes and delights audiences.

Alexander Ptushko's feature *New Gulliver* (Sunday, May 20 at 5:30 pm) was released in 1935, 2 years before Disney released *Snow White*. It is the story of a man (Petya) who falls asleep while reading *Gulliver's Travels*. He finds himself in a world full of Lilliputs (over 3,000 miniature figures were used in the stop-motion sequences). Ptushko placed his Lilliputs in a world similar to Russia in the 1930's, so there is a jazz band, mechanized tractors and "in the best revolutionary spirit a miniaturized workers' proletariat who rises up with the help of the giant Petya!" (PFA program notes) "In addition to the technical finesse with which the puppets are managed, the film hasŠ genuine wit in its sly assault on bourgeois institutions." (NY Times, 1935). Prescott Wright saw the film years ago and highly recommends ASIFA members see this interesting historic landmark.. (35mm, b/w, English subtitles)

Ptusko's *Sampo*, 1959. Thurs. May 24, 7 pm, is being presented in its complete wide screen form for the first time in the US (a chopped up short pan and scan version was released years ago as *The Day the Earth Froze*). The fantasy concerns a witch who tries to obtain a mill that can produce endless amounts of gold, salt and grain. When the hero tries to stop her she steals the sun, plunging the earth into darkness. There is a fire breathing iron horse, a talking tree, and other imaginative elements in the film. (35mm, color, scope, English subtitles)

Ptushko's *Stone Flower*, 1946, Sunday, May 27, 5:30, was Russia's first all color feature and *Life Magazine* noted it was "delightfully done, no propaganda, no moral." The plot concerns the magical Queen of Copper Hill who seduces a stone sculptor into joining her in her underworld kingdom. Lots of supernatural splendor in this tale. It was a popular success when it was released.

The series includes a lot of other features for us to discover. For example *Vly* by Ptushko on June 7 is a horror-fantasy film about a priest locked in a church full of grotesque demons and gargoyles (based on a story by Gogol). The PFA's film calendar provides a great deal more information about these works. A list of the films and show times appears in the newsletter's "local screenings" section.

FOR THE BIRDS HELLO DOLLY! SPIKE & MIKE'S 2001 CLASSIC FESTIVAL OF ANIMATION RETURNS TO THE BAY AREA WITH LOTS OF CROWD PLEASERS! MOST HAVE NOT BEEN SEEN HERE BEFORE Animation fans should enjoy Spike & Mike's 2001 Classic Festival of Animation, which opened in the San Francisco at the Castro last week. This year's eclectic mix showcases short films that are full of delightful surprises. They come from nine countries (France, Chile, Italy, Japan, Czechoslovakia, The Netherlands, Australia, USA and England).

The program features this year's Oscar winner *Father and Daughter* and a dozen other works that I think are really nice. There is also one that I think is a real gem, a couple that didn't interest me and one work that I thought was awful.

Father and Daughter is by world-renowned animator Michael Dudok De Wit. (He also won an Oscar nomination for *Monk and the Fish*, 1995) The artwork is a joy to watch and the story is sophisticated and understated. It may stimulate your imagination about what happened.

Among the works in the program that also impressed me are *For The Birds* from Pixar, *Insect Poetry* by Marilyn Zornado and her friends from Vinton's studio in Portland, Europe and Italy, a very clever comic work by Italy's Bruno Bozzetto, and *Hello Dolly!* by Mariko Hoshi (a Bay Area animator). I also liked for a variety of reasons *The Man with the Beautiful Eyes* by Jonathan Hodgson of England, *Ill Communication* by Danny Capozzi of England, *The Last Drawings of Canaletto* by Cameron McNall, *Metropopular* by Jonah Hall from PDI, *The Pigion and the Onion Pie* by Stephen Holman and Josephine Huang (how do people create strange stories like this one? - the mind is a wonderful thing) and a couple of other works.

I enjoyed almost everything in the program except *Rejected* by five-time Spike and Mike participant, Don Hertzfeldt. It was given an Oscar nomination this year and has won several other honors. Go see it and decide for your- self if it is a hit, a miss or really awful.

Rejected consists of several commissioned works that were rejected by sponsors after they were made. People who have worked on sponsored films seem to have a special place in their heart for works that are critical of sponsors including *I Like It* by Buzzco and *New Fangeled* by George Griffin. Unfortunately I find *Rejected* poorly written, poorly organized and poorly made. The stick figure style of animation has been used to good advantage by several directors including George Evelyn in his delightful "Stick Figure Theater" segments made a few years ago by Colossal for Liquid Television and Tex Avery in *Porky's Preview*, 1941. I do not feel Hertzfeldt's latest work uses the approach to good advantage, but a lot of people disagree with me.

My favorite film in the program is an old gem by Michel Ocelot of France. *The Prince and the Princess* was made in the 1980's using cut-out/silhouette animation. It wasn't widely seen, so I'm glad the program includes it. I suspect many of you will remember this film many years from now for both its beautiful animation and delightful comedy.

The program will be at the Castro Theatre 429 Castro, SF, (415) 621-6120, April 27-May 9; Grand Lake Theatre 3200 Grand Ave, Oakland, (510) 452-3556, May 4-17; Oaks Theatre 1875 Solano Ave, Berkeley, (510) 526-1836, May 4-24; Orinda Theater 2 Orinda Square, Orinda, (925) 254-9060, May 4-24; Rafael Film Center 1118 4th St, San Rafael, (415) 454-1222, May 11-24; Towne Theater 1433 The Alameda, San Jose, (408) 287-1433, May 11-June 7; Roxy Stadium 14 85 Santa Rosa Ave, Santa Rosa, (707) 522-0330, May 18-31 and Roxie Cinema 3117 16th Street, SF, (415) 863-1087, May 27 & 28.

WILD BRAIN COMPLETES A DELIGHTFUL OPENING FOR CARTOON NETWORK'S "THE CHUCK JONE SHOW" George Evelyn directed the graphic package for the show that

includes a 30 second opening, a 10 second close and several short "we will be right back" messages. He animated new versions of landmark images by Jones that appear in some of his greatest hits.

The opening sequences begin with rough pencil test drawings of characters. They are next seen as finished drawings and finally with fully rendered backgrounds. These sequences will hopefully remind TV viewers that an artist created them. The opening ends with the characters surrounding a portrait of Jones. The end "close" goes from fully rendered art to a pencil image of Roadrunner about to be blown apart by a device from Acme. (Of course it isn't functioning properly.) As the final curtain drops we hear an off-screen "boom." Thank you Mr. Jones for these golden moments, and thank you Mr. Evelyn for refreshing our memories.

The crew working on these visuals includes Gisela Hermeling, art production supervisor; Eric Schweikert, technical director, and animators Brad Rau, Aaron Sorenson, Alan Sperling, Ralph Fernan and Aichu So. The assistant animators on the project were Cindy Ng, Billy Burger, Chris Carter, Granger Davis, Heiko Drengenberg, Emile Dunonslet, Sam Hood, Christine Lacore, James Munro, Ivan Spiridonov, Armanda Tsoukanelis, Lyra Warren, Celeste Moreno and Vaughn Ross. Tod Polson created the backgrounds. The digital ink and paint crew included Danya O'Brien, Isaac Payne, Carter Tomassi, Kenrick Walz and Bryan Dawson.

ASIFA-SF DUES ARE BEING RAISED \$4 A YEAR TO COVER OFFICE DEPOT'S DOUBLING THE COST OF PRINTING THE NEWSLETTER They had really low rates for years which helped us keep membership dues at \$18 a year. Shirley Smith is trying to find a less expensive printer, but Office Depot's rates are apparently competitive with Kinko and other major copy services. Since we have been slowly spending more than we take in, your board voted to raise dues on May 1.

PIXAR, LASSETER SIGN TEN YEAR DEAL Pixar executive vice president and two-time Oscar-winning director John Lasseter has signed a new ten year contract to provide his services exclusively to the studio. "John Lasseter, more than anyone else, has shaped Pixar into the world-class animation studio it is today. With John leading our creative team for the next decade, our dream of nurturing a golden age of animation at Pixar may come true," said Pixar CEO Steve Jobs.

Lasseter, currently in development on his fourth feature, has directed Toy Story (1995), A Bug's Life (1998) and Toy Story 2 (1999). their combined worldwide box office receipts total over \$1.2 billion to date. The studio's next feature, Monsters, Inc. is scheduled for a November 2, 2001 release.

"It's the dream of every animator and storyteller to help build a studio from scratch that embraces the creative values we hold dear," said Lasseter. "A place like Pixar doesn't happen often, and I feel like one of the luckiest guys on earth." From AWN on the Internet

JONATHAN LUSKIN DIRECTED "LIFE DURING WARTIME" at Teatro 150, to May 12, (415) 433-1172.. Luskin was a cgi animator at ILM for several years.

PDI/DREAMWORKS "SHREK" IS A DELIGHTFUL COMEDY THAT MAKES MAJOR ADVANCES IN THE ART OF ANIMATION When I saw the first TV commercials for Shrek I

feared the worst. Much of what I saw was ugly. When I went to a press preview I was taken by surprise the moment the first images came on the screen. Within the opening moments of the film I was amazed at PDI's ability to create lush textures and details. In one early sequences we see Shrek taking a mud bath. While kids will love the realistic goo and slime, I was impressed with the suggestion of muscles under the skin in the close-up of his bare back.

Shrek turns out to be visually stunning much of the time and genuinely funny. The first images drew me into the film and allowed my suspension of disbelief to take over. Soon, I was in total awe of the spectacular scenery, sets, costumes, unusual characters, gorgeous colors and dozens of other elements. I was laughing out loud at some of the jokes (groaning at others, but there are so many good ones the duds don't matter) and was thoroughly convinced I was going on an incredible adventure. I wasn't thinking about all the factual information I already knew about this production. In my mind all the characters were real including the Dragon. Intellectually I knew that all the visuals were created by computers, but for 80 minutes they were alive.

We are witnessing a remarkable period of filmmaking. While each computer generated film has advanced the art to some degree, Shrek makes major advances and takes the art form to new heights. The quality of PDI's work is so good that I wanted to believe that the entire film was shot on location. I especially loved the beautiful landscapes including fields of flowers blowing in the breeze. I even accepted the characters as being real, even though they are not photo-realistic.

Shrek, based on a story by the humorist William Steig, dares to go where few films tread. It is an irreverent fairy tale in the tradition of the "Fractured Fairy Tales" from The Rocky and Bullwinkle Show. It pokes fun at numerous sacred cows of our culture from Small World at Disneyland to a TV's "Dating Game." There is an overabundance of humor and it is delivered at a rapid pace. While the sophisticated dialog and bizarre story should appeal to most adults, there is romance for the girls and some grime, slime and bathroom humor for boys. Up tight parents may be offended, but they will approve of the film's positive moral messages.

The story begins with an ugly reclusive ogre named Shrek (Mike Myers) enjoying life living alone in a dismal swamp. Suddenly he is invaded by annoying fairy tale characters (some made famous by Mr. Disney). They have been banished from their kingdom by the evil Lord Farquaad (John Lithgow). Determined to save his home from the pesky creatures, Shrek sets off to deal with Lord Farquaad. He is joined by a wisecracking donkey (Eddie Murphy) that will do anything except shut-up.

Shrek's journey is full of unorthodox moments. The rescue of Princess Fiona (Cameron Diaz) isn't your typical fairy tale adventure, nor is the love affair between the donkey and the fire breathing dragon (relax, it is a female dragon). There are lots of delightful surprises, unusual twists and wonderful laughs awaiting you if you decide to see Shrek.

For more on Shrek see the cover story of FilmTape World's May issue. It is my interview with Raman Hui, Supervising Animator about the making of the film. KC

PS Don't be surprised if there is a sequel and other spin-offs.

PDI PROMOTES MARILYN FRIEDMAN TO HEAD OF STUDIO RECRUITMENT AND STAFFING In recent years she has been a friend of our ASIFA chapter by finding people on their staff to talk at our events. She has also provided us with reels for our annual open screenings and information for our newsletter. We wish her well in her new position.

Shoshana Abrass has been named head of systems. She was a systems administrator at PDI before moving south to work for DreamWorks. She is back managing a staff of 12.

BULGARIAN SCIENCE FICTION WRITER BORIS BELOVARSKI IS IN THE BAY AREA AND DEVELOPING A TV SERIES BASED ON HIS WRITINGS For information go to www.timeship.tv There are several press clippings about his work and other informative sections. It wasn't clear to me how animation will be used in the TV series (all animation, part or effects work & live action), but it sounds like a great undertaking.

"MORE THAN 75,000 DOT-COM EMPLOYEES HAVE RECEIVED PINK SLIPS SINCE DECEMBER, 1999 - SOME 45 PERCENT OF THEM IN THE BAY AREA." The New York Times, April 15, 2001. p."bu 13." The article is about people who are being laid off and are going into the Peace Corps to teach technology in developing nations.

KQED IS OFFERING A \$10,000 OWENS INDEPENDENT VISION POST PRODUCTION AWARD Animated and part-animated projects will be considered, especially ones that conform to standard TV lengths (i.e. 26:40 min). Winner must grant KQED the right to air their work locally. Deadline is May 30 and project must be completed by summer, 2002. Karl Cohen can send you an application or contact Peter J. Owens Independent Vision Award, 2601 Mariposa, SF, CA 94110-1426

THE U. C. THEATRE CLOSED FOR GOOD MARCH 29, 2001. IT HAD SHOWED 100s OF RARE ANIMATION PROGRAMS OVER THE YEARS including Karl Cohen's Forbidden Animation program in 1997. Garry Meyers, who ran the theatre for many years is now running the Balboa in SF.

LOCAL SCREENINGS

Karel Zeman Animation at the Pacific Film Archive:

Fri. May 4, 7:00, The Stolen Airship, 9:10, The Jester's Tale

Sat., May 5, 7:00 Journey to the Beginning of Time, 8:35 Treasure of Bird Island

Fri. May 11, 7:00 Zeman Shorts, 8:55 The Fabulous World of Jules Verne

Sat. May 12, 7:00 Baron Munchausen, 9:10 Kraba - The Sorcerer's Apprentice

Sun. May 13, 5:30 The Thousand and One Nights

Friday, May 18 Free Public Screenings of Animation Finals at SF State, at 2:30 (digital displays in the lobby) and 3 pm (projected work in the Coppola Theatre, FA 101). The S. F. State Film Finals (mostly or all live action films) at 7 pm in the McKenna Theatre. Free reception at 6 pm in the Casablanca Room (CCA 158)

Saturday, May 19, 3:30 and 7:30 Starewicz Puppet Films with music performed live by The Tin Hat Trio, PFA

Saturday, May 19, 8:30, ARK EMERGENCY BENEFIT at ATA (992 Valencia). Ark "is a cell of mischievous media artists with bold graphics and aggressive wit, who have launched a steady stream of scathingly critical initiatives against the corporate take-over of the democratic process, not to mention everyday life. During the Fall 2000 elections, arc agent James Baumgartner was sued by the Chicago Board of Education for his satirical voteauction.com website. Though the ACLU has agreed to defend him, James has already racked up a \$10,000 legal debt. Here's a friggin' raft of prank videos - plus a half-hour set of Negativland music videos - towards his free speech defense."

Features by Alexander Ptushko at Pacific Film Archive

Sunday, May 20, 5:30, The New Gulliver

Thursday, May 20, 7:00, Sampo

Sunday, May 27, 5:30, Stone Flower

Sunday, June 3, 5:30, Ruslan and Ludmila

Thursday, June 7, 7:00, Viy

Friday, June 8, 7:30, Aerograd, 9:15, The Letter that was Never Sent

Friday, June 2, 7 pm, BARRY PURVES SCREENING AND DISCUSSING 5 OF HIS ANIMATED FILMS at the Women's Building as part of the National Queer Arts Festival. 3543 18th St. (415) 552-7709 www.staytooned.com

NATIONAL NEWS

SOTHEBYS IS AUCTIONING OFF 325 LOTS OF EARLY ANIMATION ART - MOST OF IT IS PRE-WAR DISNEY Go to www.sothebys.com and look for the Jeff Lotman collection sale. Go before May 5 and see part 1 up for sale. Part 2 runs from May 11 to June 1. It is (was) a very impressive collection!

"ANIMATION BLAST" #6 HONORS THE GREAT, BUT OBSCURE, CARTOON DESIGNER TOM OREB, PLUS THE AMAZING JIM TYER I didn't know Oreb was the

designer of several striking looking films from Disney and MGM. His credits include Toot, Whistle Plunk and Boom (Oscar, 1953) and Tex Avery's Symphony in Slang, 1951. He also designed characters for Disney features and Disney TV commercials, but he was not given screen credit very often. Now you can read about his impressive body of work in a long in-depth tribute (18 pages with lots of illustrations).

The second artist being honored is Jim Tyer. He spent years animating for Van Buren, Harman-Ising, Fleischer, Terrytoons, Famous and other studios. In his later work he experimented with creating extreme and outrageous shapes for his character's faces and bodies as he put them through their paces. He broke a lot of rules and is dearly loved by a lot of people from Jerry Beck to John Kricfalusi. His imagination knew no boundaries and in a section about him by Ralph Bakshi (Bakshi was an inker when he worked with Tyer) he is reported to have given him the following advice. "1. Everything moves. 2. Don't worry about the model chart. 3. Either have fun with the drawing or go home. 4. There ain't nobody to follow but yourself." This is a great 20 page tribute in an exceptional issue.

Animation Blast's new 52 page issue costs \$6. (Several pages are in color.) Copies are available from Tower Records, Comic Relief in Berkeley, by mail from Amid Amidi, PO box 260491, Encino, CA 91426-0491 and from Animation Blast.com.

A MEMBER GETS AN ADVANCED LOOK AT DISNEY'S "ATLANTIS" He writes, "it was a major disappointment. When I think of the lost city, I expect amazing graphics. Instead we get characters looking like they came from TV with nice backgrounds but nothing special. Surprisingly there are no songs though it lends itself to them as the film follows Disney formula pretty much. Opens with subtitles which will throw kids off and then everyone stops speaking 'Atlantisian' and speaks English. Even the comic relief characters are only of mild interest. One of them chain smokes! In a Disney film? The film opens well but after 30 minutes, people were falling asleep. I think much will bore audiences of all ages. There goes my stock again."

ASIFA-EAST SHOWED A RARE FEATURE THAT INCLUDED ANIMATION FROM THE HUBLEY STUDIO The feature was The Four Poster, 1952, with Rex Harrison and Lilly Palmer. Art Babbitt and Lou Keller did the animation, Paul Julian designed the layouts and backgrounds and John Hubley was the animation director of the animated sequences in this live action feature. Apparently it isn't available on video or from film libraries.

GRAND VALLEY STATE UNIVERSITY IN MICHIGAN HAD AN IMPRESSIVE GALLERY EXHIBIT, SCREENINGS AND TALKS FEATURING THE WORK OF KAREN AQUA, JOHN CANEMAKER, JOAN GRATZ, FAITH HUBLEY AND DEANNA MORSE The exhibit of work by 5 American independent animators was on display Feb. 26-March 30. While the exhibit was up Hubley and Aqua introduced screenings of their work and Morse gave a gallery talk. The gallery published a handsome and informative catalog to go with the exhibit. The university is in Allendale, Michigan.

ASIFA-HOLLYWOOD SHOWED "A LOST ANIME CLASSIC" On April 25 Jerry Beck introduced a screening of a 16mm print of Jack and the Witch (Shonen Jack to Mahoutsukai), released in 1967 by Toei. Their print was a dubbed version that was distributed to US TV stations in

the late '60's. The flyer for the program calls it, "a wacky, sometimes psychedelic, cartoon adventure, both intentionally and unintentionally funny (the awful dubbing doesn't help)."

THE GENE SISKEL FILM CENTER IN CHICAGO PRESENTED AN 80 FILM TRIBUTE TO CHUCK JONES It is a rare occurrence when somebody does a 35mm program honoring an animator, so I was amazed that the film archive connected with the Chicago Art Institute showed 8 programs of shorts plus Chuck Jones: Extremes and In-Betweens, a new documentary on Jones. Greg Ford and Ronnie Scheib were the guest curators behind this series.

PASSING

BILL HANNA DIED IN MARCH Trying to find correct information about him was an interesting adventure into how lax animation scholarship has been. He was born in either 1910 or 1911 in New Mexico (different books give different dates). He had no formal art training when he landed a job with Harman-Ising in 1931 according to Maltin, but Lenberg says he left his career in engineering, took a crash course in art and got a job with Harman-Ising when they were producing animation for MGM. That would have him joining the firm about 1934.

At Harman-Ising he rose in the ranks and directed the beautiful fantasy *To Spring* in 1936. When Harman-Ising lost their contract to produce shorts for MGM in 1937 he, like most of the staff, left and was hired by MGM for their new animation dept.

At MGM he was paired up with Joe Barbera by producer Fred Quimby right after joined MGM according to one book, in 1938 according to another and in 1939 according to Hanna in another book. Their first project together wasn't very successful (an unnamed cartoon), but other books say their first project put a cat and mouse together. The film was called *Puss Gets The Boot* (1940) and it went on to win an Oscar nomination.

According to an ABC report "in the next 12 years the pair's creations would garner them 12 nominations and 7 Oscars over the course of more than 100 cartoons." In 1957 MGM decided to close their animation studio and laid-off their staff.

This was a turning point in animation history, but what happened next isn't well known. According to official biographies Hanna opened Hanna-Barbera Studios, invented limited animation for TV, did *Ruff and Reddy* (1957), *Huckleberry Hound*, *Flintstones*, *Jetsons*, *Smurfs*, *Yogi Bear*, etc. and lived happily ever after.

If you look deeper there are other versions of the story. Hanna-Barbera didn't invent limited animation even though Hanna once told me that was one of his accomplishments. A few limited animation shows made for TV date before *Ruff and Reddy* including *Alex Anderson* and *Jay Ward's Crusader Rabbit* (1950) and some of the work of Sam Singer (see the next obituary).

Hanna also denied to me in the late '80's that he tried to produce a *Crusader Rabbit* series in 1957 without the help of Joe Barbera. It didn't matter to him that Mike Lah, a former MGM animation director and partner of Hanna in the project; voice actress Lucille Bliss (the original voice of

Crusader), Alex Anderson (the creator of the show) and others remembered his participation in this failed business venture. Fortunately he told Keith Scott (The Moose That Roared, 2000) a few years later that he had begun work on new Crusader Rabbit episodes in 1957 and that the project came to a halt due to copyright problems. It is much neater to claim you always stuck with your business partner and say that you invented limited animation for TV.

Obits are supposed to be nice, so I wont discuss the labor problems, the dozens of awful shows produced by Hanna-Barbera or the negative statements people have made about working for that company. Perhaps it is better to say he gave out-of-work Disney, MGM, Warner Bros. etc. artists employment after the theatrical animation industry shut-down, and not discuss the quality of the work (Preston Blair said he was like "a race horse pulling a milk wagon"). Hanna will certainly go down in history for keeping the industry alive during a dark period, but at what cost?

I would rather remember him for the wonderful Tom and Jerry series, but his professional life didn't end in 1957. He did provide employment for a lot of wonderful people when there were few alternatives for finding work in the animation industry.

Almost everyone who will read this grew up watching the company's products. Last month I asked people to contribute to this obit (nobody did) as I wanted to have some statements by others to balance my own feelings about his later work. I didn't grow up watching their shows so I can not tell you about the joy they gave me as a kid. I grew up watching theatrical cartoons in real movie theaters and for me TV animation was usually awful stuff until The Simpsons and Ren and Stimpy came along.

If my opinions get you mad or otherwise give you the urge to write something down, feel free to send in your statements by May 23 for the June newsletter. (karlcohen@earthlink.net or 478 Frederick, SF CA 94117)

SAM SINGER DIED AT AGE 88, DIRECTOR AND PRODUCER OF EARLY TV

ANIMATION Singer's work is unknown to most animation fans, but there was a time his work was widely seen. His animated Adventures of Pow Wow the Indian Boy was made for the Captain Kangaroo Show from 1957-'60. There were episodes Bunky and Pepito made about the same time and Courageous Cat in 1960. Paddy Pelican, originally a puppet show in the early '50's, was the star of six 5 minute b/w episodes by Singer in 1957. The finished films were nicely drawn pencil tests!

He began the Sinbad the Sailor show in 1965 (pilot) but lost the series to Hanna-Barbera (Woolery, Children's Television gives him credit as producer). He was involved with a Tubby the Tuba film, but lost that project as well. His name is associated with a few other projects, but it would take more research to find out what his involvement was.

When I spent an evening interviewing Singer about 1995 he proved to be a fascinating character. He swore constantly, was a heavy cigar smoker, and he needed two canes to walk due to arthritis. The walls of his apartment in Hollywood were covered with his paintings.(he gave me one and it now hangs in my office) and the rooms contained piles of books and papers.

As Singer talked it became obvious that what he was telling me about his career wasn't always true! He claimed to have been at Disney from 1933 to the early 40's and rose to become a "unit director" on Snow White, Bambi, Pinocchio and Fantasia. I later contacted the Disney Archives and David Smith wrote back "we show a Sam Singer working here as an apprentice animator for only 6 months, from January 18, 1937 to July 7, 1937."

I later found a brief biographical note that Samuel Bart Singer contributed to the 1969 Motion Picture Almanac. He said he was born in 1913, he had studied at the Chicago Art Institute and Univ. of Illinois, he worked for Disney in 1937, Warner Bros. 1939-'40, Columbia 1940-'42; was a producer and/or director of live TV in Chicago from 1946-'52, and was the prod.-dir. of the Courageous Cat series (1960).

Singer told me that one of his jobs in Chicago was doing about 200 quick sketch illustrations a day to illustrate stories told on the Uncle Mistletoe Show He also did various art jobs for Marshall Field Co. and Ovaltine (sponsor of local TV shows).

Late in his life he manufactured a very handsome portable drawing disc for animators and taught drawing in Los Angeles. Amid Amidi, who writes Animation Blast, took his class as he knew of Singer from the Spring, 1996 issue of Animato that called him animation's Ed Wood (Singer had a lot more talent and skill). Amidi said most of the students left before the class ended due to Singer's language (he called women "toots," "sweetheart," etc. and he tended to insult you if he didn't like your drawings). Amidi said Singer still loved to draw with his students and that he was highly skilled at it. He showed an animatic in class for his Tubby the Tuba and "his storyboard drawings were exquisitely rendered in color pencils and well laid out; it showed an artist whose talents far exceeded that of Ed Wood's."

CONFERENCES AND TRADE SHOWS

MEET AUTHORS AND ARTISTS AT OUR WEDNESDAY, MAY 30th ANIMATION BOOK FAIR. ED HOOKS, AUTHOR OF "ACTING FOR ANIMATORS" AND NIK PHELPS, CREATOR OF THE NEW CD "FETCH" TO SPEAK. OTHER LUMINARIES TO BE ON HAND TO MEET INFORMALLY WITH YOU, TO TALK ABOUT THEIR WORK AND TO SIGN COPIES FOR PEOPLE INTERESTED IN OBTAINING THEM. PLUS A LIVE PERFORMANCE OF THE "DAY ELMO AARDVARK MET VA VA LA VOOM" This should be a fascinating evening where you can meet the creators of "intellectual property" related to animation. The event features talks by Ed Hooks, teacher and author of Acting for Animators and Nik Phelps, head of The Sprocket Ensemble, who has just released a CD of their music for animated shorts.

You can meet and talk with Nina Paley (original art), Michaela Pavlatova (making available some cutouts from Forever and Forever), Russell Merritt (author of Walt in Wonderland, an important

study of Disney's silent films), Karl Cohen (author of Forbidden Animation: Censored Cartoons and Blacklisted Animators), Arnaldo Laboy (creator of The Adventures of Poyi and Ubo) and Chris Lanier (author/illustrator of the graphic novel Combustion). All will bring things to sign.

Will Ryan, the creator of Elmo Aardvark and a former president of ASIFA-Hollywood, is coming up from Los Angeles with voice actress Diane Michelle to promote the great Elmo Aardvark: Outer Space Detective show, distributed by Mondo Media. Both are voice actors (Goofy, Daisy Duck, Tigger for Disney, Yosemite Sam, characters on Batman, etc.) Ryan will sign copies of his out-of-print

Elmo Aardvark CD and copies of The Elmo Aardvark Miracle: How to Make a Movie with No Money (if it is back from the publishers). They will also perform strange and unusual acts before your very eyes!

CONGRATULATIONS FILM ARTS FOUNDATION ON YOUR 25TH BIRTHDAY A big celebration party with live music by Papa and his Band, projections, etc. will take place May 17. For details www.filmarts.org or 1 552-6350

ABOUT ED HOOKS AND "ACTING FOR ANIMATORS" A lot of animators in the Bay Area and around the world have studied with Hooks. His new book has been getting great reviews. Amazon.com writes "Until now, animators who have wanted to learn about acting have had no option but to study the subject side by side with stage and movie actors, a group that uses acting techniques in a wholly different way. Ed Hooks offers a better alternative with Acting for Animators, the first book about acting theory and technique written specifically for the animator. "

Amazon puts readers' comments about books on their site.. One person wrote, "This is a dense, thoughtful work, of lasting value, which will reward careful study. Hooks writes in an easily readable style, concisely and directly, about the most difficult and elusive portion of the art of character animation. Buy this book before you choose software or other animation tools. You will find that Hooks' advice will also improve your script and storyboard development. One of the problems with books about computer-based character animation, such as my own 'Character Animation In Depth', is that they lose value as the software they are written for becomes obsolete. Hooks' work will retain its value for a long time. Buy a copy, keep it handy, reread it frequently, and don't loan it to friends; you won't get it back. Give them one instead."

Another review concludes, "Overall, best money I've spent on an animation book in a long time! I don't care how long you've been in the industry, you'll learn something from this book!"

Brad Bird, director of Iron Giant and Family Dog, says "Hooks has made a valuable contribution toward deepening our understanding."

Hooks will be signing copies at tonight's event. This will be one of his last appearances in the Bay Area as he plans to live in Chicago part of the year and in Rome the rest of the year.

THE PACIFIC FILM ARCHIVE IN BERKELEY WILL PRESENT 9 EXTRAORDINARY

PROGRAMS BY THE CZECH DIRECTOR KAREL ZEMAN, FOLLOWED BY 7 EVEN RARER PROGRAMS BY THE RUSSIAN DIRECTOR ALEXANDER PTUSKO, AND A NIGHT OF PUPPET ANIMATION BY LADISLAW STAREWICZ (WITH LIVE MUSIC BY THE TIN HAT TRIO) Can there be too much of a good thing? If you really love animation, especially Ray Harryhausen type fantasy films, do your best to see all or most of these unusual programs. Most of the works to be shown combine stop-motion and special effects with live action. Most have never been seen in the Bay Area, or if they were shown it was decades ago.

The Zeman series begins Friday and Saturday, May 4 and 5 and continues on Fri. - Sunday May 11, 12 & 13. Karel Zeman's work created astonishing visions of ancient and modern worlds. His fantasy films include Barron Munchausen (Grand Prix, Cannes, 1964), The Stolen Airship (1960, a Jules Verne tale of boys who meet Captain Nemo, 35mm, color), Journey to the Beginning of Time (1954, boys venture to the age of dinosaurs, 35mm color), and The Fabulous World of Jules Verne (1958, it combines moments from the books 20,000 Leagues Under the Sea and An Invention for Destruction, 35mm, b/w).

There is also a program of funny Zeman shorts that feature his animated alter ego Mr. Prokouk. The program also includes his first film, The Christmas Dream, 1946 and a short that sounds simply amazing. Inspiration, 1948, "is a love story set in a single drop of water, which Zeman animated by heating and bending fragile blown-glass figures!" .

The Starewicz program on Saturday, May 19 at 3:30 & 7:30 includes several of his unusual puppet films including 3 made in Russia in 1911 (Cameraman's Revenge, Insect's Christmas, and The Ant and the Grasshopper). His stop-motion work using real insect parts on armatures and other techniques still amazes and delights audiences.

Alexander Ptushko's feature New Gulliver (Sunday, May 20 at 5:30 pm) was released in 1935, 2 years before Disney released Snow White. It is the story of a man (Petya) who falls asleep while reading Gulliver's Travels. He finds himself in a world full of Lilliputs (over 3,000 miniature figures were used in the stop-motion sequences). Ptushko placed his Lilliputs in a world similar to Russia in the 1930's, so there is a jazz band, mechanized tractors and "in the best revolutionary spirit a miniaturized workers' proletariat who rises up with the help of the giant Petya!" (PFA program notes) "In addition to the technical finesse with which the puppets are managed, the film hasŠ genuine wit in its sly assault on bourgeois institutions." (NY Times, 1935). Prescott Wright saw the film years ago and highly recommends ASIFA members see this interesting historic landmark.. (35mm, b/w, English subtitles)

Ptusko's Sampo, 1959. Thurs. May 24, 7 pm, is being presented in its complete wide screen form for the first time in the US (a chopped up short pan and scan version was released years ago as The Day the Earth Froze). The fantasy concerns a witch who tries to obtain a mill that can produce endless amounts of gold, salt and grain. When the hero tries to stop her she steals the sun, plunging the earth into darkness. There is a fire breathing iron horse, a talking tree, and other imaginative elements in the film. (35mm, color, scope, English subtitles)

Ptushko's Stone Flower, 1946, Sunday, May 27, 5:30, was Russia's first all color feature and Life

Magazine noted it was "delightfully done, no propaganda, no moral." The plot concerns the magical Queen of Copper Hill who seduces a stone sculptor into joining her in her underworld kingdom. Lots of supernatural splendor in this tale. It was a popular success when it was released.

The series includes a lot of other features for us to discover. For example Vly by Ptushko on June 7 is a horror-fantasy film about a priest locked in a church full of grotesque demons and gargoyles (based on a story by Gogol). The PFA's film calendar provides a great deal more information about these works. A list of the films and show times appears in the newsletter's "local screenings" section.

FOR THE BIRDS HELLO DOLLY! SPIKE & MIKE'S 2001 CLASSIC FESTIVAL OF ANIMATION RETURNS TO THE BAY AREA WITH LOTS OF CROWD PLEASERS! MOST HAVE NOT BEEN SEEN HERE BEFORE Animation fans should enjoy Spike & Mike's 2001 Classic Festival of Animation, which opened in the San Francisco at the Castro last week. This year's eclectic mix showcases short films that are full of delightful surprises. They come from nine countries (France, Chile, Italy, Japan, Czechoslovakia, The Netherlands, Australia, USA and England).

The program features this year's Oscar winner Father and Daughter and a dozen other works that I think are really nice. There is also one that I think is a real gem, a couple that didn't interest me and one work that I thought was awful.

Father and Daughter is by world-renowned animator Michael Dudok De Wit. (He also won an Oscar nomination for Monk and the Fish, 1995) The artwork is a joy to watch and the story is sophisticated and understated. It may stimulate your imagination about what happened.

Among the works in the program that also impressed me are For The Birds from Pixar, Insect Poetry by Marilyn Zornado and her friends from Vinton's studio in Portland, Europe and Italy, a very clever comic work by Italy's Bruno Bozzetto, and Hello Dolly! by Mariko Hoshi (a Bay Area animator). I also liked for a variety of reasons The Man with the Beautiful Eyes by Jonathan Hodgson of England, Ill Communication by Danny Capozzi of England, The Last Drawings of Canaletto by Cameron McNall, Metropopular by Jonah Hall from PDI, The Pigion and the Onion Pie by Stephen Holman and Josephine Huang (how do people create strange stories like this one? - the mind is a wonderful thing) and a couple of other works.

I enjoyed almost everything in the program except Rejected by five-time Spike and Mike participant, Don Hertzfeldt. It was given an Oscar nomination this year and has won several other honors. Go see it and decide for your- self if it is a hit, a miss or really awful.

Rejected consists of several commissioned works that were rejected by sponsors after they were made. People who have worked on sponsored films seem to have a special place in their heart for works that are critical of sponsors including I Like It by Buzzco and New Fangeled by George Griffin. Unfortunately I find Rejected poorly written, poorly organized and poorly made. The stick figure style of animation has been used to good advantage by several directors including George Evelyn in his delightful "Stick Figure Theater" segments made a few years ago by Colossal for Liquid Television and Tex Avery in Porky's Preview, 1941. I do not feel Hertzfeldt's latest work uses

the approach to good advantage, but a lot of people disagree with me.

My favorite film in the program is an old gem by Michel Ocelot of France. The Prince and the Princess was made in the 1980's using cut-out/silhouette animation. It wasn't widely seen, so I'm glad the program includes it. I suspect many of you will remember this film many years from now for both its beautiful animation and delightful comedy.

The program will be at the Castro Theatre 429 Castro, SF, (415) 621-6120, April 27-May 9; Grand Lake Theatre 3200 Grand Ave, Oakland, (510) 452-3556, May 4-17; Oaks Theatre 1875 Solano Ave, Berkeley, (510) 526-1836, May 4-24; Orinda Theater 2 Orinda Square, Orinda, (925) 254-9060, May 4-24; Rafael Film Center 1118 4th St, San Rafael, (415) 454-1222, May 11-24; Towne Theater 1433 The Alameda, San Jose, (408) 287-1433, May 11-June 7; Roxy Stadium 14 85 Santa Rosa Ave, Santa Rosa, (707) 522-0330, May 18-31 and Roxie Cinema 3117 16th Street, SF,(415) 863-1087, May 27 & 28.

WILD BRAIN COMPLETES A DELIGHTFUL OPENING FOR CARTOON NETWORK'S "THE CHUCK JONE SHOW" George Evelyn directed the graphic package for the show that includes a 30 second opening, a 10 second close and several short "we will be right back" messages. He animated new versions of landmark images by Jones that appear in some of his greatest hits.

The opening sequences begin with rough pencil test drawings of characters. They are next seen as finished drawings and finally with fully rendered backgrounds. These sequences will hopefully remind TV viewers that an artist created them. The opening ends with the characters surrounding a portrait of Jones. The end "close" goes from fully rendered art to a pencil image of Roadrunner about to be blown apart by a device from Acme. (Of course it isn't functioning properly.) As the final curtain drops we hear an off-screen "boom." Thank you Mr. Jones for these golden moments, and thank you Mr. Evelyn for refreshing our memories.

The crew working on these visuals includes Gisela Hermeling, art production supervisor; Eric Schweikert, technical director, and animators Brad Rau, Aaron Sorenson, Alan Sperling, Ralph Fernan and Aichu So. The assistant animators on the project were Cindy Ng, Billy Burger, Chris Carter, Granger Davis, Heiko Drengenberg, Emile Dunonslet, Sam Hood, Christine Lacore, James Munro, Ivan Spiridonov, Armanda Tsoukanelis, Lyra Warren, Celeste Moreno and Vaughn Ross. Tod Polson created the backgrounds. The digital ink and paint crew included Danya O'Brien, Isaac Payne, Carter Tomassi, Kenrick Walz and Bryan Dawson.

ASIFA-SF DUES ARE BEING RAISED \$4 A YEAR TO COVER OFFICE DEPOT'S DOUBLING THE COST OF PRINTING THE NEWSLETTER They had really low rates for years which helped us keep membership dues at \$18 a year. Shirley Smith is trying to find a less expensive printer, but Office Depot's rates are apparently competitive with Kinko and other major copy services. Since we have been slowly spending more than we take in, your board voted to raise dues on May 1.

PIXAR, LASSETER SIGN TEN YEAR DEAL Pixar executive vice president and two-time Oscar-winning director John Lasseter has signed a new ten year contract to provide his services exclusively

to the studio. "John Lasseter, more than anyone else, has shaped Pixar into the world-class animation studio it is today. With John leading our creative team for the next decade, our dream of nurturing a golden age of animation at Pixar may come true," said Pixar CEO Steve Jobs.

Lasseter, currently in development on his fourth feature, has directed Toy Story (1995), A Bug's Life (1998) and Toy Story 2 (1999). their combined worldwide box office receipts total over \$1.2 billion to date. The studio's next feature, Monsters, Inc. is scheduled for a November 2, 2001 release.

"It's the dream of every animator and storyteller to help build a studio from scratch that embraces the creative values we hold dear," said Lasseter. "A place like Pixar doesn't happen often, and I feel like one of the luckiest guys on earth." From AWN on the Internet

JONATHAN LUSKIN DIRECTED "LIFE DURING WARTIME" at Teatro 150, to May 12, (415) 433-1172.. Luskin was a cgi animator at ILM for several years.

PDI/DREAMWORKS "SHREK" IS A DELIGHTFUL COMEDY THAT MAKES MAJOR ADVANCES IN THE ART OF ANIMATION When I saw the first TV commercials for Shrek I feared the worst. Much of what I saw was ugly. When I went to a press preview I was taken by surprise the moment the first images came on the screen. Within the opening moments of the film I was amazed at PDI's ability to create lush textures and details. In one early sequences we see Shrek taking a mud bath. While kids will love the realistic goo and slime, I was impressed with the suggestion of muscles under the skin in the close-up of his bare back.

Shrek turns out to be visually stunning much of the time and genuinely funny. The first images drew me into the film and allowed my suspension of disbelief to take over. Soon, I was in total awe of the spectacular scenery, sets, costumes, unusual characters, gorgeous colors and dozens of other elements. I was laughing out loud at some of the jokes (groaning at others, but there are so many good ones the duds don't matter) and was thoroughly convinced I was going on an incredible adventure. I wasn't thinking about all the factual information I already knew about this production. In my mind all the characters were real including the Dragon. Intellectually I knew that all the visuals were created by computers, but for 80 minutes they were alive.

We are witnessing a remarkable period of filmmaking. While each computer generated film has advanced the art to some degree, Shrek makes major advances and takes the art form to new heights. The quality of PDI's work is so good that I wanted to believe that the entire film was shot on location. I especially loved the beautiful landscapes including fields of flowers blowing in the breeze. I even accepted the characters as being real, even though they are not photo-realistic.

Shrek, based on a story by the humorist William Steig, dares to go where few films tread. It is an irreverent fairy tale in the tradition of the "Fractured Fairy Tales" from The Rocky and Bullwinkle Show. It pokes fun at numerous sacred cows of our culture from Small World at Disneyland to a TV's "Dating Game." There is an overabundance of humor and it is delivered at a rapid pace. While the sophisticated dialog and bizarre story should appeal to most adults, there is romance for the girls and some grime, slime and bathroom humor for boys. Up tight parents may be offended, but they will approve of the film's positive moral messages.

The story begins with an ugly reclusive ogre named Shrek (Mike Myers) enjoying life living alone in a dismal swamp. Suddenly he is invaded by annoying fairy tale characters (some made famous by Mr. Disney). They have been banished from their kingdom by the evil Lord Farquaad (John Lithgow). Determined to save his home from the pesky creatures, Shrek sets off to deal with Lord Farquaad. He is joined by a wisecracking donkey (Eddie Murphy) that will do anything except shut-up.

Shrek's journey is full of unorthodox moments. The rescue of Princess Fiona (Cameron Diaz) isn't your typical fairy tale adventure, nor is the love affair between the donkey and the fire breathing dragon (relax, it is a female dragon). There are lots of delightful surprises, unusual twists and wonderful laughs awaiting you if you decide to see Shrek.

For more on Shrek see the cover story of FilmTape World's May issue. It is my interview with Raman Hui, Supervising Animator about the making of the film. KC

PS Don't be surprised if there is a sequel and other spin-offs.

PDI PROMOTES MARILYN FRIEDMAN TO HEAD OF STUDIO RECRUITMENT AND STAFFING In recent years she has been a friend of our ASIFA chapter by finding people on their staff to talk at our events. She has also provided us with reels for our annual open screenings and information for our newsletter. We wish her well in her new position.

Shoshana Abrass has been named head of systems. She was a systems administrator at PDI before moving south to work for DreamWorks. She is back managing a staff of 12.

BULGARIAN SCIENCE FICTION WRITER BORIS BELOVARSKI IS IN THE BAY AREA AND DEVELOPING A TV SERIES BASED ON HIS WRITINGS For information go to www.timeship.tv There are several press clippings about his work and other informative sections. It wasn't clear to me how animation will be used in the TV series (all animation, part or effects work & live action), but it sounds like a great undertaking.

"MORE THAN 75,000 DOT-COM EMPLOYEES HAVE RECEIVED PINK SLIPS SINCE DECEMBER, 1999 - SOME 45 PERCENT OF THEM IN THE BAY AREA." The New York Times, April 15, 2001. p."bu 13." The article is about people who are being laid off and are going into the Peace Corps to teach technology in developing nations.

KQED IS OFFERING A \$10,000 OWENS INDEPENDENT VISION POST PRODUCTION AWARD Animated and part-animated projects will be considered, especially ones that conform to standard TV lengths (i.e. 26:40 min). Winner must grant KQED the right to air their work locally. Deadline is May 30 and project must be completed by summer, 2002. Karl Cohen can send you an application or contact Peter J. Owens Independent Vision Award, 2601 Mariposa, SF, CA 94110-1426

THE U. C. THEATRE CLOSED FOR GOOD MARCH 29, 2001. IT HAD SHOWED 100s OF

RARE ANIMATION PROGRAMS OVER THE YEARS including Karl Cohen's Forbidden Animation program in 1997. Garry Meyers, who ran the theatre for many years is now running the Balboa in SF.

LOCAL SCREENINGS

Karel Zeman Animation at the Pacific Film Archive:

Fri. May 4, 7:00, The Stolen Airship, 9:10, The Jester's Tale

Sat., May 5, 7:00 Journey to the Beginning of Time, 8:35 Treasure of Bird Island

Fri. May 11, 7:00 Zeman Shorts, 8:55 The Fabulous World of Jules Verne

Sat. May 12, 7:00 Baron Munchausen, 9:10 Kraba - The Sorcerer's Apprentice

Sun. May 13, 5:30 The Thousand and One Nights

Friday, May 18 Free Public Screenings of Animation Finals at SF State, at 2:30 (digital displays in the lobby) and 3 pm (projected work in the Coppola Theatre, FA 101). The S. F. State Film Finals (mostly or all live action films) at 7 pm in the McKenna Theatre. Free reception at 6 pm in the Casablanca Room (CCA 158)

Saturday, May 19, 3:30 and 7:30 Starewicz Puppet Films with music performed live by The Tin Hat Trio, PFA

Saturday, May 19, 8:30, ARK EMERGENCY BENEFIT at ATA (992 Valencia). Ark "is a cell of mischievous media artists with bold graphics and aggressive wit, who have launched a steady stream of scathingly critical initiatives against the corporate take-over of the democratic process, not to mention everyday life. During the Fall 2000 elections, arc agent James Baumgartner was sued by the Chicago Board of Education for his satirical **voteauction**.com website. Though the ACLU has agreed to defend him, James has already racked up a \$10,000 legal debt. Here's a friggin' raft of prank videos - plus a half-hour set of Negativiland music videos - towards his free speech defense."

Features by Alexander Ptushko at Pacific Film Archive

Sunday, May 20, 5:30, The New Gulliver

Thursday, May 20, 7:00, Sampo

Sunday, May 27, 5:30, Stone Flower

Sunday, June 3, 5:30, Ruslan and Ludmila

Thursday, June 7, 7:00, Viy

Friday, June 8, 7:30, Aerograd, 9:15, The Letter that was Never Sent

Friday, June 2, 7 pm, BARRY PURVES SCREENING AND DISCUSSING 5 OF HIS ANIMATED FILMS at the Women's Building as part of the National Queer Arts Festival. 3543 18th St. (415) 552-7709 www.staytooned.com

NATIONAL NEWS

SOTHEBYS IS AUCTIONING OFF 325 LOTS OF EARLY ANIMATION ART - MOST OF IT IS PRE-WAR DISNEY Go to www.sothebys.com and look for the Jeff Lotman collection sale. Go before May 5 and see part 1 up for sale. Part 2 runs from May 11 to June 1. It is (was) a very impressive collection!

"ANIMATION BLAST" #6 HONORS THE GREAT, BUT OBSCURE, CARTOON DESIGNER TOM OREB, PLUS THE AMAZING JIM TYER I didn't know Oreb was the designer of several striking looking films from Disney and MGM. His credits include Toot, Whistle Plunk and Boom (Oscar, 1953) and Tex Avery's Symphony in Slang, 1951. He also designed characters for Disney features and Disney TV commercials, but he was not given screen credit very often. Now you can read about his impressive body of work in a long in-depth tribute (18 pages with lots of illustrations).

The second artist being honored is Jim Tyer. He spent years animating for Van Buren, Harman-Ising, Fleischer, Terrytoons, Famous and other studios. In his later work he experimented with creating extreme and outrageous shapes for his character's faces and bodies as he put the through their paces. He broke a lot of rules and is dearly loved by a lot of people from Jerry Beck to John Kricfalusi. His imagination knew no boundaries and in a section about him by Ralph Bakshi (Bakshi was an inker when he worked with Tyer) he is reported to have given him the following advice. "1. Everything moves. 2. Don't worry about the model chart. 3. Either have fun with the drawing or go home. 4. There ain't nobody to follow but yourself." This is a great 20 page tribute in an exceptional issue.

Animation Blast's new 52 page issue costs \$6. (Several pages are in color.) Copies are available from Tower Records, Comic Relief in Berkeley, by mail from Amid Amidi, PO box 260491, Encino, CA 91426-0491 and from [Animation Blast.com](http://AnimationBlast.com).

A MEMBER GETS AN ADVANCED LOOK AT DISNEY'S "ATLANTIS" He writes, "it was a major disappointment. When I think of the lost city, I expect amazing graphics. Instead we get characters looking like they came from TV with nice backgrounds but nothing special. Surprisingly there are no songs though it lends itself to them as the film follows Disney formula pretty much. Opens with subtitles which will throw kids off and then everyone stops speaking 'Atlantisian' and speaks English. Even the comic relief characters are only of mild interest. One of them chain smokes! In a Disney film? The films opens well but after 30 minutes, people were falling asleep. I think much will bore audiences of all ages. There goes my stock again."

ASIFA-EAST SHOWED A RARE FEATURE THAT INCLUDED ANIMATION FROM THE HUBLEY STUDIO The feature was *The Four Poster*, 1952, with Rex Harrison and Lilly Palmer. Art Babbitt and Lou Keller did the animation, Paul Julian designed the layouts and backgrounds and John Hubley was the animation director of the animated sequences in this live action feature. Apparently it isn't available on video or from film libraries.

GRAND VALLEY STATE UNIVERSITY IN MICHIGAN HAD AN IMPRESSIVE GALLERY EXHIBIT, SCREENINGS AND TALKS FEATURING THE WORK OF KAREN AQUA, JOHN CANEMAKER, JOAN GRATZ, FAITH HUBLEY AND DEANNA MORSE The exhibit of work by 5 American independent animators was on display Feb. 26-March 30. While the exhibit was up Hubley and Aqua introduced screenings of their work and Morse gave a gallery talk. The gallery published a handsome and informative catalog to go with the exhibit. The university is in Allendale, Michigan.

ASIFA-HOLLYWOOD SHOWED "A LOST ANIME CLASSIC" On April 25 Jerry Beck introduced a screening of a 16mm print of *Jack and the Witch* (Shonen Jack to Mahoutsukai), released in 1967 by Toei. Their print was a dubbed version that was distributed to US TV stations in the late '60's. The flyer for the program calls it, "a wacky, sometimes psychedelic, cartoon adventure, both intentionally and unintentionally funny (the awful dubbing doesn't help)."

THE GENE SISKEL FILM CENTER IN CHICAGO PRESENTED AN 80 FILM TRIBUTE TO CHUCK JONES It is a rare occurrence when somebody does a 35mm program honoring an animator, so I was amazed that the film archive connected with the Chicago Art Institute showed 8 programs of shorts plus *Chuck Jones: Extremes and In-Betweens*, a new documentary on Jones. Greg Ford and Ronnie Scheib were the guest curators behind this series.

PASSING

BILL HANNA DIED IN MARCH Trying to find correct information about him was an interesting adventure into how lax animation scholarship has been. He was born in either 1910 or 1911 in New Mexico (different books give different dates). He had no formal art training when he landed a job with Harman-Ising in 1931 according to Maltin, but Lenberg says he left his career in engineering, took a crash course in art and got a job with Harman-Ising when they were producing animation for MGM. That would have him joining the firm about 1934.

At Harman-Ising he rose in the ranks and directed the beautiful fantasy *To Spring* in 1936. When Harman-Ising lost their contract to produce shorts for MGM in 1937 he, like most of the staff, left and was hired by MGM for their new animation dept.

At MGM he was paired up with Joe Barbera by producer Fred Quimby right after joined MGM according to one book, in 1938 according to another and in 1939 according to Hanna in another book. Their first project together wasn't very successful (an unnamed cartoon), but other books say their first project put a cat and mouse together. The film was called *Puss Gets The Boot* (1940) and it went on to win an Oscar nomination.

According to an ABC report "in the next 12 years the pair's creations would garner them 12 nominations and 7 Oscars over the course of more than 100 cartoons." In 1957 MGM decided to close their animation studio and laid-off their staff.

This was a turning point in animation history, but what happened next isn't well known. According to official biographies Hanna opened Hanna-Barbera Studios, invented limited animation for TV, did Ruff and Reddy (1957), Huckleberry Hound, Flintstones, Jetsons, Smurfs, Yogi Bear, etc. and lived happily ever after.

If you look deeper there are other versions of the story. Hanna-Barbera didn't invent limited animation even though Hanna once told me that was one of his accomplishments. A few limited animation shows made for TV date before Ruff and Reddy including Alex Anderson and Jay Ward's Crusader Rabbit (1950) and some of the work of Sam Singer (see the next obituary).

Hanna also denied to me in the late '80's that he tried to produce a Crusader Rabbit series in 1957 without the help of Joe Barbera. It didn't matter to him that Mike Lah, a former MGM animation director and partner of Hanna in the project; voice actress Lucille Bliss (the original voice of Crusader), Alex Anderson (the creator of the show) and others remembered his participation in this failed business venture. Fortunately he told Keith Scott (The Moose That Roared, 2000) a few years later that he had begun work on new Crusader Rabbit episodes in 1957 and that the project came to a halt due to copyright problems. It is much neater to claim you always stuck with your business partner and say that you invented limited animation for TV.

Obits are supposed to be nice, so I won't discuss the labor problems, the dozens of awful shows produced by Hanna-Barbera or the negative statements people have made about working for that company. Perhaps it is better to say he gave out-of-work Disney, MGM, Warner Bros. etc. artists employment after the theatrical animation industry shut-down, and not discuss the quality of the work (Preston Blair said he was like "a race horse pulling a milk wagon"). Hanna will certainly go down in history for keeping the industry alive during a dark period, but at what cost?

I would rather remember him for the wonderful Tom and Jerry series, but his professional life didn't end in 1957. He did provide employment for a lot of wonderful people when there were few alternatives for finding work in the animation industry.

Almost everyone who will read this grew up watching the company's products. Last month I asked people to contribute to this obit (nobody did) as I wanted to have some statements by others to balance my own feelings about his later work. I didn't grow up watching their shows so I can not tell you about the joy they gave me as a kid. I grew up watching theatrical cartoons in real movie theaters and for me TV animation was usually awful stuff until The Simpsons and Ren and Stimpy came along.

If my opinions get you mad or otherwise give you the urge to write something down, feel free to send in your statements by May 23 for the June newsletter. (karlcohen@earthlink.net or 478 Frederick, SF CA 94117)

SAM SINGER DIED AT AGE 88, DIRECTOR AND PRODUCER OF EARLY TV

ANIMATION Singer's work is unknown to most animation fans, but there was a time his work was widely seen. His animated Adventures of Pow Wow the Indian Boy was made for the Captain Kangaroo Show from 1957-'60. There were episodes Bunky and Pepito made about the same time and Courageous Cat in 1960. Paddy Pelican, originally a puppet show in the early '50's, was the star of six 5 minute b/w episodes by Singer in 1957. The finished films were nicely drawn pencil tests!

He began the Sinbad the Sailor show in 1965 (pilot) but lost the series to Hanna-Barbera (Woolery, Children's Television gives him credit as producer). He was involved with a Tubby the Tuba film, but lost that project as well. His name is associated with a few other projects, but it would take more research to find out what his involvement was.

When I spent an evening interviewing Singer about 1995 he proved to be a fascinating character. He swore constantly, was a heavy cigar smoker, and he needed two canes to walk due to arthritis. The walls of his apartment in Hollywood were covered with his paintings.(he gave me one and it now hangs in my office) and the rooms contained piles of books and papers.

As Singer talked it became obvious that what he was telling me about his career wasn't always true! He claimed to have been at Disney from 1933 to the early 40's and rose to become a "unit director" on Snow White, Bambi, Pinocchio and Fantasia. I later contacted the Disney Archives and David Smith wrote back "we show a Sam Singer working here as an apprentice animator for only 6 months, from January 18, 1937 to July 7, 1937."

I later found a brief biographical note that Samuel Bart Singer contributed to the 1969 Motion Picture Almanac. He said he was born in 1913, he had studied at the Chicago Art Institute and Univ. of Illinois, he worked for Disney in 1937, Warner Bros. 1939-'40, Columbia 1940-'42; was a producer and/or director of live TV in Chicago from 1946-'52, and was the prod.-dir. of the Courageous Cat series (1960).

Singer told me that one of his jobs in Chicago was doing about 200 quick sketch illustrations a day to illustrate stories told on the Uncle Mistletoe Show He also did various art jobs for Marshall Field Co. and Ovaltine (sponsor of local TV shows).

Late in his life he manufactured a very handsome portable drawing disc for animators and taught drawing in Los Angeles. Amid Amidi, who writes Animation Blast, took his class as he knew of Singer from the Spring, 1996 issue of Animato that called him animation's Ed Wood (Singer had a lot more talent and skill). Amidi said most of the students left before the class ended due to Singer's language (he called women "toots," "sweetheart," etc. and he tended to insulted you if he didn't like your drawings). Amidi said Singer still loved to draw with his students and that he was highly skilled at it. He showed an animatic in class for his Tubby the Tuba and "his storyboard drawings were exquisitely rendered in color pencils and well laid out; it showed an artist whose talents far exceeded that of Ed Wood's."

CONFERENCES AND TRADE SHOWS

SIGGRAPH 2001 WILL BE IN LA IN AUGUST for information www.siggraph.org/s2001 (312) 321-6830 or write 401 N. Michigan Ave. Chicago, Illinois 60611

Well, the net has been likened to the world's largest shopping mall. So why not this?

<http://www.theage.com.au/breaking/0008/19/A14328-2000Aug19.shtml>

Americans try to sell votes over the Internet

Source: AP|Published: Saturday August 19, 11:40 AM

NEW YORK - Six people offered to sell their vote for president on the Internet this week, fetching as much as \$US10,100 (\$A17,372) before online auctioneer eBay cancelled the bidding.

Meanwhile, another site is soliciting undecided voters to offer as a block to the highest bidder for each state. By today, bidders already offered \$US100 (\$A172) each for New York and California, which together have 87 of the 270 electoral votes needed to win the presidency.

Federal and state laws prohibit the sale of votes, and eBay said it is cooperating with investigators from the Justice Department and Washington state, the home of one attempted seller.

"We'd like to think we've got a good sense of humour, ... but these are people who are dealing with violations of federal law," eBay spokesman Kevin Pursglove said. "It's very serious."

An eBay user first notified the company about a sale on Wednesday night, Pursglove said.

He said eBay found and cancelled others yesterday because they violate company policies prohibiting sales of illegal goods.

The site does not pre-approve auctions, but will stop them if they violate its policies.

One offering under the header "Vote of One US Citizen" received 20 bids, the highest for \$US10,100. Another individual got one bid for \$US1 (\$A1.72), and a third received a bid for 99 cents. Three others had no bids, according to eBay records.

Justice Department officials did not return a call today about the auctions.

Advocates of overhauling campaign finance already believe votes are for sale - to the largest campaign contributors.

Sheila Krumholz, research director at the Center for Responsive Politics in Washington, said these attempted sales could be no more than an expression of frustration with the political system.

"Choices and votes are being made or at least impacted by money and by moneyed interests," she said. "Everybody knows money has had an undeniable impact in the system today."

But Deborah Phillips, chairwoman of the Voting Integrity Project in Arlington, Virginia, worried that such efforts undermine trust in elections, even if they are no more than an expression of frustration.

"It is just further contributing to this increased sense of cynicism that's so pervasive in America today - that my vote doesn't matter," she said. "It does matter a lot, and ordinary citizens should be outraged by this."

Voteauction.com, the site taking bids by state, promises to collect votes by absentee ballot, verify them and mail them "to the appropriate election district".

"The election industry is spending hundreds of millions of dollars in an attempt to influence the presidential election," organisers said in a statement. "This system is an inefficient waste of money for the candidates and their supporters."

The site aims to improve the system "by bringing the campaign contributors' money directly to the

voters".

Chapter 1

The Road to Florida 2000

Democratic Theory—Briefly

BEHIND THE 2000 Presidential election in Florida lie thousands of years of thinking about, controversy over, experimentation with, regulation of, and tinkering with the popular vote as the method of political governance deemed central to democratic theory.¹ Not that voting is limited to the political arena, or to democracies. Appellate decisions are determined by judges' votes; one of the jokes that went the rounds after *Bush v. Gore* was decided had Bush saying, "I want to thank those who voted for me for President: Rehnquist, O'Connor, Scalia, Kennedy, and Thomas." And one of the complaints about the punchcard voting machines used in a number of Florida counties was that the machines had been worn down by being lent for use in union elections. Voting is a

1. For a taste of the complexity of democratic theory, to which I cannot possibly do justice in this book, see Thomas Christiano, *The Role of the Many: Fundamental Issues in Democratic Theory* (1996); James A. Gardner, "Consent, Legitimacy and Elections: Implementing Popular Sovereignty under the Lockean Constitution," *52 University of Pittsburgh Law Review* 189 (1990).

highly economical method of aggregating preferences, which is why it is used so widely. But it is also a very crude method.² It does not weight preferences by intensity or knowledge, and, partly for that reason, it does not impose a cost on the ignorant, irresponsible, or exploitive exercise of the franchise. Especially when the ballot is secret (which it has to be wherever there is concern about intimidation or other coercion, or undue influence), the voter is insulated from criticism, however just; he is neither rewarded for voting intelligently nor punished for voting stupidly.

I have been speaking thus far of voting in its pure “one person-one vote” sense, however, and often impurities are deliberately introduced. Corporate voting is by share rather than by shareholder; votes are weighted by the voter’s financial interest in the outcome of the vote. We shall see that John Stuart Mill thought that in political elections abler individuals should be given additional votes. Even in modern American political elections there are eligibility requirements that, deliberately or not, prevent or discourage the most incompetent, apathetic, and irresponsible elements of the population from voting. Voters must be adults, must register to vote, must not be in jail or prison (often, must not be ex-felons as well), must be residents of the voting district, usually must be citizens. Obviously these are coarse sieves if the objective is to confine voting to intelligent, knowledgeable, civic-minded, politically mature, responsible people with a tangible stake in the outcome of the election.

Why anyone who is eligible *bothers* to vote is a puzzle,³ especially to economists, who emphasize self-interest as the engine of human action. The puzzle is not why voters do not invest much

2. A proposition substantiated in a huge literature; for a glimpse, see Amartya Sen, “How to Judge Voting Schemes,” *Journal of Economic Perspectives*, Winter 1995, p. 91. One of the complications is that there is a great variety of potential voting rules, all with different effects. For a lively discussion, see Gordon Tullock, *On Voting: A Public Choice Approach*, ch. 2 (1998).

3. John H. Aldrich, “When Is It Rational to Vote?” in *Perspectives on Public Choice: A Handbook* 373 (Dennis C. Mueller ed. 1997); Anthony Downs, *An Economic Theory of Democracy*, ch. 14 (1957).

time in equipping themselves to vote intelligently (something that many of them would lack the intelligence or education to be able to do, no matter how much time they spent studying the issues and the candidates); obviously they have little to gain from such an investment, since political elections, other than on the most local level, are virtually never decided by a single vote. The puzzle is that people vote at all in a society in which voting is not compulsory, given the lack of instrumental value to which I have just pointed—even the 2000 Presidential election in Florida was not decided by a single vote.

Of course, many Americans who are eligible to vote do not vote. The nationwide turnout in the 2000 Presidential election was only 50 percent of the eligible voters, and it is often much lower in more obscure elections. Yet many do vote. The costs are slight. But what are the benefits? Because a single voter cannot swing the election, voting is less plausibly regarded as an activity yielding instrumental benefits than as a form of consumption, like rooting for one's alma mater at a college football game. Consistent with this suggestion, voter turnout is largely a function of how exciting the election campaign has been; the voter chooses between the candidates much as he would between competing brands of an ordinary product or service.⁴ Voting is also a way of constructing and signaling the voter's solidarity with like-minded people. But that is often an element of ordinary consumption too; the choice of brand may be influenced by a desire to signal taste, values, or affluence. Because the benefits of voting are small, however, even modestly high costs of voting can depress turnout significantly. The fact that turnout in U.S. elections is low by international standards is largely explained by mundane factors affecting, however slightly, the cost

4. See, besides the references in note 3, Daniel Hays Lowenstein, *Election Law: Cases and Materials* 54–60 (1995), a good summary of the literature on incentives to vote.

of voting. For example, elections are scheduled on regular workdays in the United States, rather than on holidays or weekends as in a number of other countries. Registering to vote is also more of a bother in the United States, because registration is carried out at the state level; Americans tend to move around a great deal and so have to register more frequently than the citizens of less mobile or more centralized societies.⁵

The popular vote is often thought to be *the* defining element of political democracy, but that is a modern view. The classical view, which originates in the Athenian concept of democracy⁶ and contains an insight that we moderns have largely lost sight of, is that filling political offices by popular election rather than by lot conduces to *aristocratic* (in the Aristotelian sense) rather than democratic government. Conduces, in other words, to government by “the best” rather than by the average (as in a system of filling offices by lot) or by “the people” as a whole.⁷ Only *representative* democracy is aristocratic in this sense, however. Direct democracy—voting on issues rather than for officials—is not. Although a hallowed part of our tradition in the form of the New England meeting and still employed to a limited extent in some of our states, primarily in the form of the referendum, direct democracy is infeasible in a large, complex polity. Switzerland employs the referendum extensively—and it is exceptional even among small countries in this respect.⁸ Moreover, Switzerland is also and primarily a representative democracy, like California and other U.S. states that authorize referenda. In these instances direct democracy merely

6. Scott Gordon, *Controlling the State: Constitutionalism from Ancient Athens to Today* 66–80 (1999).

7. Bernard Manin, *The Principles of Representative Government* (1997). Schumpeter’s theory of competitive democracy is similar; Joseph A. Schumpeter, *Capitalism, Socialism, and Democracy*, ch. 22 (3d ed. 1950).

8. On direct democracy generally, see Dennis Mueller, *Constitutional Democracy*, ch. 7 (1996).

supplements representative democracy, providing a means of breaking cross-party coalitions of politicians.⁹

The aristocratic character of representative democracy is rooted in the fact that, especially if political parties are weak or nonexistent (the significance of this qualification will become clear shortly), voters will tend to pick the best candidate for each office. The best candidate—which is to say the candidate most likely to occupy the office with distinction—is likely to be a superior person, not at all typical of the voters. And it is the officeholders, the elected officials and the officials whom they appoint, who govern—not the people who elect them.¹⁰ Of course voters may often be deceived about who is the best candidate; even so, an average Joe is unlikely to prevail in electoral competition, just as an average Joe is unlikely to win the world boxing title. The glib, the clever, the shrewd, the handsome, and the charismatic are likely to dominate the electoral competition, occupy the principal offices, and constitute, in short, a political aristocracy. Not that the people are an inert element in representative democracy. The politicians will vie for their favor by advocating policies that command broad support. But these advocates will be drawn from a narrow and unrepresentative segment of the community, and the policies they advocate, or seem to advocate, to win popular support will often not be the policies they implement.

Representative democracy becomes monarchical when the representative is a dictator and there is only one candidate, as in the plebiscites employed by Napoleon and Hitler to cement their rule, or the one-party voting in communist states. But democratic

9. Bruno S. Frey, "Direct Democracy: Politico-Economic Lessons from Swiss Experience," 84 *American Economic Review Papers and Proceedings* 338 (May 1994).

10. This assumes that, as in our system of government, the voters are not authorized to issue binding instructions to the successful candidate. If they were, officeholders would be genuine agents, rather than principals; the people would rule, as they do not in our system.

aristocracy, oxymoron as it may seem, best describes our system. The framers of the original Constitution, the Constitution of 1787, decreed that the House of Representatives would be popularly elected, but they had a distinctly aristocratic conception of the Presidency; it is reflected in the device of the Electoral College. In the wake of the 2000 election fiasco, there are renewed calls to abolish the Electoral College. We shall be considering the merits of abolition throughout this book, particularly in the last chapter. The deadlock, and the difficulties of resolving it, were inseparable from that institution. But even if the Electoral College were abolished and the President directly elected by popular vote, our political system would remain aristocratic in Aristotle's sense.

Our political aristocracy is not hereditary, and its direct or indirect dependence on the popular vote, not only for initial appointment but also for reappointment at stated intervals, tends to align its interests more closely with the interests of the population at large than do other systems of government.¹¹ Nevertheless, representative democracy, democratic self-government, and popular government are misleading descriptions of the system for governing modern "democracies." This is so not only because the people do not rule, and because there are no guaranties that they vote intelligently or even conscientiously, but also because the voters are not the people, but only a fraction (and not necessarily a representative fraction) of the entire population, and also because, as I have noted, voting is a crude method of aggregating preferences. In the 2000 Presidential election, little more than a third of the population actually cast a ballot that was counted as a vote for one of the Presidential candidates, and the winner of the popular vote lost

11. In a representative democracy, "elections are part of the system of accountability and control" (Gordon, *Controlling the State*, at 360), along with a host of other mechanisms, as Gordon emphasizes.

the election, because the loser had more electoral votes. Winner and loser, moreover, each had the votes of only about one-sixth of the total population.

Although the Electoral College is controversial, one of the principles that it embodies, that of districted rather than at-large elections, is not; and yet districting drives a further wedge between popular majorities and electoral outcomes. If two parties compete for control of a 100-member state legislature elected by districts of equal population, a party that wins a bare majority of the votes in a bare majority of the districts will end up with control of the legislature, though that party could be the preference of only a shade over 25 percent of the state's voters, who might in turn be only a modest fraction of the population. This paradox is complicated at the Presidential election level by the facts that a state's electoral votes are the sum of the state's Senators and Representatives in Congress and that each state has two Senators regardless of its population. This might be thought to imply that the votes of the voters in the less populous states are weighted more heavily in the Electoral College than those of the voters in the more populous states. Yet we shall see in Chapter 5 that this is an oversimplification, because given the winner-take-all rule that all but two states use for allocating their electoral votes, swing voters in more populous states have more influence in the Presidential election than swing voters in less populous ones.

The only constant is that voting is indeed a crude method of mapping preferences onto policies—and for the further reason that voting for a candidate is voting both for a person and, in effect, for a package of likely policies: the policies the candidate supports, possibly the policies endorsed in his party's platform. So wholly apart from voter ignorance, policies may be adopted that do not actually command majority support, either because a majority of voters prefers the candidate whose policies they do not like (they may consider him an abler leader) or because the majority likes

only a subset of those policies. In a two-party system, moreover, the parties have a strong incentive to move to the center of the distribution of political opinion. This may force voters to choose between two candidates who have largely identical views that are not widely supported but that have the support of the median voter. Making a choice between two alternatives is more difficult the harder the alternatives are to distinguish—but it is also more difficult the more alternatives there are, so that a proliferation of candidates does not cure the Tweedledum-Tweedledee problem.¹² And such a proliferation is in any event unlikely because a two-party system is a natural although not inevitable corollary of a Presidential as distinct from a parliamentary system. It is difficult for a third party to mount a credible Presidential campaign—third-party Presidential candidates are invariably just “spoilers”—and so it is difficult to take the party itself seriously as a national force.¹³ What really does in third parties, however, is a winner-take-all voting system (as distinct from proportional representation) at the legislative level. For that is likely to prevent a third party from electing any legislators at all, making the party impotent at the legislative as well as the executive level.

When ignorance about issues and candidates,¹⁴ exploitive intentions (voting for the party that you hope will, if it takes

12. On both points, see Richard R. Lau and David P. Redlawsk, “Voting Correctly,” 91 *American Political Science Review* 585, 592 (1997).

13. Arend Lijphart, *Democracies: Patterns of Majoritarian and Consensus Government in Twenty-One Countries* 130–131, 180 (1984).

14. “Interest in politics is generally weak, discussion is rare, political knowledge on the average is pitifully low, and few people actively participate in politics beyond voting. . . . And what good is even voting if for so many it is based on so little information?” Lau and Redlawsk, “Voting Correctly,” at 585. “Individuals are creatures of habit when they vote, as when they work and play. They vote for the same party in the present election as in the last one, unless that decision is perceived to have been unrewarded or punished. Unlike in market transactions, however, the rewards and punishments that follow voting are neither immediate nor often clearly linked to the act of voting. Thus, rational or irrational political beliefs and behavior—like beliefs in the prognostic powers of constellations of stars—are likely to persist even in individuals whose everyday behavior in the market place conforms well to that predicted by rational actor models.” Dennis C. Mueller, “Capitalism, Democracy and Rational Individual Behavior,” 10 *Journal of Evolutionary Economics* 67, 73 (2000). See also Larry

power, redistribute wealth to you from other people), low turnout, and errors in voting and in tabulating votes are added to the brew, it becomes apparent that voting registers informed public opinion in only the loosest sense and the “popular will,” Rousseau’s “general will,” perhaps not at all. Some of the distortions may be offsetting, but that cannot be assumed. And while it is true that low turnout would not matter if nonvoters had the same interests as voters, they do not. Turnout is disproportionately high among the elderly even after adjustment is made for other influences on it¹⁵—a factor that, in combination with the disfranchisement of children, creates a strong public policy tilt away from children and toward the elderly.¹⁶ We shall note in Chapter 5 that the expressed political *preferences* of nonvoters tend to be quite similar to those of voters; but those preferences may not correspond very closely to nonvoters’ *interests*. As nonparticipants in the electoral system, nonvoters are unlikely to have given much thought to aligning their political views with their interests.

Our actual existing democracy falls so far short of the soaring ideals of the theorists of democracy¹⁷ that some of those theorists might be inclined to deny that our system is democratic. But that is to be unrealistic, as well as to attribute a fixed meaning to a word (“democracy”) of notorious plasticity. Representative democracy has decisive *pragmatic* advantages over alternative systems of governing a modern society, and so we can be enthusiasts for democracy without having to prate about self-government or the popular

M. Bartels, “Uninformed Voters: Information Effects in Presidential Elections,” 40 *American Journal of Political Science* 194 (1996). But not all students of the electoral process believe that voters are seriously uninformed. See, for example, Sam Peltzman, “How Efficient Is the Voting Market?” 33 *Journal of Law and Economics* 27 (1990); with specific reference to Presidential elections, see *ibid.* at 59–62.

15. John E. Filer, Lawrence W. Kenny, and Rebecca B. Morton, “Redistribution, Income, and Voting,” 37 *American Journal of Political Science* 63, 74–75 (tab. 2), 80 (1993).

16. Richard A. Posner, *Aging and Old Age* 148–149, 288–289 (1995).

17. See, for example, David M. Estlund, “Democracy without Preference,” 99 *Philosophical Review* 397 (1990).

will. Paradoxically, the advantages of representative democracy emerge most clearly if we eschew pious platitudes about civic virtue and assume that people (including those who live in democratic societies) are, whether as citizens or as officials, self-interested rather than public-interested or altruistic, or that, if they are public-interested or altruistic, the specific beliefs they hold are likely to be distorted by self-interest or ignorance. It is a realistic assumption and implies that people—whether the collective “We the People” of the Constitution’s preamble or individual persons—cannot be trusted to exercise power.

That is a worrisome thought. The core function of government has always been to provide services—classically, internal and external security—that the market cannot provide efficiently because the benefits which these services generate could not be appropriated by the private individual or firm that produced them. Imagine trying to finance the national defense by means of voluntary contributions. People who did not contribute would obtain the same benefits from national defense as those who contributed, and so the incentive to contribute would be meager. The same thing is true with regard to the financing of police, prosecutors, judges, and the rest of the law enforcement apparatus.

The effective performance of the core functions of government requires a concentration of physical power—the “monopoly of force” that all governments claim. Force to maintain law and order, force to extract the revenues necessary to pay for that maintenance. As a result, control of the government creates opportunities for expropriation of the citizenry’s wealth, and for other abuses, provided there are significant costs of emigrating, as there usually are. Quite apart from the danger of abuse, the mere fact that the basic government services are ones not sold in a market makes the monitoring of their efficient provision difficult. Both the loyalty and the competence of our political fiduciaries must somehow be secured by the institutions of the society.

The key institution in our society is, precisely, representative democracy, and its defining “democratic” feature is that the representatives are elected by the public at large, with each eligible member of the public having a single, nonsalable vote. But why voting? Why majority voting? Why equal voting? And why are votes nonsalable? These turn out to be related questions, and the answers will point us toward the central concerns of this book.

Voting in effect constitutes citizens¹⁸ the “owners” of the government, in much the same way that shareholders are the owners of corporations. But whereas shareholders vote by shares rather than per capita, because their stakes in the corporation may be very unequal, citizens have more or less equal stakes. Not entirely so, of course; people are very differently related to government so far as the costs they bear and the benefits they reap. But because of the great power of government, almost everyone has a significant stake in the government’s operation.

Too great a departure from the “one person–one vote” principle (as opposed to corporate democracy’s “one share–one vote” principle, under which, were it transposed to the political setting, a share might be a specified percentage of the total wealth of the electoral unit) would make acute the danger of the government’s being captured by a minority (I mean an electoral, not an ethnic, minority—a cabal, an oligarchy) bent on expropriating the property or extinguishing the freedom of the majority or of another minority. The reason is that the fewer people who have to be organized in order to achieve a common end, the more likely they are to succeed: transaction costs are lower, a proposition familiar to students of price fixing and other conspiracies.

For the same reason, votes must not be salable,¹⁹ since that would enable the concentration of voting power in the hands of a

18. Here used in a loose, indeed circular, sense, since aliens are sometimes permitted to vote—a permission that constitutes them “citizens” in a meaningful sense, despite their (formal) alienage.

19. See Downs, *An Economic Theory of Democracy*, at 188–194; and for a fuller dis-

relative handful of people or corporations. A market in votes presents a classic free rider problem. If a wealthy individual offered to buy the first million voting rights tendered to him at \$25 a vote, he would have little difficulty closing the deal, especially if many voters assumed that others would sell their right to vote for that price.²⁰ Suppose he wanted to buy a really commanding number of votes, such as 10 million—only a modest percentage, however, of the total number of votes cast in the 2000 election, and an even smaller percentage of the total number of votes potentially buyable, since the half of the electorate that did not bother to vote would be especially eager to sell their voting rights. He might have to pay a much higher price per vote. Suppose it would be \$100. Still, many firms and even individuals can plunk down \$1 billion in cash for an asset that is worth that much to them. Allowing votes to be bought and sold would, therefore, be practically as well as theoretically inconsistent with the principle of equal voting. Majority voting also follows from that principle, because it is the only method of vote counting that weights each voter's vote equally.

In short, although the people do not rule in a representative democracy—that would be infeasible—they pick the rulers, kick them out when necessary, and provide for an orderly, peaceful succession (although the one in 2000 turned out not to be so orderly) when a vacancy occurs. The last point deserves particular emphasis given the subject of this book. Hereditary monarchy solved the succession problem, but at the sacrifice of both quality assurance and democratic control, sacrifices that representative democracy avoids having to make. Taken all in all, representative democracy not only

cussion of the pros and cons of allowing votes to be sold, see Saul Levmore, "Voting with Intensity," 53 *Stanford Law Review* 111 (2000).

20. The theory of the two-tier tender offer. And during the 2000 Presidential campaign a market in votes did emerge, briefly, on the Internet ("voteauction.com"), before being shut down by a reminder of its illegality. The average transaction price was indeed only \$24.28. See http://62.116.31.68/end_of_bids.htm. Cf. Pamela S. Karlan, "Politics by Other Means," 85 *Virginia Law Review* 1697, 1713–1714 (1999).

honors the democratic principle but also controls the rulers, and solves the succession problem, better than any alternative system, provided—a qualification to be borne in mind throughout this book—that the procedures for determining the succession are fixed in advance, objective, administrable, and clear, so that succession is according to rules rather than to a power play by the loser.

With such advantages, one may wonder why representative democracy is not the universal system of government, and particularly why it seems to flourish only in wealthy modern countries, with a few exceptions, such as Switzerland even before modernity and a poor India today. (The Roman Republic was an interesting mixture of democracy and oligarchy.) Notice that I did not number the ancient Greek city-states among the exceptions. Direct democracy, the ancient Greek form of democracy, is feasible only in a very small, simple polity, because in a large or complex one the information costs—not to mention the costs of underspecialization and of time—of citizen government are prohibitive. Representative democracy reduces all these costs by enabling a political division of labor between governed and governing without relinquishing popular control over the governors.

But unlike Greek-style democracy, representative democracy requires an elaborate institutional framework to avoid degenerating into oligarchy or dictatorship. Remember that in such a democracy it is officials who rule, not the people. Officials have their own interests, which may not coincide with those of the people. If able to monopolize the information relating to the administration of government, these imperfect agents may be able to perpetuate themselves in office while adopting policies that disserve their constituents. So a reasonably well-informed citizenry—a citizenry that even if not highly educated, or even highly literate, makes at least approximately accurate judgments about candidates and policies—is a prerequisite of democracy. Another prerequisite is a system of

property and personal rights, including the right of free speech, enforced by judges who are not beholden to or intimidated by the representatives. For without such a system—that is, without real liberty—the representatives will be able to cow political opponents, steal elections through fraud and through intimidation of voters, and, by thus making reelection an empty formality, perpetuate their rule indefinitely.

So democracy depends on liberty, as well as being in tension with it because liberty curtails the power of the majority to impose its will. The right to vote is not enough; it is really just the tip of an institutional-cultural-juridical iceberg; a competent and independent electorate, which implies a liberty-securing institutional infrastructure, is indispensable to the operation of representative democracy. Since people are self-interested and for that and other reasons untrustworthy, pure democracy—democracy that places no limits on what the majority or its representatives can do²¹—is an extremely dangerous system of government, viable if at all only in tiny polities, where ties of family and friendship may enable voluntary cooperation to be substituted for coercion. Pure democracy is unstable and likely to degenerate into oligarchy or autocracy. Limited democracy is best. Representative democracy is limited democracy, even without judicially protected liberty, because it puts up a screen between citizens and the application to them of state power by other citizens.

It is also a far more efficient and economical system of governance than direct democracy. Not only does it enable specialization in the provision of government services and political goods; in addition, because governance is delegated to the specialists, the elected and other officials, the people at large do not have to

21. The term “pure democracy” should not be confused with “direct democracy.” The former is democracy, representative or direct, without legal limits on what the democratic majority may do. The latter is governance by the people themselves rather than by representatives whom they elect.

spend all or even much of their time worrying about politics. Some theorists—Hannah Arendt is perhaps the outstanding modern exemplar—are distressed that modern democracy enables the mass of people to redirect their energies from the public to the private sphere.²² Bonnie Honig would go further, radicalizing Arendt in an effort to restore “politics as a disruptive practice that resists the consolidations and closures of administrative and juridical settlement for the sake of the perpetuity of political contest.”²³ For most of us, it is a relief not to have to be jawing all the time in the *agora*.²⁴ Not for us exhaustive deliberation, life modeled on a faculty seminar. Not only is there much more to life than politics, but a preoccupation with politics is likely to exacerbate social conflict. Political conflicts are not intellectual disagreements, resolvable by deliberation or debate. They are clashes of interests and values. The political class in this country—the class that dwells obsessively on political issues—is more contentious, radical, dogmatic, and polarized than the country as a whole.

Representative democracy is historically and today associated with the market economy, though the correlation is one-sided. Nondemocratic nations often have market economies, but nations that do not have market economies are rarely democratic. A market economy seems therefore to be a necessary but not a sufficient condition for democracy. It is easy to see why it is not sufficient. Free markets are much more effective at generating wealth than non-

22. See, for example, Hannah Arendt, *The Human Condition* (2d ed. 1998), esp. pt. 2. “Arendt insists that a person can achieve an identity only through being seen and heard by his equals as they all deliberate the common fate. . . . Authentic politics fills the gap at the heart of the human condition.” George Kateb, “Political Action: Its Nature and Advantages,” in *The Cambridge Companion to Hannah Arendt* 130, 145–146 (Dana Villa ed. 2000).

23. Bonnie Honig, *Political Theory and the Displacement of Politics* 4, 124 (1993).

24. John Mueller, “Democracy and Ralph’s Pretty Good Grocery: Elections, Equality, and the Minimal Human Being,” 36 *American Journal of Political Science* 983 (1992). See also Will Kymlicka and Wayne Norman, “Return of the Citizen: A Survey of Recent Work on Citizenship Theory,” 104 *Ethics* 352, 361–362, 369 (1994).

market economic systems, and an autocrat generally wants his country to be wealthy in order to keep his subjects happy, finance an effective security apparatus, and become wealthy himself without taking such a large proportion of national wealth that he causes serious unrest. (The qualification “generally” is important, however, as wealth may create pressure for democracy, as we are about to see.)

Three things make a market economy a prerequisite for representative democracy. First, such economies depend on respect for property rights, and the effective enforcement of property rights requires a competent and impartial judiciary, which is also essential to ensure that elections are honest and to protect the personal liberties that democracy, the (potential) “tyranny of the majority,” threatens. Judicial protection of property rights is the forerunner of judicial protection of political liberty. Second, market economies generate wealth, and wealth increases the demand for and the supply of education, communications, and leisure. These goods, along with the financial security of living in a prosperous society, create a citizenry that not only is reasonably well informed about political issues and candidates, but also is sufficiently independent economically not to be the pawn of the mighty; relations of patronage and dependence undermine the power-diffusing objective of equal voting. Third, market economies reward and thus encourage commercial values, which are more hospitable than aristocratic or religious ones to the political equality that undergirds a democratic system. Like theocrats, aristocrats (not in the Aristotelian sense, the sense I used earlier, in which aristocracy is rule by the best, but in the more familiar sense of a hereditary caste preoccupied with honor and status and disdainful of commercial pursuits) think the issues involved in government too important to be left to the people. They also (the extreme example is Coriolanus) disdain the dependence on the goodwill of *hoi polloi* that a democratic system

imposes on officials.²⁵ Persons engaged in market activities disdain others at their peril, since success in the market involves catering to the preferences of others, namely one's customers and to a lesser extent one's employees and other suppliers.

There are countercurrents. The ideology of the market can foster contempt for voting because of its lack of instrumental value and its failure to weight preferences by willingness to pay, which is how the market weights preferences. The sacralizing of property rights in the name of economic efficiency curtails democratic governance by disqualifying government from intervening in the market. And markets can foster inequalities in income and wealth, which can in turn foster selfish, exploitive voting as the electorate splits into classes that have little in common with each other. But these effects are outweighed by the support that a market economy offers to representative democracy; otherwise having a market economy would not be a necessary condition of a society's being a representative democracy.

The foregoing introduction to the practice of representative democracy, brief as it has been, suggests several points germane to the argument of this book. Representative democracy is a pragmatic institution rather than the instantiation of a theorist's ideal state. Voting is a method of control, not of administration. The people do not rule in a representative democracy; they control the rulers, their delegates. For voting to perform its function of control, voters must have some minimum of political sophistication, along with a measure of independence from other people. Voting is central to the orderly succession of democratic "rulers." "Orderly" implies ordered, and delegation of governance to specialists implies realism and practicality. American democracy is structured, formal,

25. Don Herzog, *Happy Slaves: A Critique of Consent Theory* 198-199 (1989), remarks in a similar vein that a contested election "requires candidates to think the prize of election worth the risks of losing honor, of having one's neighbors publicly certify that they prefer someone else. So it requires and reinforces the decay of honor as an organizing principle." George Washington refused to be considered for President until assured that the vote for him in the Electoral College would be unanimous.

practical, realistic, and both supportive of and supported by commercial values. It is not starry-eyed, carnivalesque, or insurrectionary. It is not pure or participatory democracy, and it does not consider political chaos a price worth paying to actualize the popular will. Its spirit is closer to that of Burke than to that of Rousseau. The populism of a Jefferson or a Jackson remains a part of our democratic ideology, but a smaller part than in days of yore. These summary reflections, too, will turn out to be relevant to evaluating the Supreme Court's performance in *Bush v. Gore*.

A History of the Suffrage

The entwining of democracy with economy will also play a role in our analysis of the Florida election. As we shall see in the next chapter, the deadlock and some of the bitterness sparked by its resolution had economic roots, such as illiteracy, which is linked to poverty, and the financial costs and benefits associated with different systems of voting. There was a subterranean issue of whether literacy should be a voter qualification. Although federal law forbids the use of literacy as a voter qualification in federal elections,²⁶ the punchcard ballot used in a number of Florida counties (indeed used widely throughout the United States) requires a higher degree of literacy than other common voting technologies.

Poverty fosters ignorance, and also dependence. These are age-old worries about political elections. By the eve of the American Revolution, the idea that an elected legislature was an element of civilized government had taken firm hold in Great Britain and its American colonies. But neither the principle of universal suffrage

26. 42 U.S.C. § 1973b(e)(2), upheld against constitutional challenge in *Oregon v. Mitchell*, 400 U.S. 112 (1970). It might be questioned whether Congress has the power to regulate voter qualifications in Presidential elections, since the Constitution assigns the power to determine the manner of appointing Presidential electors to the states. U.S. Const. art II, § 1, cl. 2. But it would be impracticable for a state to fix different qualifications for voters for different offices in the same election. More on congressional power to regulate Presidential elections in subsequent chapters.

so familiar to us (though not fully actualized even today), nor the idea that all legislators (and the executive as well, and maybe even judges) should be elected by the people, had yet taken hold. The suffrage was limited as a matter of course to free adult males who owned property, specifically land. Property ownership was much more widespread in the colonies than in the mother country, with the result that something like two-thirds of free American adult males could vote. But they could vote only for the members of the lower house of the state legislatures. The governor was appointed by the Crown, and the members of the governor's council, corresponding to the Senate in the federal government ordained by the Constitution of 1787, were appointed by the governor.²⁷

This basic structure was retained in the Constitution.²⁸ Article I, section 2, provided that the members of the House of Represen-

27. There are minor exceptions to these generalizations about the form of the suffrage—a qualification that should be borne in mind throughout my brief survey of voting history. On that history, see Alexander Keyssar, *The Right to Vote: The Contested History of Democracy in the United States* (2000); Robert J. Dinkin, *Voting in Revolutionary America: A Study of Elections in the Original Thirteen States, 1776–1789*, ch. 2 (1982); Dinkin, *Voting in Provincial America: A Study of Elections in the Thirteen Colonies, 1689–1776*, ch. 2 (1977); Chilton Williamson, *American Suffrage: From Property to Democracy, 1790–1860* (1960); Arnaldo Testi, “The Construction and Deconstruction of the U.S. Electorate in the Age of Manhood Suffrage, 1830s–1920s,” in *How Did They Become Voters?* 387 (Raffaele Romanelli ed. 1998); Robert J. Steinfeld, “Property and Suffrage in the Early American Republic,” 41 *Stanford Law Review* 335 (1989).

28. Lawrence D. Longley and Neal R. Peirce, *The Electoral College Primer 2000* (1999); Michael J. Glennon, *When No Majority Rules: The Electoral College and Presidential Succession* (1992); Neal R. Peirce and Lawrence D. Longley, *The People's President: The Electoral College in American History and the Direct Vote Alternative* (rev. ed. 1981); Shlomo Slonim, “The Electoral College at Philadelphia: The Evolution of an Ad Hoc Congress for the Selection of a President,” 73 *Journal of American History* 35 (1986); L. Kinvin Wroth, “Election Contests and the Electoral Vote,” 65 *Dickinson Law Review* 321 (1961). For the most powerful contemporaneous defense of the Electoral College, see *Federalist No. 68* (Hamilton).

Writing in 1999, Longley and Peirce entitled their first chapter “The Election of 2000 Is Not Quite Decided: A Fantasy,” and in it sketched a scenario resulting in a deadlocked election and ensuing chaos. The deadlock in their fantasy, however, results from the fact that the electoral vote is split among three candidates (the authors added Colin Powell to Bush and Gore), none of whom has a majority of the electoral votes. The result is fierce politicking, first to get members of the Electoral College to switch, and later, when the election is thrown into the House of Representatives, to woo Congressmen. No one foresaw the form that the 2000 election deadlock would actually take. I am surprised that Longley and Peirce did not, since they discuss a number of challenges to Presidential electors, including one that occurred after the Electoral Count Act was passed in 1887 in an effort to prevent a repetition of

tatives were to be elected by the people of each state. No effort was made to eliminate property qualifications or other limitations on the suffrage; the only stipulation (also in section 2) was that the voters have the same qualifications that the state required of people voting for members of its lower house. Article I, section 3, provided that the Senators from each state would be appointed by the state's legislature. This method of appointing Senators reflected (at a time when states were much more important than they have become) a kind of ambassadorial conception of a Senator. Indeed, state legislatures sometimes instructed "their" Senators with regard to how to vote on specific issues.²⁹ The state legislatures were authorized to fix the time, place, and manner of choosing Senators and Representatives, though Congress was authorized to alter those regulations—except for the place of choosing Senators, which would be the state legislature itself. Each house of Congress was to be "the Judge of the Elections, Returns and Qualifications of its own Members."

There was little support at the constitutional convention for popular election of the President. Most of the delegates held the aristocratic conception of the Presidency and were dubious about the capacity of the public at large, with the limited filtering provided by gender and property qualifications, to pick the best candidate. There were also concerns about the logistics of conducting a nationwide popular election in a large country with poor transportation and communications. The alternative of having the President elected by Congress was unattractive, as it would make the President unduly dependent on the legislative branch. The ingenious expedient hit upon by the delegates was the Electoral College. Each state would have as many electors, and hence electoral votes, as it had Representatives plus Senators. The Electoral College was

the Hayes-Tilden fiasco, which that of 2000 resembled. Longley and Peirce, *Electoral College Primer 2000*, at 122–125.

29. See the discussion of this history in *Cook v. Gralike*, 121 S. Ct. 1029 (2001).

thus to be a kind of ad hoc Congress, its sole function being to elect the President. Its members were to be appointed by each state “in such Manner as the Legislature thereof shall direct” (Article II, section 1, clause 2) and were to meet in their state and vote for the President rather than assemble in one place and confer before voting. Members of Congress, and other high federal officials, were ineligible to be electors. Congress was to fix the time at which the electors would be chosen and the day on which they would cast their votes, provided the day was the same throughout the nation. The state was to transmit its electoral votes to the seat of the federal government, where they were to be counted in the presence of both houses of Congress. If no one received a majority of the votes of the appointed electors, the House of Representatives was to elect the President from among the leading candidates. But in that election, unlike the ordinary procedure of the House, each state delegation would have a single vote.

The framers’ insouciance about voting qualifications for the members of the only directly elected branch of the new government, the House of Representatives, was matched by their insouciance about the method of appointing Presidential electors, which was left to the state legislatures to decide. The framers were unperturbed by the possibility that the legislatures might (as most soon did) decide that the electors would be chosen by popular vote. Apparently they thought that the people could be trusted to pick electors good enough to pick the best person as President. Moreover, they expected the contingent election procedure ordained by the Constitution—election of the President by the House of Representatives if no candidate received a majority of electoral votes—to be used frequently, and the House was the most democratic component of the governmental structure created at Philadelphia in 1787, though, since each state’s delegation would have only one vote to cast for President, the contingent procedure was not actually very democratic. That was discovered in 1824, the

only time the President has been picked by that method. Andrew Jackson lost to John Quincy Adams in the House even though Jackson had the most popular votes³⁰ and the most electoral votes, though not a majority of the latter.

The framers expressed no concern that a popular-vote loser might be an electoral-vote winner, since they had no reason to expect all states to select their Presidential electors by popular election. That such a discrepancy might be anomalous could not even be perceived until it was customary to select Presidential electors by popular vote, as it was, however, by 1824.

The expectation that the President would often be selected by the House of Representatives was related to the framers' failure to foresee the rise of political parties.³¹ (Parties in the modern sense were unknown in the eighteenth century.) Without parties to winnow the candidates, electoral votes were likely to be scattered among numerous candidates, reducing the likelihood that anyone would receive a majority, especially as it was doubted that many men had sufficient national reputations to garner a majority of electoral votes. In a two-party system, in contrast, electors would be choosing between just the two candidates chosen by the parties.

The Electoral College was not created to be a deliberative body, since its members would not meet but would, as expressly stated in Article II and the Twelfth Amendment, vote separately in each state.³² This decision was made partly because of the difficulties of travel, but more because of concern lest the choice of the President be influenced by cabals, agents of foreign powers, other intriguers, or corrupt deals. It was believed that requiring that the electors

30. In those states, 18 out of the then total of 24, in which electors were chosen by popular vote. His popular vote lead over Adams was commanding—42.4 percent versus 31.9 percent; Glennon, *When No Majority Rules*, at 13, 15. By the next election, all but one of the states chose electors by popular vote.

31. See, for example, Jack N. Rakove, *Original Meanings: Politics and Ideas in the Making of the Constitution* 268 (1996).

32. "It was to be a strange college—more like a correspondence school"; Jules Witcover, *No Way to Pick a President* 249 (1999).

vote in their home states rather than congregating to vote, that the electors not be federal officials, and that all electoral votes be cast on the same day would minimize these dangers.³³

Such was the scheme of representative democracy created by the Constitution of 1787 for the federal government. The history of U.S. representative democracy since that date is a vast subject, but fortunately only three facets of that history are important for my purposes. One is the general though irregular movement to broaden the suffrage. Another is the trend away from indirect election. The third is the evolution of election administration, with particular reference to efforts to avoid (or if necessary resolve) deadlocks and to count votes accurately, which turn out to be related desiderata.

The movement to broaden the suffrage antedates 1787. On the eve of the Revolution, the electorate for the colonial assemblies, following the British model, was generally limited to adult Protestant males who had freeholds (that is, land ownership) of some specified minimum value. The theory behind the limitations was that only propertied men would have sufficient economic independence and political knowledge to be independent and competent voters rather than pawns of the wealthy and knowledgeable, or, in the case of a woman, of her husband, brothers, or father. Though made at least somewhat plausible by the economic and social conditions of the time and by the fact that the ballot generally was not secret, the theory was at best only partial. It did not explain the religious exclusions from the suffrage or the preferred position of owners of real estate compared with owners of other forms of property that might be equally valuable. Religious hostilities, distrust of city folk, and fear of debtors ganging up on credi-

33. *The Records of the Federal Convention of 1787*, vol. 2, 500 (Max Farrand ed., rev. ed. 1937); Tadahisa Kuroda, *The Origins of the Twelfth Amendment: The Electoral College in the Early Republic, 1787–1804* 11, 21 (1994); Peirce and Longley, *People's President*, at 22, 27, 29; Slonim, "Electoral College at Philadelphia," at 52–53.

tors and, more generally, of the poor expropriating the rich played a larger role in the restrictions on the suffrage than the incomplete theoretical justifications based on notions of independence and competence. (The most plausible justification for the preference accorded owners of real estate was that they were more vulnerable to expropriation because their wealth was immobile.)³⁴ Lack of independence was decisive, however, against permitting slaves to vote, since their votes would be controlled by their masters and thus would magnify the political power of slaveholders.³⁵

The limitations on the franchise eroded significantly between 1775 and 1787. The causes of this erosion were ideological and practical. The slogan “no taxation without representation” made it difficult to justify the denial of the franchise to people who paid taxes yet happened not to own land, especially since the limitation of the franchise to freeholders had been justified in part by the argument that they paid most of the taxes.³⁶ The equally influential slogan “all men are created equal” pointed toward universal adult male suffrage. And it was difficult to ask people to join the Continental Army without giving them the rights of a citizen.³⁷

Yet when the Constitution was adopted, only Vermont had abandoned all property qualifications for voting,³⁸ and the framers decided to allow each state to set the qualifications for voters in federal elections conducted in that state. As I have already noted, the qualifications to vote for members of the House of Representatives, the only form of direct election ordained by the Constitution, were

34. Dinkin, *Voting in Revolutionary America*, at 29.

35. A similar reason underlies the provision of the Constitution (Article I, section 2, clause 3) that counts a slave as only three-fifths of a free person for purposes of determining the number of members of the House of Representatives and hence of the Electoral College to which a state is entitled.

36. Williamson, *American Suffrage*, at 5–7; see also at 78 and at 79 (rejection of theory of “virtual representation”).

37. *Ibid.* at 80, 82. Later linkages of expansions of the suffrage with wartime exigencies are listed in Testi, “Construction and Deconstruction,” at 390. For a more extensive discussion, see Keyssar, *Right to Vote*, at 466 (index references under “War”).

38. Williamson, *American Suffrage*, at 135.

to be the same as those for voting for the members of the lower house of the legislature of the voter's state, while Senators were to be appointed by the legislature of each state and Presidential electors by each state in the manner directed by the state legislature.

The trend toward broadening the franchise continued after 1787, powered by democratic sentiment,³⁹ by (what is not the same thing) a decline of deference, by agitation of the disfranchised for the vote,⁴⁰ and by the inherent ratchet effect of changes in the franchise. The franchise is likely to be enlarged whenever the currently dominant political forces in the society believe that the newly franchised voters will support them rather than their opponents,⁴¹ and once a new group is enfranchised it becomes difficult later to withdraw the franchise from it if the political winds change, because the members of the group will vote solidly against the change. By the eve of the Civil War, universal adult (age 21 or older) male suffrage had been achieved in the Northern states,⁴² and reinstatement of property qualifications would have been politically infeasible, quite apart from ideological considerations.

But it would be wrong to infer from the ratchet effect that the expansion of the franchise is monotonic. The effect is real, but other forces are also at work. After Reconstruction ended following the election of Rutherford Hayes to the Presidency in 1876, the Southern states, forced by the Fifteenth Amendment to extend the franchise to blacks, nevertheless were able through a variety of devices, ranging from poll taxes and literacy tests to outright intimidation, to disenfranchise most blacks. Moreover, the scope of

39. Yet not, oddly, by abolitionism. Although some Southerners linked abolitionism with universal suffrage (*ibid.* at 288), the voting rights of blacks actually diminished in the North between the Revolution and the Civil War. Keyssar, *Right to Vote*, at 87–93; *Democracy, Liberty, and Property: The State Constitutional Conventions of the 1820s* 137–138 (Merrill D. Peterson ed. 1966).

40. Keyssar, *Right to Vote*, at 35.

41. For examples, see *ibid.* at 39–42.

42. With the principal exception of blacks, whom only five Northern states allowed to vote.

the franchise can contract merely because of demographic changes occurring against a background of unchanged rules. For example, if aliens are forbidden to vote and they become a larger fraction of the population, the fraction of eligible voters will, if nothing else changes, fall automatically. The same is true if the birth rate increases and as a result a larger fraction of the population is below the voting age. The effect of expansion of the suffrage on actual voting can also be—and in fact to a considerable extent has been—offset by a decline in the turnout of eligible voters.⁴³

Aliens are an example of a group that, being unorganized and unpopular, may not be able to take advantage of the ratchet effect. After the Civil War, the flood of immigrants created anxieties about the voting power of these new citizens, and literacy tests were instituted for the first time⁴⁴—along with an effective de facto literacy test that bears a distant resemblance to the punchcard ballot. Until late in the nineteenth century, the government did not supply the ballots for voting in elections. Instead each political party supplied ballots containing a party-line vote for the party's candidates. The voter would simply select one party's ballot and drop it into the ballot box. The party ballot was replaced, largely in the last decade of the century, by the "Australian" ballot: a paper ballot, supplied by the voting authorities, that contained a list of the candidates, on which the voter would mark his preference. (Such a ballot had first been used in Australia; hence the name.) A voter who was not literate would have difficulty using the Australian ballot,⁴⁵ a result welcomed by those who feared the voting power of immigrants. At the same time, the heretofore rather

43. Testi, "Construction and Deconstruction," at 390-392, 410-413.

44. Keyssar, *Right to Vote*, at 142-146; Testi, "Construction and Deconstruction," at 400. Testi points out that registration requirements, also a late nineteenth-century innovation, had a disenfranchising effect while at the same time reducing vote fraud.

45. This problem is overcome in India, where about half the population is illiterate but illiterates are entitled to vote (as they are in the United States), by printing the party's symbol next to the names of the candidates, so that to vote for a party's candidates the voter has only to learn to recognize the party's symbol.

casual attitude toward voting by aliens⁴⁶—the distinction between citizens and aliens not being strongly marked—gave way to rules excluding aliens from the franchise.⁴⁷

The practical and ideological forces that, despite some backsliding, led to the enlargement of the franchise in the nineteenth century also led to expanding the categories of officials elected by the people. In the eighteenth century the only popularly elected officials had been the members of the lower houses of the federal and state (or colonial) legislatures. Judges became elected rather than appointed officials in most states in the nineteenth century, as did state governors, members of the upper houses of the state legislatures, and Presidential electors. It has thus become anomalous that the President of the United States is not elected by popular vote. Yet there are only two certain instances in which the popular-vote winner failed to win the electoral vote: the election of 1888, in which Benjamin Harrison lost the popular vote to Grover Cleveland but won the electoral vote and so became President, and, of course, the election of 2000. The controversial elections of 1800, 1824, 1876, and 1960 are distinguishable—some of them, however, only narrowly. Let's consider them briefly.

In 1800 Jefferson and his running mate, Aaron Burr, received the same number of electoral votes, and Jefferson was elected President by the House. The deadlock in the Electoral College had been caused by the fact that Article II of the Constitution, while giving each elector two votes, did not provide for the electors to vote separately for President and Vice President. The theory was that the best man would come in first and become President and the second-best man would come in second and become Vice President. But if the electors thought alike on who should be President

46. Keyssar, *Right to Vote*, at 32–33, 38; Williamson, *American Suffrage*, at 277–278; Testi, “Construction and Deconstruction,” at 388.

47. *Ibid.* at 392–393. This change was particularly rough for persons of Asian origin and for American Indians; neither class of persons was eligible for U.S. citizenship until well into the twentieth century.

and who Vice President, and accordingly cast one of their two votes for their preferred Presidential candidate and the other for their preferred Vice Presidential candidate, the two—though candidates for different offices—would end up with the same number of electoral votes, and the designated Vice Presidential candidate might not gracefully withdraw (Aaron Burr did not, and Alexander Hamilton’s decision to throw his support to Jefferson was one of the events that lay behind the famous, fatal duel).⁴⁸ For that matter, if there was more agreement on who should be Vice President than on who should be President, the Vice Presidential candidate might receive more electoral votes (as almost happened in 1800), and so become President. These sources of deadlock (or worse) were removed by the Twelfth Amendment, adopted in 1804. The amendment required the members of the Electoral College to vote separately for President and for Vice President.

In 1824 Andrew Jackson won both the popular and the electoral vote, but because he did not have a majority of the electoral vote, but only a plurality, the choice of President was made by the House of Representatives, which picked John Quincy Adams.

In 1876 Samuel Tilden was declared the winner of the popular vote, but competing slates of electors in several Southern states (including Florida!) made the outcome of the electoral vote uncertain. An ad hoc commission created by Congress in January 1877 to resolve the dispute over the electors awarded the disputed votes to Hayes, who thus obtained, when objections in Congress to the commission’s award failed, a majority in the Electoral College, and so became President.⁴⁹ Because of extensive vote fraud by Democrats as well as by Republicans, it is uncertain whether Tilden really did win the popular vote.⁵⁰

48. Joseph J. Ellis, *Founding Brothers: The Revolutionary Generation* 40–43 (2000).

49. Asher C. Hinds, *Hinds’ Precedents of the House of Representatives of the United States*, vol. 3, §§ 1953, 1954 (1907).

50. See William Josephson and Beverly J. Ross, “Repairing the Electoral College,” *22 Journal of Legislation* 145, 157 n. 77 (1996), and references cited there.

In 1960 John F. Kennedy won the popular vote by only a shade over 100,000 votes. There were serious allegations of fraud by Democratic election officials in Illinois and Texas, but the number of votes affected was not enough either to change the result in the Electoral College vote or to deprive Kennedy of his plurality of the popular vote nationwide. Deciding who won the popular vote in 1960 is clouded, however, by a question unrelated to fraud, namely how to classify the popular votes for the 6 unpledged Democratic electors in Alabama, who, out of a total of 11 Democratic electors in that state, ended up voting for Harry Byrd rather than for Kennedy. If Kennedy is allocated 5/11 of the popular vote in Alabama, then Nixon, not Kennedy, had a plurality of the nationwide popular vote.⁵¹

In 2000 Al Gore won the popular vote, but George W. Bush obtained a bare electoral-vote majority—thanks to Florida, which many people believe Bush “stole” just as Hayes may have done 124 years earlier. We shall examine that contention in later chapters. Whether it is well founded or not, there is no question that Gore won the nationwide popular vote fair and square.

In short, in five elections (1824, 1876, 1888, 1960, and 2000) the winner of the popular vote for President either was not or may not have been (1876 and 1960) elected President. But the wedge that the Electoral College drives between popular democracy and election to the Presidency is larger. Because Presidential candidates campaign to win the electoral vote rather than the popular vote, they allocate their efforts, their appeals, their choice of running mate, and their policies and appointments when elected differently than they would if the President were chosen by popular vote rather than by the vote of the Electoral College. We shall return to this issue in the last chapter.

51. Longley and Peirce, *Electoral College Primer 2000*, at 51; Lawrence D. Longley and Alan G. Braun, *The Politics of Electoral College Reform* 3–6 (1972).

The twentieth century saw further expansions both in the suffrage and in the categories of official appointed by popular vote. The Seventeenth Amendment, ratified in 1913, required the direct election of Senators. The reasons were, in part, intensely practical, such as that elections for state legislators were sometimes overshadowed by concerns over whom a legislator might support for U.S. Senator and that legislatures frequently deadlocked over the choice of Senators.⁵² In 1920, the Nineteenth Amendment was adopted, guaranteeing the right to vote to women. Subsequent amendments abolished poll taxes, entitled the District of Columbia to appoint Presidential electors, and guaranteed the right to vote to 18-year-olds. More and more states adopted the primary election as the method of choosing the candidates of the major parties. And legislation designed to make the Fifteenth Amendment a meaningful protection of the franchise of black citizens⁵³ culminated in the abolition of literacy tests for voters in all federal elections. With universal adult suffrage within reach, attention shifted to subtle issues of voting power, including malapportionment (a conspicuous feature of the U.S. Senate and therefore of the Electoral College as well), gerrymandering, the creation of districts in which minority groups would have a voting majority, restrictions on candidacy, lengthy residency requirements, and campaign financing.

Because it became an issue in the 2000 election deadlock and its aftermath, we should consider the merit of the goal of universal suffrage—especially when it is pressed to the point of insisting that people who cannot read well enough to follow voting instructions should be permitted, perhaps even assisted, to vote. One way to put the question is to ask whether it would be desirable, were it politically feasible (which it is not), to confine the vote to people who

52. Congressional Quarterly, Inc., *Guide to U.S. Elections* 447–451 (3d ed. 1994); David A. Strauss, “The Irrelevance of Constitutional Amendments,” 114 *Harvard Law Review* 1457, 1496–1499 (2001)

53. Voting Rights Act of 1965, 42 U.S.C. § 1973.

are well informed about the public issues—including issues of leadership, competence, and probity—that are relevant to picking the best representatives. It would be undesirable. The politically well informed are an unrepresentative slice of the population. They differ systematically from the poorly informed along the dimensions of race, income, and education.⁵⁴ They have interests as well as opinions, and, since they are not a random draw from the population, their interests differ systematically from those of other groups. If the politically savvy monopolized the vote, their interests would have more weight than those of other people, the politically apathetic, immature, or alienated, unless we indulge the unrealistic assumption that well-informed people can be depended upon to be altruistic rather than self-interested voters. Once that assumption is abandoned, it becomes clear that the interests of any group that lacks the franchise are likely to be undervalued in the political process.⁵⁵ It is on this basis that I have urged consideration of giving each parent an extra one-half vote for each of his or her minor children.⁵⁶

Some people, such as small children and the severely retarded, cannot form a competent conception of their own interests. But this is not the case for illiterates, especially in an era in which people get most of their information about public affairs from radio and television rather than from the print media.⁵⁷ Literacy tests for

54. Michael X. Delli Carpini and Scott Keeter, *What Americans Know about Politics and Why It Matters* (1996).

55. “The interest of the excluded is always in danger of being overlooked”; John Stuart Mill, *Considerations on Representative Government* 66 (1870).

56. Posner, *Aging and Old Age*, at 289.

57. Mill, writing before television, thought a literacy requirement essential. But it is not just television that separates Mill’s political culture from ours; the differences between nineteenth-century England and twentieth-century America run much deeper, as is illustrated by his belief that only taxpayers should be permitted to vote (“no taxation without representation” implying, he thought, no representation without taxation), that paupers therefore should be excluded, and that educated people should be given additional votes. Mill, *Considerations on Representative Government*, at 174–186. By “illiterates,” I do not mean only, or primarily, people who cannot read at all—cannot read a street sign, for example, or sign their own name. There are, relatively speaking, very few of those. I mean people who have very serious reading difficulties, so that, for example, they cannot read a newspaper with comprehension.

voting have now been outlawed, in major part because of their historical association with the pertinacious efforts of the Southern states to deny the vote to blacks. But a voting technology that as a practical matter requires literacy to cast a vote that will be counted operates in the same direction. Another difference between children and the severely retarded, on the one hand, and illiterates, on the other, is that children and the severely retarded usually have someone—a parent or guardian—to look after them, and so are less needful of the vote to protect their interests; illiterates do not.

There is also a psychological factor to be considered. The right to vote is a symbol of equality. It dramatizes the principle that every person is to count for one and no one for more than one, at least in the political sphere. This may be hokum or sentimentality, or even a mask for the inequalities of circumstance and opportunity that pervade our (as every) society; but it is a brute fact about the American political culture. It is one reason why giving additional votes to members of particular groups (say, to blacks, or to veterans) to reward past services or to compensate for past or to offset present discrimination is out of the question, and why denial of the suffrage is taken so much more seriously than denial of giving votes equal weight (as in the Senate and the Electoral College); and it is why ex-felons are denied the vote in some states—as a symbol of disapprobation. People are not illiterate by choice, and to deny them the vote would therefore be a gratuitous insult, as is not the case with denying the vote to ex-felons.⁵⁸

The psychological effect of denying the vote to people may have practical consequences. In Mill's words, "whoever, in an otherwise popular government, has no vote, and no prospect of obtaining it, will either be a permanent malcontent, or will feel as one

58. With the growth in the number of people who have a felony record, however, and given that a large and growing percentage of felonies are nonviolent crimes against willing victims (mainly the sale of illegal drugs, an arbitrary subset of mind-altering substances) and that the composition of the ex-felon population is disproportionately black, this exclusion too has become controversial.

whom the general affairs of society do not concern.”⁵⁹ But not too much weight should be placed on the symbolic and psychological dimensions of the right to vote. They are extremely speculative. The important thing is that even people who cross only a very modest threshold of competence and independence ought to be allowed to vote in order to protect their interests, and that illiterates have interests and, in our radio- and television-saturated society, generally cross that threshold.

The dramatic and ultimately successful struggles to broaden the *legal* franchise, plus the increasing preoccupation with subtle issues of voting power (even if everyone has one vote, voting *power*—that is, the power through voting to influence the outcome of an election—may be unequally distributed, as when legislatures are malapportioned), have obscured the mundane issues of election administration that the Florida 2000 Presidential election brought to light. With the successful enforcement of the Voting Rights Act, the abolition of poll taxes and literacy tests, simplified registration, the curtailment of durational residency requirements, and the reduction in the amount of corruption and the hold of machine politics in big cities, the subject of election administration became practical (rather than a matter of theoretical speculation or moral urgency), fragmented (because election administration—as distinct from federal constitutional and statutory regulation of voting—is decentralized to states, counties, and even precincts), and technological. It dipped below the radar screen of constitutional lawyers, and most political scientists as well. Not only the elections of 1824, 1876, and 1888 but also the close and problematic elections of 1960 and 1968 (the former rife

59. Mill, *Considerations on Representative Government*, at 172–173. Mill also believed that, independently of all practical considerations, “every one is degraded, whether aware of it or not, when other people, without consulting him, take upon themselves unlimited power to regulate his destiny”; *ibid.* at 173. Mill made no effort to reconcile this ethical point with his advocacy of excluding paupers and other nontaxpayers, as well as illiterates, from the franchise.

with fraud and the latter almost undone by runaway electors), became “history.” Even the much more recent, exceptionally bitter, and absurdly protracted congressional battle over the deadlocked 1984 election in Indiana’s Eighth Congressional District was forgotten.⁶⁰ Forgotten too was the push in the wake of the 1968 Presidential election to abolish the Electoral College by constitutional amendment, a proposal approved by the House by the requisite two-thirds margin in 1969.

The problematic Presidential elections that I have listed involved or exposed a variety of problems. The 1824 election taught that a President who had lost both the popular and the electoral vote—and who owed his election only to the House of Representatives, because the electoral-vote winner had had only a plurality, and not a majority, of the electoral votes—might not be accepted by the nation as fully legitimate. Adams was defensive about his victory and was soundly trounced by Jackson in their rematch in 1828, though in part this was due to the suspicion that Adams had owed his election to a “corrupt bargain” with Henry Clay, the Speaker of the House, who indeed became Adams’s secretary of state⁶¹—but such suspicions are likely when the election is thrown into the Congress. A similar danger, that the winner of both the popular and the electoral vote might nevertheless not be elected President, loomed in the 1968 Presidential election, because of George Wallace’s strong third-party candidacy, since a third-party candidate who won some electoral votes might, by throwing them to the losing major-party candidate, give that candidate a majority in the Electoral College. The problem in the 1960 election was not

61. Glennon, *When No Majority Rules*, at 15–16.

only fraud but also, and more seriously, unpledged electors, and it loomed briefly again in 2000 when some Democrats mounted a campaign to persuade Bush electors to switch to Gore. The election of 1888 was a reminder that the popular-vote winner can lose the electoral vote, which of course happened again in 2000, though so far without untoward results. The problem in 2000 was deadlock, and it may actually have had the effect of distracting people from the anomaly of the popular-vote winner's losing the election, though Gore's lack of personal popularity was also a factor.

The 1876 election fiasco was the most ominous portent for 2000. It exposed, as had the 1800 election, an embarrassing gap in the Constitution. The framers had foreseen and provided for the case in which no candidate wins a majority of the electoral votes (though the relevant provision is ambiguous, as we shall see), but not for the case in which there is a dispute over whom a state has appointed to be its Presidential electors. An ad hoc resolution of the dispute over the 1876 election was not achieved until the eve of the inauguration, and it involved Congress's appointing a committee whose deciding member was a Republican Supreme Court Justice who, along with the other Republicans on the committee, voted for the Republican candidate.⁶² These events led to the enactment a decade later of the Electoral Count Act, now Title III of the U.S. Code, which specified a procedure for resolving a future such deadlock. We shall see in Chapter 3, however, that the procedure is both incomplete and of uncertain constitutionality.

Completely unforeseen was the possibility that a deadlock in the Presidential election might arise not from skullduggery (as in the 1876 election), not from a failure of any candidate to obtain a majority of the electoral votes, not from runaway electors, and not

62. Again there was a suspicion of a corrupt bargain—a promise to end Reconstruction in exchange for the Democrats' accepting Hayes's election. See "The Electoral Commission [Hayes-Tilden Election]," *Great Debates in American History*, vol. 9, ch. 3 (Marian Mills Miller ed. 1970).

from an actual tie in the popular vote in a key state, but from innocent defects in electoral mechanics, whether defects in the design of a ballot, the staffing of the polling places, or the design, maintenance, or operation of voting and vote-tabulating machines, or gaps and ambiguities in the state statutes regulating the administration of elections and the resolution of election disputes. Nor was it foreseen that such shortcomings not only might make it difficult to determine who had won an election, and thus increase the probability of having to activate some postelection mechanism to decide who the winner was, but also might selectively disenfranchise voters. It had always been understood that the methods for counting votes are imperfect; challenges to the outcome of close elections have not been uncommon and have sometimes resulted in recounts that changed the outcome. But that this might happen in a Presidential election, that procedures that function properly in less momentous and less time-sensitive elections might not serve for a deadlocked Presidential election, and that the federal constitutional and statutory provisions relating to a contested Presidential election are rickety, were lost to view. These problems achieved visibility, not only to the public at large but also to scholars of the electoral process, only with the 2000 election. The gravity of such problems, and the difficulty of solving them with our existing laws and institutions, are the themes of the subsequent chapters.

Chapter 1

The Road to Florida 2000

Democratic Theory—Briefly

BEHIND THE 2000 Presidential election in Florida lie thousands of years of thinking about, controversy over, experimentation with, regulation of, and tinkering with the popular vote as the

method of political governance deemed central to democratic theory.¹ Not that voting is limited to the political arena, or to democracies. Appellate decisions are determined by judges' votes; one of the jokes that went the rounds after *Bush v. Gore* was decided had Bush saying, "I want to thank those who voted for me for President: Rehnquist, O'Connor, Scalia, Kennedy, and Thomas." And one of the complaints about the punchcard voting machines used in a number of Florida counties was that the machines had been worn down by being lent for use in union elections. Voting is a

1. For a taste of the complexity of democratic theory, to which I cannot possibly do justice in this book, see Thomas Christiano, *The Role of the Many: Fundamental Issues in Democratic Theory* (1996); James A. Gardner, "Consent, Legitimacy and Elections: Implementing Popular Sovereignty under the Lockean Constitution," *52 University of Pittsburgh Law Review* 189 (1990).

—12—

The Road to Florida 2000 —

highly economical method of aggregating preferences, which is why it is used so widely. But it is also a very crude method. not weight preferences by intensity or knowledge, and, partly for that reason, it does not impose a cost on the ignorant, irresponsible, or exploitive exercise of the franchise. Especially when the ballot is secret (which it has to be wherever there is concern about intimidation or other coercion, or undue influence), the voter is insulated from criticism, however just; he is neither rewarded for voting intelligently nor punished for voting stupidly.

² It does

I have been speaking thus far of voting in its pure "one person—one vote" sense, however, and often impurities are deliberately introduced. Corporate voting is by share rather than by share-

holder; votes are weighted by the voter's financial interest in the outcome of the vote. We shall see that John Stuart Mill thought that in political elections abler individuals should be given additional votes. Even in modern American political elections there are eligibility requirements that, deliberately or not, prevent or discourage the most incompetent, apathetic, and irresponsible elements of the population from voting. Voters must be adults, must register to vote, must not be in jail or prison (often, must not be ex-felons as well), must be residents of the voting district, usually must be citizens. Obviously these are coarse sieves if the objective is to confine voting to intelligent, knowledgeable, civic-minded, politically mature, responsible people with a tangible stake in the outcome of the election.

Why anyone who is eligible *bothers* to vote is a puzzle, ³ especially to economists, who emphasize self-interest as the engine of human action. The puzzle is not why voters do not invest much

2. A proposition substantiated in a huge literature; for a glimpse, see Amartya Sen, "How to Judge Voting Schemes," *Journal of Economic Perspectives*, Winter 1995, p. 91. One of the complications is that there is a great variety of potential voting rules, all with different effects. For a lively discussion, see Gordon Tullock, *On Voting: A Public Choice Approach*, ch. 2 (1998).

3. John H. Aldrich, "When Is It Rational to Vote?" in *Perspectives on Public Choice: A Handbook* 373 (Dennis C. Mueller ed. 1997); Anthony Downs, *An Economic Theory of Democracy*, ch. 14 (1957).

— Chapter 1

time in equipping themselves to vote intelligently (something that many of them would lack the intelligence or education to be able to do, no matter how much time they spent studying the issues and the candidates); obviously they have little to gain from such an investment, since political elections, other than on the most

local level, are virtually never decided by a single vote. The puzzle is that people vote at all in a society in which voting is not compulsory, given the lack of instrumental value to which I have just pointed—even the 2000 Presidential election in Florida was not decided by a single vote.

Of course, many Americans who are eligible to vote do not vote. The nationwide turnout in the 2000 Presidential election was only 50 percent of the eligible voters, and it is often much lower in more obscure elections. Yet many do vote. The costs are slight. But what are the benefits? Because a single voter cannot swing the election, voting is less plausibly regarded as an activity yielding instrumental benefits than as a form of consumption, like rooting for one's alma mater at a college football game. Consistent with this suggestion, voter turnout is largely a function of how exciting the election campaign has been; the voter chooses between the candidates much as he would between competing brands of an ordinary product or service.⁴ Voting is also a way of constructing and signaling the voter's solidarity with like-minded people. But that is often an element of ordinary consumption too; the choice of brand may be influenced by a desire to signal taste, values, or affluence. Because the benefits of voting are small, however, even modestly high costs of voting can depress turnout significantly. The fact that turnout in U.S. elections is low by international standards is largely explained by mundane factors affecting, however slightly, the cost

4. See, besides the references in note 3, Daniel Hays Lowenstein, *Election Law: Cases and Materials* 54–60 (1995), a good summary of the literature on incentives to vote.

of voting. For example, elections are scheduled on regular workdays in the United States, rather than on holidays or weekends as in a number of other countries. Registering to vote is also more of a bother in the United States, because registration is carried out at the state level; Americans tend to move around a great deal and so have to register more frequently than the citizens of less mobile or more centralized societies.⁵

The popular vote is often thought to be *the* defining element of political democracy, but that is a modern view. The classical view, which originates in the Athenian concept of democracy⁶ and contains an insight that we moderns have largely lost sight of, is that filling political offices by popular election rather than by lot conduces to *aristocratic* (in the Aristotelian sense) rather than democratic government. Conduces, in other words, to government by “the best” rather than by the average (as in a system of filling offices by lot) or by “the people” as a whole.⁷ Only *representative* democracy is aristocratic in this sense, however. Direct democracy—voting on issues rather than for officials—is not. Although a hallowed part of our tradition in the form of the New England meeting and still employed to a limited extent in some of our states, primarily in the form of the referendum, direct democracy is infeasible in a large, complex polity. Switzerland employs the referendum extensively—and it is exceptional even among small countries in this respect.⁸ Moreover, Switzerland is also and primarily a representative democracy, like California and other U.S. states that authorize referenda. In these instances direct democracy merely

8. On direct democracy generally, see Dennis Mueller, *Constitutional Democracy*, ch. 7 (1996).

— Chapter 1

supplements representative democracy, providing a means of breaking cross-party coalitions of politicians.⁹

The aristocratic character of representative democracy is rooted in the fact that, especially if political parties are weak or nonexistent (the significance of this qualification will become clear shortly), voters will tend to pick the best candidate for each office. The best candidate—which is to say the candidate most likely to occupy the office with distinction—is likely to be a superior person, not at all typical of the voters. And it is the officeholders, the elected officials and the officials whom they appoint, who govern—not the people who elect them.¹⁰ Of course voters may often be deceived about who is the best candidate; even so, an average Joe is unlikely to prevail in electoral competition, just as an average Joe is unlikely to win the world boxing title. The glib, the clever, the shrewd, the handsome, and the charismatic are likely to dominate the electoral competition, occupy the principal offices, and constitute, in short, a political aristocracy. Not that the people are an inert element in representative democracy. The politicians will vie for their favor by advocating policies that command broad support. But these advocates will be drawn from a narrow and unrepresentative segment of the community, and the policies they advocate, or seem to advocate, to win popular support will often not be the policies they implement.

Representative democracy becomes monarchical when the representative is a dictator and there is only one candidate, as in the plebiscites employed by Napoleon and Hitler to cement their rule, or the one-party voting in communist states. But democratic

9. Bruno S. Frey, "Direct Democracy: Politico-Economic Lessons from Swiss Experience," 84 *American Economic Review Papers and Proceedings* 338 (May 1994).

10. This assumes that, as in our system of government, the voters are not authorized to issue binding instructions to the successful candidate. If they were, officeholders would be genuine agents, rather than principals; the people would rule, as they do not in our system.

aristocracy, oxymoron as it may seem, best describes our system. The framers of the original Constitution, the Constitution of 1787, decreed that the House of Representatives would be popularly elected, but they had a distinctly aristocratic conception of the Presidency; it is reflected in the device of the Electoral College. In the wake of the 2000 election fiasco, there are renewed calls to abolish the Electoral College. We shall be considering the merits of abolition throughout this book, particularly in the last chapter. The deadlock, and the difficulties of resolving it, were inseparable from that institution. But even if the Electoral College were abolished and the President directly elected by popular vote, our political system would remain aristocratic in Aristotle's sense.

Our political aristocracy is not hereditary, and its direct or indirect dependence on the popular vote, not only for initial appointment but also for reappointment at stated intervals, tends to align its interests more closely with the interests of the population at large than do other systems of government.¹¹ Nevertheless, representative democracy, democratic self-government, and popular government are misleading descriptions of the system for governing modern "democracies." This is so not only because the people do not rule, and because there are no guaranties that they vote intelligently or even conscientiously, but also because the voters are not the people, but only a fraction (and not necessarily a representative fraction) of the entire population, and also because, as I

have noted, voting is a crude method of aggregating preferences. In the 2000 Presidential election, little more than a third of the population actually cast a ballot that was counted as a vote for one of the Presidential candidates, and the winner of the popular vote lost

11. In a representative democracy, “elections are part of the system of accountability and control” (Gordon, *Controlling the State*, at 360), along with a host of other mechanisms, as Gordon emphasizes.

—17—

— Chapter 1

the election, because the loser had more electoral votes. Winner and loser, moreover, each had the votes of only about one-sixth of the total population.

Although the Electoral College is controversial, one of the principles that it embodies, that of districted rather than at-large elections, is not; and yet districting drives a further wedge between popular majorities and electoral outcomes. If two parties compete for control of a 100-member state legislature elected by districts of equal population, a party that wins a bare majority of the votes in a bare majority of the districts will end up with control of the legislature, though that party could be the preference of only a shade over 25 percent of the state’s voters, who might in turn be only a modest fraction of the population. This paradox is complicated at the Presidential election level by the facts that a state’s electoral votes are the sum of the state’s Senators and Representatives in Congress and that each state has two Senators regardless of its population. This might be thought to imply that the votes of the voters in the less populous states are weighted more heavily in the

Electoral College than those of the voters in the more populous states. Yet we shall see in Chapter 5 that this is an oversimplification, because given the winner-take-all rule that all but two states use for allocating their electoral votes, swing voters in more populous states have more influence in the Presidential election than swing voters in less populous ones.

The only constant is that voting is indeed a crude method of mapping preferences onto policies—and for the further reason that voting for a candidate is voting both for a person and, in effect, for a package of likely policies: the policies the candidate supports, possibly the policies endorsed in his party's platform. So wholly apart from voter ignorance, policies may be adopted that do not actually command majority support, either because a majority of voters prefers the candidate whose policies they do not like (they may consider him an abler leader) or because the majority likes

—18—

only a subset of those policies. In a two-party system, moreover, the parties have a strong incentive to move to the center of the distribution of political opinion. This may force voters to choose between two candidates who have largely identical views that are not widely supported but that have the support of the median voter. Making a choice between two alternatives is more difficult the harder the alternatives are to distinguish—but it is also more difficult the more alternatives there are, so that a proliferation of candidates does not cure the Tweedledum-Tweedledee problem. And such a proliferation is in any event unlikely because a two-party system is a natural although not inevitable corollary of a

Presidential as distinct from a parliamentary system. It is difficult for a third party to mount a credible Presidential campaign—third-party Presidential candidates are invariably just “spoilers”—and so it is difficult to take the party itself seriously as a national force.

13

What really does in third parties, however, is a winner-take-all voting system (as distinct from proportional representation) at the legislative level. For that is likely to prevent a third party from electing any legislators at all, making the party impotent at the legislative as well as the executive level.

When ignorance about issues and candidates,¹⁴ exploitive intentions (voting for the party that you hope will, if it takes

12. On both points, see Richard R. Lau and David P. Redlawsk, “Voting Correctly,”

91 *American Political Science Review* 585, 592 (1997).

13. Arend Lijphart, *Democracies: Patterns of Majoritarian and Consensus Government in Twenty-One Countries* 130–131, 180 (1984).

14. “Interest in politics is generally weak, discussion is rare, political knowledge on the average is pitifully low, and few people actively participate in politics beyond voting. . . . And what good is even voting if for so many it is based on so little information?” Lau and Redlawsk, “Voting Correctly,” at 585. “Individuals are creatures of habit when they vote, as when they work and play. They vote for the same party in the present election as in the last one, unless that decision is perceived to have been unrewarded or punished. Unlike in market transactions, however, the rewards and punishments that follow voting are neither immediate nor often clearly linked to the act of voting. Thus, rational or irrational political beliefs and behavior—like beliefs in the prognostic powers of constellations of stars—are likely to persist even in individuals whose everyday behavior in the market place conforms well to that predicted by rational actor models.” Dennis C. Mueller, “Capitalism, Democracy and Rational Individual Behavior,” 10 *Journal of Evolutionary Economics* 67, 73 (2000). See also Larry

power, redistribute wealth to you from other people), low turnout, and errors in voting and in tabulating votes are added to the brew, it becomes apparent that voting registers informed public opinion

in only the loosest sense and the “popular will,” Rousseau’s “general will,” perhaps not at all. Some of the distortions may be offsetting, but that cannot be assumed. And while it is true that low turnout would not matter if nonvoters had the same interests as voters, they do not. Turnout is disproportionately high among the elderly even after adjustment is made for other influences on it a factor that, in combination with the disfranchisement of children, creates a strong public policy tilt away from children and toward the elderly.¹⁶ We shall note in Chapter 5 that the expressed political *preferences* of nonvoters tend to be quite similar to those of voters; but those preferences may not correspond very closely to nonvoters’ *interests*. As nonparticipants in the electoral system, nonvoters are unlikely to have given much thought to aligning their political views with their interests.

15 —

Our actual existing democracy falls so far short of the soaring ideals of the theorists of democracy¹⁷ that some of those theorists might be inclined to deny that our system is democratic. But that is to be unrealistic, as well as to attribute a fixed meaning to a word (“democracy”) of notorious plasticity. Representative democracy has decisive *pragmatic* advantages over alternative systems of governing a modern society, and so we can be enthusiasts for democracy without having to prate about self-government or the popular

M. Bartels, “Uninformed Voters: Information Effects in Presidential Elections,” 40

American Journal of Political Science 194 (1996). But not all students of the electoral process believe that voters are seriously uninformed. See, for example, Sam Peltzman, “How Efficient Is the Voting Market?” 33 *Journal of Law and Economics* 27 (1990); with specific reference to Presidential elections, see *ibid.* at 59–62.

15. John E. Filer, Lawrence W. Kenny, and Rebecca B. Morton, “Redistribution, Income, and Voting,” 37 *American Journal of Political Science* 63, 74–75 (tab. 2), 80 (1993).

—20—

will. Paradoxically, the advantages of representative democracy emerge most clearly if we eschew pious platitudes about civic virtue and assume that people (including those who live in democratic societies) are, whether as citizens or as officials, self-interested rather than public-interested or altruistic, or that, if they are public-interested or altruistic, the specific beliefs they hold are likely to be distorted by self-interest or ignorance. It is a realistic assumption and implies that people—whether the collective “We the People” of the Constitution’s preamble or individual persons—cannot be trusted to exercise power.

That is a worrisome thought. The core function of government has always been to provide services—classically, internal and external security—that the market cannot provide efficiently because the benefits which these services generate could not be appropriated by the private individual or firm that produced them. Imagine trying to finance the national defense by means of voluntary contributions. People who did not contribute would obtain the same benefits from national defense as those who contributed, and so the incentive to contribute would be meager. The same thing is true with regard to the financing of police, prosecutors, judges, and the rest of the law enforcement apparatus.

The effective performance of the core functions of government requires a concentration of physical power—the “monopoly of force” that all governments claim. Force to maintain law and order, force to extract the revenues necessary to pay for that maintenance. As a result, control of the government creates opportunities for expropriation of the citizenry’s wealth, and for other abuses, provided there are significant costs of emigrating, as there usually are. Quite apart from the danger of abuse, the mere fact that the basic government services are ones not sold in a market makes the monitoring of their efficient provision difficult. Both the loyalty and the competence of our political fiduciaries must somehow be secured by the institutions of the society.

— Chapter 1

The key institution in our society is, precisely, representative democracy, and its defining “democratic” feature is that the representatives are elected by the public at large, with each eligible member of the public having a single, nonsalable vote. But why voting? Why majority voting? Why equal voting? And why are votes nonsalable? These turn out to be related questions, and the answers will point us toward the central concerns of this book.

Voting in effect constitutes citizens¹⁸ the “owners” of the government, in much the same way that shareholders are the owners of corporations. But whereas shareholders vote by shares rather than per capita, because their stakes in the corporation may be very unequal, citizens have more or less equal stakes. Not entirely so, of course; people are very differently related to government so far as the costs they bear and the benefits they reap. But because of the great power of government, almost everyone has a significant stake in the government’s operation.

Too great a departure from the “one person—one vote” principle (as opposed to corporate democracy’s “one share—one vote” principle, under which, were it transposed to the political setting, a share might be a specified percentage of the total wealth of the electoral unit) would make acute the danger of the government’s being captured by a minority (I mean an electoral, not an ethnic, minority—a cabal, an oligarchy) bent on expropriating the property or extinguishing the freedom of the majority or of another minority. The reason is that the fewer people who have to be organized in order to achieve a common end, the more likely they are to succeed: transaction costs are lower, a proposition familiar to students of price fixing and other conspiracies.

For the same reason, votes must not be salable,¹⁹ since that would enable the concentration of voting power in the hands of a

18. Here used in a loose, indeed circular, sense, since aliens are sometimes permit-

ted to vote—a permission that constitutes them “citizens” in a meaningful sense, despite their (formal) alienage.

19. See Downs, *An Economic Theory of Democracy*, at 188–194; and for a fuller dis-

—22—

The Road to Florida 2000 —

relative handful of people or corporations. A market in votes presents a classic free rider problem. If a wealthy individual offered to buy the first million voting rights tendered to him at \$25 a vote, he would have little difficulty closing the deal, especially if many voters assumed that others would sell their right to vote for that price.²⁰ Suppose he wanted to buy a really commanding number of votes, such as 10 million—only a modest percentage, however, of the total number of votes cast in the 2000 election, and an even smaller percentage of the total number of votes potentially buyable, since the half of the electorate that did not bother to vote would be especially eager to sell their voting rights. He might have to pay a much higher price per vote. Suppose it would be \$100. Still, many firms and even individuals can plunk down \$1 billion in cash for an asset that is worth that much to them. Allowing votes to be bought and sold would, therefore, be practically as well as theoretically inconsistent with the principle of equal voting. Majority voting also follows from that principle, because it is the only method of vote counting that weights each voter’s vote equally.

In short, although the people do not rule in a representative democracy—that would be infeasible—they pick the rulers, kick them out when necessary, and provide for an orderly, peaceful succession (although the one in 2000 turned out not to be so orderly) when a vacancy occurs. The last point deserves particular emphasis

given the subject of this book. Hereditary monarchy solved the succession problem, but at the sacrifice of both quality assurance and democratic control, sacrifices that representative democracy avoids having to make. Taken all in all, representative democracy not only

cussion of the pros and cons of allowing votes to be sold, see Saul Levmore, "Voting with Intensity," 53 *Stanford Law Review* 111 (2000).

20. The theory of the two-tier tender offer. And during the 2000 Presidential campaign a market in votes did emerge, briefly, on the Internet ("**voteauction.com**"), before being shut down by a reminder of its illegality. The average transaction price was indeed only \$24.28. See http://62.116.31.68/end_of_bids.htm. Cf. Pamela S. Karlan, "Politics by Other Means," 85 *Virginia Law Review* 1697, 1713–1714 (1999).

—23—

— Chapter 1

honors the democratic principle but also controls the rulers, and solves the succession problem, better than any alternative system, provided—a qualification to be borne in mind throughout this book—that the procedures for determining the succession are fixed in advance, objective, administrable, and clear, so that succession is according to rules rather than to a power play by the loser.

With such advantages, one may wonder why representative democracy is not the universal system of government, and particularly why it seems to flourish only in wealthy modern countries, with a few exceptions, such as Switzerland even before modernity and a poor India today. (The Roman Republic was an interesting mixture of democracy and oligarchy.) Notice that I did not number the ancient Greek city-states among the exceptions. Direct democracy, the ancient Greek form of democracy, is feasible only in a very small, simple polity, because in a large or complex one the

information costs—not to mention the costs of underspecialization and of time—of citizen government are prohibitive. Representative democracy reduces all these costs by enabling a political division of labor between governed and governing without relinquishing popular control over the governors.

But unlike Greek-style democracy, representative democracy requires an elaborate institutional framework to avoid degenerating into oligarchy or dictatorship. Remember that in such a democracy it is officials who rule, not the people. Officials have their own interests, which may not coincide with those of the people. If able to monopolize the information relating to the administration of government, these imperfect agents may be able to perpetuate themselves in office while adopting policies that disserve their constituents. So a reasonably well-informed citizenry—a citizenry that even if not highly educated, or even highly literate, makes at least approximately accurate judgments about candidates and policies—is a prerequisite of democracy. Another prerequisite is a system of

—24 —

property and personal rights, including the right of free speech, enforced by judges who are not beholden to or intimidated by the representatives. For without such a system—that is, without real liberty—the representatives will be able to cow political opponents, steal elections through fraud and through intimidation of voters, and, by thus making reelection an empty formality, perpetuate their rule indefinitely.

So democracy depends on liberty, as well as being in tension with it because liberty curtails the power of the majority to impose

its will. The right to vote is not enough; it is really just the tip of an institutional-cultural-juridical iceberg; a competent and independent electorate, which implies a liberty-securing institutional infrastructure, is indispensable to the operation of representative democracy. Since people are self-interested and for that and other reasons untrustworthy, pure democracy—democracy that places no limits on what the majority or its representatives can do

²¹ —is an

extremely dangerous system of government, viable if at all only in tiny polities, where ties of family and friendship may enable voluntary cooperation to be substituted for coercion. Pure democracy is unstable and likely to degenerate into oligarchy or autocracy. Limited democracy is best. Representative democracy is limited democracy, even without judicially protected liberty, because it puts up a screen between citizens and the application to them of state power by other citizens.

It is also a far more efficient and economical system of governance than direct democracy. Not only does it enable specialization in the provision of government services and political goods; in addition, because governance is delegated to the specialists, the elected and other officials, the people at large do not have to

21. The term “pure democracy” should not be confused with “direct democracy.”

The former is democracy, representative or direct, without legal limits on what the democratic majority may do. The latter is governance by the people themselves rather than by representatives whom they elect.

—25—

— Chapter 1

spend all or even much of their time worrying about politics. Some theorists—Hannah Arendt is perhaps the outstanding modern

exemplar—are distressed that modern democracy enables the mass of people to redirect their energies from the public to the private sphere.²² Bonnie Honig would go further, radicalizing Arendt in an effort to restore “politics as a disruptive practice that resists the consolidations and closures of administrative and juridical settlement for the sake of the perpetuity of political contest.”²³ For most of us, it is a relief not to have to be jawing all the time in the *agora*.²⁴ Not for us exhaustive deliberation, life modeled on a faculty seminar. Not only is there much more to life than politics, but a preoccupation with politics is likely to exacerbate social conflict. Political conflicts are not intellectual disagreements, resolvable by deliberation or debate. They are clashes of interests and values. The political class in this country—the class that dwells obsessively on political issues—is more contentious, radical, dogmatic, and polarized than the country as a whole.

Representative democracy is historically and today associated with the market economy, though the correlation is one-sided. Nondemocratic nations often have market economies, but nations that do not have market economies are rarely democratic. A market economy seems therefore to be a necessary but not a sufficient condition for democracy. It is easy to see why it is not sufficient. Free markets are much more effective at generating wealth than non-

22. See, for example, Hannah Arendt, *The Human Condition* (2d ed. 1998), esp. pt.

23. “Arendt insists that a person can achieve an identity only through being seen and heard by his equals as they all deliberate the common fate. . . . Authentic politics fills the gap at the heart of the human condition.” George Kateb, “Political Action: Its Nature and Advantages,” in *The Cambridge Companion to Hannah Arendt* 130, 145–146 (Dana Villa ed. 2000).

24. Bonnie Honig, *Political Theory and the Displacement of Politics* 4, 124 (1993).

market economic systems, and an autocrat generally wants his country to be wealthy in order to keep his subjects happy, finance an effective security apparatus, and become wealthy himself without taking such a large proportion of national wealth that he causes serious unrest. (The qualification “generally” is important, however, as wealth may create pressure for democracy, as we are about to see.)

Three things make a market economy a prerequisite for representative democracy. First, such economies depend on respect for property rights, and the effective enforcement of property rights requires a competent and impartial judiciary, which is also essential to ensure that elections are honest and to protect the personal liberties that democracy, the (potential) “tyranny of the majority,” threatens. Judicial protection of property rights is the forerunner of judicial protection of political liberty. Second, market economies generate wealth, and wealth increases the demand for and the supply of education, communications, and leisure. These goods, along with the financial security of living in a prosperous society, create a citizenry that not only is reasonably well informed about political issues and candidates, but also is sufficiently independent economically not to be the pawn of the mighty; relations of patronage and dependence undermine the power-diffusing objective of equal voting. Third, market economies reward and thus encourage commercial values, which are more hospitable than aristocratic or religious ones to the political equality that undergirds a democratic system. Like theocrats, aristocrats (not in the Aristotelian sense, the sense I used earlier, in which aristocracy is rule by the best, but in the more familiar sense of a hereditary caste preoccupied with honor and status and disdainful of commercial pursuits) think the issues involved in government too important to be left to the people. They also (the extreme example is Coriolanus) disdain the dependence on the goodwill of *hoi polloi* that a democratic system

— Chapter 1

imposes on officials.²⁵ Persons engaged in market activities disdain others at their peril, since success in the market involves catering to the preferences of others, namely one's customers and to a lesser extent one's employees and other suppliers.

There are countercurrents. The ideology of the market can foster contempt for voting because of its lack of instrumental value and its failure to weight preferences by willingness to pay, which is how the market weights preferences. The sacralizing of property rights in the name of economic efficiency curtails democratic governance by disqualifying government from intervening in the market. And markets can foster inequalities in income and wealth, which can in turn foster selfish, exploitive voting as the electorate splits into classes that have little in common with each other. But these effects are outweighed by the support that a market economy offers to representative democracy; otherwise having a market economy would not be a necessary condition of a society's being a representative democracy.

The foregoing introduction to the practice of representative democracy, brief as it has been, suggests several points germane to the argument of this book. Representative democracy is a pragmatic institution rather than the instantiation of a theorist's ideal state. Voting is a method of control, not of administration. The people do not rule in a representative democracy; they control the rulers, their delegates. For voting to perform its function of control, voters must have some minimum of political sophistication, along with a measure of independence from other people. Voting is central to the orderly succession of democratic "rulers." "Orderly" implies ordered, and delegation of governance to specialists implies realism and practicality. American democracy is structured, formal,

25. Don Herzog, *Happy Slaves: A Critique of Consent Theory* 198–199 (1989).

remarks in a similar vein that a contested election “requires candidates to think the prize of election worth the risks of losing honor, or having one’s neighbors publicly certify that they prefer someone else. So it requires and reinforces the decay of honor as an organizing principle.” George Washington refused to be considered for President until assured that the vote for him in the Electoral College would be unanimous.

—28—

The Road to Florida 2000 —

practical, realistic, and both supportive of and supported by commercial values. It is not starry-eyed, carnivalesque, or insurrectionary. It is not pure or participatory democracy, and it does not consider political chaos a price worth paying to actualize the popular will. Its spirit is closer to that of Burke than to that of Rousseau. The populism of a Jefferson or a Jackson remains a part of our democratic ideology, but a smaller part than in days of yore. These summary reflections, too, will turn out to be relevant to evaluating the Supreme Court’s performance in *Bush v. Gore*.

A History of the Suffrage

The entwinement of democracy with economy will also play a role in our analysis of the Florida election. As we shall see in the next chapter, the deadlock and some of the bitterness sparked by its resolution had economic roots, such as illiteracy, which is linked to poverty, and the financial costs and benefits associated with different systems of voting. There was a subterranean issue of whether literacy should be a voter qualification. Although federal law forbids the use of literacy as a voter qualification in federal elections, the punchcard ballot used in a number of Florida counties (indeed used widely throughout the United States) requires a higher degree

of literacy than other common voting technologies.

Poverty fosters ignorance, and also dependence. These are age-old worries about political elections. By the eve of the American Revolution, the idea that an elected legislature was an element of civilized government had taken firm hold in Great Britain and its American colonies. But neither the principle of universal suffrage

26. 42 U.S.C. § 1973b(e)(2), upheld against constitutional challenge in *Oregon v.*

Mitchell, 400 U.S. 112 (1970). It might be questioned whether Congress has the power to regulate voter qualifications in Presidential elections, since the Constitution assigns the power to determine the manner of appointing Presidential electors to the states. U.S. Const. art II, § 1, cl. 2. But it would be impracticable for a state to fix different qualifications for voters for different offices in the same election. More on congressional power to regulate Presidential elections in subsequent chapters.

—29—

— Chapter 1

so familiar to us (though not fully actualized even today), nor the idea that all legislators (and the executive as well, and maybe even judges) should be elected by the people, had yet taken hold. The suffrage was limited as a matter of course to free adult males who owned property, specifically land. Property ownership was much more widespread in the colonies than in the mother country, with the result that something like two-thirds of free American adult males could vote. But they could vote only for the members of the lower house of the state legislatures. The governor was appointed by the Crown, and the members of the governor's council, corresponding to the Senate in the federal government ordained by the Constitution of 1787, were appointed by the governor.²⁷

This basic structure was retained in the Constitution.

²⁸ Article

I, section 2, provided that the members of the House of Represen-

27. There are minor exceptions to these generalizations about the form of the

suffrage—a qualification that should be borne in mind throughout my brief survey of voting history. On that history, see Alexander Keyssar, *The Right to Vote: The Contested History of Democracy in the United States* (2000); Robert J. Dinkin, *Voting in Revolutionary America: A Study of Elections in the Original Thirteen States, 1776–1789*, ch. 2 (1982); Dinkin, *Voting in Provincial America: A Study of Elections in the Thirteen Colonies, 1689–1776*, ch. 2 (1977); Chilton Williamson, *American Suffrage: From Property to Democracy, 1790–1860* (1960); Arnaldo Testi, “The Construction and Deconstruction of the U.S. Electorate in the Age of Manhood Suffrage, 1830s–1920s,” in *How Did They Become Voters?* 387 (Raffaele Romanelli ed. 1998); Robert J. Steinfeld, “Property and Suffrage in the Early American Republic,” 41 *Stanford Law Review* 335 (1989).

28. Lawrence D. Longley and Neal R. Peirce, *The Electoral College Primer 2000* (1999); Michael J. Glennon, *When No Majority Rules: The Electoral College and Presidential Succession* (1992); Neal R. Peirce and Lawrence D. Longley, *The People’s President: The Electoral College in American History and the Direct Vote Alternative* (rev. ed. 1981); Shlomo Slonim, “The Electoral College at Philadelphia: The Evolution of an Ad Hoc Congress for the Selection of a President,” 73 *Journal of American History* 35 (1988); Kevin Wroth, “Election Contests and the Electoral Vote,” 65 *Dickinson Law Review* 321 (1961). For the most powerful contemporaneous defense of the Electoral College, see *Federalist No. 68* (Hamilton).

Writing in 1999, Longley and Peirce entitled their first chapter “The Election of 2000 Is Not Quite Decided: A Fantasy,” and in it sketched a scenario resulting in a deadlocked election and ensuing chaos. The deadlock in their fantasy, however, results from the fact that the electoral vote is split among three candidates (the authors added Colin Powell to Bush and Gore), none of whom has a majority of the electoral votes. The result is fierce politicking, first to get members of the Electoral College to switch, and later, when the election is thrown into the House of Representatives, to woo Congressmen. No one foresaw the form that the 2000 election deadlock would actually take. I am surprised that Longley and Peirce did not, since they discuss a number of challenges to Presidential electors, including one that occurred after the Electoral Count Act was passed in 1887 in an effort to prevent a repetition of

—30—

tatives were to be elected by the people of each state. No effort was made to eliminate property qualifications or other limitations on the suffrage; the only stipulation (also in section 2) was that the voters have the same qualifications that the state required of people voting for members of its lower house. Article I, section 3, provided that the Senators from each state would be appointed by the state’s legislature. This method of appointing Senators reflected (at a time when states were much more important than they have

become) a kind of ambassadorial conception of a Senator. Indeed, state legislatures sometimes instructed “their” Senators with regard to how to vote on specific issues.²⁹ The state legislatures were authorized to fix the time, place, and manner of choosing Senators and Representatives, though Congress was authorized to alter those regulations—except for the place of choosing Senators, which would be the state legislature itself. Each house of Congress was to be “the Judge of the Elections, Returns and Qualifications of its own Members.”

There was little support at the constitutional convention for popular election of the President. Most of the delegates held the aristocratic conception of the Presidency and were dubious about the capacity of the public at large, with the limited filtering provided by gender and property qualifications, to pick the best candidate. There were also concerns about the logistics of conducting a nationwide popular election in a large country with poor transportation and communications. The alternative of having the President elected by Congress was unattractive, as it would make the President unduly dependent on the legislative branch. The ingenious expedient hit upon by the delegates was the Electoral College. Each state would have as many electors, and hence electoral votes, as it had Representatives plus Senators. The Electoral College was

the Hayes-Tilden fiasco, which that of 2000 resembled. Longley and Peirce, *Electoral College Primer 2000*, at 122–125.

29. See the discussion of this history in *Cook v. Gralike*, 121 S. Ct. 1029 (2001).

elect the President. Its members were to be appointed by each state “in such Manner as the Legislature thereof shall direct” (Article II, section 1, clause 2) and were to meet in their state and vote for the President rather than assemble in one place and confer before voting. Members of Congress, and other high federal officials, were ineligible to be electors. Congress was to fix the time at which the electors would be chosen and the day on which they would cast their votes, provided the day was the same throughout the nation. The state was to transmit its electoral votes to the seat of the federal government, where they were to be counted in the presence of both houses of Congress. If no one received a majority of the votes of the appointed electors, the House of Representatives was to elect the President from among the leading candidates. But in that election, unlike the ordinary procedure of the House, each state delegation would have a single vote.

The framers’ insouciance about voting qualifications for the members of the only directly elected branch of the new government, the House of Representatives, was matched by their insouciance about the method of appointing Presidential electors, which was left to the state legislatures to decide. The framers were unperturbed by the possibility that the legislatures might (as most soon did) decide that the electors would be chosen by popular vote. Apparently they thought that the people could be trusted to pick electors good enough to pick the best person as President. Moreover, they expected the contingent election procedure ordained by the Constitution—election of the President by the House of Representatives if no candidate received a majority of electoral votes—to be used frequently, and the House was the most democratic component of the governmental structure created at Philadelphia in 1787, though, since each state’s delegation would have only one vote to cast for President, the contingent procedure was not actually very democratic. That was discovered in 1824, the

only time the President has been picked by that method. Andrew Jackson lost to John Quincy Adams in the House even though Jackson had the most popular votes³⁰ and the most electoral votes, though not a majority of the latter.

The framers expressed no concern that a popular-vote loser might be an electoral-vote winner, since they had no reason to expect all states to select their Presidential electors by popular election. That such a discrepancy might be anomalous could not even be perceived until it was customary to select Presidential electors by popular vote, as it was, however, by 1824.

The expectation that the President would often be selected by the House of Representatives was related to the framers' failure to foresee the rise of political parties.³¹ (Parties in the modern sense were unknown in the eighteenth century.) Without parties to winnow the candidates, electoral votes were likely to be scattered among numerous candidates, reducing the likelihood that anyone would receive a majority, especially as it was doubted that many men had sufficient national reputations to garner a majority of electoral votes. In a two-party system, in contrast, electors would be choosing between just the two candidates chosen by the parties.

The Electoral College was not created to be a deliberative body, since its members would not meet but would, as expressly stated in Article II and the Twelfth Amendment, vote separately in each state.³² This decision was made partly because of the difficulties of travel, but more because of concern lest the choice of the President be influenced by cabals, agents of foreign powers, other intriguers, or corrupt deals. It was believed that requiring that the electors

30. In those states, 18 out of the then total of 24, in which electors were chosen

by popular vote. His popular vote lead over Adams was commanding—42.4 percent versus 31.9 percent; Glennon, *When No Majority Rules*, at 13, 15. By the next election, all but one of the states chose electors by popular vote.

31. See, for example, Jack N. Rakove, *Original Meanings: Politics and Ideas in the Making of the Constitution* 268 (1996).

— *Chapter 1*

vote in their home states rather than congregating to vote, that the electors not be federal officials, and that all electoral votes be cast on the same day would minimize these dangers. ³³

Such was the scheme of representative democracy created by the Constitution of 1787 for the federal government. The history of U.S. representative democracy since that date is a vast subject, but fortunately only three facets of that history are important for my purposes. One is the general though irregular movement to broaden the suffrage. Another is the trend away from indirect election. The third is the evolution of election administration, with particular reference to efforts to avoid (or if necessary resolve) deadlocks and to count votes accurately, which turn out to be related desiderata.

The movement to broaden the suffrage antedates 1787. On the eve of the Revolution, the electorate for the colonial assemblies, following the British model, was generally limited to adult Protestant males who had freeholds (that is, land ownership) of some specified minimum value. The theory behind the limitations was that only propertied men would have sufficient economic independence and political knowledge to be independent and competent voters rather than pawns of the wealthy and knowledgeable, or, in the case of a woman, of her husband, brothers, or father. Though made at least somewhat plausible by the economic and social conditions of the time and by the fact that the ballot generally was not secret, the theory was at best only partial. It did not explain the religious exclusions from the suffrage or the preferred position of owners of real estate compared with owners of other forms of property that might be equally valuable. Religious hostili-

ties, distrust of city folk, and fear of debtors ganging up on credi-

—34 —

The Road to Florida 2000 —

tors and, more generally, of the poor expropriating the rich played a larger role in the restrictions on the suffrage than the incomplete theoretical justifications based on notions of independence and competence. (The most plausible justification for the preference accorded owners of real estate was that they were more vulnerable to expropriation because their wealth was immobile.)³⁴ Lack of independence was decisive, however, against permitting slaves to vote, since their votes would be controlled by their masters and thus would magnify the political power of slaveholders.³⁵

The limitations on the franchise eroded significantly between 1775 and 1787. The causes of this erosion were ideological and practical. The slogan "no taxation without representation" made it difficult to justify the denial of the franchise to people who paid taxes yet happened not to own land, especially since the limitation of the franchise to freeholders had been justified in part by the argument that they paid most of the taxes.³⁶ The equally influential slogan "all men are created equal" pointed toward universal adult male suffrage. And it was difficult to ask people to join the Continental Army without giving them the rights of a citizen.³⁷

Yet when the Constitution was adopted, only Vermont had abandoned all property qualifications for voting,³⁸ and the framers

decided to allow each state to set the qualifications for voters in federal elections conducted in that state. As I have already noted, the qualifications to vote for members of the House of Representatives, the only form of direct election ordained by the Constitution, were

34. Dinkin, *Voting in Revolutionary America*, at 29.

35. A similar reason underlies the provision of the Constitution (Article I, section 2, clause 3) that counts a slave as only three-fifths of a free person for purposes of determining the number of members of the House of Representatives and hence of the Electoral College to which a state is entitled.

36. Williamson, *American Suffrage*, at 5–7; see also at 78 and at 79 (rejection of the theory of “virtual representation”).

37. *Ibid.* at 80, 82. Later linkages of expansions of the suffrage with wartime exigencies are listed in Testi, “Construction and Deconstruction,” at 390. For a more extensive discussion, see Keyssar, *Right to Vote*, at 466 (index references under “War”).

— Chapter 1

to be the same as those for voting for the members of the lower house of the legislature of the voter’s state, while Senators were to be appointed by the legislature of each state and Presidential electors by each state in the manner directed by the state legislature.

The trend toward broadening the franchise continued after 1787, powered by democratic sentiment,³⁹ by (what is not the same thing) a decline of deference, by agitation of the disfranchised for the vote,⁴⁰ and by the inherent ratchet effect of changes in the franchise. The franchise is likely to be enlarged whenever the currently dominant political forces in the society believe that the newly franchised voters will support them rather than their opponents,⁴¹ and once a new group is enfranchised it becomes difficult later to withdraw the franchise from it if the political winds change, because the members of the group will vote solidly against

the change. By the eve of the Civil War, universal adult (age 21 or older) male suffrage had been achieved in the Northern states, and reinstatement of property qualifications would have been politically infeasible, quite apart from ideological considerations.

But it would be wrong to infer from the ratchet effect that the expansion of the franchise is monotonic. The effect is real, but other forces are also at work. After Reconstruction ended following the election of Rutherford Hayes to the Presidency in 1876, the Southern states, forced by the Fifteenth Amendment to extend the franchise to blacks, nevertheless were able through a variety of devices, ranging from poll taxes and literacy tests to outright intimidation, to disenfranchise most blacks. Moreover, the scope of

39. Yet not, oddly, by abolitionism. Although some Southerners linked abolitionism with universal suffrage (*ibid.* at 288), the voting rights of blacks actually diminished in the North between the Revolution and the Civil War. Keyssar, *Right to Vote*, at 87–93; *Democracy, Liberty, and Property: The State Constitutional Conventions of the 1820s* 137–138 (Merrill D. Peterson ed. 1966).

40. Keyssar, *Right to Vote*, at 35.

41. For examples, see *ibid.* at 39–42.

42. With the principal exception of blacks, whom only five Northern states allowed to vote.

the franchise can contract merely because of demographic changes occurring against a background of unchanged rules. For example, if aliens are forbidden to vote and they become a larger fraction of the population, the fraction of eligible voters will, if nothing else changes, fall automatically. The same is true if the birth rate increases and as a result a larger fraction of the population is below

the voting age. The effect of expansion of the suffrage on actual voting can also be—and in fact to a considerable extent has been—offset by a decline in the turnout of eligible voters.⁴³

Aliens are an example of a group that, being unorganized and unpopular, may not be able to take advantage of the ratchet effect. After the Civil War, the flood of immigrants created anxieties about the voting power of these new citizens, and literacy tests were instituted for the first time⁴⁴—along with an effective de facto literacy test that bears a distant resemblance to the punchcard ballot. Until late in the nineteenth century, the government did not supply the ballots for voting in elections. Instead each political party supplied ballots containing a party-line vote for the party's candidates. The voter would simply select one party's ballot and drop it into the ballot box. The party ballot was replaced, largely in the last decade of the century, by the "Australian" ballot: a paper ballot, supplied by the voting authorities, that contained a list of the candidates, on which the voter would mark his preference. (Such a ballot had first been used in Australia; hence the name.) A voter who was not literate would have difficulty using the Australian ballot,⁴⁵ a result welcomed by those who feared the voting power of immigrants. At the same time, the heretofore rather

43. Testi, "Construction and Deconstruction," at 390–392, 410–413.

44. Keyssar, *Right to Vote*, at 142–146; Testi, "Construction and Deconstruction," at 400. Testi points out that registration requirements, also a late nineteenth-century innovation, had a disenfranchising effect while at the same time reducing vote fraud.

45. This problem is overcome in India, where about half the population is illiterate but illiterates are entitled to vote (as they are in the United States), by printing the party's symbol next to the names of the candidates, so that to vote for a party's candidates the voter has only to learn to recognize the party's symbol.

casual attitude toward voting by aliens⁴⁶ —the distinction between citizens and aliens not being strongly marked—gave way to rules excluding aliens from the franchise.⁴⁷

The practical and ideological forces that, despite some backsliding, led to the enlargement of the franchise in the nineteenth century also led to expanding the categories of officials elected by the people. In the eighteenth century the only popularly elected officials had been the members of the lower houses of the federal and state (or colonial) legislatures. Judges became elected rather than appointed officials in most states in the nineteenth century, as did state governors, members of the upper houses of the state legislatures, and Presidential electors. It has thus become anomalous that the President of the United States is not elected by popular vote. Yet there are only two certain instances in which the popular-vote winner failed to win the electoral vote: the election of 1888, in which Benjamin Harrison lost the popular vote to Grover Cleveland but won the electoral vote and so became President, and, of course, the election of 2000. The controversial elections of 1800, 1824, 1876, and 1960 are distinguishable—some of them, however, only narrowly. Let's consider them briefly.

In 1800 Jefferson and his running mate, Aaron Burr, received the same number of electoral votes, and Jefferson was elected President by the House. The deadlock in the Electoral College had been caused by the fact that Article II of the Constitution, while giving each elector two votes, did not provide for the electors to vote separately for President and Vice President. The theory was that the best man would come in first and become President and the second-best man would come in second and become Vice President. But if the electors thought alike on who should be President

46. Keyssar, *Right to Vote*, at 32–33, 38; Williamson, *American Suffrage*, at 277–278; Testi, “Construction and Deconstruction,” at 388.

47. *Ibid.* at 392–393. This change was particularly rough for persons of Asian origin and for American Indians; neither class of persons was eligible for U.S. citizenship until well into the twentieth century.

and who Vice President, and accordingly cast one of their two votes for their preferred Presidential candidate and the other for their preferred Vice Presidential candidate, the two—though candidates for different offices—would end up with the same number of electoral votes, and the designated Vice Presidential candidate might not gracefully withdraw (Aaron Burr did not, and Alexander Hamilton’s decision to throw his support to Jefferson was one of the events that lay behind the famous, fatal duel).⁴⁸ For that matter, if there was more agreement on who should be Vice President than on who should be President, the Vice Presidential candidate might receive more electoral votes (as almost happened in 1800), and so become President. These sources of deadlock (or worse) were removed by the Twelfth Amendment, adopted in 1804. The amendment required the members of the Electoral College to vote separately for President and for Vice President.

In 1824 Andrew Jackson won both the popular and the electoral vote, but because he did not have a majority of the electoral vote, but only a plurality, the choice of President was made by the House of Representatives, which picked John Quincy Adams.

In 1876 Samuel Tilden was declared the winner of the popular vote, but competing slates of electors in several Southern states (including Florida!) made the outcome of the electoral vote uncertain. An ad hoc commission created by Congress in January 1877 to resolve the dispute over the electors awarded the disputed votes to Hayes, who thus obtained, when objections in Congress to the commission’s award failed, a majority in the Electoral College, and so became President.⁴⁹ Because of extensive vote fraud by Democrats as well as by Republicans, it is uncertain whether Tilden really did win the popular vote.⁵⁰

— Chapter 1

In 1960 John F. Kennedy won the popular vote by only a shade over 100,000 votes. There were serious allegations of fraud by Democratic election officials in Illinois and Texas, but the number of votes affected was not enough either to change the result in the Electoral College vote or to deprive Kennedy of his plurality of the popular vote nationwide. Deciding who won the popular vote in 1960 is clouded, however, by a question unrelated to fraud, namely how to classify the popular votes for the 6 unpledged Democratic electors in Alabama, who, out of a total of 11 Democratic electors in that state, ended up voting for Harry Byrd rather than for Kennedy. If Kennedy is allocated 5/11 of the popular vote in Alabama, then Nixon, not Kennedy, had a plurality of the nationwide popular vote.⁵¹

In 2000 Al Gore won the popular vote, but George W. Bush obtained a bare electoral-vote majority—thanks to Florida, which many people believe Bush “stole” just as Hayes may have done 124 years earlier. We shall examine that contention in later chapters. Whether it is well founded or not, there is no question that Gore won the nationwide popular vote fair and square.

In short, in five elections (1824, 1876, 1888, 1960, and 2000) the winner of the popular vote for President either was not or may not have been (1876 and 1960) elected President. But the wedge that the Electoral College drives between popular democracy and election to the Presidency is larger. Because Presidential candidates campaign to win the electoral vote rather than the popular vote, they allocate their efforts, their appeals, their choice of running mate, and their policies and appointments when elected differently

than they would if the President were chosen by popular vote rather than by the vote of the Electoral College. We shall return to this issue in the last chapter.

—40—

The Road to Florida 2000 —

The twentieth century saw further expansions both in the suffrage and in the categories of official appointed by popular vote. The Seventeenth Amendment, ratified in 1913, required the direct election of Senators. The reasons were, in part, intensely practical, such as that elections for state legislators were sometimes overshadowed by concerns over whom a legislator might support for U.S. Senator and that legislatures frequently deadlocked over the choice of Senators.⁵² In 1920, the Nineteenth Amendment was adopted, guaranteeing the right to vote to women. Subsequent amendments abolished poll taxes, entitled the District of Columbia to appoint Presidential electors, and guaranteed the right to vote to 18-year-olds. More and more states adopted the primary election as the method of choosing the candidates of the major parties. And legislation designed to make the Fifteenth Amendment a meaningful protection of the franchise of black citizens⁵³ culminated in the abolition of literacy tests for voters in all federal elections. With universal adult suffrage within reach, attention shifted to subtle issues of voting power, including malapportionment (a conspicuous feature of the U.S. Senate and therefore of the Electoral College

as well), gerrymandering, the creation of districts in which minority groups would have a voting majority, restrictions on candidacy, lengthy residency requirements, and campaign financing.

Because it became an issue in the 2000 election deadlock and its aftermath, we should consider the merit of the goal of universal suffrage—especially when it is pressed to the point of insisting that people who cannot read well enough to follow voting instructions should be permitted, perhaps even assisted, to vote. One way to put the question is to ask whether it would be desirable, were it politically feasible (which it is not), to confine the vote to people who

— Chapter 1

are well informed about the public issues—including issues of leadership, competence, and probity—that are relevant to picking the best representatives. It would be undesirable. The politically well informed are an unrepresentative slice of the population. They differ systematically from the poorly informed along the dimensions of race, income, and education.⁵⁴ They have interests as well as opinions, and, since they are not a random draw from the population, their interests differ systematically from those of other groups. If the politically savvy monopolized the vote, their interests would have more weight than those of other people, the politically apathetic, immature, or alienated, unless we indulge the unrealistic assumption that well-informed people can be depended

upon to be altruistic rather than self-interested voters. Once that assumption is abandoned, it becomes clear that the interests of any group that lacks the franchise are likely to be undervalued in the political process.⁵⁵ It is on this basis that I have urged consideration of giving each parent an extra one-half vote for each of his or her minor children.⁵⁶

Some people, such as small children and the severely retarded, cannot form a competent conception of their own interests. But this is not the case for illiterates, especially in an era in which people get most of their information about public affairs from radio and television rather than from the print media.⁵⁷ Literacy tests for

54. Michael X. Delli Carpini and Scott Keeter, *What Americans Know about Politics and Why It Matters* (1996).

55. “The interest of the excluded is always in danger of being overlooked”; John Stuart Mill, *Considerations on Representative Government* 66 (1870).

56. Posner, *Aging and Old Age*, at 289.

57. Mill, writing before television, thought a literacy requirement essential. But it is not just television that separates Mill’s political culture from ours; the differences between nineteenth-century England and twentieth-century America run much deeper, as is illustrated by his belief that only taxpayers should be permitted to vote (“no taxation without representation” implying, he thought, no representation without taxation), that paupers therefore should be excluded, and that educated people should be given additional votes. Mill, *Considerations on Representative Government*, at 174–186. By “illiterates,” I do not mean only, or primarily, people who cannot read at all—cannot read a street sign, for example, or sign their own name. There are, relatively speaking, very few of those. I mean people who have very serious reading difficulties, so that, for example, they cannot read a newspaper with comprehension.

voting have now been outlawed, in major part because of their historical association with the pertinacious efforts of the Southern states to deny the vote to blacks. But a voting technology that as a practical matter requires literacy to cast a vote that will be counted operates in the same direction. Another difference between chil-

dren and the severely retarded, on the one hand, and illiterates, on the other, is that children and the severely retarded usually have someone—a parent or guardian—to look after them, and so are less needful of the vote to protect their interests; illiterates do not.

There is also a psychological factor to be considered. The right to vote is a symbol of equality. It dramatizes the principle that every person is to count for one and no one for more than one, at least in the political sphere. This may be hokum or sentimentality, or even a mask for the inequalities of circumstance and opportunity that pervade our (as every) society; but it is a brute fact about the American political culture. It is one reason why giving additional votes to members of particular groups (say, to blacks, or to veterans) to reward past services or to compensate for past or to offset present discrimination is out of the question, and why denial of the suffrage is taken so much more seriously than denial of giving votes equal weight (as in the Senate and the Electoral College); and it is why ex-felons are denied the vote in some states—as a symbol of disapprobation. People are not illiterate by choice, and to deny them the vote would therefore be a gratuitous insult, as is not the case with denying the vote to ex-felons.⁵⁸

The psychological effect of denying the vote to people may have practical consequences. In Mill's words, "whoever, in an otherwise popular government, has no vote, and no prospect of obtaining it, will either be a permanent malcontent, or will feel as one

58. With the growth in the number of people who have a felony record, however, and given that a large and growing percentage of felonies are nonviolent crimes against willing victims (mainly the sale of illegal drugs, an arbitrary subset of mind-altering substances) and that the composition of the ex-felon population is disproportionately black, this exclusion too has become controversial.

whom the general affairs of society do not concern.”

⁵⁹ But not too

much weight should be placed on the symbolic and psychological dimensions of the right to vote. They are extremely speculative. The important thing is that even people who cross only a very modest threshold of competence and independence ought to be allowed to vote in order to protect their interests, and that illiterates have interests and, in our radio- and television-saturated society, generally cross that threshold.

The dramatic and ultimately successful struggles to broaden the *legal* franchise, plus the increasing preoccupation with subtle issues of voting power (even if everyone has one vote, voting *power*—that is, the power through voting to influence the outcome of an election—may be unequally distributed, as when legislatures are malapportioned), have obscured the mundane issues of election administration that the Florida 2000 Presidential election brought to light. With the successful enforcement of the Voting Rights Act, the abolition of poll taxes and literacy tests, simplified registration, the curtailment of durational residency requirements, and the reduction in the amount of corruption and the hold of machine politics in big cities, the subject of election administration became practical (rather than a matter of theoretical speculation or moral urgency), fragmented (because election administration—as distinct from federal constitutional and statutory regulation of voting—is decentralized to states, counties, and even precincts), and technological. It dipped below the radar screen of constitutional lawyers, and most political scientists as well. Not only the elections of 1824, 1876, and 1888 but also the close and problematic elections of 1960 and 1968 (the former rife

⁵⁹ Mill, *Considerations on Representative Government*, at 172–173. Mill also believed

that, independently of all practical considerations, “every one is degraded, whether aware of it or not, when other people, without consulting him, take upon themselves unlimited power to regulate his destiny”; *ibid.* at 173. Mill made no effort to reconcile this ethical point with his advocacy of excluding paupers and other nontaxpayers, as well as illiterates, from the franchise.

with fraud and the latter almost undone by runaway electors), became “history.” Even the much more recent, exceptionally bitter, and absurdly protracted congressional battle over the deadlocked 1984 election in Indiana’s Eighth Congressional District was forgotten.⁶⁰ Forgotten too was the push in the wake of the 1968 Presidential election to abolish the Electoral College by constitutional amendment, a proposal approved by the House by the requisite two-thirds margin in 1969.

The problematic Presidential elections that I have listed involved or exposed a variety of problems. The 1824 election taught that a President who had lost both the popular and the electoral vote—and who owed his election only to the House of Representatives, because the electoral-vote winner had had only a plurality, and not a majority, of the electoral votes—might not be accepted by the nation as fully legitimate. Adams was defensive about his victory and was soundly trounced by Jackson in their rematch in 1828, though in part this was due to the suspicion that Adams had owed his election to a “corrupt bargain” with Henry Clay, the Speaker of the House, who indeed became Adams’s secretary of state⁶¹—but such suspicions are likely when the election is thrown into the Congress. A similar danger, that the winner of both the popular and the electoral vote might nevertheless not be elected President, loomed in the 1968 Presidential election, because of George Wallace’s strong third-party candidacy, since a third-party candidate who won some electoral votes might, by throwing them to the losing major-party candidate, give that candidate a majority in the Electoral College. The problem in the 1960 election was not

60. Marie Garber and Abe Frank, *Contested Elections and Recounts*, vol. 1: *Issues and Options in Resolving Disputed Federal Elections* 14–16 (Federal Election Commission, National Clearinghouse on Election Administration, Autumn 1990) (“four months of partisan wrangling . . . that took up more time than almost any other issue the House considered in 1985 . . . left a bitter legacy which has not yet dissipated”). See also Timothy Downs, Chris Sautter, and John Hardin Young, “The Recount Primer” (Aug. 1994, available from Sautter Communications, Washington, D.C.), pp. 39–42.

— Chapter 1

only fraud but also, and more seriously, unpledged electors, and it loomed briefly again in 2000 when some Democrats mounted a campaign to persuade Bush electors to switch to Gore. The election of 1888 was a reminder that the popular-vote winner can lose the electoral vote, which of course happened again in 2000, though so far without untoward results. The problem in 2000 was deadlock, and it may actually have had the effect of distracting people from the anomaly of the popular-vote winner's losing the election, though Gore's lack of personal popularity was also a factor.

The 1876 election fiasco was the most ominous portent for 2000. It exposed, as had the 1800 election, an embarrassing gap in the Constitution. The framers had foreseen and provided for the case in which no candidate wins a majority of the electoral votes (though the relevant provision is ambiguous, as we shall see), but not for the case in which there is a dispute over whom a state has appointed to be its Presidential electors. An ad hoc resolution of the dispute over the 1876 election was not achieved until the eve of the inauguration, and it involved Congress's appointing a committee whose deciding member was a Republican Supreme Court Justice who, along with the other Republicans on the committee, voted for the Republican candidate.⁶² These events led to the enactment a decade later of the Electoral Count Act, now Title III of the U.S. Code, which specified a procedure for resolving a future such deadlock. We shall see in Chapter 3, however, that the procedure is both incomplete and of uncertain constitutionality.

Completely unforeseen was the possibility that a deadlock in the Presidential election might arise not from skullduggery (as in the 1876 election), not from a failure of any candidate to obtain a majority of the electoral votes, not from runaway electors, and not

62. Again there was a suspicion of a corrupt bargain—a promise to end Reconstruction in exchange for the Democrats' accepting Hayes's election. See "The Electoral Commission [Hayes-Tilden Election]," *Great Debates in American History*, vol. 9, ch. 3 (Marian Mills Miller ed. 1970).

—46—

from an actual tie in the popular vote in a key state, but from innocent defects in electoral mechanics, whether defects in the design of a ballot, the staffing of the polling places, or the design, maintenance, or operation of voting and vote-tabulating machines, or gaps and ambiguities in the state statutes regulating the administration of elections and the resolution of election disputes. Nor was it foreseen that such shortcomings not only might make it difficult to determine who had won an election, and thus increase the probability of having to activate some postelection mechanism to decide who the winner was, but also might selectively disenfranchise voters. It had always been understood that the methods for counting votes are imperfect; challenges to the outcome of close elections have not been uncommon and have sometimes resulted in recounts that changed the outcome. But that this might happen in a Presidential election, that procedures that function properly in less momentous and less time-sensitive elections might not serve for a deadlocked Presidential election, and that the federal constitutional and statutory provisions relating to a contested Presiden-

tial election are rickety, were lost to view. These problems achieved visibility, not only to the public at large but also to scholars of the electoral process, only with the 2000 election. The gravity of such problems, and the difficulty of solving them with our existing laws and institutions, are the themes of the subsequent chapters.

Speelgoedoorlog in cyberspace

Rond de kerstdagen vorig jaar woedde er op internet een heuse speelgoedoorlog. Naar schatting tweeduizend creactivisten kregen hierin gezamenlijk het internetbedrijf eToys.com op de knieën. Zij moest het door haar zo felbegeerde domein teruggeven aan de digitale straatbende etoy.com. Een lesje actievoeren in cyberspace.

*Oh, give me land, lots of land under starry skies above,
Don't fence me in.
Let me ride through the wide open country that I love,
Don't fence me in.
Let me be by myself in the evenin' breeze,
And listen to the murmur of the cottonwood trees,
Send me off forever but I ask you please,
Don't fence me in.*

(Cole Porter, 1944)

Het internet is de laatste paar jaren ingrijpend veranderd. De zogenaamde reële wereld betreedt steeds meer de virtuele wereld en verovert terrein in het traditionele doolhof van het web. Warenhuizen, banken en andere commerciële bedrijven openen hun deuren en overnamen en faillissementen bepalen het economische klimaat op het web. De van oudsher gekraakte percelen - domeinen - worden langzaam maar zeker ingenomen door financiële giganten. Daarbij gaat het niet alleen om domeinen die de naam van een bedrijf gebruiken, maar ook domeinen die deze naam benaderen.(1)

Vanuit de wetenschap dat de gemiddelde internet-gebruiker regelmatig type fouten begaat, proberen bedrijven een reeks van namen te bemachtigen die lijken op die van hun eigen domein. Zo hopen consumenten toch te vangen óf actievoerders te slim af te zijn. Landje pik heet het in de reële wereld, domeintje pik in de virtuele wereld, maar het principe is hetzelfde.

Eerste bedrijf

Heeft de commercie het internet al volledig veroverd? Nee, nog niet. Nog steeds zijn er overal gekraakte programma's, spelle-tjes, encyclopedieën, gratis muziek en andere spullen te vinden die internetgebruikers aan elkaar doorsturen. Ook komen domeinen in het verweer tegen de macht van het kapitaal. Een van deze domeinen is etoy.com (<http://www.etoys.com>) van een kunste-naarscol-lectief uit Zwitserland.

Op maandag 8 november 1999 diende er aan de rechtbank van de staat Californië in de Verenigde Staten een rechtszaak van het internetbedrijf eToys.com (<http://www.etoys.com>) tegen etoy.com.

EToys.com, dat haar domeinnaam op 3 november 1997 liet registreren, is een typisch internetbedrijf. Gevestigd in Santa Monica, Californië, 500 werknemers, lage verkoopcijfers, toch een hoge aandelenkoers en een toekomst van het bedrijf die vooral in de komende jaren bepaald gaat worden.

Etoys mocht zichzelf marktleider noemen op het gebied van online verkoop van speelgoed en was het op drie na grootste bedrijf op het internet in e business. De marktwaarde van het bedrijf wordt geschat op 8.41 miljard dollar. Het aandeel eToys werd gepresenteerd op 20 mei 1999 en in korte tijd gestegen tot een bedrag tussen de 60 en de 80 dollar per aandeel.

Een dergelijk bedrijf dat speelgoed verkoopt aan nette gezin-nen zal er alles aan doen om zich zo goed mogelijk te presenteren. Wat daar niet bij helpt is een buurman die de naam etoy.com draagt. Helemaal niet als deze buurman een kunstenaarsgroep is die zich graag de eerste straatbende van de informatiesnelweg noemt. Als deze buurman ook nog eens zeer aanstootgevende en in generlei zin met speelgoed gerelateerde pagina's publiceert, is het des te pijnlijker. Laten we wel wezen. Wie een poging doet eToys te typen zal regelmatig de 's' vergeten en dan

Opmaat

Op 25 augustus 1999 overkwam dit de kleinzoon van een argeloze consument. De kleine jongen typte *www.etoy.com* en kwam op de eerste pagina van de website van het kunstenaarscollectief waar de bezoeker de mogelijkheid wordt geboden om op de traditionele manier te reizen (alleen html). De kleinzoon klikte op deze knop en kreeg toen vervolgens de zin naar zijn hoofd geslingerd dat etoy niet de traditionele manier ondersteunt, maar dat de bezoeker een flash plugin moet downloaden (... *get the fucking flash plugin!*).⁽²⁾ Grootvader ontstak in woede en liet in een brief aan het bedrijf eToys.com weten nooit meer iets bij hen te kopen.

Twee weken later, op 10 september 1999 klaagde het speelgoed-bedrijf etoy aan voor merknaam misbruik, beschadiging en oneerlijke concurrentie. EToys wist echter in 1997 bij het registreren van haar domeinnaam al van het bestaan van etoy.com dat haar domein op 13 oktober 1995 geregistreerd had. Het speelgoedbedrijf vond het niet noodzakelijk om toen etoy aan te klagen. Wel werden er zeventuizend aandelen en een som van 50 duizend dollars (bij elkaar ongeveer 516 duizend dollar) geboden voor de domeinnaam etoy.com. Het kunstenaarscollectief weigerde dit beleefd.

"Onze gevoelens, onze artistieke integriteit, ons hele zijn is de domeinnaam", stelde woordvoerder Zai van etoy. "Ons project was altijd radicaal, dus is het beter alles te riskeren en te vechten."

Wetgeving

De rechtszaak volgde op de tweede weigering van het kunstenaarscollectief om de 100 duizend dollar die eToys.com nu had geboden aan te nemen en daarmee de zaak onderhands te regelen. Etoy.com is namelijk geen virtuele kraker van domeinen die zijn verkregen domeinnamen duur doorverkoopt.

De kunstenaars van etoy.com hebben de tijd helaas niet mee. Er wordt steeds meer wetgeving geïntroduceerd om het bedrijven makkelijker te maken rechtszaken aan te spannen tegen onwillige actievoerders of anderen die domeinnamen beheren die dicht tegen die van het bedrijf aanliggen.

In november 1999 nam de Amerikaanse Senaat de Satellite Viewers Act aan. De wet is vooral gericht tegen virtuele hackers en bepaald dat merknaamhouders virtuele krakers voor het gerecht kunnen slepen in het land waar het domein geregistreerd staat. Voor .com, .org en .net is dat de Verenigde Staten.

De Satellite Viewers Act bepaald verder dat merknaamhouders 100 duizend dollar schadevergoeding kunnen eisen van virtuele hackers, mensen die merknamen schenden op het net en zij die consumenten in het ongewisse willen laten wie een website beheert. Het laatste heeft alles te maken met imago beschadigingsacties zoals bijvoorbeeld rond de KLM en Lufthansa.⁽³⁾

Tweede bedrijf

Op 29 november 1999 verloor etoy.com dan ook de eerste ronde van het gevecht met het bedrijf eToys.com. Rechter John P. Shook oordeelde in zijn voorlopige

uitspraak dat het kunstenaarscollectief etoy, maar ook mogelijke andere gebruikers, de website met de domeinnaam *www.etoys.com* niet meer mochten gebruiken. Tevens oordeelde Shook dat de kunstenaars geen aandelen mogen uitgeven en verkopen in de Verenigde Staten of de merknaam etoy presenteren voordat deze merknaam officieel is geregistreerd. De uitspraak werd vergezeld van een boete van 10 duizend dollar voor elke dag dat de uitspraak niet wordt opgevolgd.

Megan Gray, een advocaat van het advocatenkantoor Baker & Hostetler, gespecialiseerd in Internet recht en intellectueel eigendom, betoogde dat de claim van eToys.com geen stand zou houden. Toch lag er nu een uitspraak die het werk van de kunstenaars van etoy onmogelijk maakte en eToys een gerust gevoel gaf over de komende kerstaankopen van de consumenten. De rechtszaak zou namelijk pas de dag na kerst, 27 december 1999, worden voortgezet.

In een vergelijkbare zaak tussen het adviesbureau Clue Computing Inc. en de speelgoedhandelaar Hasbro werd de laatste in het ongelijk gesteld toen het bedrijf de Url *www.clue.com* opeiste voor haar nieuwe speeltje, een nintendo met de naam clue. Hasbro bezat weliswaar de gedeponeerde merknaam clue, maar moest Clue Computing met rust laten, zo oordeelde de rechter toen het bedrijf *www.clue.com* wilde afpakken. Er was dus nog hoop voor etoy.(4)

Etoy sloot haar site en vervolgde haar juridische strijd met het speelgoedbedrijf eToys onder een IP nummer (*http://146.228.204.72:8080/*).

Prijs

Het kunstenaarscollectief Etoy was in de internetwereld al enige tijd bekend. In 1996 wonnen zij de prestigieuze internetprijs, de Golden Nica, *the Ars Electronica price for best Internet art*. Etoy heeft in het verleden ook al conflicten met bedrijven of instanties gehad in verband met haar internetactiviteiten. Zo publiceerde etoy.com foto's van de bomaanslag op het federale gebouw van Oklahoma City op 19 april 1995 met daarbij de provocerende aanmerking: "*Such work needs a lot of training*". Etoy heeft echter nog nooit een proces aan haar broek gekregen in verband met haar internet activiteiten.

In 1996 werkte etoy aan een succesvol project onder de naam 'digital hijack'. Na onderzoek van zoekmachines op het internet had de groep een methode ontwikkeld om als hoogste in de zoekmachines te eindigen. De groep ontwikkelde vervolgens duizenden pagina's en lokte daarmee niets vermoedende internetgebruikers die informatie zochten over David Bowie, Porsche, Penthouse en andere zaken naar hun website. Ergens op het internet zijn die pagina's nog te vinden en deze werden in de rechtszaak door eToys tegen etoy gebruikt als bewijs dat het kunstenaarscollectief zich schuldig maakte aan onwettig gedrag.

Een ander project van etoy dat later door eToys in het proces werd gebruikt, is de verkoop van aandelen in etoy. Voor woordvoerder Zai van etoy dwingt de verkoop van aandelen mensen om na te denken over de ongrijpbare en amorfe aard van Internetkunst: "Eén van de vele controversen van Net-kunst is dat er geen origineel is". De aandelen, een "uniek" certificaat van 2 bij 2 voet, bevestigd op een aluminium plaat met een chip met elektronische informatie over de aandeelhouder, werden door eToys aangegrepen om etoy te beschuldigen van het creëren van valse fondsen.

Toywar

De eerste slag in de Toywar was dus voor eToys, maar het speelgoedbedrijf had geen rekening gehouden met de internetgemeenschap. Deze was verontwaardigd over de handelwijze van eToys en tevens zeer verbaasd dat rechter Shook het bedrijf in het gelijk had gesteld. Vlak na de uitspraak werd de Toywar site (*http://www.toywar.com/*) geopend en het beloofde een echte oorlog te worden.

De kunstenaars van etoy hielden bij hoog en bij laag vol dat zij niets te maken hadden met de nieuwe site. Om dit te benadrukken verklaarde Zai tegenover het Duitse internettijdschrift *Telepolis*: "de handen van etoy zijn gebonden, als het gaat om netcampagne technieken".

Etoy richtte zich op de rechtszaak en het vergaren van geld voor het proces middels de verkoop van etoy.shares. Het collectief had tot dat moment al 20 duizend dollar uitgegeven aan het proces en stond aan de rand van faillissement.

Etoys.com had echter nooit verwacht dat zoveel mensen zich zouden aansluiten bij het toyleger en allerlei speeltjes ontwikkelden om het bedrijf langzaam ten gronde te richten.⁽⁵⁾ Tussen 29 november en 12 december 1999, de datum dat RTMark zich in de oorlog mengde, was het aandeel eToys al gezakt van 67 dollar naar 45 dollar. Toeval of niet maar in die periode verkocht een groot aandeelhouder, de Moore Capital Management Inc. haar aandelenpakket eToys ter waarde van 2,5 miljoen dollar.

Computerspel

De eerste slag leek gewonnen, hoewel er in het begin van de Toywar geen duidelijke lijn zat. De RTMark campagne (<http://rtmark.com/etoycampaigns.html>) zorgde echter voor structuur. De Toywar werd geformuleerd als een multi user internet spel waarbij het doel was de NASDAQ-notering van eToys neer te halen.⁽⁶⁾ RTMark woordvoerder Lucha formuleerde het passend met de woorden: "Dit spel is veel interessanter dan welk computerspel dan ook, omdat je een slechterik uit de werkelijke wereld moet bevechten".

RTMark is een soort persiflage op een transnationale onderneming met als product 'sabotage'. De aandelen die je van RTMark koopt vormen een investering in mogelijke acties die mensen bij allerlei fondsen hebben aangemeld. Op internet staan de acties vermeld die bij die fondsen aangemeld zijn, met het investeringsbedrag dat nodig is voor de uitvoering van de actie. Investeerders kunnen zich aandienen en vervolgens is daar de website voteauction.com waar voor de Amerikaanse verkiezingen stemmen konden worden geveild. Ook het Barbie Liberation Front is zo tot stand gekomen. RTMark is in zekere zin een tussenpersoon tussen de geldschieters en de actievoerders. Daarnaast doet RTMark vooral het persbeleid voor de acties.

De RTMark campagne was betrekkelijk eenvoudig van opzet. Er werd een etoy fonds opgezet waar allerlei mogelijke acties en ideeën werden samengebracht waardoor iedereen kon bijdragen in de productie of in het gebruik. Er was voor iedereen iets te vinden, iets individueels, iets collectiefs, iets eenvoudigs, iets complex, iets onschuldigs, iets niet onschuldigs en ga zo maar door. Daarnaast was er een pagina met actuele informatie over de financiële situatie van eToys en een pagina met links naar een groot aantal andere pagina's die opriepen om de eToys servers te verstoren.

Woordvoerder Lucha van RTMark verwoordde het uitgangspunt van de campagne als volgt: "waarom zou de mondiale cultuur gedomineerd moeten worden door de zakenwereld? Het internet is het speelveld dat de mogelijkheid heeft een wereldwijd machtsevenwicht te creëren welke op dit moment niet bestaat".

Etoyssucks

Als eerste deel van het virtuele spel moesten vanaf tien dagen voor kerst de servers van eToys op allerlei manieren volledig lam worden gelegd. Naast RTMark mengden zich dan ook anderen in de strijd.

Op een protest site was een anti eToys videospel te vinden waarbij tien bewapende

stoere mannen in eToys t shirts tot bloedens toe moesten worden gedood. Bands als Negativland doneerden MP3s voor de campagne tegen eToys. Een groep hackers ontwikkelde een 'action entertainment product', waarmee een internet gebruiker direct eToys.com kon aanvallen.

Een andere groep ontwikkelde een anti eToys wapen dat automatisch internet adressen produceert die de eToys site bezoeken. De adressen die het programma produceert lijken op normale eToys bezoekers die op zoek zijn naar een stuk speelgoed voor hun kinderen, kleinkinderen of anderen. Het programma maakt keer op keer contact met eToys en doet eindeloos veel bestellingen van eindeloos veel verschillende internetadressen. De betrouwbaarheid van de verkoopcijfers van etoys.com neemt daarmee af. Natuurlijk werd de domeinnaam <http://www.etoys.com> aangevraagd, maar in dit geval was eToys de campagne voor en belandde men bij het typen van etoys.com op de officiële eToys site. Het concern had echter geen rekening gehouden met <http://www.etoys.com> (let op het streepje) die wel geregistreerd kon worden.

Virtuele demonstraties

Het Electronic Disturbance Theater (EDT) nam op 15 december de eerste stap tot een virtuele picket line voor de server van eToys. Het bedrijf richtte zich meteen tot de provider Verio Inc. om de website van het EDT te laten blokkeren. Ricardo Dominguez van het EDT verklaarde tegenover de *New York Times* dat de virtuele picket line, hoewel die maar 13 uur had geduurd, toch succesvol was. Enig bewijs voor het succes is niet te leveren. Maar eToys kan evenmin beweren dat de blokkade niet effectief was, want waarom zouden ze dan de moeite nemen de site uit de lucht te halen?

Het gevolg was dat het programma dat de virtuele sit in levendig houdt, over de hele wereld werd gekopieerd en de demonstratie meer en meer vorm kreeg. Onder andere op de website van RTMark uit de Verenigde Staten, Let it snow uit Duitsland ([http://www.assoziations blaster.de/](http://www.assoziationsblaster.de/)), FirstFloorElectro-nix uit Oostenrijk <http://www.firstfloor.org/> die hun eKillerToy bij een andere provider hadden ondergebracht en vele anderen.

De grap van de virtuele demonstraties is dat het onmogelijk is na te gaan hoeveel mensen er werkelijk meedoen en tevens of de server niet te bereiken is door de demonstratie. Het effect van de virtuele demonstraties was echter wel dat naast de *New York Times* andere media ook de bereikbaarheid van de servers van eToys.com in de gaten gingen houden. De volgende dag werd de servers van eToys overladen met valse informatie van toekomstige consumenten en een groot deel van de dag was het bedrijf niet te bereiken.

Genadeslag

EToys dacht door het Electronic Disturbance Theatre af te snijden van het internet de angel uit de demonstratie te kunnen halen. Zij verstevigden hun website en bedreigden individuele demonstranten met e mailtjes als: "get the hell out of dodge" (scheer je weg met je trucje). Als reactie hierop werden de elektronische adressen en telefoon- en faxnummers van eToys medewerkers verspreid om het bedrijf niet alleen onli-ne, maar ook offline lam te leggen.

Vrijdag, 19 december 1999, was een betrekkelijk rustige dag voor eToys. Ze leek de demonstratie te kunnen overleven. Zaterdag lag de site van het bedrijf echter weer een groot deel van de tijd plat.

RTMark voedde de onrust binnen en buiten het bedrijf met echte en valse informatie over medewerkers van het bedrijf die ontslag wilden nemen en over aandeelhouders die het vertrek van Chief Executive Officer Edward Lenk eisten. In de financiële media verschenen steeds meer verontrustende berichten en de definitieve val van het aandeel eToys was nog maar slechts een kwestie van

dagen. Investeerders en aandeelhouders werden bestookt met berichten om hun aandelen eToys te verko-pen.

EToys had de kerstinkopen overleefd, al was het met vele kleerscheuren, en de verliezen waren nog niet dramatisch. Het bedrijf gaf op 27 december 1999 aan de aanklacht tegen etoy aan te houden en tijdelijk de rechtszaak tegen het kunstenaarscollectief niet door te zetten.

Vervolgens gebeurde er niets en het was duidelijk dat het bedrijf de gemoederen wilde sussen. Hierop riepen RTMark en Toywar op tot de tweede en finale slag in de Toywar. RTMark riep op om het aandeel verder naar beneden te halen en Toywar formeerde een 'toy army' met 1400 activisten die operaties op commando wilden uitvoeren.

Het aandeel eToys stortte in en zakte onder de waarde van uitgifte. Na 81 dagen Toywar gaf het bedrijf het domein *www.etoy.com* terug aan de wettige eigenaars, trok het de aanklacht in en betaalde de proces en advocaatkosten van etoy.

Naar schatting tweeduizend toy-soldaten hebben tussen november 1999 en februari 2000 aan de Toywar meegedaan. Er werden meer dan 250 Toywar soldaten sites gebouwd en binnen twee maanden daalde het aandeel van toys Inc. dramatisch van 67 dollar op de dag van de aanvang van de Toywar tot 15 dollar op de dag dat het bedrijf volledig door de knieën ging. De schade voor het bedrijf wordt geraamd op 4.5 miljard dollar.

Joichi Ito, een manager uit Japan, die in 1997 door *Time magazine* tot de cyberelite werd gerekend, zei met betrekking tot de Toywar dat het bij het internet niet om het kapitalisme en geld gaat maar "om mensen die doen wat ze willen doen".

Speelgoedoorlog in cyberspace

Rond de kerstdagen vorig jaar woedde er op internet een heuse speelgoedoorlog. Naar schatting tweeduizend creactivisten kregen hierin gezamenlijk het internetbedrijf eToys.com op de knieën. Zij moest het door haar zo felbegeerde domein teruggeven aan de digitale straatbende etoy.com. Een lesje actievoeren in cyberspace.

*Oh, give me land, lots of land under starry skies above,
Don't fence me in.*

*Let me ride through the wide open country that I love,
Don't fence me in.*

*Let me be by myself in the evenin' breeze,
And listen to the murmur of the cottonwood trees,
Send me off forever but I ask you please,
Don't fence me in.*

(Cole Porter, 1944)

Het internet is de laatste paar jaren ingrijpend veranderd. De zogenaamde reële wereld betreedt steeds meer de virtuele wereld en veroverd terrein in het traditionele doolhof van het web. Warenhuizen, banken en andere commerciële bedrijven openen hun deuren en overnamen en faillissementen bepalen het economische klimaat op het web. De van oudsher gekraakte percelen - domeinen - worden langzaam maar zeker ingenomen door financiële giganten. Daarbij gaat het niet alleen om domeinen die de naam van een bedrijf gebruiken, maar ook domeinen die deze naam benaderen.(1)

Vanuit de wetenschap dat de gemiddelde internet-gebruiker regelmatig type fouten begaat, proberen bedrijven een reeks van namen te bemachtigen die lijken op die van hun eigen domein. Zo hopen consumenten toch te vangen óf actievoerders te slim af te zijn. Landje pik heet het in de reële wereld, domeintje pik in de virtuele wereld, maar het principe is hetzelfde.

Eerste bedrijf

Heeft de commercie het internet al volledig veroverd? Nee, nog niet. Nog steeds zijn er overal gekraakte programma's, spelle-tjes, encyclopedieën, gratis muziek en andere spullen te vinden die internetgebruikers aan elkaar doorsturen. Ook komen domeinen in het verweer tegen de macht van het kapitaal. Een van deze domeinen is etoy.com (<http://www.etoy.com>) van een kunstenaarscol-lectief uit Zwitserland.

Op maandag 8 november 1999 diende er aan de rechtbank van de staat Californië

in de Verenigde Staten een rechtszaak van het internetbedrijf eToys.com (<http://www.etoys.com>) tegen etoy.com.

EToys.com, dat haar domeinnaam op 3 november 1997 liet registreren, is een typisch internetbedrijf. Gevestigd in Santa Monica, Californië, 500 werknemers, lage verkoopcijfers, toch een hoge aandelenkoers en een toekomst van het bedrijf die vooral in de komende jaren bepaald gaat worden.

Etoys mocht zichzelf marktleider noemen op het gebied van online verkoop van speelgoed en was het op drie na grootste bedrijf op het internet in e business. De marktwaarde van het bedrijf wordt geschat op 8.41 miljard dollar. Het aandeel eToys werd gepresenteerd op 20 mei 1999 en in korte tijd gestegen tot een bedrag tussen de 60 en de 80 dollar per aandeel.

Een dergelijk bedrijf dat speelgoed verkoopt aan nette gezin-nen zal er alles aan doen om zich zo goed mogelijk te presenteren. Wat daar niet bij helpt is een buurman die de naam etoy.com draagt. Helemaal niet als deze buurman een kunstenaarsgroep is die zich graag de eerste straatbende van de informatie-snelweg noemt. Als deze buurman ook nog eens zeer aanstootgevende en in generlei zin met speelgoed gerelateerde pagina's publiceert, is het des te pijnlijker. Laten we wel wezen. Wie een poging doet eToys te typen zal regelmatig de 's' vergeten en dan

Opmaat

Op 25 augustus 1999 overkwam dit de kleinzoon van een argeloze consument. De kleine jongen typte www.etoys.com en kwam op de eerste pagina van de website van het kunstenaarscollectief waar de bezoeker de mogelijkheid wordt geboden om op de traditionele manier te reizen (alleen html). De kleinzoon klikte op deze knop en kreeg toen vervolgens de zin naar zijn hoofd geslingerd dat etoy niet de traditionele manier ondersteunt, maar dat de bezoeker een flash plugin moet downloaden (... *get the fucking flash plugin!*).⁽²⁾ Grootvader ontstak in woede en liet in een brief aan het bedrijf eToys.com weten nooit meer iets bij hen te kopen.

Twee weken later, op 10 september 1999 klaagde het speelgoed-bedrijf etoy aan voor merknaam misbruik, beschadiging en oneerlijke concurrentie. EToys wist echter in 1997 bij het registreren van haar domeinnaam al van het bestaan van etoy.com dat haar domein op 13 oktober 1995 geregistreerd had. Het speelgoedbedrijf vond het niet noodzakelijk om toen etoy aan te klagen. Wel werden er zeventuizend aandelen en een som van 50 duizend dollars (bij elkaar ongeveer 516 duizend dollar) geboden voor de domeinnaam etoy.com. Het kunstenaarscollectief weigerde dit beleefd.

"Onze gevoelens, onze artistieke integriteit, ons hele zijn is de domeinnaam", stelde woordvoerder Zai van etoy. "Ons project was altijd radicaal, dus is het beter alles te riskeren en te vechten."

Wetgeving

De rechtszaak volgde op de tweede weigering van het kunstenaarscollectief om de 100 duizend dollar die eToys.com nu had geboden aan te nemen en daarmee de zaak onderhands te regelen. Etoy.com is namelijk geen virtuele kraker van domeinen die zijn verkregen domeinnamen duur doorverkoopt.

De kunstenaars van etoy.com hebben de tijd helaas niet mee. Er wordt steeds meer wetgeving geïntroduceerd om het bedrijven makkelijker te maken rechtszaken aan te spannen tegen onwillige actievoerders of anderen die domeinnamen beheren die dicht tegen die van het bedrijf aanliggen.

In november 1999 nam de Amerikaanse Senaat de Satellite Viewers Act aan. De

wet is vooral gericht tegen virtuele hackers en bepaald dat merknaamhouders virtuele krakers voor het gerecht kunnen slepen in het land waar het domein geregistreerd staat. Voor .com, .org en .net is dat de Verenigde Staten.

De Satellite Viewers Act bepaald verder dat merknaamhouders 100 duizend dollar schadevergoeding kunnen eisen van virtuele hackers, mensen die merknamen schenden op het net en zij die consumenten in het ongewisse willen laten wie een website beheert. Het laatste heeft alles te maken met imago beschadegingsacties zoals bijvoorbeeld rond de KLM en Lufthansa. (3)

Tweede bedrijf

Op 29 november 1999 verloor etoy.com dan ook de eerste ronde van het gevecht met het bedrijf eToys.com. Rechter John P. Shook oordeelde in zijn voorlopige uitspraak dat het kunstenaarscollectief etoy, maar ook mogelijke andere gebruikers, de website met de domeinnaam *www.etoy.com* niet meer mochten gebruiken. Tevens oordeelde Shook dat de kunstenaars geen aandelen mogen uitgeven en verkopen in de Verenigde Staten of de merknaam etoy presenteren voordat deze merknaam officieel is geregistreerd. De uitspraak werd vergezeld van een boete van 10 duizend dollar voor elke dag dat de uitspraak niet wordt opgevolgd.

Megan Gray, een advocaat van het advocatenkantoor Baker & Hostetler, gespecialiseerd in Internet recht en intellectueel eigendom, betoogde dat de claim van eToys.com geen stand zou houden. Toch lag er nu een uitspraak die het werk van de kunstenaars van etoy onmogelijk maakte en eToys een gerust gevoel gaf over de komende kerstaankopen van de consumenten. De rechtszaak zou namelijk pas de dag na kerst, 27 december 1999, worden voortgezet.

In een vergelijkbare zaak tussen het adviesbureau Clue Computing Inc. en de speelgoedhandelaar Hasbro werd de laatste in het ongelijk gesteld toen het bedrijf de Url *www.clue.com* opeiste voor haar nieuwe speeltje, een nintendo met de naam clue. Hasbro bezat weliswaar de gedeponeerde merknaam clue, maar moest Clue Computing met rust laten, zo oordeelde de rechter toen het bedrijf *www.clue.com* wilde afpakken. Er was dus nog hoop voor etoy. (4)

Etoy sloot haar site en vervolgde haar juridische strijd met het speelgoedbedrijf eToys onder een IP nummer (*http://146.228.204.72:8080/*).

Prijs

Het kunstenaarscollectief Etoy was in de internetwereld al enige tijd bekend. In 1996 wonnen zij de prestigieuze internetprijs, de Golden Nica, *the Ars Electronica price for best Internet art*. Etoy heeft in het verleden ook al conflicten met bedrijven of instanties gehad in verband met haar internetactiviteiten. Zo publiceerde etoy.com foto's van de bomaanslag op het federale gebouw van Oklahoma City op 19 april 1995 met daarbij de provocerende aanmerking: "*Such work needs a lot of training*". Etoy heeft echter nog nooit een proces aan haar broek gekregen in verband met haar internet activiteiten.

In 1996 werkte etoy aan een succesvol project onder de naam 'digital hijack'. Na onderzoek van zoekmachines op het internet had de groep een methode ontwikkeld om als hoogste in de zoekmachines te eindigen. De groep ontwikkelde vervolgens duizenden pagina's en lokte daarmee niets vermoedende internetgebruikers die informatie zochten over David Bowie, Porsche, Penthouse en andere zaken naar hun website. Ergens op het internet zijn die pagina's nog te vinden en deze werden in de rechtszaak door eToys tegen etoy gebruikt als bewijs dat het kunstenaarscollectief zich schuldig maakte aan onwettig gedrag.

Een ander project van etoy dat later door eToys in het proces werd gebruikt, is de verkoop van aandelen in etoy. Voor woordvoerder Zai van etoy dwingt de verkoop

van aandelen mensen om na te denken over de ongrijpbare en amorfe aard van Internetkunst: "Eén van de vele controversen van Net-kunst is dat er geen origineel is". De aandelen, een "uniek" certificaat van 2 bij 2 voet, bevestigd op een aluminium plaat met een chip met elektronische informatie over de aandeelhouder, werden door eToys aangegrepen om etoy te beschuldigen van het creëren van valse fondsen.

Toywar

De eerste slag in de Toywar was dus voor eToys, maar het speelgoedbedrijf had geen rekening gehouden met de internetgemeenschap. Deze was verontwaardigd over de handelwijze van eToys en tevens zeer verbaasd dat rechter Shook het bedrijf in het gelijk had gesteld. Vlak na de uitspraak werd de Toywar site (<http://www.toywar.com/>) geopend en het beloofde een echte oorlog te worden.

De kunstenaars van etoy hielden bij hoog en bij laag vol dat zij niets te maken hadden met de nieuwe site. Om dit te benadrukken verklaarde Zai tegenover het Duitse internettijdschrift *Telepolis*: "de handen van etoy zijn gebonden, als het gaat om netcampagne technieken".

Etoy richtte zich op de rechtszaak en het vergaren van geld voor het proces middels de verkoop van etoy.shares. Het collectief had tot dat moment al 20 duizend dollar uitgegeven aan het proces en stond aan de rand van faillissement.

Etoys.com had echter nooit verwacht dat zoveel mensen zich zouden aansluiten bij het toyleger en allerlei speeltjes ontwikkelden om het bedrijf langzaam ten gronde te richten.⁽⁵⁾ Tussen 29 november en 12 december 1999, de datum dat RTMark zich in de oorlog mengde, was het aandeel eToys al gezakt van 67 dollar naar 45 dollar. Toeval of niet maar in die periode verkocht een groot aandeelhouder, de Moore Capital Management Inc. haar aandelenpakket eToys ter waarde van 2,5 miljoen dollar.

Computerspel

De eerste slag leek gewonnen, hoewel er in het begin van de Toywar geen duidelijke lijn zat. De RTMark campagne (<http://rtmark.com/etoycampaigns.html>) zorgde echter voor structuur. De Toywar werd geformuleerd als een multi user internet spel waarbij het doel was de NASDAQ-notering van eToys neer te halen.⁽⁶⁾ RTMark woordvoerder Lucha formuleerde het passend met de woorden: "Dit spel is veel interessanter dan welk computerspel dan ook, omdat je een slechterik uit de werkelijke wereld moet bevechten".

RTMark is een soort persiflage op een transnationale onderneming met als product 'sabotage'. De aandelen die je van RTMark koopt vormen een investering in mogelijke acties die mensen bij allerlei fondsen hebben aangemeld. Op internet staan de acties vermeld die bij die fondsen aangemeld zijn, met het investeringsbedrag dat nodig is voor de uitvoering van de actie. Investereerders kunnen zich aandienen en vervolgens is daar de website voteauction.com waar voor de Amerikaanse verkiezingen stemmen konden worden geveild. Ook het Barbie Liberation Front is zo tot stand gekomen. RTMark is in zekere zin een tussenpersoon tussen de geldschieters en de actievoerders. Daarnaast doet RTMark vooral het persbeleid voor de acties.

De RTMark campagne was betrekkelijk eenvoudig van opzet. Er werd een etoy fonds opgezet waar allerlei mogelijke acties en ideeën werden samengebracht waardoor iedereen kon bijdragen in de productie of in het gebruik. Er was voor iedereen iets te vinden, iets individueels, iets collectiefs, iets eenvoudigs, iets complex, iets onschuldigs, iets niet onschuldigs en ga zo maar door. Daarnaast was er een pagina met actuele informatie over de financiële situatie van eToys en een pagina met links naar een groot aantal andere pagina's die opriepen om de eToys servers te verstoren.

Woordvoerder Lucha van RTMark verwoordde het uitgangspunt van de campagne als volgt: "waarom zou de mondiale cultuur gedomineerd moeten worden door de zakenwereld? Het internet is het speelveld dat de mogelijkheid heeft een wereldwijd machtsevenwicht te creëren welke op dit moment niet bestaat".

Etoyssucks

Als eerste deel van het virtuele spel moesten vanaf tien dagen voor kerst de servers van eToys op allerlei manieren volledig lam worden gelegd. Naast RTMark mengden zich dan ook anderen in de strijd.

Op een protest site was een anti eToys videospel te vinden waarbij tien bewapende stoere mannen in eToys t shirts tot bloedens toe moesten worden gedood. Bands als Negativland doneerden MP3s voor de campagne tegen eToys. Een groep hackers ontwikkelde een *'action entertainment product'*, waarmee een internet gebruiker direct eToys.com kon aanvallen.

Een andere groep ontwikkelde een anti eToys wapen dat automatisch internet adressen produceert die de eToys site bezoeken. De adressen die het programma produceert lijken op normale eToys bezoekers die op zoek zijn naar een stuk speelgoed voor hun kinderen, kleinkinderen of anderen. Het programma maakt keer op keer contact met eToys en doet eindeloos veel bestellingen van eindeloos veel verschillende internetadressen. De betrouwbaarheid van de verkoopcijfers van etoys.com neemt daarmee af. Natuurlijk werd de domeinnaam *http://www.etoysucks.com/* aangevraagd, maar in dit geval was eToys de campagne voor en belandde men bij het typen van etoyssucks op de officiële eToys site. Het concern had echter geen rekening gehouden met *http://www.etoysucks.com/* (let op het streepje) die wel geregistreerd kon worden.

Virtuele demonstraties

Het Electronic Disturbance Theater (EDT) nam op 15 december de eerste stap tot een virtuele picket line voor de server van eToys. Het bedrijf richtte zich meteen tot de provider Verio Inc. om de website van het EDT te laten blokkeren. Ricardo Dominguez van het EDT verklaarde tegenover de *New York Times* dat de virtuele picket line, hoewel die maar 13 uur had geduurd, toch succesvol was. Enig bewijs voor het succes is niet te leveren. Maar eToys kan evenmin beweren dat de blokkade niet effectief was, want waarom zouden ze dan de moeite nemen de site uit de lucht te halen?

Het gevolg was dat het programma dat de virtuele sit in levendig houdt, over de hele wereld werd gekopieerd en de demonstratie meer en meer vorm kreeg. Onder andere op de website van RTMark uit de Verenigde Staten, Let it snow uit Duitsland (*http://www.assoziationsblaster.de/*), FirstFloorElectro-nix uit Oostenrijk *http://www.firstfloor.org/* die hun eKillerToy bij een andere provider hadden ondergebracht en vele anderen.

De grap van de virtuele demonstraties is dat het onmogelijk is na te gaan hoeveel mensen er werkelijk meedoen en tevens of de server niet te bereiken is door de demonstratie. Het effect van de virtuele demonstraties was echter wel dat naast de *New York Times* andere media ook de bereikbaarheid van de servers van eToys.com in de gaten gingen houden. De volgende dag werd de servers van eToys overladen met valse informatie van toekomstige consumenten en een groot deel van de dag was het bedrijf niet te bereiken.

Genadeslag

EToys dacht door het Electronic Disturbance Theatre af te snijden van het internet de angel uit de demonstratie te kunnen halen. Zij verstevigden hun website en

bedreigden individuele demonstranten met e-mailtjes als: *"get the hell out of dodge"* (scheer je weg met je trucje). Als reactie hierop werden de elektronische adressen en telefoon- en faxnummers van eToys medewerkers verspreid om het bedrijf niet alleen onli-ne, maar ook offline lam te leggen.

Vrijdag, 19 december 1999, was een betrekkelijk rustige dag voor eToys. Ze leek de demonstratie te kunnen overleven. Zaterdag lag de site van het bedrijf echter weer een groot deel van de tijd plat.

RTMark voedde de onrust binnen en buiten het bedrijf met echte en valse informatie over medewerkers van het bedrijf die ontslag wilden nemen en over aandeelhouders die het vertrek van Chief Executive Officer Edward Lenk eisten. In de financiële media verschenen steeds meer verontrustende berichten en de definitieve val van het aandeel eToys was nog maar slechts een kwestie van dagen. Investeerders en aandeelhouders werden bestookt met berichten om hun aandelen eToys te verko-pen.

eToys had de kerstinkopen overleefd, al was het met vele kleerscheuren, en de verliezen waren nog niet dramatisch. Het bedrijf gaf op 27 december 1999 aan de aanklacht tegen etoy aan te houden en tijdelijk de rechtszaak tegen het kunstenaarscollectief niet door te zetten.

TIME INC. SITES:

Courts assail online vote-swap and auction sites

November 7, 2000
 Web posted at: 11:45 AM EST (1645 GMT)

In this story:

[Massachusetts goes after vote auctioneers](#)

RELATED STORIES, SITES ↓

From staff and wire reports

Courts on both sides of the nation issued rulings ahead of the Tuesday elections unfavorable to Web sites that encourage voters to swap presidential ballots for political or financial gain.

In Los Angeles, a federal judge refused to stop state officials from cracking down on California-based Web sites that let users in one state trade their vote for president to someone in another state.

The American Civil Liberties Union (ACLU) of Southern California had sought to get a temporary restraining order, arguing Secretary of State Bill Jones' actions were an unconstitutional restriction of free speech.

U.S. District Judge Robert Kelleher denied the request in a ruling issued Monday night.

The Web sites seek to have Green Party candidate Ralph Nader supporters cast their votes for Vice President Al Gore in states where the presidential race is expected to be close.

In exchange, Democrats agree to vote for Nader in states where Republican George W. Bush is expected to win. The trades, not sanctioned by the campaigns, could help Gore in swing states and give the Green Party the 5 percent of the national vote it needs to win federal campaign money.

Three sites voluntarily shut down last week after Jones told one it was violating state election laws. Officials in Oregon have issued similar warnings.

Jones hailed the ruling.

"Votes are not a commodity," he said. "In California, it is illegal to buy, sell or trade votes for anything of value -- including another vote."

The ACLU said it would appeal, saying such exchanges between voters are

protected and that agreeing to a voting strategy is different from offering payment for a vote.

Massachusetts goes after vote auctioneers

State officials in Massachusetts did not try to halt two so-called "Nader Trader" Web sites, www.winwincampaign.org and www.nadertrader.com.

The activity on both sites was described as voluntary and involved no contract or exchange of money.

"You can't give away your vote for something of value, but because there is no material gain, it's not ... clearly in violation of federal law," said Harvard Law School professor Jonathan Zittrain.

Under federal law, buying and selling votes is punishable by up to five years in prison, \$10,000 in fines or both.

However, a Massachusetts judge on Monday temporarily halted an Austrian Web site owner from buying or selling votes in the U.S. presidential election.

Suffolk Superior Court Judge Maria Lopez granted an injunction against "the people operating this Web site and anybody else" who attempted to operate the site or sell their vote. Hans Bernhard of Vienna, Austria, who was identified as owning the site, had no representative at the hearing.

Prosecutors told Lopez that as of Monday morning 1,116 state voters had registered with the site that was offering a total of \$13,000 for their votes.

The order meant Massachusetts joined Illinois, California and Nebraska in trying to shut down the Web site.

The site's domain name has changed several times since been subjected to legal challenges in U.S. courts in recent weeks. It began as voteauction.com and last week was vote-auction.com. Following a temporary shutdown, the content of the site was resurrected by using a pure Internet protocol (IP) address (devoid of a domain name) and was still on the Web as of Tuesday morning.

David Kerrigan, the Massachusetts state assistant attorney general, said his office did not know the identities of the voters who registered with the site, but hoped that the operator "will abide by the court order."

Bernhard could not be reached for comment.

With special care when you think the *ftf* it introduced, Nifty which is the main [server because](#) of maintenance, renewal did not become way. Angry hmm.

Upper ,Ð -.

From present afternoon [becoming](#) the *ftf*, is.

Modification procedure it does in the provider forgetting, the ,Ä, not being able to connect, you were hasty, is.

The , -, with this the news it can renew to noon Japan and China from the *fRf*, don't you think? it is is. Ukekekeke!

- Perhaps, whether, a how from ,¹ this it becomes faster CATV, however it is is, don't you think?!

The 64kbps how you obtain slowly and are slow obtaining! Don't you think? the ,Ä you say, or in the speed aspect were not impressed at all. It is the case that it is the opportunity how plate which nowadays experiences a faster environment and.

Oh, but how much it is slow with say, it keeps connecting as for ,Á ,Ä it is good. Keeps connecting ,Á ,Ä feeling is good. Keeps connecting ,Á ,Ä is warm, there is a sense of relief, body temperature is felt.

When story goes to strange direction with, how without report end.

*f*sf"fof|[f"fo and pin fo pawn fo, fE•[f]•[f,•[f" •ô

f%ofCfffw•[fC, f%ofCff|[f€ and fJf"f_fj|[f" •ô

It is the ,Ó -, it is cartridge viewing. High. It keeps connecting. , as for , , .

Note

* **J- phone Tokai, " J-SH05 " of folding type and " J-N03 " (k tie Watch)**

* **The official contents of all colors finally break 400 contents concerning the official contents of the J-sky November first half! Is, so. fnfA. Such a fVf‡f{ it is and so distantly it is the thinking which is meaning in the color of 256 colors or, as for everyone of the J-PHONE staff. [Contents details: [Annex 1 annex 2 annex 3 annex 4 annex 5](#)]**

* **NFL official sight establishment official information of the NFL in the J- sky concerning, the J - the sky monopoly offer! So, " downloading the logograph of the NFL each team, it can set the main contents to the expecting picture of the portable telephone. " " Information offer of the up-to-date game result and up-to-date news et cetera " and " introduction of all the 31 teams " is, so. Obtaining - with, the football ,Á ,Ä to be good the ,í can well it does the webmaster. How good kana, with. Well, such a thing it does not have to be. As expected the J-PHONE! If we want NFL information, don't you think? carrying is the rule with the J-PHONE! J-PHONE hurray! The J-PHONE highest! [Related article: [In J- sky NFL official sight opening](#) (k tie Watch)]**

* **Business * solution program " JCSP " start industry beginning! It is release, so it does, the development support program in the WEB but. In the webmaster meaning of the word, " business * solution " being the fCf}fCf" precisely not to be able to grasp, it is the new business which it is unable to comment at all. The solution ,Á ,Ä it is the solution and namely " the solution " " the solution method " ,Á ,Ä in sense but. The ,Ü - in a word ", when you used as Japanese " something with word ,Á ,Ä thing of lie smells. In regard to this case how it is good, is. High and the next. [Related article: [J- phone, for enterprise support program of solution offer trader](#) (k tie Watch)]**

* **Concerning the start of request of sky melody request in the home page of the J- phone with entire country acceptance start! [Related article: [J- phone, request acceptance of sky melody start](#) (k tie Watch)]**

* **Mitsubishi entire research, for carrying test use of intramural information service start (k tie Watch) [[Mitsubishi entire research news release](#)]**

* **The new service which can search the portable sight with information seeking and the mail** (the k tie Watch) inputting keyword of the information which we would like to know into the text of the mail, when it transmits to the kensaku@m.infoseek.co.jp, the searching result it replies as a mail, so is. In this searching service and the J-Sky do not correspond, so. The corresponding type temporarily is the EZweb and the i-mode, so. With being the case that it is said, for the time being how it is good, is.

* **Casio, casual fffWfJf• " LV-10 " approximately of 10000 Yen** (the k tie Watch) and the digital turtle ,Á ,Ä of such convenient price of the ,Á ,Ï it is good with the weight 120g, don't you think?. You probably will buy? But, if the fRfœ you buy, [whether](#) the J-SH04 it does also the air which is said and.

001030.mon

The ,Û, such [mono](#) adhering forever, it is helpless, it is with. News renewal reopening.

Note

* **The Japanese Telecom " J-STYLE ", the J- sky contents transmission** (the k tie Watch) with the L-mode opposite disagreeing with for the PC, it is thing? As for fRfœ.

* **As for the J-PHONE and 16 chord + sampling sound audition** corner webmaster arrival sound with type something which is used with while it is normal electronic sound. Extremely, how it is good, is. Well, when rashly it is strange arrival sound, it is shy it is with hobby exposure.

- The J-T04 which presently is [in the midst of](#) using corresponding 16 chords or. It is -, as for sampling sound, however you are attracted well enough, well. War movie " captain! It is urgent entrance electricity! When it designates that " we would like to see, are as arrival sound of the mail, parenthesis I I... the ,Á ,Ä, it probably is to call such hobby exposure. [Related article: [J- phone east Japan, on home page experience corner](#) (k tie Watch)] of 16 chords

* **The mail and the web of the J- sky, morning of 10/28 o'clock of 9 around 15 minutes - morning o'clock of 11 there was an obstacle, in** around 50 minutes, so is.

It is -? The ,Á , - which is? The webmaster message being not to feel, how is good, is. - You forgot the thing of such former times.

* **The k tie Watch, news access of last week (2000/10/23 - 10/29)** (the k tie Watch) news to access several superior 15 ranks are reported, but we as for J-PHONE-RELATED news in 15 cases barely one case, " [at the J- phone northeast * Niigata area on November 16th just the news,](#) " J-PE03s " sale ". The body cod ,-, that 12 rank in 15 rank.

And it probably is ,Á ,Ï J-PHONE ,Á ,Ä useless what? It probably is minor what? It probably is rubbish what? It probably is kudzu what? There is no value which uses it is probably will be? Having, even personality of the ,é person, it probably is portable telephone kind of what which is doubted? The TVCM to strike it probably is what too much in the habit which either great share is not? Fujiwara period fragrance buying, antipathy the ,é it is probably will be? The webmaster message Fujiwara period fragrance is not accustomed to the favorite, is. The ,° which will be replaced to another person. Kato brown. Kato. If the personal computer you do, it probably will go to the fAfrfo. If that useless Asano loyal trust. That it is, already Fujiwara period fragrance the strange woman of the K-1 f}fj., which is said it is useless what. If times you mention the color printer with the color printer, if there is love at Xerox, you say it is possible to be that, mono is not, it is is. With lie to look at actuality sweetly with deception that it can keep with just love living how, because the ,ç ,á it is not good, the ,° which will appoint Asano loyal trust to the cm of J-PHONE. Don't you think? well, J-PHONE Tokyo. Being appointed at other area, the thing which the webmaster sees it not being possible, being to be trivial. It was the webmaster of the Asano loyal trust fan with the Kato brown fan.

If [addition] it is from laughing direction, with the super great man rather, it is dense dearly or and per master what whether to be, the ,µ,ê,Û,¹,ñ. With favorite something. The all Osaka and Kobe giant many lintels to be, the ,µ,ê,Û,¹,ñ. Or freely using the CG, to come easily, revival. When that it is, not only Kato brown, making also Arai note revive, adding also will village, the fhfšft the image character. The being disgusted ,á which is useless. It fell highly and cleanly. - Don't you think? the anchor and, you age recently and truly it is with increase densely.

*** If 75% input & the picture of the portable user it is improved, information utilization it increases,** (the internet.com) certainly. But most, fee lower temporarily from that. That low level that price is the *fIfWfTf“frfbfNfŠ* with service.

*** " As for the possibility of President Nokia portable telephone infinity " * World Council of Management (NIKKEI)** certainly. Whether it stops taking the shape, " portable telephone " in the future, the ,μ,ê,Û,¹,ñ, as for the portable communication equipment for the individual mono is already becoming general consist of.

*** Mobile radio telephone utilization ratio of the individual, in 1 year 10 point increases * Nomura entire research you inspect (NIKKEI)** perhaps, packet generation influences largely and reaches it is probably will be. Perhaps.

*** In the area whose, portable radio wave such as Furukawa electricity is weak laser radio communication (the NIKKEI)** the ,Ó - is, technical thing however it is not understood well, in any case becomes convenient, if is, it is possible to be that.

*** For the portable telephone solar array development * m * s technology (the NIKKEI)** in carrying the sunlight it is discovered near future there here the spectacle which you bathe, it becomes, it is probably will be?

*** Kyocera, by carrying peripheral device expansion * portable telephone picture exchanging (NIKKEI)**

せっかくフレッツ導入したと思ったら、メインサーバである[ニフティがメンテナンス](#)の為、更新がままなりませんでした。カッパン。

うえひー。

今日の午後から[フレッツ](#)になりましたですよ。

プロバイダに変更手続きするのとか忘れてて、接続できなくて焦ったですよ。

あー、これでコレからは昼日中にnews更新できるんですね。ukekekekeke!!

つーか、どうせこれからもっと速いCATVになるかもしれないんですけどね!!

64kbpsなんて遅えよ遅え! ていうか、速度的な面では全然感動しませんでしたね。今時もっと速い環境を体験する機会なんてザラにあるわけですし。

いやあ、しかしいくら遅いとは言え、繋ぎっぱなしってのはいいなあ。繋ぎっぱなしってのは気持ちいいよな。繋ぎっぱなしってのは暖かいよな安心感があるよな体温を感じるよな。

と、なんとなく妙な方向に話が行った辺りで報告終わり。

ピングポーン、ピングポーン、ウーマーヤーン

ライデヘーイ、ライデポーム、カンダニーン

んふー、たまらんです。ハイ。繋ぎっぱなし。はあはあはあ。

note

[__](#) J-フォン東海、折りたたみ型の「J-SH05」と「J-N03」(ケータイWatch)

[__](#) J-スカイ11月前半のオフィシャルコンテンツについて **全てカラーのオフィシャルコンテンツがついに400コンテンツを突破!** だそうです。ハア。あんなショボい256色のカラーにそんなに意味があるとお思いなんですか、J-PHONEスタッフの皆様は。[コンテンツ詳細: [別紙1](#)、[別紙2](#)、[別紙3](#)、[別紙4](#)、[別紙5](#)]

[__](#) J-スカイでのNFL公式サイト開設について **NFLの公式情報をJ-スカイが独占提供!**

で、主なコンテンツは「NFL各チームのロゴをダウンロードして、携帯電話の待ち受け画面に設定できる。」、「最新ゲーム結果、最新ニュースなどの情報提供」、「全31チームの紹介」だそうです。えーと、webmasterはフットボールってよくわかんねえし。どうでもいいかな、と。いや、そんなコトを言うてはいけないな。流石はJ-PHONE! NFL情報が欲しいなら携帯はJ-PHONEで決まりだね! J-PHONE万歳! J-PHONE最高! [関連記事: [J-スカイでNFL公式サイトがオープン](#)(ケータイWatch)]

[__](#) ビジネス・ソリューションプログラム「JCSP」開始 **業界初! WEBにおける開発支援プログラムを公開** だそうです。webmasterには「ビジネス・ソリューション」という言葉の意味

がイマイチ的確に掴めないのになんともコメントしかねる新事業です。ソリューションってな solutionであり即ち「解決」とか「解決法」ってな意味なんです。まー要するに「日本語として使った場合は」なんか嘘臭い類の言葉ってコトで。本件に関してはどうでもいいです。ハイ、次。[関連記事：[J-フォン、企業向けソリューション提供業者のサポートプログラム](#)(ケータイWatch)]

__スカイメロディのリクエスト開始について [J-フォンのホームページでのリクエストを全国で受付開始!](#) [関連記事：[J-フォン、スカイメロディのリクエスト受付を開始](#)(ケータイWatch)]

__三菱総研、携帯向け学内情報サービスの試験運用を開始(ケータイWatch) [[三菱総研ニュースリリース](#)]

__インフォseek、メールで携帯サイトが検索できる新サービス(ケータイWatch) 知りたい情報のキーワードをメールの本文に入力して、kensaku@m.infoseek.co.jpに送信すると、検索結果がメールとして返信されるそうです。が、この検索サービス、J-Skyには対応してないそうで。対応機種はとりあえずEZwebとi-modeだそうで。というわけで、当面どうでもいいです。

__カシオ、重量120gで1万円前後のお気軽デジカメ「LV-10」(ケータイWatch) やっぱこういうお手頃価格のデジカメっていいよね。買おうか。しかし、コレ買うなら[J-SH04](#)かという気もするし。

001030.mon

ま、いつまでも[こんなモノ](#)にこだわっていても仕方ないんで。news更新再開。

note

__日本テレコム「J-STYLE」、J-スカイコンテンツをPC向けに配信(ケータイWatch) L-modeとやらに対抗ってコトですか。コレは。

__J-PHONE、16和音+サンプリングサウンド試聴コーナー webmasterは着信音とかは普通の電子音のままで使うタイプなんで。割とどうでもいいです。いや、なまじ変な着信音だと趣味丸出しで恥ずかしいじゃんよ。

つーか、現在使用中の[J-T04](#)じゃ16和音とか対応してないし。んー、サンプリングサウンドは結構惹かれますけどねえ。戦争映画とかの「大尉! 緊急入電です!」みたいなのをメールの着信音にしたりしたらカッコイイ...って、そういうのを趣味丸出しと言うのでしょうか。[関連記事:[J-フォン東日本、ホームページ上に16和音の体験コーナー](#)(ケータイWatch)]

__J-スカイのmailとweb、10/28の午前9時15分頃~午前11時50分頃に障害 が、あったそうです。

んー? あったっけ? webmasterはあんま感じなかったのどうでもいいです。つーか、そんな昔のコトは忘れました。

__ケータイWatch、先週のニュースアクセス(2000/10/23~10/29)(ケータイWatch) アクセス数上位15位までのニュースをレポートしていますが、我々がJ-PHONE関連ニュースは15件中わずかに一件、「[J-フォン東北・新潟エリアで11月16日に「J-PE03s」発売](#)」というニュースだけ。それも15位中12位という体たらく。

やっぱJ-PHONEってダメなんですか。マイナーなんですか。ゴミなんですか。クズなんですか。使う価値無いんでしょうか。持ってる奴の人格すら疑われてしまうような携帯電話なんですか。大したシェアも無い癖にTVCM打ち過ぎなんですか。藤原紀香が反感買ってるんでしょうか。webmasterもあんま藤原紀香は好きになれないです。別の奴に代えようぜ。加藤茶とか。加藤。パソコンやるならアビバに行こう。それがダメなら浅野忠信とか。それだよ、もう藤原紀香とかいうK-1マニヤの変な女じゃダメなんだ。時代はカラープリンタでカラープリンタと言えればゼロックスで愛があればそれでいいというモノではないんだ。愛だけで生きていけるなんてのは嘘でまやかして現実を甘く見ちゃいけないので、浅野忠信をJ-PHONEのCMに起用しようぜ。ああ、J-PHONE東京ね。他の地域で起用されてもwebmasterが見るコト出来なくてつまらないので。加藤茶ファンで浅野忠信ファンのwebmasterでした。

[追加]お笑い方面からというコトであれば、いっそ超大物というコトで、いとしいし師匠あたりなんかいいかもしれませんな。好きなんで。オール阪神巨人なんかもいいかもしれませんな。もしくはCGを駆使してやすきよ復活とか。それだったら加藤茶だけでなく、荒井注も復活させて、志村も加えてドリフがイメージキャラクターとか。ダメだこりゃ。ハイ、綺麗に落ちました。つーか、いかりや、最近本当に老けこんでますね。

__携帯利用者の75%入力&画面改善されれば情報利用増やす(internet.com) 確かに。しかしとりあえずそれよりなにより、料金下げろよ。あの低レベルなサービスであの値段とはオジサンビックリだ。

__ノキア社長「携帯電話の可能性は無限」・世界経営者会議(NIKKEI) 確かに。将来的には「携帯電話」という形をとらなくなるかもしれませんが、もはや個人用の携帯通信機器は一般的なモノになりつつありますからな。

__個人の移動電話利用割合、1年で10ポイント増・野村総研調べ(NIKKEI) 多分、パケット代が大きく影響していたりするんでしょうな。多分。

__古河電など、携帯電波の弱い地域にレーザー無線通信(NIKKEI) ふーん、技術的なコトはよくわからないけど、とにかく便利になるならばそれでいいよ。

__携帯電話向け太陽電池開発・エム・エステクノロジー(NIKKEI) 携帯に日光浴させる光景が近い未来そこここで見受けられる、とかなるんでしょうか。

__京セラ、携帯周辺機器拡充・携帯電話で画像やりとり(NIKKEI)

__日立、MPEG4対応携帯向け動画の画質向上(NIKKEI)

__携帯子会社の売却、ボーダフォンと交渉・アイルランドの大手通信(NIKKEI)

__ブロードバンド・インターネット時代の新サービス「Broadband@nifty」提供開始 [関連記事:[ニフティ、ブロードバンド向けコンテンツ配信サービス](#)(internet.com)]

__EUと米国、通信の監督機能分離を要求(NIKKEI)

__Nintendo Powerの12月書き換え開始ソフトの情報 めぼしい作品は新作の[メタルスレイダーグロリーディレクターズカット](#)だけですかね。えーと、これってNP版だけ?と思ったら!ちゃんと[プリライト版](#)もあるようです。しかも、NPのお約束「値の張るプリライト版のほうがNP版より数日先にリリース」もしっかり。プリライト版引渡し日は11/29、\5780。NP版書き換え開始は12/1、\2000。\3780余分に払えば、二日早く遊べるわけです。

で、そのプリライト版は予約受け付け期間が10/1-10/31。って、明日までじゃん。欲しい人はとっととローソンへGO!プリライト版は特典として「特製ポストカード5枚付き」だそうです。まー、いわゆる「ファンなら買い」って奴でしょう。プリライト版は例によって数量限定らしいので、その内秋葉の中古屋とかで、微妙な高値をつけられて販売する光景をみかけるでしょうな。webmasterは特別ファンじゃないのでどうでもいいです。明日までにローソン行くなんてかったるいし。

__任天堂、ゲームボーイ25%増産・年末商戦控え(NIKKEI)

__ドリームキャスト用周辺機器「メモリーカード4X(フォーエックス)」新発売のお知らせ
12/14発売、\4800。

従来のVMの4倍の容量で云々・・・と言うコトですが、ネクサスとか買った方がいいんじゃないかと思えます。メリットは「純正品」というコトだけですね。きっと、サードパーティ製のストレージよりムキャストの親和性が高いですよ。いやあ、すごいメリットだなあ。値段が高いのなんか全然関係無いね。欲しいよ、欲しい。

すいません、嘘つきました。心が痛いです。こんなヘタレたストレージ、欲しくもなんともないです。

__セガ、矢口事業所の閉鎖ならびに希望退職募集について

__セガの今期連結、赤字200億円・ゲーム機値下げ響く(NIKKEI)

__新社名「セガ」、11月1日から正式に採用(ZDNet) なんでもいいからさっさと[VF-X](#)出せや。あと、ムキャ版FV2。

__懐かしの喫茶店ゲーム機の興奮をふたたび(WIRED) ポン製作者であるノーラン・ブッシュネル氏がなんか作ったそうで。要するにシステム基板込みのアーケード用筐体作ったってコトでしようかね?

なんでもいいからガントレットをアップライト筐体込みで欲しいなあ。欲しいなあ。

[AOL対MSN、新『ブラウザ大戦争』勃発か\(上\)\(WIRED\)](#) AOL対MSNエクスペローラ
じゃあなんか燃えないなあ。やっぱ「ネスケ対なにか」でなきゃ。

[ドイツに移った「票のオークション」サイト\(WIRED\)](#) ドイツにドメインを移して、メリケン国内からの法的追求を避けるつもりようです。なんかしらんが頑張れvote-auction.com。
ところでこのvote-auction.comサイトのアドレスどなたかご存知ありませんか。最後を<http://voteauction.de/>とかしてみたんですけど、どうも関係ないサイトっぽいし。見つかりません。

[神棚用の櫛をネット販売・ケイフローリスト\(NIKKEI\)](#) あの、櫛ってそんなに需要があるモンなんですか。うーん、そんなに需要がないからこそ、店舗を構える必要のないオンライン販売にしてみた、と言う理由も考えられますが。まーなんにせよ面白い時代ですね。

001029.sun

主よ、今日も迷える子羊に安息を与えて下さりありがとうございます。

[このような暴力的かつ全能たるあなたを恐れぬ内容のゲーム](#)が私めの周辺に出現するコトなき
ようにとのお取り計らい、感謝の念をあなたに捧げずにはおられません。

[あのようなふざけたゴンポリムビーゲー](#)は近々あなたの教えを伝え、そしてその最も忠実な
僕である法王様が閲覧禁止の旨を全世界に向けて発せられる筈ですが、それまではあなたの比
類なきお力で悪しき存在が私めに近付かぬようにお守り下さい。

ああ、今日は安息日でしたね。

あなたの教えどおり、一切の仕事をを行わず、一日をすべてあなたへの祈りに捧げます。
ですので、当然news更新はありません。

001028.sat

__J-フォン東北・新潟エリアで11月16日に「J-PE03s」発売(ケータイWatch) じぇいぴーえーぜろすりー...えす？Sってなんじゃらホイ？「答え：普通のJ-PE03からJ-Skyステーション機能を省いたもの」ハイ？ていうか、J-PE03とかの売りって、「J-Skyステーション機能搭載の新機種！」じゃなかったの？

どうやら東北地区では、ステーションサービスの開始が来春開始予定とかいうコトで、要は「まだステーション機能いらねえし」というコトだったようです。

へ～、こんなところにも地域色ってな出るモンなんですねえ。そいでもって、東北新潟エリアでは来春までに「ステーション機能にわざわざ非対応モデル」が続々と販売されるようです。携帯の筐体マニア泣かせの代物...なんですかね。多分そうだろう。

なお、J-フォン東日本 東北支社によると、ステーションのサービス開始後にJ-PE03sなどをステーション機能に対応させるアップグレードサービスの予定は今のところないという。だつてさ。ひっでえ話！怒れ、東北地域J-PHONEユーザ。大体J-SkyWebの公式サイトって東京に情報片寄り過ぎだつての。そらま、人口の1割以上が東京圏内に住んでるなら仕方ないコトなのかも知らんですが。それじゃ、webの意味がねえよ。

__「罪と罰 地球の継承者」公式サイト 11/21発売。N64用ソフト。予価\6800。製作がトレジャーなので、またひねくれたようなアクションゲームなのでしょう。楽しみ。ところで主人公の名前はやっぱりラスコーリニコフだったりするのでしょうか。そりゃないか。

001024.tue

note

__無料グループウェアサービス「ケースケ」がJ-スカイに対応(ケータイWatch) 「ケースケ」は、携帯電話だけでグループが形成でき、伝言版・スケジューラー・行先案内板などのグループウェア機能が利用できるサービスで、PCからの利用も可能。J-スカイ版のサービス開始により、iモード・J-スカイ・PC間でデータの共有が可能となった。というコトで、PCとi-modeとJ-Skyでアーキテクチャを超えて利用可能ならば結構実用性は高そうですね。「今日の飲み会の集合場所の告知に」「大事な会議に遅れそうな時に」みたいな感じがあ？いやあ、便利便利。

__オフィスノア、リアルタイム動画を携帯電話に配信するシステム(ケータイWatch)

__テレビ朝日、携帯向けサイトをリニューアルして有料化(ケータイWatch) テレビ朝日は、現在iモード・J-スカイ向けに無料で提供しているサイトを「テレ朝 com・plete」として、月額280円の有料サービスでリニューアルオープンするそう。J-Sky版のサービス開始が11/1から。i-modeは11/6、EZwebではauが11/7、ツーカーが11/2だそうです。

従来の無料サイトは、J-Skyとi-mode用のみは並列して存続だそうですが、EZweb版は有料サイトのみになるそうです。えー、多分廃れますね。有料版だけだと。こういうのは無料だから客がくるんだってばさ。

__米国ではiモードは流行らない?(WIRED) 日本語読めないし、第一NTTがないしねえ。違うか。

確かに、あの太くて早い回線を常時接続で、デカくて綺麗なディスプレイを悠々と使っているメリケン国の方々には携帯電話みたいな遅くて小さいモノは我慢出来ないでしょうな。「太くて早い」VS「遅くて小さい」。うーん、後者の方がテクニシャンって感じですか？いや、別になんとなくフとそんなコト思っただけで発言に特に含みなどは一切ありませんが。テクニシャンの方がいいよね。でも、結局最後は愛か？愛だろ、愛。とかいうTVCMもあったしなあ。

で、なんの話でしたっけ？

ああそうそう、何故メリケン国でi-modeが流行らないか、とかいうテーマでしたっけ。米国人は携帯電話でフルモーション映像を観ることに興味がないからだ。だそう。つーか、webmasterもそういうのには興味ないですが、その前に現在のi-modeだとまだそんなコト出来てねえよ、っていうか。近々出来るようになってもやっぱり別に観たくないですがね。大体僕は携帯でwebみるコトすら嫌なのに(お金がかかるから)、そんなタリイコト誰がやるかっての。

__携帯電話やPDAがジュエリーに(WIRED) 携帯機能付きのイヤリング、PDA機能の付いた時計、MP3プレイヤーのタイピン、とか**作っちゃった**らしいです。IBMが。

webmasterは最初この記事のタイトルを見た時に「携帯ががアクセサリか。そうだなー、時計なんて機能より見た目優先で選んでる人はいっぱいいるしな。携帯ももうそこまでこなれた使われ方するレベルにまで来てるのかな」とか思ったんですが、どうやらIBMの連中はwebmasterより一枚上手だったようです。つーか、多分そういうスパイクグッズみたいのはあんまり流行らないから安心して部門を縮小した方がいいと思うよ>IBM

とか言ったら、もしかして流行ったりしてな。それならそれで愉快的な世の中ですが。つーか、webmasterはあんまアクセサリとかつけない人なんでどうでもいいですが。人からシルバーとか貰ってもつけねえし。

__ギガフロップス、携帯サイトの人気ランキングをメールで毎日配信(ケータイWatch)

__MTI、iモードコンテンツをEZweb向けに自動変換するサービス(ケータイWatch) あー、こういうのいいね。気に食わないi-modeサイトをクラックして全部J-SkyWeb完全対応にしちゃうとか。ところでこのサービス、どうもパーソナルユーザ向けではなく、業者向けっぽいんで、大抵の人にはあんまり関係ないみたいです。多分。

__ACCESS、米KOPIN社と提携して小型モバイル端末を開発(ケータイWatch) 商品名

は"BrowserScope"。以前あった、京セラのDataScopeと名前が似てますな。この端末、MPEG-4とかも再生出来ちゃうようで。だから、携帯端末で動画とか観たくねっつの。実用レベルならいいけどよ。どうせそうじゃねえんだろ。

__京セラ米子会社と米Lucent、第3世代「CDMA」で提携(ケータイWatch) ところでこういうニュースってさ、一応知った風な顔でnewsとして流してるけど、全然わかってないのよね。あはははは。なによ、DMAって？デオキシリボ核酸？DNAですな。ああ、HDDのアレ？Direct Memory Accessだっけ？つーわけで、織田裕二には悪いけどなんのコトやらサパリーね。

__公取委、NTT東日本を事情聴取 DSL参入妨害の疑い(asahi) まったく、図体デカイ癖にやるコトはこすっからくてケチ臭い、いかにも親方日の丸野郎といった感じですな。クソNTT。

__広帯域はクラッカー天国？(上)(WIRED)

__「票のオークション」サイトが閉鎖(WIRED) 衆愚政治に陥っているかもしれないとは言え、現代社会システムの最高峰である民主主義。その根幹を成す選挙権の一票をオークションで売ろうと考えるたあ。流石に自由の国メリケンですな。とか、ベタなコトしか考え付かなかったんですが、やっぱなんつーか、自分の一票はもう少しマシなコトに使った方がいいよね、とか死ぬ程まともな考えを述べてみたり。ああダメだ、webmasterは根が善良で善良で仕方が無い人間なので、こういう時はつい正論をぶちまけてしまいますよ。やっぱ男は(女も)白票でしょう！もしくはテメエで立候補しときなさい。で、オークションサイトで票を買って当選しなさい。あ、潰れたのかこのサイト。自分で運営して自分で買いなさい。それなら万事解決。

__メーカー直販で購入希望8割。ただし、「安ければ」(internet.com) メーカー直販って、安くなければ、普通は特にメリットありませんからねえ。まー、自作機を製作可能なレベルのユーザに限っての話ですが。ちなみにwebmasterはGateway2kのG6-350なる型番のレディメイドPCをメインで使用しています。具合悪いです。ガワが特に。お金が出来たらチョコチョコパーツ入れ替えして行きたいと思います。

__セガのオンラインショッピングサイト、売上好調(internet.com) [Dreamcast DIRECT](#)のコトですが...。みんな、何買ってるの？買うモノなんかないじゃん。ムキヤ関連製品って。シェンムーとかTURBとか買ってんのか？まさか。いや、嫌いじゃないですけどね。ムキヤ。ただ、そんな「好調」って程、何が売れてるのかな～、と。

__任天堂「パーフェクトダーク」公式サイト更新

__「脳ペースメーカー」で鬱病治療(WIRED) 「脳にペースメーカー入れる」ってだけでかなり気分悪くなるんですが。鬱病の人にそんなコト言ったらショックで自殺する人とか出ねえか？

001023.mon

note

__腕時計型デジカメでミニスカ盗撮、陸上自衛隊二曹を逮捕(ZAKZAK) ウム！機材を臨機応変に駆使して行くその創意！戦場においては柔軟性こそがなにより役に立つ！お国の為に役に立てよ！つーか、なかなかこの人も頭いいですね。女性(31)のミニスカート内に腕を入れ、手に持った腕時計型デジカメで盗み撮りした疑い。なんだ、誉めて損したよ。タダの頭悪い人じゃん。容疑者は福岡県春日市の陸自福岡駐屯地で不発弾処理の研修を受けた帰りだった。記事の最後にこの文章があるんですが、その不発弾処理とリストカメラで盗撮するのはなんか関連性があるんですか。「人を殺した後はシヨンベンをしたくなる(c)北斗の拳」のと同じように「不発弾処理をした後は盗撮をしたくなる」んでしょうか。ところでこのリストカメラは恐らく[カシオのアレ](#)でしょうな。webmasterも前から欲しかったんですけどね～。こんな使い方があったとは。いや、別に真似する訳じゃないですが。待てよ、J-PHONEユーザが今そのリリースを心待ちにしている[J-SH04](#)は、「携帯電話 + デイ

ジカメ」だし、似たようなカモフラージュが可能だね！バッグかポケットにでもしまえばいいのに、何故か携帯を手を持って街中歩いている奴とか結構いるしさ！激写激写！しかもカシオのアレと違ってこっちゃカラーだぜ！そんでもって撮ったら即座にサイトにアップだ！アクセスもウナギ昇り！

つーか、なんかかなりいいアイデア過ぎて、これは実行する奴いそうだよな～、という感じなんですけどどうでしょうか。賭けましょうか。類似犯が出るかどうか。出る方にうまい棒(めんたいこ味)一本+フィリックス君ガム二つ。時価およそ\30といったところですか。

__丸紅テレコム、携帯の待ち受け画面保管サービス(internet.com)

__丸紅テレコム、携帯電話向けのディスクスペースサービスpandoru.com(ケータイWatch) iモード、EZweb、J-スカイの各端末に対応するディスクスペースサービス。自作の待受画面や着信メロディなどのデータをメールに添付して送信することで、サーバー上で5MBまで保存しておくことができる。画像データの表示については、各端末向けに自動的にファイル形式やサイズを調整する機能も備えている。

携帯向けのストレージサービスですか。便利そうですね。しかし、5MBも転送するとしたらパケット代が恐ろしくてかなわないでしょうな。サービス開始は10/25。[<http://www.pandoru.com/>]

__携帯電話からホームページに簡単アクセス「ワンコールネット」(ケータイWatch)

ユーザーが番号通知機能がついた携帯電話からサーバーに電話をかけ、呼び出し音を聞いて電話を切ると、サーバーから携帯端末宛てにメールが届く。届いたメールには、ホームページのアドレスが掲載されており、ユーザーはURL部分を選択するだけで簡単にアクセスすることができる。

ふんふん、確かに携帯のテンキーで長ったらしいURLを入力するのは骨ですからな。

webmasterはやったコトないけど。

サーバーへの通話料は無料だが、同サービスを利用するには、メールアドレスが電話番号のまま、番号通知設定をオンにしている必要がある。また、ワンコールネットへの掲載については、サイトオーナーより月額5000円程度の料金を徴収。

なるほどほど。利用者側は恐らく無料で利用できるんでしょうな。まあ、面白い試みかもしれない。対応端末はJ-Skyとi-mode。サービス開始は来年1月を予定。

__マキシーの恋愛サポートサービスがJ-スカイに対応(ケータイWatch)

note

__Gratzer2.74リリース 定番MP3プレイヤー。今回はWinMeに対する動作確認などが為されたようです。最近WinMeを正式にサポートするソフトも増えていますが、そもそもWinMeというOS自体はどうなのでしょうね。「バグだらけ」とかも聞きますが、そんなんだったら別にWin9x系も同じだしなあ。やっぱNTかUNIX系辺りのOSですかね。乗りかえるなら。安定しててよさそうだし。うん、MacもMac OS Xなら既にアレは一応UNIX系の亜種と言えないコトもないし選択肢に入りますなあ。うむうむうむ。

最近本気で新機種導入(asメイン使用OS乗換え)を考えているwebmasterです。つーか、お金無いから新しいモノ買うなんてなかなか出来ないけどね！haha

__任天堂の今西紘史取締役広報室長にインタビュー(mainichi)

001020.fri

で、結局news更新出来ませんでした。[10/22未明記入]

さー、今日こそきちんと更新したいモンですね。コメントが命の当サイト、とにかくたわけたコメントを付けたいモノです。[朝]

001019.thu

午後三時頃、[携帯](#)の音で目が冷めたら知人から「家の電話通じないよ」とありがたいお知らせが。

つーわけで、日中の更新は出来ませんでした。すいません。現在10/20のAM06:55。いわゆる「あした」です。

朝で～す。未明で～す。そろそろ日の出で～す。

やーすんません。15日の更新をしている途中でWindozeが死んじゃいまして。

「政府モード」とか呼称される謎のシステム監察モードすらたちあがらず、「えー、Win再インストールするの面倒臭いな～。ていうか、C:\のバックアップとってなくて困ったな～。つーか、ブックマークだけでも救助してから再構築すっか。でも面倒～」とか思ってたらあつという間に3日ばかり経ってしまいまして。えっへっへ。今週ももう木曜ですね。つーか、実はまだきちんと復旧してません。

今回のトラブルは、ネスケ4.73とWWWdでwebを巡回している最中に、Iria ver.1.06を起動したら何故かHIMEM.SYSがブツ壊れちゃったらしく、Win98起動ディスクからHIMEM.SYSだけをC:\にcopyしたら、何事も無かったかのように、割とあっさり起動してくれちゃったりしたので、「ん～、大丈夫かな?」とか思いつつ恐る恐る使ってます。でも、結構大丈夫臭いのでまたシステム吹っ飛ばすまで再インストールするつもりは無かったり。適当webmaster。

しかしこんなに簡単に復旧できるなら3日も放っとくんじゃなかったなあ。あっはっは。

001015.sun

日曜だし、どうせnews無いよね。

今日は寒いね。

当サイト、最近のレファ 最近やたらとJ-PHONEづいているせいか、[J-PE03](#)で検索をかけ

た結果、当サイトに辿り着いてしまった哀れな人がそれなりにいっぱいいるみたいです。なーんも、有用な情報はありませんよ。すいませんね。パクリニュースばっかで。で、えーと、訪問者の具体的な数字を言うと日に10人くらい。あんまり多くないか。でも、当サイトにしてみれば、10人は多いほうなのです。あっはっは。つーか、webmasterのネスケだと、上記検索結果9件のアンカーすべてが「10日以内に訪問済み」な色になっていて、なんかこいつJ-PHONE好きだなあ、とか自分で思います。

ところでその先日10/13に発売されたJ-PE03、どうなんでしょうね。実際。とりあえず2chの携帯PHS掲示板にあったスレッドを二つ。[J-PE03どーですか？](#)、[J-PE03を](#)。どちらもかなり寂しいスレッドですね。

webmaster思いまするに、携帯はやはりある程度ボタンが多くあった方がいいのではないかと。

「電話機として必要なボタン(10キー+リダイヤル履歴)」、「メールボックス呼出ボタン」、「www接続ボタン」、「4方向程度のカーソルキー」。

ボタンはこれくらいは欲しいですな。それと、出来る限り大きな液晶画面。電池の持ち。どーも、現在のJ-PHONEの新型機種はボタンが少ない奴が多くていけません。J-PE03然り。やっば、J-SHシリーズはなんだかんだでなかなかいいシリーズなのかも知れません。デジタルメ付きの[J-SH04](#)に大期待！

2chを色々みていたら、[SH05情報GET!!](#)などというアホスレを見つけてしまいました。流石2ch。11月発売はないだろ。来月だぜ。

note

[J-スカイ「ステーション」](#)対応機[J-PE03\(by Pioneer\)](#) 本日発売!eSHOPで[新規加入](#)を開始しました はーいお待たせ。J-Skyステーション対応機種がまた新たにリリース。店頭での実勢価格はどんなモンなんでしょね。売れ行きとか。

今更[J-T04](#)使用レポ 今日webmasterは、なんか初期不良っぽかった[J-SH02](#)から[J-T04](#)に機種変更しました。前機種使用6ヶ月以上+J-PHONE CLUB加入で、機種変更料金は\4200+消費税\210の計\4410でした。機種変更の申し込み日は今週日曜日の10/8。J-T04の使用感はえーと、割と悪いです。ボタンのクリック感が死ぬ程イマイチで、しっかりボタンを押し込まないと反応してくれません。特に4方向に別れているマルチファンクションボタンあたりは最悪。お金が出来次第ととと近日発売予定の[J-SH04](#)に乗換えたいと思います。J-T04独自の「お楽しみ機能(Skyウォーカーの送受信回数に応じて徐々に機能追加)」ってのはそれなりに面白いと思いますが、そんなん出来るんだったら最初から使用可能にしとけよなというか。しかも、この機能はJ-T04含む東芝機間でのみ有効な機能が多いので、他社製の筐体を使用している人とのメールのやり取りじゃあんまり関係なかったり。ちょっとナニな機能です。

...いや、ここはやはり逆境を逆手に取り「メル友募集！J-PHONEの方に限ります！出来れば東芝機種の方でお願いします！」とかするべきなのではないでしょうか。 :-<

__ J-スカイ端末価格調査10/12版：東京でカラー機含む4機種値下げ(ケータイWatch) J-SH04の発売が間近になり、多少値下げが行われたようです。

__ iモードはメール端末？有料コンテンツ利用者は2割弱(internet.com) オイラァJ-PHONEユーザーだからi-modeなんて知らねえや。つーか、やっぱ普通有料コンテンツなんてアクセスしないよな。高いし、無線だから接続超不安定だし。大体速度も携帯だから9600だしな。

__ 【CEATEC JAPAN】cdma2000対応ゲーム端末、DC用無線通信ユニットなど(eg)

__ 広島・紀藤と中日・鶴田の交換成立 えっ、紀藤マジで行っちゃうの？つーか昨日戦力外通知出されてたけど急な話だな。交換相手は鶴田か～。なんかかなり微妙なセンですね。年に一度だけスーパーモードになる紀藤の方がまだいいんじゃないかな、とか思わないでも。紀藤は愛知出身なんで里帰りですな。ああ、カープ一筋の男がまた一人いなくなる。[[スポニチ](#)]

金本3割30本30盗塁達成！ 行って来ました最終戦@神宮。
やりましたよ、知憲(ともあき)は！打ちやがりました第二打席で。ライトスタンドに飛び込む見事な弾丸ライナーでした。辛抱たまらん感じで思わずnoise氏大興奮でした。とりあえず知り合いにメールうちまくりの電話しまくりでした。あはははは。[TERRAZIさん](#)にも電話して「速報で載せとけコラ」などと思わず口走ってしまいご迷惑おかけしました。まあいいじゃないの、ダイエーは優勝したんだし(TERRAZIさんはダイエーファン)。これくらいの迷惑かけられても当然だよあははは。

試合的には、

- ・横山が1失点の完投で、最終戦で今季初勝利という微妙な勝利を記録
- ・ヤクルト先発は今季限りで引退の岡本が1回表をピシャリ(岡林最後の対戦打者は町田。遊飛)
- ・2回表からは最優秀防御率のタイトルがかかる石井がリリーフしそのまま1回1/3イニングスを抑え最優秀防御率のタイトルを手中にし即座に降板
- ・4回表の先頭打者、金本がここでソロホームランを放ち史上7人目の3割30本30盗塁達成(ちなみに前回達成者は1995年の野村。カープでワンツー)
- ・馬場も引退試合(馬場のプロ最後の打席はライトフライ。町田がもぎとりました)
- ・[広島がヤクルトに4年ぶり勝ち越し](#)(しかも今日の勝利なんか「魔の神宮」ですよ！)

という感じでした。

まー先日順位が確定した後の最終戦と言うコトもあり、緊張感に欠けたせいか間抜けなプレーも目立ちましたが、10月にしては暖かい気候でしたし、金本の記録、石井の記録、岡本&馬場の引退試合&セレモニーなんて、歴史的な瞬間にも立ち会えた訳ですし、なかなか楽しめる野球観戦ではありました。ペナントレース真っ最中に怒号を放ち青筋立てて応援するのも面白いですが、こういうのんびり観戦できる試合もいいもんです。達川も最後が勝利でよかったな。

コレで今シーズンの僕の野球は終了。後はストーブリーグだけが楽しみです。日本シリーズなんてなあ…。来季はナゴヤドームで中日戦がスタートですな。

暴落しているApple株を買ってみよう！ 昨日「Apple株を買ってみたいけど買い方よくわかんない～ん」と財テク全盛の昨今(嘘)で大恥を掻いてしまったwebmaster。チラッと調べてみました。[1株.com](#)なるダッサイ名前のオンラインショップがあるようです。「Appleの！ピクサーの！ディズニーの株を所持してみたいけどやり方わからん！」という人の為に一株だけ購入して額縁に入れて郵送してあげるヨ、というサービスを展開しているお店のようです。えーと、値段を見てみたのですが、素人目に見ても「Appleの株が一株で三万円近くするのは高すぎねえ？」という感じなので多分お勧めできません<本当に素人判断ですのであまり鵜呑みにすんじゃねえぞコラ<途中から何故かガラが悪い

コレだったら、[Yahoo!のApple株関連掲示板](#)でも見た方がまだいいかもしれません。ここ数日「株買ってみたいけどよくわかんねえ」という人達の質疑応答がなされていますので。

で、Yahoo!の掲示板によると、ゼロからの状態で株を購入したい場合は、証券会社に新規に口座を開設する必要があるそうで、それが数日間(?)くらい時間がかかるそうで、思い立って即日株を買えると言うようなモノではないらしいです。

Apple株は外国の株なんでどこの証券会社でも買えるという訳ではないそうで。大和証券のダイワダイレクト部でなら購入可能だそうです。他は知りません。

webmasterも結局なんだかよくわかっていないのですが、Apple株が安い内にほんの少しいいからオーナーになってみたいものです。そんでもって業績報告書とかもらってみよう！

んー、やっぱ株やってる知人にでも聞くのが一番手っ取り早そうですね。

そういえば、[ビーム](#)で連載している桜玉吉漫画で「アスキー株を買おう！」みたいな企画ありましたね。アレを参考にすればいいのか！...って、あんま参考にならなさそうだなあ。

[__公取委、独禁法違反の疑いでアップルに警告\(ZDNet\)](#) よっ！公取屋！ハイハイハイ、Apple株を買おうかな、とか思ってるwebmasterには朗報と言えましょう。hehehe

[__J-スカイ対応機、全国で300万台突破](#) 「サービス全国化から約6か月で300万台を突破」だそうです。が、これは「J-Sky対応機の販売台数」であって「J-PHONEユーザのweb利用者数」ではないのです。

[__J-PHONEとJR東日本が提携、音楽配信プラットフォームを共同で構築](#) J-PHONEも音楽配信ですか。webmasterの考えとしては今のところ[9/29付けでお伝えしたfeel H](#)のnewsで言った通り、今のところ携帯と音楽配信を結びつけたガジェットにはやや懐疑的ですんで別にどうでもいいです。大体ウチ、田舎だしなあ。新宿渋谷池袋でサービス開始したってあんまり関係ないのよ。つーかやっぱどう考えても電池もたないでしょ。普通に通話とメール使ってるだけで、夕方頃には電池表示がピンチ気味になるのに(使用機種は[J-SH02](#))、その上更にスピーカから音鳴らすなんて自殺行為としか。携帯メーカは、新機能追加はいいから、基本的なポテンシャル上げるコトもきっちり研究しなさい。使用電力と、メモリ管理ユーティリティとか、日本語FEPの品質の向上とか。

[__家電各社が描く次世代ビデオレコーダーの姿\(ZDNet\)](#) webmaster、実はアナログビデオ

デッキなるものを所持したコトがありません。勿論日常的に使ったコトもありません。どうもあんまりテープメディアって好きになれないのよね。マイコンの記録媒体と音楽用のカセットテープくらいなら使いましたが。ストリーマは憧れでしたな。まあ、どうでもいい話です。これからはDVD!なんですかね。

__ シャープ、携帯情報端末「ザウルス」にキーボード標準装備(NIKKEI) マジ? キーボード標準装備のザウカ。んー、ちょっと興味覚えますね。

__ 「日本語.com」可能に、米NSIが登録開始へ(NIKKEI)

カーブ、今季Bクラス確定 [CCC](#)でわかりやすく説明されているので引用。 [横浜が阪神に勝利](#)。ヤクルトが中日に勝利。阪神は7 6敗で、広島が残り6試合に全敗しても7 5敗であるため、阪神の単独最下位、広島の単独5位以上が確定。横浜は6 6勝で、広島は残り試合に全勝しても6 6勝止まり。ヤクルトは6 3勝で、横浜との残り試合が4。横浜が残り試合に全敗するとすれば、ヤクルトが6 7勝を挙げてしまうため、広島は3位以上に上がることができない。このため広島の単独4位以下が確定した。だそうで、非常に残念なコトです。まー最下位回避できたからいいか。こういうのをブービー賞ってんだね。やったぜカーブ! 詳しい順位表をご覧になりたい方は[Yahoo! Sportsの順位表](#)をじっくりとみて再度ご確認ください。

webmasterも何度も計算し直してみましたが、どうあがいてもカーブのAクラス入りは無理でした。ぬう。

なお、今季のカーブの関東での試合は、

10/04(水) ヤクルト戦 神宮 18:20プレイボール

10/11(水) ヤクルト戦 神宮 18:20プレイボール

の、2試合を残すのみとなりました。10/11の試合は恐らく今季の最終戦でもあるので、暇だったら観戦に行こうかと思えます。秋風吹く神宮はさぞかし寒いでしょうな。

001002.mon

あーはいはいはいはい。今から更新するからまってろよ、私の可愛い小ネズミちゃんたち。こういう場合は普通「子猫ちゃん」か。

note

広島東洋カーブ、今季単独最下位は回避 現在セ・リーグ5位のカーブは60勝69敗1分で残り6試合。6位のタイガースは今日の敗戦(対ヤクルト。0-3)で、57勝75敗1分で残り3試合。よって、カーブが残り試合を全敗しても現時点でのタイガースの敗戦数に並ぶ75敗で最悪同率最下位。

いくらなんでも今から全敗は考えにくいので、カーブは今シーズンの最下位ほぼ回避と見てオッケーでしょう！

先月中頃までは、再びの3位浮上なども垣間見えていましたが、結局今シーズンはほぼ5位確定ですね。4位ヤクルトが62勝64敗1分残り9試合ですので、最高にコトがうまく運んで、カーブが4勝2敗ヤクルトが2勝7敗で終われば、同率4位。カーブヤクルト両チームの勝敗数が一つずつひっくり返れば当然順位もひっくり返し、カーブ4位ヤクルト5位もありえます。

まず無理でしょうけど、この小さな希望だけを心の支えに秋風が身に染みる10月前半を精一杯生きて行こうと思うwebmasterでした。

カーブファンの心の支え 金本3割30本30盗塁。日本プロ野球史上7人目の。これだけだ。盗塁は後ひとつ、ホームランは後2本。なんとかやってくれ頼むぞ。盗塁王は結局石井が現在34盗塁と、結局順当に軽く金本を抜き去りましたからねえ。ミンチーの最多勝もここ2試合負け続け+昨日バンチが14勝目ゲットで、追いつくには残り試合6ではちょっとなあ、な感じでコレは完全に諦めるしか。というわけで今年は金本アంతしかしいないんだ。がんばってください。

__J-フォン東京は、J-フォン東日本へ。 本日10/1から、J-PHONE北海道、東北、東京が合併してJ-PHONE東日本という名前に。新サイトのアドレスは<http://www.j-phone-east.com/>だそう。即ちJ-PHONE East。イースト。カタカナで書くと、パンの材料みたいでなんだか締まらない名前ですが、慣れてしまえば多分なんてことはないでしょう。各エリア毎の窓口サイトなんてのが[北海道](#)、[東北](#)、[東京](#)、にわかれてあるようで、まだ合併って言ってもどうも組織的

に上手く機能していないような感じがあります。

__ J-PHONE東京、エリア別情報配信サービス「ステーション」本日サービスイン このJ-Sky「ステーション」では、要するに無料のメールマガジンみたいなモンです。情報の内容によって、無料のモノと有料のモノがあります。有料の方の料金は、月額\100でそれ以外の料金(通信費とか情報量とか)は一切発生しないので、内容によっては結構面白いサービスになるかもしれません。

ただ、今のところこのサービスに対応している機種が[J-D03](#)、[J-K03](#)、[J-PE03](#)の三つだけなので、真価を発揮するのはしばらく先でしょうかね。

あっ、そうか。昨日は[J-T04](#)安いいいよな、とか思ってたけどこのJ-Skyステーションがあったか。うーむ、やっぱ機種交換はしばらく「待ち」か。安いからとりあえず[J-T04](#)買って、暫くしたら[J-SH04](#)に乗換えるって手もあるか。

__ 東京・大手町に高速接続のネットカフェ誕生(NIKKEI) ネットカフェ。割と死語っぽいと思うのはwebmasterだけでしょうか。ま、ネットカフェはともかく、従来の公衆電話のようにweb端末が設置されると世の中便利でしょうな。[フランスのコレ](#)みたいにするとか。

__ KDDI、携帯で動画本格伝送・世界最速、2002年開始(NIKKEI)

__ 富士通、携帯電話の通信インフラを仏社から受注(NIKKEI)

__ a u、アナログ方式の携帯電話サービス終了(NIKKEI)

In-Reply-To: [Re: Selective Enforcement](#) posted by anonymous on 12:41:01 AM 30 Oct 2000

On the contrary, Jim Cody agreed to take down his site after California told him that it contravened state voting laws. California viewed the votes themselves as possessing intrinsic value. See:

California Shuts Down Vote-Trader Web Site Secretary of state calls such swaps illegal

: <<from the website>>

:

: Is it legal? A spokesperson at the U.S. Justice Department, which investigates potential instances of voter fraud, said it is, since the sites "serve as a clearing house. There is no pecuniary exchange, and it is an agreement amongst private parties, no legal violation there in terms of violation fraud. It definitely is an innovative campaign technique, to say the least." (excerpted from the MSNBC article reachable through our media page.)

:

: : How is that voteauction.com got busted, but these people don't? It's still interstate election tampering, right?

::

: : : <<from an email that went out recently to Green Party Affiliates>>

:::

:::

: : : We've all heard it: "A vote for Nader is a vote for Bush." Wouldn't it be great if you could both vote for Ralph Nader AND against George W. Bush? Now you can-- become a Nader Trader. If you live in a swing state, contact a Gore-voting friend in a strongly Bush-leaning state and informally agree that your friend will vote for Nader, while you will vote for Al Gore. Becoming a Nader Trader hurts George W. Bush, helps Al Gore, and will increase the national totals for Ralph Nader and the Green Party.

:::

: : : As the election quickly approaches and the presidential race appears

to be going down to the wire, many of us are wrestling with how to use our vote. Should we vote for Al Gore, who often strikes us as the lesser of two evils, or for Ralph Nader, the Green Party candidate?

:::

::: In a way, you can do both. Become a Nader Trader! All indications are that the election will be decided in a handful of swing states, where a few thousand votes might make a huge difference in the electoral process. Votes for Nader in these states run a very real risk of putting George W. Bush in the White House. While sincere, committed people can disagree on voting for Gore or Nader, few want the responsibility of personally ushering in four or eight years of Bush's regressive fiscal, environmental, and social agenda. At the same time, voters are torn by the fact that although Nader will not win any states outright, if the Green Party gets more than 5% of the national vote, it will qualify for federal election funds in the 2004 election.

:::

::: A Nader Trader is someone who is leaning toward Ralph Nader in a swing state, but informally agrees to "trade" his or her vote with a Gore-voting friend in a state that's strongly expected to go for Bush. In other words, you vote for Gore in your swing state, while your friend casts a vote for Nader without doing damage to the Gore/Lieberman ticket. It's an easy way to tip the electoral balance away from Bush while preserving the national totals for the Green Party. If enough people "trade" their votes, there is a very real chance that the Green Party's power will be increased AND that George W. Bush and his cronies will be kept out of the White House.

This week [May 12 - 19, 2001] in avant garde cinema (part 2)

THURSDAY, MAY 17, 2001

5/17

Brookline, Massachusetts: Coolidge Corner Theatre

<http://www.coolidge.org>

VIDEO BALAGAN: INDEPENDENT EXPOSURE

8pm: Balagan is pleased to host an evening of Experimental works compiled by Joel S. Bachar, Founder of Microcinema and Blackchair Productions based in Seattle, Washington and on the web (www.microcinema.com). Works will include Joel Schlemowitz's EYE MUSIC, Paul Catanese's TWO MINUTES ON A SUBWAY TRAIN, Laura Purdy and Kristy Guevera-Flanagan's BLOW THEM UP and Rica Linders's DEJA VU. The Coolidge Corner Theater is located at 290 Harvard Street in Brookline, Massachusetts. For more information, call (617) 734-2500.

5/17

Cambridge, Massachusetts: Harvard Film Archive

<http://www.harvardfilmarchive.org/index.shtml>

AN EVENING WITH WENDY CLARK

7pm: Wendy Clarke has made a career out of creating contexts for other people (particularly disenfranchised individuals such as teens and prison inmates) to access the tools and resources of video and other new forms of communications technology. Grasping the therapeutic potential of television after making her own video diary in the early 1970s, media artist and educator Clarke has spent the past two decades exploring video as a forum for personal expression. First came her legendary LOVE TAPES, a series begun in the late 1970s in which people spoke extemporaneously on camera about love, videotaping themselves in a special booth. Clarke then spent six years as an artist-in-residence in the California prison system, working with

HIV-positive inmates on a series of media collaborations that led to her REMEMBRANCE project. The stories in REMEMBRANCE, like those from THE LOVE TAPES a decade earlier, range from personal tragedy and deep sadness to humorous attempts at coping. Collectively, the tapes serve as both a forum for contemporary discussion (and healing) and as a historic record of these times. Tonight's program will include ONE ON ONE: KEN AND LOUISE and THE LOVE TAPES (Volume One). This screening will take place at the Archive, the Carpenter Center for the Visual Arts, 24 Quincy Street, Cambridge. For more information, call the Archive at (617) 495-4700.

5/17

London, England: The Lux

<http://www.lux.org.uk>

KURT KREN

7pm: "With thirty-one 16mm works to date, Kren's historical role in Europe is comparable to that of Brakhage in America, as is the way in which each historically represent some aspect of the transition from the existential to the structural in their work" (Malcolm LeGrice, STUDIO INTERNATIONAL Nov/Dec 1975). The programme will be divided into 3 parts, showing 21 of Kren's films chronologically (1957-1969), including the masterpiece 15/67 T.V. and 9/64 O TANNENBAUM-MATERIALAKTION OTTO MUHL. This event will be held at the Lux Centre for Film, Video and Digital Arts, 2-4 Hoxton Square, London N1 6NU; for more information, call the Lux Centre at 020 7684 0200.

5/17

New York, New York: Anthology Film Archives

<http://www.anthologyfilmarchives.org/>

WORKS BY INDEPENDENT MAKERS

7pm: Tonight at Anthology Film Archives, Film/Video Arts, Third World Newsreel and Downtown Community Television present their on-going screening series of works by independent makers. This series takes place once a month throughout the five boroughs alternating between curated screenings of finished work and work-in-progress. Tonight's screening is free and open to the public. For more information contact Duana C. Butler at Film/Video Arts 212.673.9361 ext. 21 or e-mail dcbutler@fva.com. Anthology is located at 32 2nd Avenue, New York; for more information, call (212) 505-5181.

5/17

Pittsburgh, Pennsylvania: Andy Warhol Museum

<http://www.usaor.net:80/warhol/>

MORE MILK YVETTE

12:30pm: A screening of MORE MILK YVETTE (1965), directed by Andy Warhol. With Mario Montez, Paul Caruso, Richard Schmidt. The Andy Warhol Museum is located at 117 Sandusky Street in Pittsburgh; for more information, call (412) 237-8300.

5/17

San Francisco, California: Film Arts Foundation

<http://www.filmarts.org/>

25TH ANNIVERSARY SILVER JUBILEE

8pm: Music: Local Jazz Legend BJ Papa. Live Sets: DJ Moody Eva; DJ Cameron.

And a program from the stage featuring special guests and a FAF 25th

Anniversary Film by Frazer Bradshaw and Dan Weir. And in conjunction with

the San Francisco Cinematheque, two programs: 7:30pm: ALL IN THE FAMILY,

films that address, with humor, love or dismay, the institution which in

some way forms us all, including Curt McDowell's A VISIT TO INDIANA, Chuck

Hudina's PARENTS' VISIT, Barbara Hammer's OPTIC NERVE, Jay Rosenblatt's

SHORT OF BREATH, Ted White's THE PASSION OF GOOSE-EGG TUFFY and Daven Gee's

RISING. 9:30pm: INNER AND OUTER SPACES, films of physical or emotional

landscapes, often marked by the psyches of their makers, including Tim

Blaskovich's INTRO, Michael Rudnick's PANORAMA, Scott Bartlett's METANOMEN,

William Farley's SEA SPACE, Toney Merritt's LONESOME COWBOY, Dean Snider's

ISH AND VINNY, Sal Giammona's WALLS IN THE WOODS, Elise Hurwitz' I RAISE MY

ARM, Mark Taylor's HE WOULD HAVE LOVED ME TO DEATH, Danny Plotnick's DRUNK

#9 DRAMAMINE #5 or ANGEL AND GENO'S WEDDING, and Christian Bruno and

Natalija Vekic's DIGGINS. Complimentary drinks, desserts and hors d'oeuvres

will be served. This event will take place at the Yerba Buena Center for the

Arts, 701 Mission Street, San Francisco; for more information, call the Film

Arts Foundation at (415) 552-8760.

5/17

San Jose, California: Cine16

<http://www.cine16.com/>

VOICE OF THE CONVICT

The United States does a better job of putting people in prison than any

other western nation. Tonight's films are over thirty years old, but are

they irrelevant? Since they were made, the U.S. prison system has grown

tenfold, and now 2 million of our citizens are behind bars in any given day.

These films not only offer a broad perspective on life behind bars, but

provide an insight as to some of the historical reasons we are where we are

today. VOICES INSIDE (Tom Pettit, 1969): This hard-hitting segment of NBC

News "First Tuesday" program describes the seamier aspects of incarceration,

as described by the convicts themselves: rapes, punks, and bad food are

three recurrent themes. THIS CHILD IS RATED X (Martin Carr, 1971): Here,

Edwin Newman delivers a scathing report on the juvenile justice system,

reporting that half the crimes committed by youth (such as running away to

get married) would not have been considered offenses if committed by adults.

While many of the specific issues in the film have been rectified, the

question of police action selectively enforced against those least able to

speak out in their own behalf remains, to a large extent, unaddressed. This

documentary asks whether less draconian measures against non-violent statute

violators may have value, adding a provocative element to the discourse over incarceration that is as vital today as it was thirty years ago. CELL 16 (Martin Duckworth, 1971): At Collins Bay Penitentiary, Kingston, Ontario, we experience convict Peter Madden's bedlam in cinema v*rit*...Cine 16 is held at the Agenda Restaurant and Lounge, 399 South First Street, San Jose, California, and admission is free.

FRIDAY, MAY 18, 2001

5/18

Chicago, Illinois: Chicago Filmmakers

<http://www.chicagofilmmakers.org/>

STAN BRAKHAGE: NEW FILMS

8pm: The legendary Stan Brakhage, who is nearing his 50th year as an experimental filmmaker, is a hard one to keep up with! Tonight's program features five of the dozens of films the ever-prolific Brakhage has made since our last show of his work almost two years ago. Among these is a major new long film, THE GOD OF DAY HAD GONE DOWN UPON HIM (2000), an energetic, powerful, somber, and ultimately majestic portrait of the ocean.

"Miraculously, impossibly GOD OF DAY is like a vision of the ocean as the ocean might see itself, if it had eyes and a sentience capable of assimilating its own complex reality" (Paul Arthur). THE JESUS TRILOGY AND CODA is comprised of four beautiful handpainted films which utilized new step-printing techniques. Made with the assistance of Mary Beth Reed, these four films envision episodes of the New Testament. IN JESUS NAME (2001), THE BABY JESUS (2001), JESUS WEPT (2001), and CHRIST ON CROSS (2001). This event will be held at Columbia College, 600 South Michigan Avenue, Chicago. For more information, call Chicago Filmmakers at (773) 293-1447.

5/18

London, England: The Lux

<http://www.lux.org.uk>

INVISIBLE ADVERSARIES (VALIE EXPORT, 1976)

7pm: Aerial and close-up scenes from one year in the life of Anna, a young photographer living in Vienna. In rendering legible her landscape: headlines, radio news, strangers in the streets and in her home, Anna becomes increasingly convinced the Hyksos, a hostile alien force, are responsible for people's actions and the rising violence around her. This early feature is an excursion into identity splintered by the social and psychological static of the city. With an exclusive, live telephone Q&A with Valie Export from Vienna. This event will be held at the Lux Centre for Film, Video and Digital Arts, 2-4 Hoxton Square, London N1 6NU; for more information, call the Lux Centre at 020 7684 0200.

5/18

New York, New York: Anthology Film Archives

<http://www.anthologyfilmarchives.org/>

METRO PRESENTS: THE NEW YORK STORIES/ANGELIKA FILM FESTIVAL

MetroChannels, a division of Rainbow Media Holdings, and Angelika Entertainment Corporation have created a new film festival dedicated to independent features and shorts made in and about New York. From Friday, May 18, through Sunday, May 20, METRO PRESENTS: THE NEW YORK STORIES/ANGELIKA FILM FESTIVAL will simultaneously present selected shorts, documentaries and features on the Metro Channel and at Anthology Film Archives. Rainbow Media's MetroChannels are the first and only suite of television networks dedicated to the experience of living in the New York metropolitan area. The Film Festival will be presented on Metro, the anchor entertainment channel of MetroChannels' trio of networks, which is seen in more than three million households in the tri-state area. Angelika Entertainment Corporation is a production, distribution and exhibition company headed by Angelika Saleh, who produced such landmark films as STREETWISE and SWEET LORRAINE and co-founded Manhattan's famous Angelika Film Center. Check out the Metro Angelika Website at www.AngelikaFilm.com for Screening Information. Anthology is located at 32 2nd Avenue, New York; for more information, call (212) 505-5181.

5/18

Pittsburgh, Pennsylvania: Andy Warhol Museum

<http://www.usaor.net:80/warhol/>

SCREEN TEST #2

12:30pm: A screening of SCREEN TEST #2 (1965), directed by Andy Warhol. Written by Ronald Tavel. With Mario Montez, Ronald Tavel (offscreen). The Andy Warhol Museum is located at 117 Sandusky Street in Pittsburgh; for more information, call (412) 237-8300.

5/18

Portland, Oregon: Portland Art Museum

http://www.nwfilm.org/exhibition_nowplaying.html

THE 39TH ANNUAL ANN ARBOR FILM FESTIVAL TOUR

8pm: The Film Center is pleased to present the best of the 39TH ANN ARBOR FILM FESTIVAL, one of the oldest and most respected festivals celebrating American and international independent and experimental cinema. From animation to the avant garde, the Ann Arbor Film Festival is the only festival in the nation devoted solely to short works originating in 16mm. This year's winners are still being decided as we go to press, but the tour promises to boast a diverse selection of the celebrated and the unknown. This screening will take place at the Whitsell Theatre of the North West Film Center, SW 9th and Taylor, Portland. For more information, call (503) 221-1156.

5/18

Seattle, Washington: 911 Media Arts Center

<http://www.911media.org/>

ACCESS ORBIT YOUTH SCREENING

8pm: For the first time in television history, youth have created their own Television series distributed via satellite! ACCESS ORBIT provides a forum for young people to express themselves. The series looks at a range of issues that affect young people: family relationships, immigration, police brutality, homelessness, globalization, sex, gang culture, and homophobia. Come to 911 to see what young people from around the country are producing! ACCESS ORBIT is a project of Paper Tiger TV in association with Manhattan Neighborhood Network's Youth Channel, Deep Dish Satellite Network, and Free Speech TV. Each one hour program addresses themes chosen by youth from around the U.S. This event will be held at 911 Media Arts Center, 117 Yale Ave N., Seattle; for more information, call (206) 682-6552.

Cambridge, Massachusetts: Harvard Film Archive

<http://www.harvardfilmarchive.org/index.shtml>

TWO SHORT FILMS BY FREDERIC PARDO AND PIERRE CLEMENTI

7pm: LA REVOLUTION N'EST QU'UN DEBUT: CONTINUOUS (Pierre Cl*menti, 1968):

This recently discovered film by actor/filmmaker Pierre Cl*menti records the tumultuous period leading up to May 1968 and its aftermath. Cl*menti's psychedelic visual style uses filters and superimposed images to create a manifesto for "permanent revolution," "spontaneous creation," and "poetry in the streets." Like the Warhol Factory, Cl*menti and his friends were interested in an expanded notion of art; here we see their band Les Fabuleux Loukoms (later called Les Jeunes rebelles) practicing, together with other activities that form an important document of the period and a portrait of key figures in Zanzibar Films. HOME MOVIE: ON THE SET OF PHILIPPE GARREL'S "LE LIT DE LA VIERGE" (Fr*d*ric Pardo, 1968): Filmmaker Philippe Garrel has always discussed the importance of painting for his cinema and, specifically, the painting of his longtime friend Fr*d*ric Pardo. In this film, Pardo documents the Garrel inner circle in Morocco in 1968 on the set of LE LIT DE LA VIERGE. While the stars of the Garrel film were Pierre Cl*menti and Zouzou, here in Pardo's behind-the-scenes view it is Garrel's peripheral actors who take center stage: Pierre-Richard Br*, Jean-Pierre Kalfon, Babette Lamy, and above all, the luminous Tina Aumont. The Zanzibar equivalent of THE CHELSEA GIRLS, Pardo's home movie is a mystical, life-affirming celebration. LE LIT DE LA VIERGE (Philippe Garrel, 1969): Born in 1948, Philippe Garrel was the wunderkind of French cinema in the 1960s. His fifth feature, LE LIT DE LA VIERGE, is a parable about Jesus set in modern times. Shot in the aftermath of the uprisings of May 1968, the film reverberates with the rebellious spirit of that period. Pierre Cl*menti

plays a Christ reluctant to assume his earthly mission, while the Virgin Mary (Zouzou, doubly cast as Mary Magdalene) attempts to reconcile him with his duty. Garrel invokes the Christian narrative only to reject a strict retelling in a chronicle that is episodic and nonlinear. This screening will take place at the Archive, the Carpenter Center for the Visual Arts, 24 Quincy Street, Cambridge. For more information, call the Archive at (617) 495-4700.

5/19

London, England: The Lux

<http://www.lux.org.uk>

MARINA ABRAMOVIC AND KIRA O'REILLY

8pm: A major selection of early performance works, the famous bow and arrow held in pure tension between Abramovic and Ulay with the arrow directed 3 inches from her heart, and Charles Atlas' SSS of 1989 in which Abramovic reclaims personal history after her extensive collaborations with Ulay.

Featured works will include: ART MUST BE BEAUTIFUL, ARTIST MUST BE BEAUTIFUL; FREEING THE VOICE; RELATION IN SPACE; AAA-AAA; TALKING ABOUT SIMILARITY; ANIMA MUNDI; SSS (Abramovic/Atlas 1989) and WET CUP (Kira O'Reilly, 2000). This event will be held at the Lux Centre for Film, Video and Digital Arts, 2-4 Hoxton Square, London N1 6NU; for more information, call the Lux Centre at 020 7684 0200.

5/19

Minneapolis, Minnesota: Intermedia Arts Center

FLAMING FILM FESTIVAL: PLAYING WITH OURSELVES

9:30pm: Curator and filmmaker Maëa Cybelle Carpenter brings her lesbian and trans showcase of sexexplicit video work, exploring the boundaries of sexual fantasy and moving beyond the categories of "porn" and "erotica." Featuring works by: Teri Rice, Kat Pankam, Tobaron Waxman, Liz Miller, Dale Bogucki, Liz Miller, Stacey Goldate, Tejal Shah and others. Some of the video-makers will be in attendance. This event will take place at the Intermedia Arts Center, 2822 Lyndale Avenue South in Minneapolis; for more information, e-mail oleyebrow@technodyke.com or call (612) 871-4444.

5/19

New York, New York: Millennium Film Workshop

<http://www.millenniumfilm.org/>

GIMME A KISS BY LILLY RIVLIN

GIMME A KISS (2000): Parents, the things you know, the things you don't know and the things you find out. After the filmmaker's parents celebrate their 50th anniversary, she documents the discovery of her father's incessant womanizing and her mother's stoic grace, a troubling investigation of family secretsÉ Who of us really ever knows our parents? asks the filmmaker. Against the backdrop of her aging parents (Ben and Bella) as they lie next

to each other in adjoining hospital beds, like two Beckett characters, immobilized by sickness, she seeks to make sense of her parents' marriage. She explores her father's contradictory personality, his relationship to his family and his infidelities. In searching for answers, she reveals the multiple layers of the human condition as she weaves her brother, sister, aunts, her mother's best friend, and, one of her father's lovers into the story. In the end, it is her father who is her mother's chief caretaker, keeping her alive, and giving her the attention she always wanted. And in the process of documenting this story over years, the filmmaker has the conversation she never had with her father: about unfaithfulness, life, death and the meaning of love. This event will take place at Millennium Film Workshop, 66 East 4th Street, New York City. For more information, call (212) 673-0090.

5/19

Pittsburgh, Pennsylvania: Andy Warhol Museum

<http://www.usaor.net:80/warhol/>

MORE MILK YVETTE AND SCREEN TEST #2

12:30pm: A screening of MORE MILK YVETTE (1965), directed by Andy Warhol. With Mario Montez, Paul Caruso, Richard Schmidt. 3pm: A screening of SCREEN TEST #2 (1965), directed by Andy Warhol. Written by Ronald Tavel. With Mario Montez, Ronald Tavel (offscreen). The Andy Warhol Museum is located at 117 Sandusky Street in Pittsburgh; for more information, call (412) 237-8300.

5/19

Portland, Oregon: Portland Art Museum

http://www.nwfilm.org/exhibition_nowplaying.html

ON AND OFF THE RES' WITH CHARLIE HILL (SANDY OSAWA, 2000)

7:30pm: Tonight we welcome Seattle filmmaker Sandy Osawa (PEPPER'S POW WOW, LIGHTING THE 7TH FIRE, IN THE HEART OF BIG MOUNTAIN) for a screening of her wonderful new portrait of America's foremost Native American comedian. Charlie Hill, an Oneida from Wisconsin, has used his piercing satirical humor to debunk stereotypes of Native Americans and offer wry and insightful commentary on America's history of racism and oppression of minorities. Drawing on a range of influences, from Sioux author and scholar Vine Deloria, Jr., and Native American humorist Will Rogers, to comedian Richard Pryor, Hill's art is testament to the power of humor to inspire thought as well as laughter. This screening will take place at the Guild Theatre of the North West Film Center, SW 9th and Taylor, Portland. For more information, call (503) 221-1156.

5/19

Portland, Oregon: Portland Art Museum

http://www.nwfilm.org/exhibition_nowplaying.html

THE 39TH ANNUAL ANN ARBOR FILM FESTIVAL TOUR

8pm: The Film Center is pleased to present the best of the 39TH ANN ARBOR FILM FESTIVAL, one of the oldest and most respected festivals celebrating American and international independent and experimental cinema. For more details, see May 18.

San Francisco, California: Other Cinema

<http://www.othercinema.com/>

“aARK EMERGENCY BENEFIT

8:30pm: In case you haven't heard, “aark is a cell of mischievous media artists with bold graphics and aggressive wit, who have launched a steady stream of scathingly critical initiatives against the corporate take-over of the democratic process, not to mention everyday life. During the Fall 2000 elections, “aark agent James Baumgartner was sued by the Chicago Board of Elections for his satirical voteauction.com website. Though the ACLU has agreed to defend him, James has already racked up a \$10,000 legal debt. Here's a friggin' raft of prank videos, plus a half-hour set of Negativland music videos-towards his free speech defense. This event will take place at Artists' Television Access, 992 Valencia, San Francisco; for more information, call (415) 824-3890.

5/19

Shreveport, Louisiana: Mini-Cine

<http://www.swampland.org/>

MADCAT

7pm: Minicine Visiting Filmmaker Series host Ariella Ben-Dov of San Francisco to screen The MadCat International Women's Film Festival. Doors open at 7pm for art by Michael Moore, The Double Barrel Project, and the Girly-Girl and Manly-Man Art Show; films roll at 8:30pm. This event will take place at 710 Texas Street (formerly Ivan Smith Furniture) in Shreveport; for more information, write Mini-Cine at minicine@swampland.org.

Let us know about your alternative film/video event!

Send your event announcements and subscription requests to Craig Fischer at fischercj@conrad.appstate.edu.

Brookline, Massachusetts. For more information, call (617) 734-2500.

5/17

Cambridge, Massachusetts: Harvard Film Archive

<http://www.harvardfilmarchive.org/index.shtml>

AN EVENING WITH WENDY CLARK

7pm: Wendy Clarke has made a career out of creating contexts for other people (particularly disenfranchised individuals such as teens and prison inmates) to access the tools and resources of video and other new forms of communications technology. Grasping the therapeutic potential of television after making her own video diary in the early 1970s, media artist and educator Clarke has spent the past two decades exploring video as a forum for personal expression. First came her legendary LOVE TAPES, a series begun in the late 1970s in which people spoke extemporaneously on camera about love, videotaping themselves in a special booth. Clarke then spent six years as an artist-in-residence in the California prison system, working with HIV-positive inmates on a series of media collaborations that led to her REMEMBRANCE project. The stories in REMEMBRANCE, like those from THE LOVE TAPES a decade earlier, range from personal tragedy and deep sadness to humorous attempts at coping. Collectively, the tapes serve as both a forum for contemporary discussion (and healing) and as a historic record of these times. Tonight's program will include ONE ON ONE: KEN AND LOUISE and THE LOVE TAPES (Volume One). This screening will take place at the Archive, the Carpenter Center for the Visual Arts, 24 Quincy Street, Cambridge. For more information, call the Archive at (617) 495-4700.

5/17

London, England: The Lux

<http://www.lux.org.uk>

KURT KREN

7pm: "With thirty-one 16mm works to date, Kren's historical role in Europe is comparable to that of Brakhage in America, as is the way in which each historically represent some aspect of the transition from the existential to the structural in their work" (Malcolm LeGrice, STUDIO INTERNATIONAL Nov/Dec 1975). The programme will be divided into 3 parts, showing 21 of Kren's films chronologically (1957-1969), including the masterpiece 15/67 T.V. and 9/64 O TANNENBAUM-MATERIALAKTION OTTO MUHL. This event will be held at the Lux Centre for Film, Video and Digital Arts, 2-4 Hoxton Square, London N1 6NU; for more information, call the Lux Centre at 020 7684 0200.

25TH ANNIVERSARY SILVER JUBILEE

8pm: Music: Local Jazz Legend BJ Papa. Live Sets: DJ Moody Eva; DJ Cameron. And a program from the stage featuring special guests and a FAF 25th Anniversary Film by Frazer Bradshaw and Dan Weir. And in conjunction with the San Francisco Cinematheque, two programs: 7:30pm: ALL IN THE FAMILY, films that address, with humor, love or dismay, the institution which in some way forms us all, including Curt McDowell's A VISIT TO INDIANA, Chuck Hudina's PARENTS' VISIT, Barbara Hammer's OPTIC NERVE, Jay Rosenblatt's SHORT OF BREATH, Ted White's THE PASSION OF GOOSE-EGG TUFFY and Daven Gee's RISING. 9:30pm: INNER AND OUTER SPACES, films of physical or emotional landscapes, often marked by the psyches of their makers, including Tim Blaskovich's INTRO, Michael Rudnick's PANORAMA, Scott Bartlett's METANOMEN, William Farley's SEA SPACE, Toney Merritt's LONESOME COWBOY, Dean Snider's ISH AND VINNY, Sal Giammona's WALLS IN THE WOODS, Elise Hurwitz' I RAISE MY ARM, Mark Taylor's HE WOULD HAVE LOVED ME TO DEATH, Danny Plotnick's DRUNK #9 DRAMAMINE #5 or ANGEL AND GENO'S WEDDING, and Christian Bruno and Natalija Vekic's DIGGINS. Complimentary drinks, desserts and hors d'oeuvres will be served. This event will take place at the Yerba Buena Center for the Arts, 701 Mission Street, San Francisco; for more information, call the Film Arts Foundation at (415) 552-8760.

5/17

San Jose, California: Cine16

<http://www.cine16.com/>

VOICE OF THE CONVICT

The United States does a better job of putting people in prison than any other western nation. Tonight's films are over thirty years old, but are they irrelevant? Since they were made, the U.S. prison system has grown tenfold, and now 2 million of our citizens are behind bars in any given day. These films not only offer a broad perspective on life behind bars, but provide an insight as to some of the historical reasons we are where we are today. VOICES INSIDE (Tom Pettit, 1969): This hard-hitting segment of NBC News "First Tuesday" program describes the seamier aspects of incarceration, as described by the convicts themselves: rapes, punks, and bad food are three recurrent themes. THIS CHILD IS RATED X (Martin Carr, 1971): Here, Edwin Newman delivers a scathing report on the juvenile justice system, reporting that half the crimes committed by youth (such as running away to get married) would not have been considered offenses if committed by adults. While many of the specific issues in the film have been rectified, the question of police action selectively enforced against those least able to speak out in their own behalf remains, to a large extent, unaddressed. This documentary asks whether less draconian measures against non-violent statute violators may have value, adding a provocative element to the discourse over incarceration that is as vital today as it was thirty years ago. CELL 16 (Martin Duckworth, 1971): At Collins Bay Penitentiary, Kingston, Ontario, we experience convict Peter Madden's bedlam in cinema v*rit*...Cine 16 is held at the Agenda Restaurant and Lounge, 399 South First Street, San Jose, California, and admission is free.

FRIDAY, MAY 18, 2001

5/18

Chicago, Illinois: Chicago Filmmakers

<http://www.chicagofilmmakers.org/>

STAN BRAKHAGE: NEW FILMS

8pm: The legendary Stan Brakhage, who is nearing his 50th year as an experimental filmmaker, is a hard one to keep up with! Tonight's program features five of the dozens of films the ever-prolific Brakhage has made since our last show of his work almost two years ago. Among these is a major new long film, THE GOD OF DAY HAD GONE DOWN UPON HIM (2000), an energetic, powerful, somber, and ultimately majestic portrait of the ocean.

"Miraculously, impossibly GOD OF DAY is like a vision of the ocean as the ocean might see itself, if it had eyes and a sentience capable of assimilating its own complex reality" (Paul Arthur). THE JESUS TRILOGY AND CODA is comprised of four beautiful handpainted films which utilized new step-printing techniques. Made with the assistance of Mary Beth Reed, these four films envision episodes of the New Testament. IN JESUS NAME (2001), THE BABY JESUS (2001), JESUS WEPT (2001), and CHRIST ON CROSS (2001). This event will be held at Columbia College, 600 South Michigan Avenue, Chicago. For more information, call Chicago Filmmakers at (773) 293-1447.

5/18

London, England: The Lux

<http://www.lux.org.uk>

INVISIBLE ADVERSARIES (VALIE EXPORT, 1976)

7pm: Aerial and close-up scenes from one year in the life of Anna, a young photographer living in Vienna. In rendering legible her landscape: headlines, radio news, strangers in the streets and in her home, Anna becomes increasingly convinced the Hyksos, a hostile alien force, are responsible for people's actions and the rising violence around her. This early feature is an excursion into identity splintered by the social and psychological static of the city. With an exclusive, live telephone Q&A with Valie Export from Vienna. This event will be held at the Lux Centre for Film, Video and Digital Arts, 2-4 Hoxton Square, London N1 6NU; for more information, call the Lux Centre at 020 7684 0200.

5/18

New York, New York: Anthology Film Archives

METRO PRESENTS: THE NEW YORK STORIES/ANGELIKA FILM FESTIVAL

MetroChannels, a division of Rainbow Media Holdings, and Angelika Entertainment Corporation have created a new film festival dedicated to independent features and shorts made in and about New York. From Friday, May 18, through Sunday, May 20, METRO PRESENTS: THE NEW YORK STORIES/ANGELIKA FILM FESTIVAL will simultaneously present selected shorts, documentaries and features on the Metro Channel and at Anthology Film Archives. Rainbow Media's MetroChannels are the first and only suite of television networks dedicated to the experience of living in the New York metropolitan area. The Film Festival will be presented on Metro, the anchor entertainment channel of MetroChannels' trio of networks, which is seen in more than three million households in the tri-state area. Angelika Entertainment Corporation is a production, distribution and exhibition company headed by Angelika Saleh, who produced such landmark films as STREETWISE and SWEET LORRAINE and co-founded Manhattan's famous Angelika Film Center. Check out the Metro Angelika Website at www.AngelikaFilm.com for Screening Information. Anthology is located at 32 2nd Avenue, New York; for more information, call (212) 505-5181.

7:30pm: Tonight we welcome Seattle filmmaker Sandy Osawa (PEPPER'S POW WOW, LIGHTING THE 7TH FIRE, IN THE HEART OF BIG MOUNTAIN) for a screening of her

wonderful new portrait of America's foremost Native American comedian. Charlie Hill, an Oneida from Wisconsin, has used his piercing satirical humor to debunk stereotypes of Native Americans and offer wry and insightful commentary on America's history of racism and oppression of minorities. Drawing on a range of influences, from Sioux author and scholar Vine Deloria, Jr., and Native American humorist Will Rogers, to comedian Richard Pryor, Hill's art is testament to the power of humor to inspire thought as well as laughter. This screening will take place at the Guild Theatre of the North West Film Center, SW 9th and Taylor, Portland. For more information, call (503) 221-1156.

5/19

Portland, Oregon: Portland Art Museum

http://www.nwfilm.org/exhibition_nowplaying.html

THE 39TH ANNUAL ANN ARBOR FILM FESTIVAL TOUR

8pm: The Film Center is pleased to present the best of the 39TH ANN ARBOR FILM FESTIVAL, one of the oldest and most respected festivals celebrating American and international independent and experimental cinema. For more details, see May 18.

5/19

San Francisco, California: Other Cinema

<http://www.othercinema.com/>

“aARK EMERGENCY BENEFIT

8:30pm: In case you haven't heard, “aark is a cell of mischievous media artists with bold graphics and aggressive wit, who have launched a steady stream of scathingly critical initiatives against the corporate take-over of the democratic process, not to mention everyday life. During the Fall 2000 elections, “aark agent James Baumgartner was sued by the Chicago Board of Elections for his satirical **voteauction**.com website. Though the ACLU has agreed to defend him, James has already racked up a \$10,000 legal debt. Here's a friggin' raft of prank videos, plus a half-hour set of Negativland music videos-towards his free speech defense. This event will take place at Artists' Television Access, 992 Valencia, San Francisco; for more information, call (415) 824-3890.

5/19

Shreveport, Louisiana: Mini-Cine

<http://www.swampland.org/>

MADCAT

7pm: Minicine Visiting Filmmaker Series host Ariella Ben-Dov of San Francisco to screen The MadCat International Women's Film Festival. Doors open at 7pm for art by Michael Moore, The Double Barrel Project, and the Girly-Girl and Manly-Man Art Show; films roll at 8:30pm. This event will take place at 710 Texas Street (formerly Ivan Smith Furniture) in

Shreveport; for more information, write Mini-Cine at minicine@swampland.org.

Let us know about your alternative film/video event!

Send your event announcements and subscription requests to Craig Fischer at fischerj@conrad.appstate.edu.

For info on FrameWorks, contact Pip Chodorov at [<PipChod@aol.com>](mailto:PipChod@aol.com).

Stimmenkauf

[[Wahlrechtslexikon](#)]

Stimmenkauf

In Deutschland ist es weder erlaubt Stimmen für die Bundestagswahl zu kaufen, bzw. zu verkaufen oder zum Verkauf anzubieten. Selbst der Versuch ist strafbar.

Das [Strafgesetzbuch \(§§ 108b, 108c\)](#) sieht dafür Freiheitsstrafen von **mindestens sechs Monaten** bis zu fünf Jahren oder Geldstrafen vor.

Unter diese Regelungen dürften damit auch alle Versuche fallen, über Auktionsplattformen wie [Ebay](#), Wählerstimmen oder Briefwahlunterlagen zu versteigern oder ersteigern.

Vor der Bundestagswahl 2002 wurden einige Ermittlungsverfahren wegen [Wahlstimmenverkaufs](#) eingeleitet.

Bei der amerikanischen Präsidentschaftswahl 2000 sind Stimmenverkäufer wie [Voteauction.com](#) unangenehm aufgefallen.

Links

freedom of statement

Buying of votes

[[right to vote encyclopedia](#)]

Buying of votes

In Germany is it neither permits voices for the election to the Bundestag to buy to sell and/or offer for the sales. Even the attempt is punishable.

[The penal code \(§ § 108b, 108c\)](#) plans duration imprisonments from **at least six months** to five years or fines.

Under these regulations thereby also all attempts might fall, over auction platforms such as [Ebay](#), votes or letter choice documents to auctions or ersteigern.

Before the election to the Bundestag 2002 some preliminary investigations were introduced [because of](#) vote sales.

With the American Praesidenschaftswahl 2000 voice salesmen were noticeable [such as](#) Voteauction.com unpleasantly.

Injunction generator

From Wikipedia, the free encyclopedia.

The Injunction Generator ^[1] (*http://ipnic.org*) is a artistic software module which claims to generate on request legal injunctions and personalized documentation in .rtf/.pdf format to force a site into taking its contents offline.

Carrying on with their principles of 'radical corporative marketing strategy' ([Media Hacking](#)), the artists group [ubermorgen](#) has produced an effective and credible interface which helps creating one's own documented cease-and-desist request, which is also automatically sent to the DNS administrators, to the site's owner and to some journalists to trick them into supporting the 'public trial'.

The project is published on the IP-NIC domain ipnic.org ^[2] (*http://ipnic.org*), an acronym which mimics the official protocols (Internet Protocol - Network Information Center), revisited as 'Internet Partnership for No Internet Content'.

This sarcastic provocation (a 'public shutdown service') was conceived after experiencing a similar mishap for the **Voteauction**, which invited American citizens to put up their vote for auction. At the time (2000) an email injunction by an American court was sent to the swiss provider hosting the site, who took them immediately offline even though email documents aren't legally considered official and even though Swiss is outside of American jurisdiction.

DIE ZEIT – "Ein weiter Weg"

DIE ZEIT

17/2001

"Ein weiter Weg"

Mit internationalen Abkommen will der Internet-Jurist Henry H. Perritt globalen Glückssrittern beikommen

Die Fragen stellte Thomas Fischermann

DIE ZEIT: Die Aufsicht der Nationalstaaten über Internet-Geschäfte funktioniert immer weniger. Zollbeamte können Bits und Bytes nicht an der Grenze abfangen, und jetzt entstehen Computerfirmen sogar auf fernen Inseln. Ein Grund zur Sorge?

HENRY H. PERRITT: Die nationalstaatlichen Institutionen fürchten, dass Unternehmen aus dem Wirkungsbereich von Gesetzen verschwinden, die zum Schutz der Bürger gemacht wurden. Dotcom-Unternehmer sollen aber auch nicht von Gerichten und Behörden in aller Welt geknebelt werden. Ich glaube, dass wir uns weltweit darüber verständigen müssen, wie das Internet zu regulieren ist.

ZEIT: Die Staaten der Welt ziehen an einem Strang? Das wäre überraschend.

PERRITT: Einige Gerichtsbeschlüsse zeigen, dass sich überall bestimmte Prinzipien für den Umgang mit dem Internet herauszubilden scheinen. Im Idealfall wird es auf eine Mischung aus verbindlichen staatlichen Grundregeln und einer privaten Selbstaufsicht hinauslaufen. Es gibt auch Debatten über vereinheitlichte nationalstaatliche Regeln in aller Welt, etwa bei der Haager Konferenz für internationales Privatrecht oder der EU-Kommission. Das ist noch ein weiter Weg.

ZEIT: Bis dahin herrscht fröhliche Anarchie, sobald die Unternehmer Grenzen überschreiten?

PERRITT: So schlimm ist es gar nicht. Wir hatten in Chicago einen Fall, bei dem die Wahlbehörden erfolgreich eine Internet-Site verklagt haben, auf der die Leute Stimmen zur Präsidentschaftswahl kaufen und verkaufen konnten. Der Anbieter saß in Österreich, wir konnten den Gerichtsbeschluss also nicht einfach vollstrecken. Aber jede Website braucht eine Adresse, einen so genannten Domain-Namen – in diesem Fall www.voteauction.com –, und der wird von einem Unternehmen vergeben. Das saß in Pennsylvania. Also hat der zuständige Richter den Betreiber in Pennsylvania angewiesen, den Domain-Namen zurückzuziehen, und plötzlich fand sich unter jener Internet-Adresse nichts mehr.

ZEIT: Dann hat sich der Betreiber dieser Website wohl einen anderen Namen besorgt?

PERRITT: So war es. Er nannte sich fortan www.vote-auction.com und hat diesen Namen in der Schweiz registrieren lassen. Wir haben daraufhin Kontakt mit dem schweizerischen Unternehmen aufgenommen, das diesen Domain-Namen vergibt, und wir haben so argumentiert: Okay, es wird wohl lange dauern, bis wir einen Gerichtsbeschluss aus Illinois durch die schweizerischen Instanzen bringen. Aber Ihre eigenen Geschäftsbedingungen verbieten illegale Aktivitäten auf Ihren Websites. Bei uns hat ein Richter entschieden, dass dieses Angebot illegal ist – wollen Sie die Website nicht abstellen? Die Schweizer hielten das für eine gute Idee.

ZEIT: Solche Erfahrungen treiben Internet-Anbieter auf Inseln oder in ferne Länder.

PERRITT: Man braucht für eine Website immer noch einen Domain-Namen, und der muss registriert sein. Die meisten Computer dafür stehen in den Vereinigten Staaten oder zumindest in anderen respektabel regierten Ländern.

ZEIT: Die Rolle der Vereinigten Staaten passt vielen Ländern nicht ...

PERRITT: ... wir können ruhig offen von US-Hegemonie oder Dominanz sprechen ...

ZEIT: ... und diese Ablehnung könnte die Kontrolle auf Dauer infrage stellen. Die Chinesen haben dagegen protestiert, dass ihr System für die Verwaltung von Domain-Namen von Amerika aus gelenkt werden soll.

PERRITT: Wenn jeder seine eigenen Domain-Namen festlegen könnte, würden wir das Internet balkanisieren. Dann könnte bald auch jeder Betrüger sein eigenes System haben.

ZEIT: Programmierer, Hacker, "Cypherpunks" arbeiten bereits an so etwas – und auch an virtuellen Netzen, in denen man keine Domain-Namen mehr braucht. Beunruhigt Sie das nicht?

PERRITT: Ja, wenn man seine Kommunikation im Internet verschlüsselt, können die Behörden nicht mehr wissen, was da passiert. Man kann aber nicht alles verschlüsseln. Wenn man eine Website betreiben will, die etwas kauft oder verkauft, müssen die Kunden sie ja finden können; sie muss also öffentlich sein. Und selbst wenn man anonyme Korrespondenz mit Geschäftspartnern führt, werden diese Daten immer noch auf einem Computer gespeichert. In den meisten Ländern kann man einen Durchsuchungsbefehl bekommen, um diesen Computer zu beschlagnahmen.

ZEIT: Aber das ist genau der Grund, warum jetzt "Datenparadiese" in Mode kommen.

PERRITT: Ja, aber wer will dort auf Dauer leben? Natürlich werden Betrüger sich stets vor den Behörden zu verstecken versuchen. Das heißt aber nicht, dass sie vom Erdboden verschwinden. Terroristen müssen Bomben legen, Geldwäscher und Steuersünder müssen an irgendeinem Punkt auch mit "richtigem" Geld hantieren. Deshalb sind die traditionellen Waffen der Behörden nicht stumpf geworden.

Des "votes" en vente aux enchères sur le web ?

Un homme d'affaire autrichien a décidé de lancer **un site de vente aux enchères avec comme principe "tout est permis"**.

Selon le journal "Wired" du 6/9/2000, Hans Bernard (il n'y a pas de majuscules, ce n'est pas un oubli!) a installé les ordinateurs de son site (voteauction.com) en Bulgarie et déclare "Je me fiche de la loi. A l'avenir, tout sera à vendre et tout sera vendu aux enchères sur Internet".

Ca a le mérite d'être clair, côté stratégie...

Il a ensuite prétendu que 376 électeurs américains (ou la vente de votes est évidemment interdite) lui ont déjà "vendu" leur voix pour la somme minimale de 34,56\$ et que son site serait opérationnel pour toutes les élections à venir en Europe!

Avec en plus une vente d'organes, y aura-t-il des promos ?

Adapté du Canard Enchaîné du 13/9/2000

"votes" on sale with the biddings on the Web?

An Austrian businessman A to decide to launch a site of auction sale with as principle "all is allowed".

According to the newspaper "Wired" of the 6/9/2000, hans Bernard (there are no capital letters, it is not a lapse of memory!) installed the computers of its site (voteauction.com) in Bulgaria and declares "I card-index myself law. In the future, all will be to sell and all will be sold with the biddings on Internet".

Ca has the merit to be clear, side strategy...

It then claimed that 376 American voters (or the sale of votes is cavity prohibited) already "sold to him" their voice for the minimal sum of 34,56\$ and that its site would be operational for all the elections to come to Europe!

With in more will one sale of bodies, be there promos?

Adapted Enchainé Duck of the 13/9/2000

ARGENTINA: DENUNCIAN A UN ALTO FUNCIONARIO CORDOBÉS SUPUESTO TRÁFICO DE INFLUENCIAS

Un alto funcionario del gobernador José Manuel de la Sota quedó seriamente comprometido y puso en jaque la imagen del gobierno por una denuncia sobre un supuesto tráfico de influencias en favor de una empresa constructora de la que formó parte, la cual habría estafado en unos 180.000 pesos a los habitantes de una pequeña localidad del interior provincial. El caso, puesto al descubierto por el programa televisivo "Telenoche investiga", involucra al contador Jorge Eduardo Acosta, secretario de Finanzas, y a la firma Giacomo, acusada de haber emitido alrededor de 150 cheques sin fondos de una cuenta del Banco de Córdoba. Resultaron perjudicados con esos valores incobrables los habitantes de la localidad de Alto Alegre, ubicada en el departamento Unión y en las proximidades de Villa María, donde la empresa tenía a su cargo la construcción de la ruta hacia la vecina población de Cintra. La obra le fue adjudicada durante la gestión del gobernador anterior, el radical Ramón Mestre. Acosta, que era apoderado de la empresa mientras se desempeñaba en el Tribunal de la provincia, fue acusado de haber intervenido para que el banco no le cerrara la cuenta a la constructora, hecho que finalmente ocurrió el 15 de diciembre del año último. Incluso, el banco inhabilitó por 15 días la firma de Acosta. El interventor en la entidad bancaria, Fabián Maidana, aclaró que no se pagaron cheques en descubierto y aseguró que no se violaron disposiciones del Banco Central. En su defensa, el funcionario aclaró que en 1995 se desvinculó de la empresa -exhibió como prueba un acta notarial fechada el 29 de diciembre de 1995- y que desde entonces no firmó más documentos ni cheques, por lo cual desconoció lo ocurrido con posterioridad. Además, negó haber ejercido influencias sobre el Banco de Córdoba para ordenar algún beneficio. Apenas regresado de un viaje de descanso por Brasil, el gobernador se encontró con este problema y dijo que, en caso de haber irregularidades, las deberá investigar la Justicia. En el caso del Banco de Córdoba, indicó que "si hay algún funcionario que haya violado las responsabilidades que le corresponden, debe tener las sanciones correspondientes". El ministro de Finanzas, José María las Heras, respaldó a su colaborador, aunque trascendió que en el seno del gobierno se analiza el futuro del funcionario denunciado. La Nación 18

de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: DOS EX-MINISTROS ACUSADOS EN TRAFICO DE ARMAS

Dos exministros y un antiguo vice-ministro del gobierno del presidente Carlos Menem fueron acusados de formar parte de una red de venta ilegal de armas. El exministro de Relaciones Exteriores, Guido Di Tella, y el que fue ministro de Defensa, Ermán González, se encuentran bajo sospecha de haber vendido armas a Ecuador y Croacia, cuando ambos países sufrían embargos internacionales. Según informaciones hechas públicas el viernes, al antiguo vice-ministro de Exteriores con Di Tella, Juan Carlos Olima, también se le acusa de estar involucrado en el caso. El fiscal los acusa de 'haber firmado documentos que sabían que eran falsos' y 'haber negligido su deber público'. Los tres acusados formaron parte del gobierno de Carlos Menem, sobre el cual siempre pesaron dudas sobre presuntos casos de corrupción. Una de las acusaciones más graves sería que el gobierno había conspirado para vender armas a Croacia -que se encontraba bajo un embargo de Naciones Unidas a causa del conflicto en los Balcanes. Otras armas fueron supuestamente encontradas cuando eran transportadas a Ecuador, que había estado en guerra contra Perú en 1995. El gobierno de Argentina en aquel momento negó todas las acusaciones asegurando que las armas tenían otras destinaciones y que luego fueron desviadas hacia Croacia y Ecuador. Analistas aseguran que detrás de las nuevas investigaciones judiciales se encuentra la voluntad del nuevo presidente Fernando de la Rúa de erradicar la corrupción de la administración pública. Incluso clarificando escándalos de los gobiernos anteriores. BBC News, August 19, 2000 <http://www.bbc.co.uk/spanish/news000819argentina.shtml>

ARGENTINA: EL PRESIDENTE ARGENTINO RESPALDÓ A SU GABINETE ANTE LAS DENUNCIAS DE CORRUPCIÓN

El presidente argentino, Fernando de la Rúa, ratificó este martes su confianza en todo el gabinete ministerial ante denuncias de corrupción. El mandatario solicitó a los ministros que colaboren con todas las investigaciones sobre las denuncias de sobornos en el Senado para aprobar la reforma laboral, el pasado mes de mayo. Entretanto, las dos ramas de la principal central obrera argentina: la Confederación General del Trabajo, CGT, dividida en oficial y rebelde, pidieron la derogación de la ley de Reforma Laboral, si se comprueban las denuncias de que la oposición en el Senado fue sobornada para aprobar esa norma en mayo pasado. La nueva ley laboral amplía el período de prueba de los trabajadores, fomenta la renovación de los convenios colectivos de trabajo y favorece la reducción de los aportes patronales a las empresas que tomen nuevos empleados. A pesar de la nueva ley, más de cuatro millones de argentinos tienen actualmente problemas para conseguir trabajo. Radio Nederland, Holanda, 23 de Agosto de 2000 <http://www.rnw.nl/>

ARGENTINA: EN CASO DE PRESUNTO PAGO DE SOBORNO EN EL SENADO, PRESENTARON SEIS DENUNCIAS Y LA JUSTICIA YA INVESTIGA

En el marco de la investigación por el presunto pago de sobornos para aprobar la ley de reforma laboral, ayer se realizaron seis denuncias en los tribunales federales de Comodoro Py. Las presentaciones fueron hechas por los abogados Marcelo Parrilli, Ricardo Monner Sans, Juan Carlos Iglesias, Eduardo Barcesat, el diputado frepasista Jorge Giles, y el legislador cavallista Guillermo Francos. Pese a que todas las denuncias cayeron por sorteo en distintos juzgados, la Cámara Federal unificará la investigación en el magistrado que fue sorteado en primer lugar. Ayer, en fuentes judiciales se aseguraba que la causa quedará en manos del juez federal Carlos Liporaci. Los denunciadores coincidieron en solicitar la convocatoria del presidente Fernando de la Rúa y en enmarcar la conducta que se les atribuye a los senadores en la figura de cohecho. Parrilli pidió

además que se interrogue al vicepresidente Carlos "Chacho" Alvarez, al jefe de Gabinete Rodolfo Terragno, al ministro de Trabajo Alberto Flamarique y a los senadores justicialistas Jorge Yoma y Antonio Cafiero. Monner Sans aportó como evidencia el anónimo que detalla la supuesta maniobra que se siguió para repartir las coimas. Mientras que Iglesias señaló que de comprobarse el pago de coimas las instituciones nacionales se asemejarían a "inodoros políticos". Otros denunciantes solicitaron también la declaración testimonial del líder de la Confederación General de Trabajadores (CGT) disidente, el camionero Hugo Moyano, quien meses atrás formuló acusaciones sobre la circulación de dinero sucio en el tratamiento de la nueva ley laboral. "Estamos frente a la crisis institucional más grave desde la reanudación de la vida democrática", opinó Francos. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: EN ESCÁNDALO DE SOBORNOS EN EL SENADO, EL GOBIERNO BUSCA PASAR A LA OFENSIVA

Fernando de la Rúa retomó ayer la iniciativa frente a la denuncia de posibles sobornos en el Senado para aprobar el proyecto oficial de reforma laboral, y después de solidarizarse con sus ministros, los invitó a presentarse ante la Oficina Anticorrupción (OA). La otra parte de la ofensiva oficial quedó en manos del vicepresidente, Carlos "Chacho" Alvarez, quien anoche anunció que hoy presentará una denuncia ante la Justicia solicitando que se investigue el presunto pago de sobornos. Mientras los abogados terminaban el escrito, Chacho Alvarez discutía con sus colaboradores si será él quien se presente hoy ante los Tribunales o si radicará la denuncia mediante alguno de los letrados. La invitación presidencial a sus ministros para concurrir a la Oficina Anticorrupción se produjo durante la reunión de gabinete de ayer, y la primera consecuencia fue que el jefe de la SIDE, Fernando de Santibañes, y el ministro de Trabajo, Alberto Flamarique, se pusieron a disposición del organismo. Es la primera vez que el Presidente de la Nación asume la necesidad de investigar el tema fuera del Senado. Con este paso, De la Rúa retomó un protagonismo propio en un intento por evitar pagar mayores costos políticos por este caso. Durante la semana pasada, mientras desde la Casa Rosada se esforzaban por bajar la tensión en torno al presunto caso de sobornos, la ofensiva había quedado en manos de Alvarez, quien presionó para promover la investigación. De la Rúa cambió así radicalmente su estrategia luego de percibir el impacto creciente de la denuncia, según la cual algún miembro del oficialismo habría pagado con sobornos el voto de algunos senadores, sobre todo del Partido Justicialista, para poder aprobar la reforma laboral. El monto y destino de los presuntos sobornos varía de acuerdo con los rumores: distintas fuentes mencionaron sumas de entre dos y cinco millones de dólares. Algunos sostienen que la suma habría ido dirigida hacia el bloque justicialista, mientras que otros afirman que también habría llegado hasta el bloque radical. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: EN INVESTIGACIÓN DE SOBORNOS EN EL SENADO. LA SECRETARIA DE INTELIGENCIA DEL ESTADO DARÁ A CONOCER SUS CUENTAS

La Secretaría de Inteligencia del Estado (SIDE), presentará hoy ante la Oficina Anticorrupción un detalle sobre el movimiento de sus fondos desde el comienzo de la administración de Fernando de Santibañes. La decisión de la SIDE de abrir sus cuentas responde a un pedido del titular de ese organismo, José Massoni, en el marco de la investigación sobre el presunto pago de coimas en el Senado durante el tratamiento de la ley laboral. El informe incluye el manejo de los aproximadamente 2 millones de pesos mensuales, que dispone la Secretaría en concepto de gastos reservados, que no requieren rendición. Hay una fuerte sospecha --alentada por el vicepresidente, Chacho Alvarez-- de que parte de esos fondos fueron usados para pagar el voto de senadores del

Partido Justicialista --e incluso algunos de la Alianza-- para sacar la ley laboral. El detalle de la SIDE ocupa diez carillas en las que se intentaría demostrar que no hubo, en los meses que llevó el tratamiento de la ley, en los anteriores y en los que siguieron a su sanción, gastos que pudieran comprometer a la Secretaría. Fernando de la Rúa reclamó que todos sus hombres se pongan a disposición de la Oficina Anticorrupción, o donde se los requiera, para despejar sospechas sobre el papel del Gobierno en el escándalo. La tensión natural entre los principales referentes de un gobierno --más tratándose de una coalición de gobierno-- amenaza ahora con fragmentar algunas decisiones, al menos en relación a este escándalo. Por ahora a la de la Oficina Anticorrupción, que investiga desde la semana pasada el escándalo, se suman otras. Los dos bloques mayoritarios del Senado --el del PJ y el de la Alianza-- decidieron trasladar la investigación al procurador Nicolás Becerra. La Procuración inició una investigación --que quedó en manos del fiscal Eduardo Taiano-- sobre el trámite que precedió a la sanción de la ley. El Clarín, 24 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: JUEZ DECIDIRÁ SI PROCESAN A EX SECRETARIA DE RECURSOS NATURALES POR ENRIQUECIMIENTO ILÍCITO

El juez federal Juan José Galeano decidirá en los próximos días la situación procesal de la ex secretaria de Recursos Naturales María Julia Alsogaray en la causa en que se investiga si se enriqueció en forma ilícita durante el gobierno del ex presidente Carlos Menem. Fuentes oficiales consultadas por Clarín dijeron que el plazo de Galeano para decidir si la procesa, sobresee o dicta la falta de mérito se vence mañana, pero no descartaron que el juez prorrogue el tema hasta principios de la semana próxima. El juez Galeano tiene que decidir si las declaraciones y presentaciones de María Julia justifican el considerable incremento que registraron sus bienes entre 1989 y 1999 de 300 mil a 2.500.000 pesos. Esto es así porque en los juicios por enriquecimiento ilícito se invierte la carga de la prueba y, por lo tanto, es el acusado el que tiene que justificar sus bienes. Para los fiscales Eamon Mullen y José Barbaccia, María Julia no justificó ingresos lícitos por 1.800.000 pesos en las presentaciones que viene haciendo desde que se abrió la causa, hace casi siete años. Y los fiscales creen que en los descargos que ya había hecho por escrito no demostró el origen lícito de 1.800.000 dólares. Dudan --además de la herencia anticipada de su padre-- de, por lo menos, dos fuentes que María Julia presentó para justificar su patrimonio. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: OPERACIÓN MANOS LIMPIAS PODRÍA INICIARSE EN ARGENTINA

Un proceso anticorrupción mani pulite (manos limpias), al estilo italiano, podría iniciarse en Argentina, a raíz de la denuncia sobre sobornos en el Senado para sancionar una reforma laboral, dijo ayer el vicepresidente, Carlos Alvarez. El mani pulite fue un proceso de investigación en gran escala de los casos de soborno y corrupción en el más alto nivel político y judicial de Italia, iniciado por el fiscal de Milán, Antonio Di Pietro, en 1992. El Universo, Ecuador (AP), 22 de Agosto de 2000 <http://www.eluniverso.com>

ARGENTINA: PIDEN A LA JUSTICIA QUE INVESTIGUE EL SOBORNO PAGADOS A SENADORES

Los supuestos sobornos pagados en el Senado ya llegaron a la Justicia. Guillermo Francos, diputado de Acción por la República, presentará hoy una denuncia ante los juzgados federales exigiendo que se investigue si es cierta o no la versión que señala que hubo senadores que recibieron favores personales a cambio de aprobar la reforma laboral que impulsaba el Gobierno. En su escrito, el dirigente cavallista solicita a la Justicia que investigue "si el Poder Ejecutivo pagó sobornos a

senadores de la Nación para obtener su voto afirmativo a la sanción de la llamada ley de reforma laboral y eventualmente identificar y llevar a juicio a sus responsables". La denuncia de Francos es la primera que se realiza sobre el tema. El diputado trabajó en ella durante el fin de semana luego de constatar, con sorpresa, que ningún fiscal decidía actuar de oficio para investigar el tema. En su denuncia, Francos no aporta datos nuevos, sino que relata las noticias periodísticas publicadas sobre el tema. Cita el artículo de Joaquín Morales Solá publicado en La Nación y las transcripciones de la denuncia anónima que circuló por diversos ámbitos ligados al poder político. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: PRESIDENTE DE LA COMISIÓN DE ASUNTOS CONSTITUCIONALES DESCALIFICÓ DENUNCIAS DE COIMA EN EL SENADO

"Están todos locos, empezando por Alfonsín (Raúl) y De la Rúa (Fernando) que no descalifican tamaña barbaridad", opinó el presidente de la Comisión de Asuntos Constitucionales, senador Jorge Yoma (PJ-La Rioja). Con estas palabras, Yoma desestimó el pedido realizado por el Presidente para que el Senado investigue el presunto pago de favores personales, con el objetivo de que se aprobase el proyecto de reforma laboral impulsado por el Gobierno de la Alianza en medio de fuertes críticas gremiales y de la oposición. El riojano rechazó la propuesta de De la Rúa, que durante los actos de homenaje al general José de San Martín dijo que "es el Senado el que debe dar los pasos para determinar con claridad" la existencia o no de sobornos en el trámite de aprobación de la ley en la Cámara alta. De la Rúa sugirió que debía actuar la Comisión de Asuntos Constitucionales, presidida por Yoma. Esa comisión es la responsable de tramitar todas las cuestiones de privilegio y, en consecuencia, está a cargo de las presentaciones que hicieron los senadores Antonio Cafiero y Jorge Villaverde para que se esclarecieran las versiones que circularon por el presunto pago de favores personales en ese cuerpo legislativo. "Si esto es cierto, el que está involucrado es el propio Gobierno y esto va a ser un verdadero desastre institucional", aseguró Yoma. El legislador riojano calificó de "disparate total" los rumores que circulaban en la Cámara alta en relación con esta supuesta operación. Aunque aclaró que si en el Senado "van a darle entidad al tema, hay que formar una comisión ad hoc que cite a todo el mundo, empezando por el Presidente". El titular de la Comisión de Asuntos Constitucionales opinó que no había que darle entidad a las versiones ni prestar atención a las denuncias anónimas que circularon sobre el tema. La Nación, 18 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: SURGE GRAVE ESCÁNDALO POR SOSPECHA DE SOBORNOS A SENADORES ARGENTINOS

Las insistentes sospechas de que senadores de la oposición peronista habrían sido sobornados para que votaran favorablemente la reforma laboral que el actual gobierno logró hacer aprobar por el Congreso hace tres meses, amenazaban hoy en convertirse en el peor escándalo político argentino de las últimas décadas. Tanto el gobierno del Presidente Fernando de la Rúa como el Partido Justicialista, que controla el Senado, parecían hoy desorientados ante las previsibles derivaciones del caso. Un sector de la actual administración, encabezado por el vicepresidente Carlos Alvarez, y un grupo minoritario de senadores peronistas, reclaman una investigación a fondo para esclarecer las denuncias, lo que provoca alarma en no pocos oficialistas y opositores. Todo comenzó cuando el columnista del diario La Nación, Joaquín Morales Solá, escribió hace algunas semanas que había fundadas sospechas de que un grupo de senadores peronistas habían "negociado" su apoyo a la reforma laboral, a cambio de dinero. La información del periodista provino, aparentemente, de dos legisladores peronistas no involucrados en esta maniobra, identificados como Antonio Cafiero y

Jorge Villaverde, ambos de la provincia de Buenos Aires. La denuncia provocó alarma en el bloque senatorial peronista, cuyas autoridades visitaron la semana pasada al Mandatario De la Rúa, para pedirle que públicamente desautorizara las versiones. De la Rúa así lo hizo y declaró que no dudaba de la honorabilidad de sus adversarios. Pero dos prominentes figuras de la Alianza gobernante, el vicepresidente Alvarez y el ex presidente Raúl Alfonsín, titular de la Unión Cívica Radical (UCR), el partido de De la Rúa, demandaron una investigación. Alvarez manifestó que si las denuncias se confirmaban, significarían una "decadencia terminal" del sistema democrático. Alfonsín, a su vez, refirió que si se probaban los sobornos, renunciaría a la actividad política. De la Rúa, evidentemente preocupado, modificó su postura inicial e indicó que el Senado tendría que investigar las acusaciones contra algunos de sus integrantes. El senador peronista Jorge Yoma, titular de la comisión de asuntos constitucionales, respondió anunciando que citaría al Presidente como el principal imputado. En medios legislativos circuló un libelo anónimo, mencionando por su nombre a los presuntos involucrados en el ofrecimiento y cobro de sobornos. Menciona a algunos funcionarios gubernamentales y a senadores peronistas y de la UCR. El vicepresidente Alvarez, titular del centroizquierdista Frente del País Solidario (Frepasso), el otro integrante de la Alianza, hizo saber a sus amigos que no cejará hasta esclarecer este caso. El destino de la investigación está en manos, aparentemente, de los senadores peronistas Cafiero y Villaverde, a quienes llamaría a declarar esta semana una comisión de la Cámara Alta. El Excelsior, México (AP), 21 de Agosto de 2000 <http://www.excelsior.com.mx/>

ARGENTINA: VICEPRESIDENTE DENUNCIA LA FALTA DE ``VOLUNTAD COLECTIVA`` PARA LUCHAR CONTRA LA CORRUPCION POLITICA

El vicepresidente argentino Carlos "Chacho" Alvarez ha realizado unas declaraciones en las que señala que aún no existe una "voluntad colectiva" para luchar contra la corrupción política del país. "El combate frontal contra las prácticas que la sociedad rechaza de la política no se ganó. Hay mecanismos de acción política que son reprochables y cuestionables en todos lados y todavía no se observa una voluntad colectiva de combate a fondo", ha declarado el vicepresidente. Carlos Álvarez ha criticado que esta actitud es "una de las causas de la degradación de la política o que la gente sospeche sobre la ineficiencia e improductividad de la política. Esto hace que a la política se la asimile con el mejor posicionamiento social de quienes la hacemos, al enriquecimiento ilícito o al incremento patrimonial". Asimismo, el líder frepasista ha mostrado su preocupación porque "las imperfecciones de la política no son desde un lugar excluyente de la sociedad, sino que se trasladan al sistema económico, institucional y social". Noticias Yahoo, (INFOSIC/EP), 20 de agosto de 2000 <http://es.news.yahoo.com/000820/4/i4ej.html>

ARGENTINA: VICEPRESIDENTE PROPUSO UN DESAFUERO COLECTIVO, ASÍ LA JUSTICIA INVESTIGARÍA A SENADORES POR PRESUNTOS SOBORNOS

El vicepresidente Carlos Alvarez reforzó ayer la estrategia del Gobierno para enfrentar las denuncias de pago de "favores personales" a los legisladores en busca de la sanción de la ley de reforma laboral. Y, en esa línea, sostuvo que los legisladores deberían perder sus fueros en forma colectiva para someterse a la Justicia. "Debería desaforarse colectivamente la Cámara para que la Justicia pueda actuar en este tema", dijo Alvarez, tras expresar sus reticencias a que las sospechas sólo sean investigadas por el Congreso cuando, precisamente, atañen a esa institución. "Es muy difícil, al estar involucrada una parte de los senadores en este tema, que el propio cuerpo pueda llevar adelante una investigación objetiva", razonó. En ese sentido, se confesó "pesimista acerca de la posibilidad de autoinvestigación de los senadores". Aseguró que su intención es la de lograr una investigación "a

fondo y sin concesiones", porque su prioridad es "mejorar las instituciones", dijo. "Salvando las distancias, esto es como pasó en Italia cuando comenzó el mani pulite (manos limpias), que empezó con un gran temor", comparó. Para ello, estimó que "un trámite bastante rápido para avanzar sería citar al senador (Antonio) Cafiero (Partido Justicialista-Buenos Aires), que puso el tema en el lugar de las sospechas". Precisamente, fueron los senadores Cafiero y Jorge Villaverde (PJ-Buenos Aires) quienes impulsaron la investigación, luego de los rumores de que hubo colegas suyos que supuestamente recibieron dinero a cambio de sus votos favorables a la reforma laboral. Hoy los dos senadores del PJ se reunirán con los presidentes de las bancadas del Congreso. En ese sentido, Alvarez rechazó sentir temor por las eventuales derivaciones de una investigación y dijo que el más preocupado en esclarecer la situación es el presidente Fernando de la Rúa, a quien, aclaró, no se citará al Congreso. "Nunca puede haber costos en la voluntad de mejorar el funcionamiento de las instituciones", consideró Alvarez. Inmediatamente agregó: "No estoy dispuesto a ser el presidente de un cuerpo que conviva con estas situaciones". Así, Alvarez, presidente de la Cámara alta, puso su propio cuerpo al escándalo que hace poco más de una semana colocó al Gobierno y al Congreso bajo un manto de sospechas. El vicepresidente aprovechó sus declaraciones públicas para defender la figura del ministro de Trabajo, Alberto Flamarique, señalado como el funcionario que habría pagado los presuntos sobornos a los senadores. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

BOLIVIA: DENUNCIAN PRESIDENTE DEL SENADO POR NEPOTISMO

En medio de la guerra sucia que se inició en el Parlamento entre miristas y adenistas, este sábado se denunció que el adenista presidente del Senado, Leopoldo Fernández Ferreira, habría cometido delito de nepotismo al haber brindado trabajo a 13 de sus "parientes cercanos". Sin embargo, confirmaron que sólo dos casos de los denunciados podrían ser indicados como nepotismo puesto que Liliana Zabala Beltran, "es pariente lejana de la esposa de Fernández Ferreira, pero que trabaja en el Senado desde 1993 con el ítem número 427 y un sueldo mensual de 4 mil bolivianos". El otro caso sería el de Evelin Ferreira de Azad que es prima hermana del titular del Senado. Sin embargo, se confirmó que trabaja en esa instancia legislativa desde 1997 con una remuneración mensual de 4.600 Bs. y con el ítem 109. No es desconocido que adenistas y miristas están enfrentados en la Cámara Baja por "pegas y mayores espacios de poder aprovechando la falta de decisión y negociación del ucesista Jaalil Melgar Mustafá". El Deber, 20 de agosto de 2000 http://www.eldeber.com.bo/20000820/nacional_6.html

BOLIVIA: FUNCIONARIOS DE LA ADMINISTRACIÓN PÚBLICA GANAN MÁS QUE EL PRESIDENTE

El diputado de Nueva Fuerza Republicana (NFR) Roberto Fernández Moscoso denunció que en la administración pública existen niveles salariales superiores al del Presidente de la República, por lo que pedirá a la Cámara Baja se haga una corrección salarial. Según el parlamentario, el Decreto Supremo 25056 determina que en el régimen salarial del país, en concordancia con el artículo 21 de la Ley 1826, se dispone que el sueldo mayor en el territorio nacional corresponderá al Presidente de la República, esto actualmente no se está cumpliendo. Sostuvo que el sueldo del Presidente, actualmente, es de Bs 29.900, de los ministros de Estado 20.900; sin embargo, existen en otras instituciones como la Superintendencia y el Banco Central de Bolivia en las que se perciben encima de los 30 mil bolivianos, hasta en unidades técnicas dependientes del Ministerio de Defensa ganan sueldos de más de 5 mil dólares americanos, lo que representa más de 30 mil bolivianos. El diputado enfatizó que, efectivamente, los sueldos de estas entidades son mayores al del Presidente de la República, por lo que frente a esta situación se impone la necesidad de que el Congreso Nacional

analice con detenimiento y corrija estas irregularidades salariales. El diputado Roberto Fernández sostuvo que es indispensable que se plantee una revisión de estas irregularidades y que se cumpla la norma legal que indica claramente que el sueldo mayor debe ser del Presidente. Todos debemos ajustarnos a esa situación, no podemos permitir que haya islas de privilegiados económicamente en el país", señaló el parlamentario. Esta observación se la ha coordinado con otros parlamentarios, por lo que de manera conjunta se pedirá una información, incluso los ministros Herbert Müller han homologado sus sueldos, desconociendo normas, así como el ex ministro Candia han fijado niveles salariales por encima de lo que percibe el Primer Mandatario. Por todas estas razones "se pedirá una sanción e incluso un juicio de responsabilidades, no se puede dañar al Estado, por debajo del sueldo del Presidente tienen que estar los demás sueldos de la administración", señaló el diputado. Por otra parte, mencionó que debe haber la austeridad y se debe copiar lo que hacen los peruanos para controlar la crisis económica. Por ejemplo, Alberto Fujimori frente a la grave crisis económica ha dispuesto que los ministros, diputados subalternos y senadores dejen de tener celulares, porque el gasto económico es muy elevado. Otra medida es que los vehículos oficiales limiten el uso de combustible. Algo contrario sucede en el país, los vehículos oficiales se utilizan para ir al mercado, para llevar a las esposas de funcionarios públicos, acotó. El Diario, 23 de Agosto de 2000 <http://www.eldiario.net/>

BOLIVIA: RESPONSABLES VARIOS FUNCIONARIOS Y EX FUNCIONARIOS DE IRREGULARIDADES EN EL USO DE RECURSOS DEL TESORO NACIONAL

Cinco ex ministros de Estado, varios ex viceministros y ejecutivos de Defensa Civil, un ex prefecto y varios ex funcionarios de la Prefectura de Cochabamba fueron identificados como responsables administrativos, civiles y penales de las diferentes irregularidades cometidas en el uso de los recursos del Tesoro General de la Nación y de la cooperación internacional para la atención de la emergencia del terremoto del 22 de mayo de 1998. La Comisión de Defensa y Fuerzas Armadas de la Cámara de Diputados entregó ayer sus conclusiones requiriendo el inicio de acciones civiles, administrativas y penales contra los involucrados. Las mayores responsabilidades penales recaen sobre los ex funcionarios de la Prefectura de Cochabamba. La Comisión halló también indicios de responsabilidad penal y civil contra ex ejecutivos de organismos que manejaron las donaciones; contra José Ernesto Ayoroa, ex director administrativo del Ministerio de Defensa Nacional, y Luis Montero Zanquis, ex director de Defensa Civil, responsabilidad civil por el sobreprecio en la compra de víveres y la contratación y pago de consultoría por 125.708 bolivianos; responsabilidad penal contra Luis Montero Zanquis, Luis Daza Montero, ex director de Defensa Civil, Guillermo Asturizaga. Ernesto Acosta, Miguel Nogales, Armando Deheza (del Ministerio de Defensa), y Guido Galleguillos, ex director de Bienes e Infraestructura del Ministerio de Defensa por indicios de malversación. En el caso de irregularidades en compra del avión Beechcraft, la Comisión vio indicios de responsabilidad administrativa contra Juan Vera Antezana, ex viceministro de Desarrollo Integral, y Oscar Guillarte Luján, ex comandante de la Fuerza Aérea y actual viceministro de Defensa. También estableció responsabilidad administrativa contra Fernando Kieffer, ex ministro de Defensa Nacional; Guillermo Cuentas, ex viceministro de Salud y actual ministro del área; Edgar Millares, ex ministro de Hacienda; Carlos Iturralde Ballivián, ex ministro de la Presidencia, y Herbert Müller, ex ministro de Hacienda, por contravenir las normas. También tienen responsabilidad administrativa contra Ramón Prada, ex viceministro de Transportes; Armando Méndez y Ramiro Cavero, ambos ex viceministros de Presupuesto. Los Tiempos, 24 de Agosto de 2000 <http://www.lostiempos-bolivia.com/>

BRASIL: PRESIDENTE CARDOSO LANZA UN CÓDIGO DE CONDUCTA PARA FUNCIONARIOS PÚBLICOS

El presidente brasileño, Fernando Henrique Cardoso, lanzó ayer un código de conducta para funcionarios públicos, en un esfuerzo por disipar la mala imagen dejada por un escándalo de corrupción que amenazó su gobierno los últimos meses. Cardoso emitió el código junto a un paquete de medidas que incluye la divulgación del gasto público en la Internet, para poner en evidencia la consternación de su gobierno ante el desvío de 100 millones de dólares de la construcción de un edificio judicial. "Con estas medidas estamos dando un choque de transparencia en la administración pública", declaró Cardoso en una ceremonia en el palacio presidencial de Planalto. Según el código de conducta, los funcionarios públicos deberán enviar a la Comisión de Ética Pública un informe de su patrimonio y no podrán recibir ingresos de otras fuentes que no sean su salario del gobierno mientras ejercen el cargo. Asimismo, se verán impedidos de asumir cargos como asesores de individuos u entidades que mantienen relaciones con el gobierno en los cuatro meses posteriores a su salida del cargo público. Cardoso respondió así al escándalo por el desvío de fondos destinados al Tribunal Regional de Trabajo (TRT) de Sao Paulo, al que calificó como un "símbolo de una crisis que pone en cuestión las instituciones republicanas". El Nacional, Venezuela (Reuters), 22 de Agosto de 2000 <http://www.el-nacional.com/>

CHILE: DESTITUYEN A ALCALDE DE VIÑA DEL MAR

Rodrigo González, hasta ahora alcalde de Viña del Mar, quedó definitivamente destituido del cargo por decisión unánime del Tribunal Calificador de Elecciones (Tricel), máximo organismo electoral del país, y en contra de cuya resolución no cabe recurso alguno. González (PPD) fue destituido por "notable abandono de sus deberes" por tres casos específicos: la situación del ex Hotel Miramar; por una rebaja de derechos municipales que hizo a dos empresas, a pesar de que la ordenanza municipal había restado tal potestad al jefe comunal, y por haber logrado la aprobación para otorgar un bono de productividad en favor del personal de la Municipalidad de Viña del Mar. El alcalde de Viña del Mar quedará oficialmente destituido inmediatamente después de que sea notificado de la resolución del Tricel, lo que podría ocurrir hoy, y deberá dejar en ese instante la municipalidad, ya que la medida no sólo lo afecta en su calidad de alcalde, sino también como concejal. Rodrigo González, quien permaneció durante toda la tarde reunido con sus asesores y amigos más cercanos, señaló ayer que pese a acatar el fallo del Tricel, mantendrá su candidatura a la reelección, por sobre lo que opinen los dirigentes nacionales de su partido, el Partido por la Democracia (PPD). Poco después de conocida la destitución del alcalde de Viña del Mar, el PPD bajó su postulación como candidato a alcalde privilegiado por esa comuna en las próximas elecciones del 29 de octubre. Con esto, la Concertación deberá negociar cuál será ahora su candidato "privilegiado". El Mercurio, 24 de Agosto de 2000 <http://www.elmercurio.cl/>

CHINA: MUSEO DE LA CORRUPCIÓN SE CONVIERTE EN CENTRO TURÍSTICO DE PEKÍN

Cientos de personas abarrotan todos los días el "museo de la corrupción" de la capital china, donde se inauguró la exposición "La ciudad de Pekín golpea duro y advierte contra los delitos económicos", con la que se intenta calmar a la población, cada vez más irritada con la justicia. La muestra, con un despliegue inusitado de fotografías de personalidades corruptas de la vida política o del mundo empresarial chino, recoge también montones de billetes falsificados por delincuentes, cigarrillos introducidos en el país de contrabando y carnés de identidad de personas que se encuentran tras las rejas. La exposición, que abarca varias salas del Museo Militar de Pekín, desea ser la ventana de los esfuerzos del Gobierno por combatir ese mal fuertemente arraigado en China, donde la liberalización económica ha fomentado, especialmente entre la clase gobernante, el culto al dinero. Como si de una

exposición de arte "pop" se tratara, las paredes del museo muestran desde carteles coloridos a vídeos con filmaciones de juicios y tarjetas de crédito falsas con las que grupos de delincuentes desvalijaban los bancos. La mayoría de los visitantes son personas mayores, explican los vigilantes, aunque también acuden jóvenes que desean echar un vistazo a los objetos del museo, que se está convirtiendo, desde que se inauguró hace unos días, en uno de los centros turísticos de Pekín. "Aunque las puertas del museo están vigiladas por militares, también hay gran número de oficiales y soldados que acuden como espectadores", indica el diario "South China Morning Post", editado en inglés en Hong Kong. La fuente agrega que, aunque los visitantes hacen vivos comentarios mientras recorren las salas, "de repente se impone el silencio cuando se entra en la estancia de veinte metros en la que se exponen los documentos que llevaron a la detención y expulsión del Partido Comunista Chino (PCCh) del vicepresidente de la Asamblea Nacional Popular (ANP, legislativo) Cheng Kejie". En la citada sala están colocadas las fotografías, como si de una película se tratara, de Cheng, condenado a muerte el pasado 31 de julio, y de su amante Li Ping, sentenciada a cadena perpetua una semana más tarde. Ambos fueron hallados culpables por una comisión parlamentaria de aceptar sobornos, regalos y joyas, incluidos diamantes, por valor de unos 41 millones de yuanes (4,9 millones de dólares). El "museo de la corrupción" de Pekín es sólo un botón de muestra de lo que está ocurriendo actualmente en China, donde el Gobierno quiere acercarse al pueblo para intentar aplacar el descontento de los ciudadanos, sobre todo de los trabajadores. Hoy, lunes, la Oficina Nacional de Auditorías (ONA) anunció un plan para investigar a gran parte de los miembros del Gobierno y del PCCh, que entrará en vigor cuando dejen el cargo y que afectará incluso a los jubilados. "Va a ser posible abrir investigaciones contra altos responsables de la Administración, como ministros y gobernadores", señaló el auditor general de la ONA, Li Jinhua, quien matizó que el proyecto todavía necesita algo de tiempo para madurar y se llevará a cabo de "forma gradual". Noticias Starmedia (EFE), 21 de Agosto de 2000 <http://www.starmedia.com/>

COLOMBIA: COMO UNO DE LOS MAYORES CASOS DE CORRUPCIÓN CALIFICO LA CONTRALORÍA LA SITUACIÓN DEL INSTITUTO PENITENCIARIO

Como uno de los mayores casos de corrupción y desgreño administrativo encontrado en dependencias del Estado calificó la Contraloría General de la Nación la situación actual que presenta el Instituto Nacional Penitenciario y Carcelario (Inpec). Según la última auditoria, practicada al Inpec, el organismo de control encontró irregularidades administrativas y financieras que, debido a su magnitud, "fue difícil cuantificar". Además, el hacinamiento, la falta de servicios de salud, educación y de programas de resocialización demuestran que el objeto social para el que fue creado el Inpec tampoco se cumple. El común denominador, en la Dirección General y en las seis regionales que manejan los 168 centros de reclusión, fue la violación sistemática de las normas de contratación, entre ellas concentración en las adjudicación de contratos y sobrecostos en la ejecución de obras y servicios. La auditoria encontró que durante 1998 y 1999 el Inpec suscribió contratos por \$48.075 millones para generar 5.600 nuevos cupos y aliviar la situación de hacinamiento en las cárceles. De acuerdo con un estudio del mismo Instituto, la mitad de los centros de reclusión fueron construidos hace más de 40 años y sólo el 6% tiene menos de diez años. Para el director del Inpec, el general de la Policía (r) Fabio Campo Silva, el informe de auditoria de la Contraloría es una clara radiografía del estado en el que encontró el Instituto al asumir su cargo, hace siete meses, y aclaró que esa situación cobija a los directores que lo antecedieron. Pero, aseguró que tomó medidas inmediatas encaminadas a frenar las irregularidades detectadas por el organismo de control en el período 1998-1999. Entre ellas, un corte de cuentas y la designación de un gerente de proyectos, quien se encargará de la revisión, ordenamiento y corrección de las fallas detectadas. El Colombiano, 24 de Agosto de 2000

<http://www.elcolombiano.com.co/>

COLOMBIA: EX ALCALDES ACUSADOS DE SUSTRAR BIENES MUNICIPALES SE DEFIENDEN

Los ex alcaldes de Playas y Durán, Gabino de la A y Oswaldo Peñaherrera, respectivamente, fueron los primeros en reaccionar ante las acusaciones formuladas por sus sucesores, Gregorio Andrade y Mariana Mendieta, en su orden. Gabino de la A Escalante desmintió que se hayan sustraído bienes del Municipio y aseguró que hay un inventario de todo lo que dejó, efectuado por el agente fiscal (e) de La Libertad, Franklin Grau, el 9 de agosto. También denunció ante la Comandancia de la Segunda Zona Militar el operativo efectuado por un contingente de la Base San Antonio, que impidió el acceso de los funcionarios al Municipio. Por su parte, Oswaldo Peñaherrera, ex alcalde de Durán, dijo que desde julio y hasta la fecha hay un auditor de la Contraloría en el Municipio pedido por él, por lo que menos pudieron desaparecer bienes de la institución. "Lo que es del Municipio está ahí y no sé cuál es la intención de la alcaldesa." El Universo, 18 de Agosto de 2000 <http://www.eluniverso.com/>

COLOMBIA: PIDEN INVESTIGAR A 16 FUNCIONARIOS DE LA REGISTRADURÍA NACIONAL, 4 EX REGISTRADORES Y AL ACTUAL REGISTRADOR

Por petición de la Contraloría General, la Procuraduría inició investigación disciplinaria contra 16 funcionarios de la Registraduría Nacional, 4 ex registradores y al actual Registrador, por presunta mala conducta por la firma de un contrato por valor de 67.246 millones de pesos con la empresa francesa Sagem que finalmente incumplió. Según denunció el contralor General Carlos Ossa Escobar, la Registraduría pudo haber violado la contratación estatal al prorrogar en casi el doble del tiempo, estipulado en 22 meses, el contrato con Sagem para desarrollar el proyecto de modernización tecnológica, "que a la fecha no se ha concluido y que, por ende, ha retrasado el proceso electoral", dice el informe electoral. La investigación disciplinaria fue abierta contra los ex registradores Orlando Abello Martínez, Mariela Hernández de Domínguez, Jaime Calderón Brugés y Clara María González, así como al actual Registrador, Iván Duque Escobar. Las presuntas irregularidades disciplinarias también cobijan a los directivos de la Registraduría Gustavo Villamil Rozo, José Alberto Morillo, Álvaro Molina Vásquez, Esperanza Mejía Reyes, Antonio William Gaviria Arana, Sonia Patricia Cáceres Martínez, María Cristina Duque González, Edith Mabel Ovalle Salazar, Gustavo Pedroza Gutiérrez, Álvaro Luis Monterrosa Arrieta, Harold Wilson Salazar Virguez, Miguel Arturo Linero de Cambil, Nagib Chalave González, Epaminondas Franco Ávila y Edgar Daniel Bohórquez Encizo. El Colombiano, 23 de Agosto de 2000} <http://www.elcolombiano.com.co/>

COLOMBIA: SECTOR DE JUSTICIA UNO DE LOS MAS AFECTADOS POR LA CORRUPCIÓN, SEGÚN ESTADÍSTICAS

Uno de los sectores afectados por la corrupción es el que tiene que ver con la justicia. Según estadísticas del Consejo Superior de la Judicatura desde 1992 hasta la fecha han sido sancionados 3.377 abogados y 587 funcionarios judiciales. Tanto los profesionales del Derecho como los auxiliares de la justicia inciden sobre el normal trámite de los procesos del ramo, causando irregularidades que benefician a sus clientes y a ellos mismos. "Colombia atraviesa por una situación crítica en términos de corrupción tanto a nivel político como administrativo, situación que se ve agravada por la percepción generalizada de unas instituciones poco confiables e ineficaces. Un sistema de justicia saludable tiene una gran incidencia sobre la eficiencia económica y el desarrollo de un país", señalaron fuentes de la Corporación Excelencia en la Justicia. Para el organismo es claro que las actuaciones corruptas atentan contra los tres principios que garantizan el buen desempeño de

la justicia de una nación: independencia, autoridad para aplicar las decisiones y una organización eficiente. Así las cosas, la Corporación considera que es necesario desarrollar un sistema de incentivos dentro de la Rama Judicial que haga que tanto los funcionarios como los demás empleados administren justicia de manera responsable y eficiente. En segundo lugar, sugieren que se adopte un régimen disciplinario que sancione rigurosamente a los infractores y que facilite el desarrollo de los procesos dentro de la jurisdicción. Estas estrategias, según la Corporación, se deben acompañar de cambios en los niveles legales, administrativos y organizacionales del sector judicial. Una encuesta del Consejo Superior de la Judicatura realizada en 17.394 hogares de Barranquilla, Bucaramanga, Bogotá, Medellín, Cali y Pasto señala que el 43% de las personas entrevistadas piensan que la justicia no opera y, por lo tanto, no acuden a ella. Entre las razones que dieron están el costo de honorarios (45.1% de los encuestados), el desconocimiento de los derechos (45.1%), la demora de los procesos (39.1%) y la falta de credibilidad en el aparato judicial (30.2%). Fuera de lo anterior, el Consejo Superior de la Judicatura y la Procuraduría General de la Nación, organismos que ejercen control y vigilancia de tipo administrativo y disciplinario sobre la rama judicial, encuentran que ésta se encuentra colapsada. La Corporación Excelencia en la Justicia considera que eso se debe al alto índice de congestión en la jurisdicción disciplinaria, donde la carga laboral supera los 40 mil procesos. Entre 1994 y 1999, la saturación ha pasado de 13.500 a 26.657 procesos sin solución, al cierre del año. Y es que los entes de control no disponen de herramientas para sancionar rápida y drásticamente a los funcionarios correspondientes con el retiro de su cargo cuando existan indicios de prácticas antiéticas o corruptas. El Colombiano, 21 de Agosto de 2000 <http://www.elcolombiano.com.co/>

COSTA RICA: CONSULTA A AUTORIDADES. CORRUPCIÓN TIENE VARIOS PORTILLOS

La creación de instancias extraoficiales que suplantán a las instituciones públicas en la administración de recursos económicos y el manejo de esos dineros con fines político-electorales, son dos de los principales portillos a través de los cuales la corrupción penetra y causa estragos. Ese problema también se infiltra por medio del caos administrativo que impera en diversas entidades y de la falta de una lucha coordinada, en escala nacional, contra los actos ilícitos. De esa manera se resumen los criterios expresados por cinco autoridades nacionales que, como parte de sus funciones, investigan o tratan casos relacionados con actos indebidos. Se trata del fiscal general, Carlos Arias; el contralor general de la República, Luis Fernando Vargas; el procurador, Román Solís; la magistrada de la Sala Constitucional y presidenta de la Comisión Nacional para el Mejoramiento de la Justicia (Conamej), Ana Virginia Calzada, y la defensora de los habitantes, Sandra Pizsk. Fueron consultados, entre el jueves y el viernes pasados, sobre las áreas más frágiles que tiene nuestro país en materia de corrupción. También se les preguntó sobre posibles soluciones. De acuerdo con Arias, uno de los terrenos fértiles para la germinación de actos corruptos son los programas de ayuda social dotados con recursos millonarios. Como ejemplo de esa situación, mencionó el caso de la crisis financiera del sector cooperativo de la vivienda, durante el gobierno anterior, a la cual calificó de "cuestión monstruosa, compleja". Carlos Arias también llamó la atención sobre un campo que, según él, cuando se investigue a fondo superará en dimensiones económicas a cualquiera de los escándalos que han ocurrido en Costa Rica en los últimos años: el contrabando de mercancías. De acuerdo al contralor Vargas, también señaló como surco de la corrupción el afán por atender a toda prisa viejas necesidades que afronta la población, con lo cual en diversas ocasiones se inventan procedimientos y se saltan regulaciones que algunos aprovechan para beneficio propio. En ese sentido, señaló como ejemplo las anomalías con fondos de Asignaciones Familiares. Para el Contralor, otro escenario

propicio para la corrupción es la creación extraoficial de instancias para el manejo de fondos públicos -en sustitución de las oficiales- con el argumento de que estas son lentas y entran. En opinión de Vargas, todo se engloba dentro de una deficiencia básica: la pérdida de la capacidad de planificación en la administración pública. "Lo que se hace a como dé lugar genera desorden y el desorden es uno de los agentes de la corrupción". Por su parte Calzada informó de que Canamej trabaja en la elaboración de un proyecto para crear un grupo -con representantes del Estado y la sociedad civil- que coordine las políticas generales para prevenir actos de corrupción. La idea, dijo, no es que ese comité tenga facultades de investigación, sino que más bien se dedique a cuestiones como orientar a los ciudadanos sobre los caminos adecuados para plantear denuncias. "Uno de los problemas principales es que la gente carece de mucha información", declaró. "Queremos hacer conciencia sobre la necesidad de unificar y coordinar esfuerzos. Una lucha dividida es más débil", afirmó. La Nación, 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ECUADOR: COMISIÓN ANTICORRUPCIÓN TRATÓ 1676 CASOS DESDE 1997

Desde marzo de 1.997 hasta la fecha, la Comisión Anticorrupción (CCC) ha tramitado 1676 denuncias, de las cuales 460 están el trámite de investigación a través de los organismos como la Fiscalía, Contraloría General del Estado, la función Judicial, el Defensor del Pueblo y el Consejo Nacional de la Judicatura. El último proceso sobre el cual se pronunció la CCC fueron irregularidades al interior de la institución policial, donde se habría segmentado contratos con empresas proveedoras de bienes. Los temas de trabajo han abordado investigaciones de corrupción en todas las instituciones del sector público, y en muchas ocasiones, las observaciones de la Comisión han provocado resentimientos de las partes afectadas La CCC tiene oficinas de trabajo en la mayoría de las provincias del país. En Portoviejo se crearon recientemente dos redes cívicas anticorrupción, y que integra a sectores sociales jóvenes de la capital manabita. Las redes que apoyan el trabajo se crearon a partir de la organización de un seminario taller que tuvo lugar el pasado 9 y 10 de agosto del presente año, donde intervinieron Alendra Cantos y Pedro Votruba, altos directivos de la CCC. Cabe añadir que también se creó la Comisión de coordinación interinstitucional que plantee alternativas para agilizar los procesos judiciales por casos de corrupción, iniciativa que nació a partir de un seminario taller entre la CCC, el Consejo Nacional de la Judicatura y la Corte Suprema de Justicia. La filosofía de la CCC es investigar y establecer presunciones de responsabilidad civil o penal respecto de la marcha y administración de los bienes y recursos del Estado. La Hora, 21 de Agosto de 2000 <http://www3.lahora.com.ec/>

ECUADOR: EL TRIBUNAL CONSTITUCIONAL ECUATORIANO CEDIÓ A LAS PRESIONES POLÍTICAS. LA CORRUPCIÓN SIGUE A SUS ANCHAS EN EL PAÍS

Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Aunque 6 de los 9 vocales del Tribunal Constitucional se mostraron a favor de la permanencia de la directiva de mayoría en el Congreso Nacional del Ecuador, dicho Tribunal optó por la "salida política" y apoyó a la minoría legislativa, representada por el derechista Partido Social Cristiano, PSC. Así, Carlos Falquez Batallas, exvicepresidente del Congreso Nacional por el PSC, deberá reinstalar la Asamblea General y desconocer todo lo actuado por Susana González, como presidenta del Congreso electa por la mayoría de centroizquierda. Minutos más tarde de la decisión del Tribunal, Susana González declinó su nombramiento, aunque rechazó el muñequero político del Gobierno y su presión al resto de organismos constitucionales. Por su parte, los movimientos sociales, indígenas y campesinos, ya se están organizando para desarrollar protestas

ante la decisión del organismo Constitucional y por la aplicación de la Ley Trole anunciada por el Presidente Gustavo Noboa. Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Los socialcristianos, en cambio, respaldan e impulsan la venta de dichas empresas pues son sus militantes los mayores interesados en comprarlas. Informativos Net, España, 23 de Agosto de 2000 <http://www.informativos.net/>

ECUADOR: ESCANDALO BANCARIO - OBRAS DE ARTE DADOS EN GARANTIA FUERON SOBREVALORADAS

Nuevos elementos se suman al proceso judicial que se desarrolla en la Corte Suprema de Justicia en contra de los ex directivos de Filanbanco, William y Roberto Isaías Dasum, mediante los cuales se confirmarían las supuestas irregularidades cometidas en la valoración tanto de las obras de arte entregadas al Banco Central, como de los bienes que recibió en dación de pago la Agencia de Garantía de Depósitos (AGD). Una diferencia de \$ 24 millones existiría entre el valor contabilizado por Filanbanco Trust y el último avalúo efectuado por el Banco Central respecto de las obras de arte entregadas por los ex directivos de Filanbanco como parte del fideicomiso de 400 millones de dólares ofrecido a cambio del préstamo que recibió dicha institución bancaria en noviembre de 1999. La última valoración efectuada por peritos del Banco Central confirmaría la existencia de "manejos fraudulentos y artificiosos por parte de los Isaías Dasum", quienes "habrían inflado los avalúos para hacer creer que lo que en realidad vale 5 millones de dólares, se lo podía hacer pasar por 30 millones". Según la nueva información proporcionada por el superintendente de Bancos, Juan Falconí Puig a la Corte Suprema de Justicia, como prueba de las irregularidades que se habrían cometido a través de la dación en pago de obras de arte por parte de Filanbanco Trust, se desvirtuaría también la valoración efectuada por la empresa Global Silverhawk, que arrojó como resultado la suma de \$10 458 508 dólares en obras de arte, es decir, \$5 263 102 dólares más en relación con la última valoración efectuada por los técnicos del Banco Central. La Superintendencia precisó también en esta ocasión, que sobre los bienes inmuebles que componen el activo de las compañías entregadas en dación en pago a la Agencia de Garantía de Depósitos (excepto los locales comerciales de Puntilla Mall) existen situaciones de carácter legal que "limitan su dominio", entre los cuales se registran juicios de excepciones, juicios coactivos, juicios de expropiación, constitución de hipotecas y fundamentalmente condición resolutoria que podría otorgar a los antiguos propietarios la posibilidad de ejercer la acción de restitución, con lo cual se provocaría aún más perjuicio económico al Estado ecuatoriano. El estudio sobre los bienes estuvo a cargo Pedro Delgado, Intendente General de Supervisión y Entidades Financieras de la Superintendencia de Bancos, cuyo informe se adjuntó al proceso judicial que se desarrolla en contra de los hermanos Isaías Dasum y demás involucrados en el caso. "Intervención urgente" Los peritos del Banco Central reevaluaron 726 obras de arte en el Museo Nahim Isaías de Guayaquil, y 1477 del Museo Filanbanco, de Quito. Las ubicadas en Guayaquil, son en su mayor parte son pinturas que han obtenido una calificación que va de buena a excelente, siendo las más caras una pintura llamada Virgen con cautivos, \$ 42.000, y las esculturas de Santa Catalina de Siena y de La Dolorosa, con un valor de \$40.000 cada una. En cambio, el informe del Banco Central señala que las cientos de obras del Museo Filanbanco, de Quito, tienen una calificación mayoritaria de "no aceptable", "urgente intervención" y "necesita intervención". En el Museo Nahim Isaías se exponen 180 obras que fueron evaluadas, según el informe del Banco Central. Las demás están en reserva. La mayoría de las obras del Museo Filanbanco, en Quito, tienen una calificación de buena, regular y mala. Muchas de ellas ni siquiera tienen avalúo y una buena parte necesitan una reparación urgente. Las obras son parte del patrimonio cultural y corresponden a diversas escuelas

artísticas de la Colonia, especialmente de la Escuela Quiteña. Todas se refieren a motivos religiosos y las más caras corresponden a artistas como Caspicara El superintendente de Bancos, Juan Falconí Puig, expresó su preocupación por la lentitud con la que se estarían tramitando los procesos judiciales relacionados con irregularidades dentro del sistema financiero, entre los cuales se encuentra el de Filanbanco. En el momento existen 31 juicios penales relacionados con irregularidades dentro del sistema financiero, en la mayoría de los cuales no se han cerrado los sumarios, por ejemplo los casos de los bancos de Préstamos, Ecuacambio, del Azuay, del Tungurahua, Progreso, Unión, Popular, Previsora, Bancomex, etc. De dichos procesos, únicamente los casos Filanbanco y Continental se ventilan en la Corte Suprema de Justicia, los demás se encuentran radicados en los juzgados de las provincias del Guayas (13), Pichincha (13), El Oro (1), y Macas (1). (MUP) La Superintendencia también pidió al juez Noveno de lo Penal de Pichincha que se solicite a la Corte Suprema de Justicia se requiera al Gobierno de Estados Unidos que inicie el proceso de extradición de los ex banqueros, hermanos Roberto y William Isaías y de Arturo Quiroz Martín, ex directivo del Banco del Pacífico. La denuncia sostiene que varios medios de comunicación han advertido la presencia de los nombrados en la ciudad de Miami. El abogado de la Superintendencia invocó ante el juez la convención de Estradición entre el Ecuador y Estados Unidos suscrita el 28 de junio de 1872 y el tratado complementario de extradición suscrito por los dos países el 22 de septiembre de 1939. Los abogados de la Superintendencia pidieron también la certificación de que el Instituto de Patrimonio Cultural autorizó la transferencia de dominio de los más de dos mil bienes culturales que se usaron como garantía de pago. Hoy, 22 de agosto de 2000 <http://www.hoy.com.ec/politica/martes/politica.htm>

ECUADOR: EXTRACTO DE CONFERENCIA DE PRENSA DE SECRETARIA DE ESTADO ALBRIGHT

Esta pregunta en la conferencia del 18 de agosto de 2000 se refiere a los profugos ecuatorianos investigados en casos de corrupción: ***** PREGUNTA: Buenas tardes. El presidente de nuestro país, doctor Gustavo Noboa, se había comprometido a solicitar oficialmente al gobierno de Estados Unidos la cancelación de visas de todos aquellos fugitivos de la justicia ecuatoriana, quienes se encuentran al presente en territorio de Estados Unidos. Nosotros no sabemos si usted y las autoridades ecuatorianas tratarían sobre este asunto en la reunión de esta tarde, sin embargo, queremos conocer qué probabilidades existen de que el gobierno norteamericano acepte o acoja la petición hecha por el Ecuador de retirar las visas a los prófugos ecuatorianos, para que ellos vengan acá? Adicionalmente, qué posibilidades hay de que el gobierno norteamericano dé las facilidades necesarias para que podamos extraditar a aquellos prófugos de la justicia porque hasta el momento ha sido muy difícil, por no decir imposible, traerlos al país? ***** SECRETARIA ALBRIGHT: En primer lugar, quiero decirles que no discuto casos de visas, porque eso se hace a través de otro sistema dentro de nuestro gobierno. Realmente no discutimos de eso esta tarde, pero debo decirles que en los casos que se solicita la extradición, es importante que el gobierno lo haga bajo el tratado de extradición, y nosotros estaremos dispuestos a tratar sobre esos temas, pero no quiero hablar sobre casos de visa. ***** CANCELLER MOELLER: Este asunto ha sido manejado por el gobierno ecuatoriano fundamentalmente a través del ministerio de Justicia de Estados Unidos. A propósito, valga esta oportunidad para agradecer una vez más la excelente y permanente colaboración que hemos tenido de la ministra Janet Reno, quien se ha preocupado personalmente de esta situación. Debo anunciar a la prensa ecuatoriana que el día de hoy se dio paso al proceso de extradición de Peñaranda. Hasta el momento él estaba sometido a un proceso de deportación, que lamentablemente tiene que cumplir una serie de requisitos de acuerdo a las leyes americanas. La cancillería, por

disposición del presidente Noboa, presentó una solicitud de extradición aplicando el antiguo tratado que para ciertos casos no es viable, pero para éste sí lo va a ser. Y aunque tengamos que esperar unas semanas más, Peñaranda vendrá a pagar sus culpas a Ecuador. En cuanto al tema de las visas, efectivamente ésta no es la instancia para tratar el tema. La solicitud ya fue hecha hace algunos meses y estamos esperando respuesta de Estados Unidos. Servicio Noticioso desde Washington, 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

ECUADOR: SE AMPLÍA CASO CONTRA EL EX PRESIDENTE MAHUAD. COMISIÓN ANTICORRUPCIÓN REMITIRÁ INVESTIGACIONES A LA JUSTICIA

Con el propósito de probar los delitos que se habrían configurado con el congelamiento de recursos en el sistema financiero nacional y el feriado bancario, la Comisión Anticorrupción deberá remitir a la Corte Suprema de Justicia las investigaciones efectuadas sobre el caso, en el que están sindicados el ex presidente Jamil Mahuad y su ex ministra de Finanzas, Ana Lucía Armijos. El pedido para que se entregue el informe documentado y debidamente certificado lo hizo el Ministerio Público con el propósito de que la Corte Suprema cuente con los antecedentes e investigaciones que sirvieron de base para solicitar que se dicte el auto cabeza de proceso en contra de los inculpados. Asimismo, la fiscal general, Mariana Yépez, pidió se recepte el testimonio de Jorge Egas Peña, quien a la época del cometimiento de la infracción desempeñaba las funciones de Superintendente de Bancos. El cuestionario de preguntas para que se efectúe esta diligencia la elaborará el Ministerio Público. El Universo, 21 de Agosto de 2000 <http://www.eluniverso.com/>

EE.UU: HASTA LOS VOTOS PUEDAN COMPRARSE POR INTERNET

Un nuevo sitio promete "unir el capitalismo y la democracia" subastando votos para las elecciones presidenciales de los EE.UU. de este año. "La industria electoral gasta cientos de millones de dólares con la intención de influir la elección presidencial", puede leerse desde agosto en voteauction.com. "Este sistema es un desperdicio inútil de dinero para los candidatos y sus seguidores. Voteauction.com se propone mejorar este sistema llevando directamente a los votantes el dinero de los contribuyentes a las campañas". El sitio le permite a los ciudadanos poner su voto en un lote de remate, estado por estado. El mayor postor determina qué candidato a la Casa Blanca se llevará los votos en masa de los participantes de voteauction.com. "No soy cínico", dice su fundador James Baumgartner, un graduado en ciencias políticas. "Soy realista. La mayoría de la gente tiene una visión sincera acerca de como los candidatos se venden. Los votantes deberían ser incluidos en esta situación y obtener parte de los réditos". Al menos un analista político elogió el mensaje propuesto por este sitio. "Es una muy buena forma de hacerle ver a los votantes todo lo que otros (los grandes contribuyentes) ganan con el sistema y qué poco obtienen los votantes en comparación", dice Sheila Krumholz, directora de investigación del Center for Responsive Politics, una organización apartidaria que estudia la influencia del dinero en la política. "Hay que darle reconocimiento a este tipo, por atraer la atención de la gente sobre este tema de manera provocativa", dice. Pero no todo el mundo está de acuerdo. "Deberían clausurarlo", dice Deborah Phillips, presidenta del Voting Integrity Project, un grupo de interés público, sin fines de lucro, que a menudo trata cuestiones relacionadas con la Internet. "Es el cinismo llevado a su máxima expresión. Es destructivo para el proceso democrático. Si los fiscales de los 50 estados no van tras este tipo y cada uno de los votantes participantes, no están haciendo su trabajo". Las autoridades ya han tomado nota sobre casos similares. El Departamento de Justicia de los EE.UU. se puso en contacto esta semana con eBay luego de que un puñado de usuarios ofreciera sus votos a la venta en ese sitio de subastas por

Internet. Ni bien eBay tomó conocimiento de estos ítems cuestionables, los quitó del sitio inmediatamente, dijo su vocero, Kevin Pursglove. "Lo cierto es que incluso si la gente se lo toma como una broma, nosotros nos lo tomamos muy seriamente", dice Pursglove. "Esto es un hecho que podría traer aparejados cargos delictivos". Según las autoridades, tanto quienes venden como quienes compran votos violan leyes estatales y federales, y podrían ser castigados con miles de dólares en multas o años en prisión. Baumgartner dice que él no vende ni compra votos, simplemente provee un foro donde otros pueden hacerlo, quedándose con un porcentaje de la transacción. También sostiene que se encuentra protegido por las recientes decisiones de la Suprema Corte que equiparan al dinero con la libertad de prensa, incluyendo una de los años 70 que sancionaba el uso del dinero en campañas políticas. Pero hasta sus simpatizantes tienen dudas. Krumholz anticipa que el sitio podría dar lugar a graves contiendas legales. "Me preocupa el autor del sitio", dice. Baumgartner, por su parte, se mantiene optimista. "Espero conseguir pronto anuncios e inversionistas", dice. Phillips dice que debería ir preparándose para recibir otra cosa. "Esto es un verdadero fraude electoral en la Internet. No me interesa como lo pinten. Espero que este tipo tenga unos buenos abogados que lo respalden". EL SALVADOR: FISCALÍA INVESTIGA FIRMAS FALSAS EN EXPEDIENTE DE FEDERACIÓN DE FÚTBOL, INVESTIGADA POR POSIBLE MALVERSACIÓN

La Fiscalía investigará la posible manipulación de documentos por parte de la Corte de Cuentas, así como la alteración de firmas en los recibos que la Federación de Fútbol (FEDEFUT) presentó para desvanecer un faltante de 35 millones de colones. Fuentes de la Fiscalía confirmaron a este medio que hay, al menos, dos documentos que contienen firmas alteradas. Se trata de recibos emitidos por fuertes sumas de dinero en dólares. La Federación, supuestamente, entregó estos comprobantes a dos miembros del equipo técnico que dirigió a la selección nacional durante las eliminatorias por el Mundial Francia 98. La Fiscalía sospecha que las firmas de los técnicos que aparecen en los recibos son falsas. Más alteraciones. Este periódico conoció, además, de otros casos donde se advierte la alteración de firmas. Dos jugadores de la liga profesional de Estados Unidos que son seleccionados nacionales habrían recibido, según los directivos de la FEDEFUT, un total de 2 mil dólares cada uno. Después de escuchar varias declaraciones en torno a estos casos, la Fiscalía no aceptó los recibos como justificantes de egreso, debido a la sospecha de que las firmas también eran falsas. Sin embargo, el notario Pablo Noé Recinos da fe de que las firmas son originales. El fiscal general, Belisario Artiga, ha girado instrucciones nuevamente para que la investigación sobre el caso FEDEFUT llegue hasta las últimas consecuencias. Actualmente, el equipo de fiscales del Departamento de Procuración, asignado al caso, realiza el cotejo de documentos enviados por la misma Corte de Cuentas y otros obtenidos por la Fiscalía, para verificar la autenticidad de los documentos presentados por la FEDEFUT. La Fiscalía, según confirmaron fuentes del Ministerio Público, también seguirá otra línea de investigación: determinar alteraciones en los informes que los auditores enviaron a la Dirección de Responsabilidades de la Corte de Cuentas. Tal como informó este diario el pasado sábado, autoridades de la Corte obviaron señalamientos importantes emitidos por los auditores en un informe fechado en junio de este año. Los documentos alterados. La Prensa, 22 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: ANUNCIAN AUDITORÍA A CORTE DE CUENTAS

Un día después que este diario denunciara el estancamiento del proceso de auditoría a la Corte de Cuentas, el presidente de la Asamblea Legislativa se comprometió a resolver la situación. El diputado

Ciro Zepeda anunció ayer que propondrá a la junta directiva de la Asamblea crear una comisión para ese propósito. Zepeda quiere que ya no se cuestione la credibilidad del Partido de Conciliación Nacional (PCN), partido que él dirige. Esa comisión deberá agilizar la contratación de una firma que audite a la Corte de Cuentas. Afirmó que buscarán asesoría internacional para iniciar el proceso. Zepeda dijo que la directiva de la Asamblea "debe dar plenos poderes... para que busque apoyo en las contralorías de otros países". Por tanto, el primer paso será contactar las instituciones contraloras de otros países. Zepeda está consciente que es difícil que el Gobierno les pueda facilitar un refuerzo presupuestario para sufragar los gastos que requiere la fiscalización de la Corte. El democristiano Aristides Alvarenga, secretario de la Asamblea, confirmó que la directiva realizó ayer un "ejercicio financiero" que permitió concluir que la Asamblea tiene insuficiencia de fondos. Recordó que se le recortó alrededor de 26 millones de colones en el presupuesto de este año. Por eso pedirán que en el presupuesto de 2001 se prevea ese gasto. "Según se ha investigado, puede andar entre 10 ó 20 millones de colones" el costo de la fiscalización. La Prensa, 18 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: FISCALÍA INVESTIGA POSIBLE MALVERSACIÓN DE FONDOS EN FEDERACIÓN DE FÚTBOL

La Fiscalía dijo que continuará investigando una "posible malversación de fondos" en la Federación Salvadoreña de Fútbol (FSF) pese a que la Contraloría multó y obligó a directivos a reintegrar unos 345.000 dólares. "Estamos investigando a fondo (el caso) y con mucha seriedad", declaró a periodistas el fiscal general, Belisario Artiga; "creo que se puede demostrar lo que sucede y si hay culpables, los vamos a hallar". La Contraloría informó el viernes que encontró un faltante de más de 3 millones de colones (unos 345.000 dólares) durante el período 1996-1998 de la administración de la FSF. Una primera auditoría había revelado un faltante de 35 millones de colones (unos 4 millones de dólares), según la prensa local. La Contraloría impuso una multa de unos 4.500 dólares para cinco ex directivos por "responsabilidad administrativa" y obligó además a otros cuatro miembros, entre ellos el actual presidente Juan Torres, a reintegrar unos 345.000 dólares por "responsabilidad patrimonial". Pero Torres y otros dos miembros de la junta directiva no serán sancionados debido a que no reciben salarios en la FSF, dijo la Contraloría, basados en artículos del Reglamento para la Determinación de Responsabilidades. Sin embargo, Artiga señaló que la Fiscalía continuará con las investigaciones debido a "una posible malversación de fondos y administración fraudulenta" en la Federación Salvadoreña de Fútbol. Torres dijo a un periódico local que, "no tenemos absolutamente nada que devolver, lo que haremos es someternos al juicio de cuenta... quiero que esto se vea como un proceso, porque no ha terminado", señaló. La Nación. Costa Rica (AP), 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ESPAÑA: PIDEN DIEZ AÑOS DE INHABILITACIÓN PARA EL ALCALDE DE SALOBREÑA POR UN PRESUNTO DELITO DE PREVARICACIÓN

La Fiscalía de Granada solicitará diez años de inhabilitación para el alcalde de Salobreña, Manuel Pérez Cobo (del Partido Socialista Obrero Español -PSOE-), por un presunto delito de prevaricación cometido en su anterior etapa como regidor por cobrar a una constructora un impuesto de cuatro millones de pesetas sin estar autorizado. Tras varias suspensiones por diferentes cuestiones procesales, Pérez Cobo será juzgado por este caso ocurrido hace diez años en la Audiencia de Granada el próximo 22 de septiembre. El escrito de acusado relata que mayo de 1990 el alcalde de Salobreña concedió a la constructora Comofesa licencia de primera ocupación para la urbanización "Cala Verde", construida dentro de un proyecto más amplio "Vial Central Playa Salobreña", cuyas

contribuciones especiales habían sido suspendidas un año antes por la Sala de lo Contencioso Administrativo de la antigua Audiencia Territorial de Granada (hoy TSJA). Aunque inicialmente denegó la licencia de primera ocupación solicitada por la constructora, el acusado "con conocimiento" de la suspensión de la Sala de lo Contencioso Administrativo "supeditó la concesión de la mencionada licencia al pago de 4.028.427 pesetas", una cantidad que fue ingresado por el municipio "no estando autorizado legalmente" para ello. En su escrito de conclusiones provisionales, la Fiscalía solicita seis años de inhabilitación por un delito de prevaricación y cuatro años de suspensión y multa de 500.000 pesetas por un delito del artículo 202 del antiguo Código Penal que castiga a los funcionarios que exijan el pago de impuestos no autorizados por las leyes o por las corporaciones respectivas. Andalucía 24 Horas, 22 de Agosto de 2000 <http://www.andalucia24horas.com/>

GUATEMALA: LIMITAN TRABAJO A AUDITORES SOCIALES EN EL CONGRESO

Por orden de la Junta Directiva del Congreso, el trabajo de auditoría social que efectúa en ese organismo la entidad cívica Acción Ciudadana (AC), se ha visto limitado. Desde la legislatura anterior, AC se dedica a monitorear el trabajo de los diputados. Entre otras cosas, esa organización civil lleva registro de las leyes aprobadas, así como de los diputados más productivos, los faltistas y los viajeros. Para hacer una evaluación del primer semestre del Congreso, Manfredo Marroquín, director de AC, solicitó el 10 de agosto diversos informes a la Junta Directiva, presidida por Efraín Ríos Montt. Un día más tarde, Carlos Wholers Monroy, secretario del Legislativo, respondió a Marroquín por medio de una misiva. "Para poder brindarle la información (...) es necesario que presente por escrito (...) las actividades a que se dedica la institución que usted dirige, copia de los estatutos bajo las cuales rige sus actividades, así como el instrumento legal por medio del cual se le autoriza para poder operar como institución dentro del país", se anota en la carta que firmó Wholers. "Nos extraña que ahora los eferregistas (del Frete Republicano Guatemalteco), no sepan quiénes somos. Incluso nuestra publicación Agenda Legislativa les sirvió para su trabajo cuando fueron opositores", se quejó Marroquín. A la vez, dijo que si los ahora oficialistas quieren fiscalizar a las organizaciones del Estado, deben dar el ejemplo; de lo contrario, "no tendrán autoridad moral, por impedir nuestro trabajo". También dijo que la actitud de la Directiva parlamentaria es violatoria del texto constitucional. "Toda información de las instituciones públicas es libre", enfatizó Marroquín. A su juicio, el Frente Republicano Guatemalteco está a tiempo de corregir la arbitrariedad en que incurre. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

GUATEMALA: CONTRALORÍA PIDE RATIFICAR CONVENIO CONTRA CORRUPCIÓN

Al inaugurar el II Foro Internacional sobre Ética y Lucha contra la Corrupción, el jefe de la Contraloría General de Cuentas de la Nación (CGCN), Marco Tulio Abadío, pidió públicamente al presidente Alfonso Portillo que promueva la ratificación de la Convención Americana contra ese flagelo, suscrita por iniciativa de la Organización de Estados Americanos. Según el funcionario, en los momentos actuales la adhesión se hace casi obligatoria por los compromisos sociales que conlleva, y también porque para combatir esa mala práctica y erradicar la impunidad es necesaria la cooperación entre las naciones. Tenemos que sacar a nuestro país de esa lista; este Gobierno tiene que manifestarse para ratificar esa lucha contra la corrupción, porque es vergonzoso que figure en ella, afirmó. Siglo Veintiuno pidió la vocera del mandatario, Fernanda Castejón, una respuesta oficial ante tal planteamiento. La funcionaria dijo que prefería consultar directamente a Portillo y devolver la llamada, lo cual no ocurrió. Al acto estaba invitado Portillo, pero otras actividades le impidieron asistir, según personal de la Secretaría de Comunicación Social. Ello molestó a Abadío, pero se cuidó

de exteriorizarlo. En cambio, el alcalde capitalino, Fritz García-Gallont, a cuyo cargo estuvo la inauguración, aprovechó para hacer notoria la ausencia. Es innegable que muchas personas no están aquí presentes...Es posible que se tengan excusas tales como demasiada carga de trabajo, por compromisos adquiridos con anterioridad o simplemente por rehuir de una realidad que cada día los encierra más, pero que algún día tendrá que pedirles cuentas. Siglo XXI, 18 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: DENUNCIAN CORRUPCIÓN EN AUTORIDAD PARA EL MANEJO SUSTENTABLE DE LA CUENCA Y EL LAGO DE AMATITLÁN

Tráfico de influencias, nuevas licitaciones concesionadas a Servicios de Jardinería de la Cruz, sobrevaloración de obras e incumplimiento de contratos, son otras irregularidades halladas por auditores de la Presidencia en la Autoridad para el Manejo Sustentable de la Cuenca y el Lago de Amatitlán (Amsa), durante la gestión de Evelyn Reyna Chacón. La nueva documentación a la que tuvo acceso Siglo Veintiuno y que incluye un informe firmado por Adolfo Efraín Reyes López, asesor del Ejecutivo, fechado 28 de abril del 2000 y dirigido a Arturo Ruiz Wong, jefe de la Unidad Financiera de la Gerencia de la Presidencia, concluye: Los procesos de contratación de bienes y servicios en Amsa para 1999 fueron realizados de forma ilegal en todos sus aspectos, con el fin de obtener beneficios propios para las autoridades de dicha institución y de un grupo de empresarios. Como argumento, el estudio señala: En todos los procesos de cotización se invitaron a las mismas compañías, lo que denota un marcado preferitismo e imparcialidad en las adjudicaciones. Siglo Veintiuno buscó ayer la opinión de Reyna Chacón; empero, Isabel Casas, quien actúa como intermediaria entre la aludida y los medios de comunicación, sostuvo que, de ahora en adelante, la ex funcionaria hablará sólo en presencia de su abogado. Una auditoría realizada por la Presidencia en Amsa reveló que, durante la gestión de la referida, la entidad gubernamental concesionó obras a socios de la ex funcionaria, así como que la infraestructura de la dependencia estatal fue utilizada para promocionar a Construnatura, ente no lucrativo presidido por Reyna Chacón. Además, se descubrió que la firma Servicios de Jardinería de la Cruz, ganadora de varios concursos, es propiedad del hijo de una conserje de Amsa y que, según el informe de Reyes López, tendría alguna relación con Reyna Chacón. El estudio citado también advierte que el gerente de Opciom 3 S.A., que licitó trabajos para Amsa por 987,735.00 quetzales, es Sergio R. Chávez, ex esposo de Reyna Chacón, versión que no se pudo confirmar con el aludido, pues no se encontraba en los momentos en que se le llamó a su trabajo. El reporte añade que algunas empresas contratadas por Amsa incumplieron los plazos establecidos en los contratos, sin que se les aplicaran las multas correspondientes. Luis Mijangos, secretario general de la Presidencia, no descartó que Reyna Chacón haya incurrido en colusión, tráfico de influencias y violaciones a la Ley de Contrataciones del Estado. De esa cuenta, añadió, se revisan todos los contratos para hablar con las empresas ganadoras y verificar que los montos pagados coincidan con las obras ejecutadas. Siglo XXI, 22 de Agosto de 2000 <http://www.sigloxxicom/>

GUATEMALA: ECUATORIANO NAPOLEÓN SALTOS GALARZA, ALTERACIÓN DE LEY ``ES UN ACTO CLARO DE CORRUPCIÓN``

Manipular una ley cuando están en juego intereses de carácter económico es un acto de corrupción", afirmó ayer Napoleón Saltos Galarza, representante de la lucha anticorrupción de Ecuador. El experto, quien tuvo participación activa en el derrocamiento de los ex presidentes ecuatorianos Jamil Mahuad y Abdalá Bucaram, analizó el controvertido caso de la alteración del Decreto 43-2000, Ley del Impuesto a la Distribución de Bebidas Alcohólicas y Gaseosas, caso conocido como "Guategate",

en el cual hay indicios de culpabilidad de varios legisladores del oficialista partido en el congreso FRG (Frente Republicano Guatemalteco). El experto ecuatoriano analizó la situación durante su disertación en un foro anticorrupción realizado ayer en el Gran Teatro Nacional Miguel Angel Asturias. Guatemala, refirió, "desgraciadamente", no escapa a la tendencia peligrosa e ilegítima de vinculación entre intereses económicos de sectores beneficiarios con los políticos. "Cuando esto sucede, pueden darse fenómenos como el que hoy día observamos de alteración de resoluciones para imponer intereses particulares", dijo. El ecuatoriano consideró que el caso de la alteración legislativa debe ser discutido seriamente por los guatemaltecos; "nosotros, como observadores internacionales, simplemente pudimos constatar que hay indicios de responsabilidades que tendrían que ser solventadas internamente", añadió. Para Saltos ahora toca el turno a las autoridades judiciales, quienes deberán determinar las responsabilidades en este hecho. "Más allá del aspecto jurídico, hay una responsabilidad política que afecta la credibilidad del Congreso, y de la propia ley", expresó. A la vez, recomendó al ente investigador actuar con transparencia y evitar la interferencia de otros poderes del Estado. La Prens Libre, 18 de Agosto de 2000 <http://www.prenslibre.com.gt/>

GUATEMALA: EN ESCÁNDALO DE ALTERACIÓN DE UNA LEY. CAIGA QUIEN CAIGA ACATAREMOS RESOLUCIÓN -PRESIDENTE PORTILLO-

Su promesa de respetar el resultado de las investigaciones y su decisión de aceptar el fallo de los órganos correspondientes, caiga quién caiga, ofreció ayer el presidente Alfonso Portillo, al responder algunas de las inquietudes sobre las supuestas ilegalidades de la ley de bebidas alcohólicas. Adicionalmente, el vicepresidente Juan Francisco Reyes López estimó que toca a los acusadores probar las presuntas anomalías, pues, recordó, nadie es culpable hasta que se pruebe lo contrario. El Ministerio Público tiene la investigación y a nosotros no nos queda más que acatar la resolución, destacó Portillo, mientras reiteró que el Ejecutivo publicó el decreto tal y como llegó del Congreso. Agregó que el partido al que pertenece (Frente Republicano Guatemalteco es respetuoso de la ley, por lo que caiga quien caiga acatará lo resuelto, en alusión a un eventual fallo de culpabilidad contra el general Efraín Ríos Montt actual presidente del congreso. Siglo XXI, 23 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: ORGANISMO JUDICIAL CREA JUNTA DISCIPLINARIA PARA EVITAR ACTOS DE IMPUNIDAD, NEGLIGENCIA Y CORRUPCIÓN

Con el propósito de evitar actos de impunidad, negligencia y corrupción de los operadores de justicia del Organismo Judicial, OJ, fueron juramentados ayer los integrantes de la primera Junta Disciplinaria de ese poder. La actividad se llevó a cabo en horas de la mañana, allí donde estuvieron presentes el presidente de ese organismo, José Quesada Fernández, y los demás magistrados. El funcionario explicó que dicha ley establece tres procedimientos importantes, como los requisitos para ingresar a la Carrera Judicial y el procedimiento de evaluación. Agregó que un tercer punto es el proceso disciplinario, que enmarca cuáles podrían ser las sanciones para los jueces a quienes se compruebe su responsabilidad en una falta, que oscila desde una sanción verbal hasta ser separado del cargo. "En la Carrera Judicial está contemplado necesariamente el aspecto disciplinario, por ello creemos que esta comisión garantizará una disciplina sumamente rígida", enfatizó. "Si fuera necesario, en el análisis de las denuncias contra los jueces participará la Supervisión de Tribunales", expuso Quesada Fernández. Asimismo, indicó que hasta el momento no hay un lugar específico para instalar a los seis miembros de la Junta Disciplinaria, quienes hoy iniciarán formalmente sus funciones, por lo que en principio trabajarán en el edificio de la CSJ. Los profesionales nombrados como magistrados titulares son Telma Esperanza Aldana Hernández, Carlos Rubén García Peláez. De

suplentes, Zully Eugenia Cantoral Arango, Héctor Mauricio Rodríguez Argueta. Además, la jueza titular, Rosalba Corsantes Zúñiga de Muñoz, y el juez suplente Jorge Mynor Acevedo. Dichos funcionarios se desligarán de sus anteriores cargos, y ejercerán funciones durante un año. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

HONDURAS: INVESTIGAN EX JEFES MILITARES DE HONDURAS POR MALVERSACIÓN

Cuatro antiguos jefes de las fuerzas armadas de Honduras son investigados por malversación de fondos públicos, informó una funcionaria de un organismo contralor. La investigación fue revelada por la contralora Vera Rubí coincidiendo con un escándalo que involucra al último ex jefe de las fuerzas armadas, general retirado Mario Hung, por el presunto extravío de unos ocho millones de lempiras (537.673 dólares) del Instituto de Previsión Militar (IPM). La Contraloría investiga a los últimos cuatro jefes de las fuerzas armadas que ocuparon el cargo de 1986 a 1998, entre 12 casos de presunta corrupción de funcionarios públicos. Rubí dijo que en las investigaciones de los mandos castrenses se descubrieron "irregularidades que tienen que documentarse", pero "es un poco complicado si no tenemos informaciones fidedignas de los bancos, porque no hemos podido confirmar algunos cheques". La funcionaria formuló la existencia de "irregularidades" en la administración de los fondos militares en estos cuatro mandatos en una conferencia de prensa en la que anunció su dimisión al cargo a partir del martes para lanzarse por la nominación presidencial del gobernante Partido Liberal. Los otros antiguos jefes de las fuerzas armadas que son investigados por la Contraloría son los generales retirados Arnulfo Cantarero, Humberto Regalado y Luis Discua. El cargo de jefe de las fuerzas armadas, que en las décadas de 1960, 1970 y 1980 fue de mayor poder e influencia que los mismos mandatarios civiles, fue suprimido en 1998 y sustituido por el de un ministro de Defensa. Hung se encuentra involucrado en un escándalo de presunta malversación de caudales del IPM, un organismo que nuclea una serie de empresas bajo control militar y cuyo fondos se destinan a pagar las jubilaciones de los militares retirados. La actual administración del IPM asegura que cuando la junta directiva del cartel la presidía Hung se pagaron unos 5,2 millones de lempiras (336.021 dólares) en efectivo por pago de impuestos a la alcaldía de Tegucigalpa. Los funcionarios del IPM dicen que los fondos salieron del organismo, pero los de la alcaldía aseguran que no los recibieron. Hung aseguró el martes que autorizó el desembolso de los fondos para pagar los impuestos. La Nación, 18 de Agosto de 2000 <http://www.nacion.co.cr/>

HONDURAS: LA FISCALÍA GENERAL ACUSA AL INSTITUTO DE PREVISIÓN MILITAR DE CORRUPCIÓN ECONÓMICA

La Fiscalía General de Honduras ha determinado que el Instituto de Previsión Militar (IPM), ha realizado acciones de corrupción económica. Al momento existe un faltante de más de medio millón de dólares. Los principales comprometidos en este dolo son justamente los directores del IPM, los cuales administraban personalmente dichos recursos. El general Mario Hung Pacheco, el ex todopoderoso comandante el jefe de las Fuerzas Armadas, hasta 1999, ha dicho que él no tiene nada que ver en este asunto. Los demás exdirectores del Instituto de Previsión tampoco asumen sus responsabilidades, y más aún, exigen a la alcaldía de Tegucigalpa la devolución de dichos recursos y con un interés del 25% anual. Esto ha sido rechazado por las autoridades civiles de la capital hondureña. Las Fuerzas Armadas y en especial el Instituto de Previsión Militar es considerada como uno de los emporios comerciales más grandes de Honduras, el octavo del país. Su capital se estima en unos 300 millones de dólares, dinero que siempre fue manejado por los comandantes militares como dinero propio y de él sacaban pingües ganancias. Informativos Net, España (Hn/LY/Mt/Ppc/mc), 24

de Agosto de 2000 <http://www.informativos.net/>

HONDURAS: MINISTRO DE SEGURIDAD COMBATIRÁ LA CORRUPCIÓN POLICIAL

El ministro de Seguridad de Honduras, Gautama Fonseca, dijo el miércoles que combatirá la corrupción en la policía y que enjuiciará a cualquier efectivo cuya culpabilidad sea demostrada. Fonseca, un respetado abogado de 68 años, dijo que si a los policías se les encuentra en violación de la ley, ``van a padecer las consecuencias, no se tratará solamente de despidos, sino de seguirle el juicio que corresponda por corrupción``. Fonseca, nombrado el martes nuevo ministro de Seguridad por el presidente Carlos Flores, asume el cargo en medio de una ola de violencia delictiva en Honduras, con asaltos frecuentes a bancos, secuestros, robos de vehículos, asaltos callejeros, atentados y otros crímenes. El clima de inseguridad se acentuó tras descubrirse que dos oficiales de la policía estaban ligados a bandas de narcotraficantes y se suspendió a otros dos. Mientras, el subdirector de la policía, Andrés Urtecho, pidió dos meses de excedencia mientras es sujeto de investigación. Pero Fonseca dijo que la culpa deben asumirla, también, quienes sobornan a los efectivos policiales para evadir castigo por alguna transgresión. Tanto organismos estatales como privados de defensa de los derechos humanos han reclamado al gobierno la depuración de la policía, que estuvo bajo mando de los militares desde 1963 hasta 1998, cuando un civil asumió el cargo de ministro de Seguridad. Noticias Yahoo, (Reuters), 24 de Agosto de 2000 <http://espanol.yahoo.com/noticias/>

INDONESIA: EX PRESIDENTE SUHARTO SERÁ JUZGADO EL 31 DE AGOSTO POR CORRUPCIÓN

El ex presidente de Indonesia caído en desgracia, Suharto, será juzgado por corrupción el 31 de agosto y tendrá que sentarse en el banquillo a pesar de los informes sobre su delicado estado de salud, dijo miembro del tribunal el miércoles. La acusación dice que, al menos, 130 personas serán llamadas para testificar en el que será el juicio del siglo en Indonesia. "Suharto debe someterse a juicio. He dicho que ordenaré a los abogados que le hagan acudir al juicio", dijo el juez jefe, Lalu Mariyun, de la Corte del Sur de Yakarta, en una rueda de prensa. El fiscal general del Estado ha acusado formalmente a Suharto de apoderarse de más de 550 millones de dólares (unos 100.000 millones de pesetas) procedentes de fundaciones de caridad durante su paso por el poder. Los abogados de Suharto han declarado que su cliente estaba demasiado enfermo para someterse a un juicio, alegando que tiene problemas para contestar a cuestiones básicas. El ex general sufrió un ataque el pasado año y tuvo que ser hospitalizado por otro suceso. La presencia del viejo déspota en un banquillo será una imagen extraordinaria para los ciudadanos, muchos de los cuales no habían conocido a otros líder hasta que fue obligado a dejar el poder en 1998 ante las graves crisis económica y de violencia que estalló en el país. Esto profundizará en la humillación para el hombre que dirigió los destinos de Indonesia durante 32 años hacia un crecimiento económico y una estabilidad política sin precedentes que llevó a cabo con mano de hierro y con constantes violaciones de los derechos humanos. La acusación ha dicho que Suharto se enfrenta a más de 20 años de cárcel y a un multa de 30 millones de dólares. Otros funcionarios habían comentado previamente que Suharto podría ser encarcelado de por vida. Sin embargo, el presidente de Indonesia Abdurrahman Wahid ha dicho que perdonaría a Suharto si es condenado. Suharto y su familia han sido acusados de amasar una fortuna a través de prácticas de corrupción valorada en más de 45.000 millones de pesetas durante su mandato. Todos ellos han negado haber actuado de forma errónea. El cuarto país más poblado del mundo sigue luchando por recuperarse de la crisis que marcó el fin de la era de hierro de Suharto. Se ha producido una fuerte presión pública para sentar a Suharto en el banquillo y analistas políticos han declarado

que el gobierno ha tenido que aceptar esta petición ante el temor de enfrentarse a nuevas protestas callejeras. En todo caso, algunos dicen que un posterior indulto probablemente sería aceptado por la mayoría aunque podría provocar protestas estudiantiles. Noticias Yahoo España, (Reuters), 23 de Agosto de 2000 <http://es.news.yahoo.com/>

ISRAEL: LÍDER DEL PARTIDO ULTRAORTODOXO DEBERÁ IR A LA CÁRCEL POR CORRUPCIÓN

Los líderes del partido ultraortodoxo sefardí Shas acogieron ayer con gran violencia verbal la decisión del presidente del Tribunal Supremo de Israel, Aharon Barak, de rechazar la apelación que había presentado el ex-ministro Arie Deri, condenado a tres años de prisión por corrupción. La decisión significa que Deri no tiene derecho a un nuevo juicio y deberá ingresar en la cárcel el próximo 3 de septiembre. En gran medida, la decisión de Aharon Barak (sin relación con el primer ministro Ehud Barak) provocó un guerra de declaraciones entre judíos ashkenazis, es decir, de origen europeo, y judíos sefardíes, o sea, judíos de origen oriental y de la península ibérica. El Comercio, España, 24 de Agosto de 2000 <http://www.elcomerciodigital.com/>

MÉXICO: CONSIGNADAS 877 DENUNCIAS POR DESVÍOS DE RECURSOS FEDERALES EN PROCESOS ELECTORALES

La Comisión Especial 2000 encargada de vigilar que no se desvíen recursos federales a los procesos electorales, entregó su informe final donde consignó que recibió 877 denuncias formales, de las cuales 407 ya son investigadas por las autoridades y dependencias mientras las 385 restantes fueron desechadas por improcedentes. Los programas sociales más denunciados fueron: Progresá, Procampo, Alianza para el Campo, Diconsa, Liconsa, Empleo Temporal, Crédito a la Palabra, Fonden y Conaza. Las dependencias y organismos más señalados por un presunto desvío de recursos públicos hacia las campañas son las secretarías de Desarrollo Social, Agricultura, Medio Ambiente, Defensa Nacional, Relaciones Exteriores así como Petroleos de México (PEMEX), Instituto Mexicano de Seguridad Social (IMSS), El Servicio Postal Mexicano (Sepomex), Comisión para la Regularización de la Tenencia de la Tierra (Corett), Comisión Nacional del Agua (Conagua), Comisión Federal de Electricidad (CFE), Instituto del Fondo Nacional de la Vivienda para los Trabajadores (Infonavit) y Desarrollo Integral de la Familia (DIF). Con motivo de las inundaciones en Tabasco la Cámara de Diputados recibió denuncias por un presunto desvío de la ayuda a los damnificados con fines proselitistas, que están pendientes todavía de analizarse y determinar si hay elementos para fincar responsabilidades. En un reporte firmado por todas las fracciones -menos el PRI- los diputados concluyen que la negativa de las autoridades gubernamentales de los 3 niveles a vigilar y prevenir el desvío de recursos públicos con fines electorales "ha sido resultado de la costumbre de utilizar los programas sociales para beneficio del Partido Revolucionario Institucional, siendo en repetidas ocasiones éstos los mejores medios para hacer proselitismo a favor de sus candidatos tricolores". El texto que aparece en la Gaceta Parlamentaria los diputados salientes de la LVII legislatura recomiendan a sus sucesores "prevenir y sancionar" el uso ilegal de recursos del erario hacia las campañas electorales. El Excelsior, 22 de Agosto de 2000 <http://www.excelsior.com.mx/>

MÉXICO: CONTRALORÍA GENERAL INVESTIGA LICITACIONES EN LA SECRETARÍA DE SEGURIDAD PÚBLICA

La Contraloría General del Distrito Federal investiga a funcionarios de la Secretaría de Seguridad Pública, del área de adquisiciones, a raíz de las distintas quejas, inconformidades y denuncias que

proveedores han interpuesto en su contra. La Contraloría del gobierno capitalino informó, que a pesar de que no se han podido corroborar presuntos actos de extorsión y corrupción por parte de los servidores públicos, ha llamado la atención que en los últimos 12 meses, por lo menos cinco empresas han presentado varios recursos de inconformidad respecto de las asignaciones de las licitaciones en ha emitido esa dependencia. El común denominador que prevalece en cada una de las quejas por parte de los proveedores, es en el sentido de que los encargados de otorgar las licitaciones benefician, de manera dudosa, a determinadas empresas. Esto ha originado que por lo menos este año la SSP no podrá adquirir 8 mil 771 chalecos antibala, 4 helicópteros y motopatruillas, debido a que los recursos destinados a estas licitaciones están "congelados" porque forman parte de juicios mercantiles y penales. A raíz de estas inconformidades, la Contraloría capitalina reconoció que se encuentran sujetos a investigación, Joel Santana Benhumea, director de Recursos Materiales; Federico Cecchetti Peregrini, subdirector de Adquisiciones; capitán piloto aviador, Carlos Antonio Medina Carrasales, director de Servicios Aéreos y Genaro Pérez Rocha, director general de Servicios de Apoyo, de la SSP. El Universal, 23 de Agosto de 2000 <http://www.el-universal.com.mx/>

MÉXICO: NO APLICARÁN CASTIGO A EX FUNCIONARIOS CORRUPTOS

Los diputados locales recibirán hoy un informe para conocer las causas que provocaron que prescribieran 300 expedientes de ex servidores públicos que laboraron durante la administración de Óscar Espinosa Villarreal. Más de 80 ex servidores públicos que trabajaron durante 1995 y 1996 en la gestión del ex regente no serán castigados ni encarcelados por cometer irregularidades administrativas o actos de corrupción, porque sus casos no fueron bien integrados para que la autoridad judicial actuara en su contra y a tiempo. Desde principios de este mes, los diputados que integran la Comisión de Vigilancia de la Contaduría Mayor pidieron una investigación al respecto a la Contraloría Interna de la Contaduría Mayor de Hacienda de la Asamblea Legislativa (CMHALDF), con el fin de que investigara las causas que provocaron esta situación. Trascendió que existe la sospecha de que el Departamento Jurídico de la misma Contaduría tuvo algo que ver en este problema, desde la gestión de la ex contadora Araceli Pitman y en la actual administración a cargo de Carlos Nava. Hay otras versiones que señalan que la actual Ley Orgánica de la Contaduría Mayor de Hacienda tiene diversos errores que obstaculiza la integración de los expedientes y que se entreguen a tiempo. En días pasados, José Narro sostuvo que con la información que van a solicitar sabrán si existe o no responsabilidad por parte de algún funcionario de la Contaduría Mayor o de la Contraloría General del gobierno capitalino. Por su parte, los legisladores perredistas Miguel Ángel Peláez y Ricardo Martínez Atalá, explicaron que durante la reunión de trabajo esperan conocer los resultados finales de esa investigación porque no es justo que ex servidores no sean sancionados, en caso de que hayan cometido algún acto de corrupción. El Universal, 22 de Agosto de 2000 <http://www.el-universal.com.mx/>

NICARAGUA: CIUDADANOS NICARAGÜENSES PIENSAN QUE VIVEN EN EL SENO DE UN ESTADO CORRUPTO

Un informe sobre Desarrollo Humano en Nicaragua, dado a conocer por el Programa de las Naciones Unidas para el Desarrollo PNUD, afirma que el 90 por ciento de los ciudadanos nicaragüenses perciben que existe corrupción en el Estado. El informe expresa que la pobreza afecta casi a la mitad de la población. De estas un 17 por ciento se encuentra en la extrema pobreza, además de no contar con los servicios básicos como energía eléctrica, transporte y comunicaciones, entre otros. Asimismo, el PNUD, señala que el acceso de la población a los beneficios de apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, que habitan en los

sectores urbanos y las zonas rurales Por su parte Ana Quiroz, presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción, CCER, refutó las declaraciones del gobierno en el sentido de que los "nicaragüenses estamos mejor que hace algunos años atrás". Quiroz se preguntó: ¿dónde está la gente que ha mejorado? En este sentido, consideró poco confiables los datos en donde se menciona como logro, el hecho que se hayan mantenido los niveles de educación. Con el crecimiento poblacional, aunque se mantenga la cobertura en la enseñanza, también aumentan los niños y niñas que se quedan sin educación, indicó Ana Quiroz. Sobre la estrategia del gobierno, para la reducción de la pobreza Ana Quiroz, consideró que la corrupción y la pobreza son el principal obstáculo para el desarrollo. Esto se refleja en el incremento del desempleo, la migración y las difíciles condiciones de vida de la mayoría de nicaragüenses, indicó. Informativos Net, España (Ni/QR/Ong-Oi/Pe/mc), 22 de Agosto de 2000 <http://www.informativos.net/>

NICARAGUA: INFORME DE PROGRAMA DE NACIONES UNIDAS REFLEJA PERCEPCIÓN GENERALIZADA DE CORRUPCIÓN Y CRECIDA POBREZA

En general, la opinión de la ciudadanía expresada en encuestas anuales desde 1997 al 2000, han mostrado que cerca del 90 por ciento de los ciudadanos perciben que existe corrupción en el Estado. Este es uno de los datos reflejados en el informe de Desarrollo Humano en Nicaragua 2000, presentado por el Programa de Naciones Unidas para el Desarrollo (PNUD). El informe también expresa que la pobreza afecta casi la mitad de la población, un equivalente a 2.3 millones de personas. De éstas, un 17 por ciento, o sea 830 mil, se encuentran en la extrema pobreza. Así mismo se señala que a consecuencia de dos décadas de bajas inversiones, existe una infraestructura inadecuada en energía, transporte y comunicaciones. El acceso desigual de la población a los beneficios de la apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, entre las personas capacitadas y las carentes de formación, de los sectores urbanos y las zonas rurales. Aunque el documento muestra algunas dificultades del país, también fue altamente refutado por recalcar avances sociales que Ana Quirós, la presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción (CCER), consideró poco confiables. En el campo de la construcción de una democracia participativa y un Estado de Derecho, Nicaragua presenta avances en algunos campos, pero también muestra una institucionalidad frágil. Además, en ámbito del medio ambiente menciona que de continuar la ampliación de la frontera agrícola, el país tendrá más amenazas y riesgos de desastres naturales. Ante la falta de oportunidades en el país, la migración se convierten en un recurso para asegurar la sobrevivencia. Las remesas familiares de 1999 se calculan entre 300 millones y 600 millones de dólares. Por su parte, Carmelo Angulo Barturen, representante del PNUD, dijo que "la cooperación externa no llegó para quedarse. Esto puede crear vicios. Es importante que Nicaragua se desarrolle para que el país logre salir adelante por sí sola". Agregó que el informe del PNUD no es acusador, sino que presenta datos que puedan servir de base para que el país incida en los aspectos primordiales. El Nuevo Diario, 18 de Agosto de 2000 <http://www.elnuevodiario.com.ni/>

NICARAGUA: PRESIDENTE ARNOLDO ALEMÁN, INCAPAZ DE COMBATIR LA CORRUPCIÓN SEGÚN ENCUESTA

Más de 72 por ciento de los nicaragüenses piensa que el Presidente Arnoldo Alemán ha sido incapaz de combatir la corrupción durante sus tres años de gobierno, según una encuesta de la firma costarricense Cid-Gallup divulgada hoy aquí. El sondeo, efectuado entre 1,245 personas de todo el país a inicios de este mes, reveló que 24 por ciento de la población considera "mala" la gestión del Mandatario para disminuir los ilícitos en el gobierno, mientras 48.3 por ciento la calificó como

"pésima". Solamente uno por ciento de los encuestados catalogó de "excelente" la labor del Presidente y 7.5 opinó que es "buena", de acuerdo a la consulta que abordó diversos problemas locales y la opinión popular sobre las autoridades y líderes políticos del país. Para 42 por ciento de los consultados, las condiciones de vida (pobreza y desempleo) han empeorado en Nicaragua desde que Alemán asumió la Presidencia en 1997. Consultado sobre la encuesta, cuya primera parte fue publicada ayer en medios locales, Alemán desestimó las cifras que indican una baja popularidad del gobierno y del oficial Partido Liberal Constitucionalista (PLC) de cara a los comicios municipales del próximo 5 de noviembre. "El 5 de noviembre va a ser la mejor encuesta y la más verdadera", dijo al asegurar que en los comicios el PLC obtendrá más de 100 de las 147 alcaldías del país. "Mi partido ha hecho obras y el pueblo lo ve, no necesita encuestas para ganar", dijo. El Excelsior, México (DPA, Xinhua y AP) 24 de Agosto de 2000 <http://www.excelsior.com.mx/>

PANAMÁ: ``CONTRALOR DEBE ABSTENERSE DE PRONUNCIAMIENTOS APRESURADOS SOBRE INVESTIGACIÓN CONTRA ALTOS FUNCIONARIOS``

Las tensiones entre la Contraloría y la Directiva de la Caja de Seguro Social no bajan de intensidad. Mientras el Subcontralor Enrique Lau anuncia "nuevos hallazgos" en la investigación promovida contra altos funcionarios de la Institución, éstos le exigen a la agencia fiscalizadora que se abstenga de pronunciamientos apresurados. Luis A. González González la Junta Directiva de la Caja de Seguro Social, por votación unánime, decidió pedir al Contralor General de la República, Alvin Weeden, que se abstenga de hacer algún pronunciamiento en cuanto a las investigaciones que adelanta sobre supuestos nuevos "hallazgos" en el Seguro, hasta tanto se hayan concluido las mismas y se cumpla fehacientemente con el debido proceso legal. La decisión fue dada a conocer mediante nota dirigida al Contralor, la cual fue leída y entregada a los medios de comunicación social por el presidente de la Junta Directiva, Rafael Medina, luego de culminar la sesión ordinaria de esta semana que duró casi cinco horas. Los demás miembros de la Junta estuvieron presentes. Asimismo, la decisión fue acordada por los directores después de que el Subcontralor, Enrique Lau, quien actuó como principal en la reunión, se retiró del salón tras manifestar que la Contraloría lleva a cabo una investigación "sobre hallazgos graves" dentro de la CSS que aparentemente involucra a altos funcionarios de la Institución. Cabe señalar que el director del Seguro, doctor Juan Jované, reiteró su interés de seguir cumpliendo con su trabajo como hasta ahora lo hace. De hecho, la Junta Directiva de la Caja aprobó, en la misma votación, pedir también un informe relacionado a los señalamientos expresados por el Subcontralor en dicha sesión. Lau, quien estuvo sólo por unas horas en la Junta no quiso adelantar mayores detalles sobre el caso al salir del salón de reuniones. Igualmente, la nota señala que al Subcontralor le fue aclarado que en ningún momento se ha pedido una investigación en su contra, tal como lo publicó un diario local, por lo que tampoco existe ninguna acción interna que lo involucre. El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: AUDITORÍA CONFIRMA ANOMALÍAS EN PASADA GESTIÓN DE LA CAJA DE SEGURO SOCIAL

El ex director de Relaciones Públicas de la Caja de Seguro Social (CSS) Santiago Quiróz contrató, mientras ocupó ese cargo, los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según señala un informe preliminar de auditoría de la Contraloría que está próximo a ser concluido, informaron fuentes allegadas a las investigaciones. Consultado al respecto, Santiago Quiróz -en declaraciones previas- negó haber cometido tales irregularidades, y además aseguró que cuando las autoridades competentes lo consideren prudente, explicará las dudas surgidas en torno a su actuación como jefe de Relaciones Públicas de la CSS. Los trabajos de auditoría ya

culminaron, aseguró una de las fuentes, y ahora se entrará en la etapa de recepción de declaración a las personas presuntamente relacionadas con estas anomalías. Entre estas anomalías hay cheques pagados sin documentos sustentadores por un monto de 220 mil 919 dólares con 10 centésimos. Culminada esta fase, explicó, se procederá a enviar el informe final al contralor, Alvin Weeden Gamboa, y éste le dará traspaso a las instancias judiciales correspondientes. De acuerdo con la fuente, el estudio consistió en la evaluación de la metodología utilizada por Relaciones Públicas de la Caja para la adquisición de bienes y servicios a través del proceso de compras menores; la verificación de las partidas presupuestarias comprometidas por el Departamento de Presupuesto y los pagos efectuados por la Dirección Nacional de Contabilidad. Las empresas beneficiadas con estos negocios son Corporación de Publicidad, S.A., Publich Photo, S.A., y Publich Production, S.A. Según el Registro Público -se anota en el informe- en las tres empresas aparecen como directivos Enith Marlene Atencio, Melva Flores y Elizabeth Atencio. Enith Marlene Atencio, según otras fuentes, es la prometida de Quiróz, mientras que Elizabeth Atencio es una de las hermanas de ésta. Melva Flores, por su parte, mantiene una relación de amistad con todos ellos. Tal relación fue negada igualmente por Quiróz. Los pagos de las órdenes de compras emitidas para la adquisición de panfletos, afiches, revistas y otros, realizadas por el departamento de Relaciones Públicas de la CSS, según el informe, totalizaron 234 mil 754 con 60 centésimos, y los beneficiados fueron los parientes de Quiróz. En la auditoría se descubrió, asimismo, la existencia de cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. Igualmente el estudio reflejó la división de la materia en las compras efectuadas que no permitieron la debida competencia y ello -a juicio de los funcionarios de Contraloría- "le restó transparencia a los procesos" al no publicarse en los medios escritos y evitó, a su vez, la participación de mayores oferentes. Por ejemplo, el 5 de noviembre de 1998 se emitió una orden de compra sin número a favor de la empresa Corporación de Publicidad para el suministro de 250 afiches, y esta presentó una cotización por un valor de mil dólares, pese a que la empresa ALFLO, S.A. había cotizado la suma de 680 dólares. A juicio de los auditores de Contraloría, en casos como el señalado "no se veló por los mejores intereses de la institución, al elegirse a un proveedor con un precio mayor". De igual forma, el 27 de noviembre de 1998 se suscribió una orden de compra a favor de Publich Photo, S.A. por 3 mil 780 dólares para el suministro de 5 mil panfletos, sin embargo, el cheque de pago salió a nombre de Corporación de Publicidad, S.A., sin que mediara cesión de pago a favor de esta última. Quiróz, quien en la actualidad labora como asesor de los magistrados del Tribunal Electoral (TE), asumió la jefatura de Relaciones Públicas de la Caja tras la llegada de Ricardo Martinelli a esa institución. Durante la pasada campaña proselitista, ejerció funciones en la jefatura de prensa del aspirante presidencial Martín Torrijos. La fuente allegada a las investigaciones en la Contraloría fue enfática al señalar que "se han acreditado todas las irregularidades. Si están allí [consignadas] es porque esas irregularidades están probadas". La Prensa, 21 de Agosto de 2000 <http://www.sinfo.net/prensa/>

PANAMÁ: CONTRALOR DE LA REPÚBLICA ANUNCIA INVESTIGACIÓN CONTRA EL SUBCONTRALOR LAU

El Contralor de la República, Alvin Weeden, anunció en conferencia de prensa la iniciación de un proceso de investigación al Subcontralor Enrique Lau, debido a denuncias de que el mismo cuando fungía como subdirector de la CSS, recibió un equipo valorado en no menos de un millón de balboas, sabiendo que estaba incompleto. Según el Contralor Weeden estas investigaciones no se realizarán porque directivos de la Caja de Seguro Social lo hayan solicitado, sino porque el mismo Subcontralor Lau, se lo pidió. A la vez manifiesta Weeden que en días anteriores el Subcontralor puso a

disposición de su cargo (del Contralor), para que realizara estas investigaciones. Las declaraciones del Contralor Weeden surgen luego de que directivos de la Caja de Seguro Social emitieran una información en donde pedían a éste investigaran al Subcontralor, lo cual él desmintió. En informaciones sobre el caso, se da a conocer que los representantes de la empresa que entregó el equipo a la CSS (Tomógrafo axial), prefirieron no comentar nada sobre el asunto, pero una fuente de entero crédito mencionó que el equipo entregado cumplía con los requisitos exigidos y que de ello pueden dar fe consultores internacionales que así lo certificaron. Un memorándum que se refiere al Informe sobre la gestión realizada con referencia al recibo del tomógrafo axial computarizado, describe la forma como Lau favoreció la admisión del aparato y desatendió instrucciones de Marianela Morales (quien en la época fungía como directora de la CSS). El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: CONTRALORÍA CITA A EX JEFE DE RELACIONES PÚBLICAS DE LA CAJA DE SEGURO SOCIAL PARA QUE ACLARE PRESUNTAS IRREGULARIDADES

La Contraloría General citó a Santiago Quiróz, ex jefe de Relaciones Públicas de la Caja de Seguro Social (CSS), con el fin de que "aclare" su participación en el manejo presuntamente irregular en el proceso de compras efectuado por ese departamento entre los años 1998 y 1999. Tal información fue facilitada por una fuente allegada a las investigaciones, quien aseguró que la referida citación está suscrita por el propio contralor, Alvin Weeden Gamboa. Dicha citación, explicó la fuente, está dirigida a que Quiróz, quien ejerce funciones de asesoría de los magistrados del Tribunal Electoral (TE), tenga la oportunidad de facilitar los documentos que aclaren las anomalías registradas. La Contraloría realiza una investigación destinada a determinar responsabilidad en el proceso de compra llevado a cabo en el referido departamento de la CSS, cuando Quiróz ejercía las tareas de jefe del aludido departamento. Según las diligencias, recordó el informante, en el departamento de Relaciones Públicas de la CSS durante el período mencionado se efectuaron pagos por bienes, cuya recepción no está debidamente documentada con sus informes y las correspondientes facturas. Quiróz, mientras ocupó ese cargo, contrató los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según las investigaciones realizadas por la Contraloría. Entre las pruebas hay cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. La Prensa, 22 de Agosto de 2000 <http://www.sinfo.net/prensa/hoy/>

PARAGUAY: ASUMIÓ NUEVO CONTRALOR Y PROMETE INVESTIGAR A SU ANTECESOR. DESPIDEN A FRETES VENTRE CON EL GRITO DE CORRUPTO

La salida del ex contralor fue tan tumultuosa, tal como lo fue una gran parte de su administración. Entre empujones, empellones y gritos de ¡bandido, corrupto! por parte de los funcionarios detractores, Daniel Fretes Ventre dejó el cargo que ocupó por cinco años. Su sucesor, Francisco Javier Galiano, abogado de 43 años, anunció que investigará la gestión de su antecesor, quien está acusado de 19 delitos. Una batahola infernal generó la salida de Fretes Ventre de la Contraloría General de la República, luego de la forzada conferencia de prensa que en principio no tenía pensado realizar. Al dejar el local, el ex contralor, en forma increíble y maleducada y ya dentro del automóvil, realizó un "corte de manga" dirigido a los que, en ese momento, se encontraban en el patio de la institución. Este hecho generó una acalorada discusión, para que minutos después se inicie un intercambio de golpes de puño entre los propios funcionarios de la Contraloría, ante la pasiva mirada de los policías presentes en el lugar. Momentos antes, Fretes Ventre en conferencia de prensa y en forma inconcebible, primero acusó a la prensa de ser la culpable de todos los delitos que se lo inculpa

y amenazó a aquellos que lo denunciaron, aunque no quiso dar nombres. Más tarde dijo que las denuncias en su contra tienen un interés político, realizado por un grupo de personas, absteniéndose nuevamente de dar nombres. Al tiempo de anunciar transparencia en su gestión, el flamante contralor general de la República, Francisco Javier Galiano, dijo que investigará a su antecesor, quien está acusado de la comisión de unos 19 hechos punibles durante el ejercicio del cargo. Fretes Ventre se "salvó" de la investigación judicial gracias al apoyo de los libero-oviedistas de la Cámara de Diputados, quienes negaron el pedido de desafuero que realizaron autoridades judiciales. Fue luego que la Cámara de Diputados haya tomado el juramento al mismo y al subcontralor, Mario Estigarribia, durante la sesión ordinaria de este cuerpo legislativo. El mismo grupo de diputados que dio una manta de impunidad a Fretes Ventre es el que votó por al candidatura de Galiano para que llegue a la Contraloría. Ayer, luego del juramento, Galiano explicó que una comisión ya está realizando una especie de auditoría a la gestión de Fretes Ventre, a fin de determinar su responsabilidad en los hechos delictivos en los cuales se lo involucra. Diario ABC Color, 18 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PARAGUAY: DENUNCIAN PEDIDO DE COIMAS EN ADUANA DE LA CIUDAD DE MARISCAL

Graves denuncias pesan contra la aduana de la ciudad de Mariscal Estigarribia, donde a diario comerciantes son objeto de amenazas, chantaje y secuestro de documentos para obligarles a la entrega de jugosas coimas. Acorde a la denuncia radicada en la fiscalía local, solamente el último fin de semana los funcionarios aduaneros se apoderaron de 2.300 dólares y dos motores de la marca Honda; todo esto, lógicamente, sin expedir recibo alguno. En el primer caso, la aduana de la ciudad de Mariscal Estigarribia atajó un cargamento de 130.000 kilos de sal fina, proveniente de Bolivia. De los choferes bolivianos Armino Centro, Rubén Flores y Mario Centro los funcionarios secuestraron la documentación personal, el título de los vehículos (tres camiones) y les obligaron a pagar 300 dólares, sin recibo, acorde a la denuncia realizada posteriormente ante el agente fiscal Gustavo Patiño. El hecho involucra a los funcionarios aduaneros Juan González y Ludserio Borba. El cargamento, que posteriormente fue liberado, entró de esta manera de contrabando al Chaco central, donde fue comercializado. En el segundo caso fue amenazado en la Picada 500 el comerciante boliviano Freddy Toledo, quien vino con 24 motores de la marca Honda, importados desde Villa Montes, Bolivia. Acorde a la denuncia, el comerciante fue amenazado en la Picada 500 supuestamente por agentes de la Dinar, quienes exigieron el pago de 10.000 dólares. Al no prosperar el chantaje, los agentes habrían avisado a la aduana en la ciudad de Mariscal Estigarribia, donde el cargamento fue atajado. Del chofer secuestraron toda su documentación personal y del vehículo, incluso la factura de la mercadería, que indicaba el valor de la mercadería con un valor de 9.990 dólares. El agente aduanero -en evidente estado de ebriedad, acorde a la denuncia- alegó la ilegalidad de la factura e insistió en que el cargamento era mercadería de contrabando y con un valor de 100 millones de guaraníes. El jefe de la aduana habría exigido el pago de 5.000 dólares y la entrega de algunos de los motores, y en reiteradas ocasiones habría dicho a los comerciantes que "la solución del problema depende de ustedes". Posteriormente, los socios comerciantes Ernst Loewen y Willy Toews trataron de pagar la tasa normal de importación, lo que fue rechazado por el agente aduanero. Del hecho fueron informados después el intendente de Mariscal Estigarribia y la jueza María Teresa Brítez, quien finalmente llegó al lugar del hecho y trató de solucionar el inconveniente. El agente Raúl Villanueva, finalmente, habría cobrado la suma de 2.000 dólares y se apoderó además de dos motores de la marca Honda, todo esto sin documentación alguna, acorde a la denuncia. Al recibir el dinero y la mercadería, los aduaneros devolvieron a los choferes sus documentos. De los hechos fue

informado el mismo domingo el funcionario aduanero Sixto Cáceres, de la aduana de Asunción. Estos últimos hechos se suman a una serie de denuncias similares que mantienen en zozobra a comerciantes y empresas de transporte público que tratan de mantener relaciones comerciales con el vecino país a través del Chaco. Fuentes fidedignas aseguran que el puesto aduanero de la ciudad de Mariscal Estigarribia "recauda" por semana entre 10 y 15.000 dólares, manteniendo en zozobra a la población de esta zona del país. Diario ABC Color, 23 de Agosto de 2000 <http://www.abc.com.py/>

PARAGUAY: HARÁN AUDITORÍA EN LA VICEPRESIDENCIA. HABRÍA MANEJO DOLOSO, SEGÚN LEGISLADOR

El Partido Liberal Radical Auténtico (PLRA) está en conocimiento de contrataciones de nuevos funcionarios que se han hecho desde que el cargo quedó vacante. El legislador Espínola informó que la Vicepresidencia ejecutó el 52 por ciento del presupuesto asignado para el presente año, que equivale a aproximadamente a un monto de 1.500 millones de guaraníes. Esta situación contrasta con otros órganos estatales que apenas han alcanzado a ejecutar más del 20 por ciento de lo presupuestado para el 2.000, debido al difícil momento que atraviesan las arcas del Estado. Concretamente comparó con el Congreso nacional, que apenas ha usado el 26 por ciento de los recursos asignados para el presente año. "Ante todo, lo que el Vicepresidente debe hacer es una auditoría a fondo de la Vicepresidencia para ver cómo ha sucedido este milagro de la dilapidación del dinero del pueblo. Se han nombrado funcionarios sin que haya Vicepresidente, se imaginan la burla, la bofetada que esto significa para el pueblo. En ese lugar sigue un montón de gente que está chupándole la sangre al pueblo", dijo el legislador. Indicó que una vez que se aclaren todas estas cosas, el Vicepresidente podrá pensar cómo y con qué elementos cuenta para conformar su equipo de trabajo y empezar a trabajar por el bien del país. Diario Noticias, 22 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PARAGUAY: JURADO PROCESA AL FISCAL DENUNCIADO POR PRESUNTA COIMA

El Jurado de Enjuiciamiento de Magistrados inició la investigación del denunciado fiscal de Ciudad del Este, Edward Friedrich Armas Godoy y solicitó ayer a la Corte Suprema de Justicia la suspensión del mismo en el ejercicio de sus funciones. Asimismo, previo procesamiento, envió todos los antecedentes al juez penal de garantías de la circunscripción judicial del Alto Paraná y Canindeyú, para la apertura del sumario penal por la presunta comisión de varios delitos. Igualmente, el Jurado dispuso la suspensión de la tramitación de la causa en espera de una sentencia definitiva por parte de la jurisdicción penal, ya que la condena por delitos comunes conlleva separación del cargo. Como antecedente se recuerda que la jueza Beatriz Venialgo, en compañía del fiscal de turno, encontró en la oficina de Armas Godoy en el Alto Paraná cinco mil dólares. La mencionada suma le fue entregada al fiscal Armas Godoy por un ciudadano brasileño en concepto de coima para lograr el levantamiento de la medida cautelar que pesaba contra las mercaderías incautadas de su propiedad. El mencionado fiscal le había solicitado para la liberación de las mercaderías quince mil dólares. Ante esta situación el ciudadano brasileño radicó la denuncia ante la jueza Venialgo y le entregó cinco mil dólares marcados a Armas Godoy, suma que durante el allanamiento fue encontrada en su oficina. "Esta resolución no constituye en modo alguno prejuizgamiento sobre el fondo de la cuestión, por el contrario, somete al denunciado a la Justicia Ordinaria, a los efectos de que, en ese ámbito, pueda esclarecerse los hechos que se le atribuyen", señala la resolución del Jurado de Enjuiciamiento de Magistrados. Diario Noticias, 22 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PERÚ: 4,000 VECINOS EXIGEN INVESTIGAR IRREGULARIDADES DE ALCALDE

CHIROQUE

Unos 4,000 vecinos de San Juan de Lurigancho marcharon ayer al mediodía hasta la Contraloría de la República, para exigir a su titular Carmen Higaonna investigue la gestión del alcalde distrital Ricardo Chiroque. Los manifestantes, en su mayoría madres del Vaso de Leche, provistas de pancartas y altavoces, acusaron a Chiroque de malversar fondos y reclamaron cese en sus funciones edilicias. Las mujeres de ese distrito pidieron se les restituya los tres días de leche a la semana y los cuatro restantes de cereal, que ahora ha sido reducido a dos de leche y cinco de cereal. La presidenta del gremio de madres del Vaso de Leche, Rosa Inga Morales, informó que anteriormente, los cereales tenían un alto índice nutritivo y de buen sabor, pero ahora les entregan productos embolsados sin registro ni marca y con residuos de tierra, debido al interés del alcalde por abaratar precios a costa de la calidad. Asimismo pidieron la destitución del cargo de presidenta del Comité de Administración del Vaso de Leche de María Elías y al jefe de la citada organización, Jaime Bernedos. Por su parte el alcalde Ricardo Chiroque ha negado todas las denuncias anteriores defendiendo su gestión como correcta y transparente. Reiterando que él mismo ha solicitado a la Contraloría General de la República se investigue el caso a fondo. La República, 18 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRA EX RECTOR DE UNIVERSIDAD RICARDO PALMA, LO SEÑALAN COMO RESPONSABLE DE DESFALCO

El rector de la Universidad Ricardo Palma, Iván Rodríguez Chávez, demandó a los magistrados de la primera Sala Penal de la Corte Suprema actuar de acuerdo a ley en el caso seguido contra el ex rector Sixto Ludeña Luque quien desfinanció con cerca de dos millones de soles a esta casa superior de estudios. Explicó que durante su gestión desde febrero del 91 hasta julio del 96 Ludeña Luque realizó pagos indebidos con dinero de la Universidad, entre ellas sus deudas personales a la Superintendencia de Administración Tributaria (Sunat). "Cuando ingresé en el rectorado la universidad estaba con sus bienes embargados, con una deuda de dos millones de dólares. Existen pruebas de estos hechos y por lo cual Ludeña estuvo preso en el Penal San Jorge, sin embargo, fue absuelto por el Tribunal Supremo", reveló. Preciso que la Sunat, la Universidad y el Ministerio Público han presentado recursos de nulidad a las sentencia absolutoria de los anteriores magistrados que fueron recusados por que adelantaron opinión, y ahora el caso está en manos de la Primera Sala Penal Transitoria especializada en delitos tributarios. Rodríguez Chávez dijo que otro de los problemas que encontró al asumir el rectorado de la universidad fue la deserción de estudiantes y el bajo número de postulantes, lo cual revertió con la reestructuración curricular y saneamiento económico y administrativo. La República, 24 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRALORA GENERAL EXPLICARÁ ATRASOS EN INFORMACIÓN DE CUENTA GENERAL

La Comisión Revisora de la Cuenta General de la República acordó ayer invitar a la Contralora General de la República, Carmen Higaonna y al Contador General de la Nación, para que expliquen las razones por las cuales existen atrasos en la presentación de la información de la Cuenta General de la República de 1999. El acuerdo fue adoptado ayer en la sesión vespertina de la comisión que preside el oficialista Willy Serrato, tras analizar un comunicado, publicado en los medios de comunicación, que da cuenta de que existen numerosas instituciones que no han presentado la información correspondiente sobre los gastos del dinero del Tesoro Público. Willy Serrato dijo que tiene la información de que hasta el momento por lo menos unas 160 instituciones públicas, la mayoría municipalidades, no han presentado la información requerida por la Contraloría. El Contador de la Nación, Oscar Pajuelo Ramírez, ha sido invitado para el próximo lunes, mientras que la

Contralora Carmen Higaonna se presentará el 4 de setiembre. La República, 22 de Agosto de 2000

PERÚ: INFORMAN SOBRE MALOS MANEJOS DE EX ALCALDE DE HUARAZ

Para Oswaldo Villafuerte, quien fuera teniente alcalde de la gestión del ex alcalde de Huaraz Waldo Ríos, la declaración de vacancia a su cargo obedece a un afán de evitar que se fiscalicen los supuestos malos manejos en la gestión del ahora congresista Ríos. Villafuerte ofreció ayer una conferencia de prensa junto con el congresista Ernesto Gamarra. Ellos indicaron que tras haber denunciado serias irregularidades en el municipio de Huaraz, Villafuerte fue destituido. Sin embargo fue repuesto tras demostrar que su vacancia fue una acción equivocada. "Una vez repuesto en mi cargo, Ríos solicitó que se reconsiderara el caso, hecho que fue atendido casi de inmediato declarándose mi vacancia nuevamente el 14 de julio de este año", comentó Villafuerte. Tras estos hechos, Gamarra señaló que podría ser cierta la versión que fue el propio Vladimiro Montesinos quien le entregó a Ríos la resolución de la vacancia de Villafuerte. Admitió el error cometido por el Frente Independiente Moralizador (FIM) al haber aceptado en sus filas a Ríos quien tenía antecedentes negativos como alcalde. El Comercio, 24 de Agosto de 2000 <http://www.elcomerciooperu.com/>

PERÚ: PIDEN INVESTIGAR A PRESIDENTE DEL COMANDO CONJUNTO DE LAS FUERZAS ARMADAS POR PRESUNTOS SIGNOS DE ENRIQUECIMIENTO

La congresista de Somos Perú, Anel Townsend, presentó ayer una moción para conformar una comisión especial que investigue el desbalance entre los ingresos y los bienes inmuebles del presidente del Comando Conjunto de las Fuerzas Armadas, general EP José Villanueva Ruesta. Suscriben la moción sus compañeros de bancada Manuel Masías, Ronnie Jurado, Jorge Chávez Sibina y Luis Guerrero, quienes solicitan el establecimiento de una comisión para que en un plazo de 30 días, emita un informe con conclusiones y recomendaciones sobre la propiedad, ingresos y patrimonio del alto oficial. El pedido parlamentario también incluye a la familia de Villanueva Ruesta, por los presuntos signos exteriores de riqueza y el desbalance entre remuneraciones y egresos que tendría el comandante general del Ejército. De acuerdo con la agencia Imediaperú, el general Villanueva poseería una importante cantidad de propiedades, como un inmueble de más de 2,500 metros cuadrados en Chosica, usado como casa de invierno por él y su familia, y que aparece como propiedad de la empresa Long View Corporation. Según la investigación periodística, el oficial también tiene otras siete propiedades de bienes inmuebles compradas por su esposa, una residencia ubicada en la urbanización Los Pinos, en Monterrico, y un local en el Centro Comercial El Polo, frente a la embajada de los Estados Unidos. La República, 23 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: POR ACUERDO DE COMISIÓN DE FISCALIZACIÓN MINISTRO DE DEFENSA INFORMARÁ SOBRE INMUEBLES ADQUIRIDOS

El ministro de Defensa, general José Villanueva Ruesta, deberá enviar a la comisión de Fiscalización del Congreso la información que permita conocer los bienes inmuebles que adquirió desde que asumió ese cargo público y que, según un medio de prensa, abarcaría a 7 inmuebles ubicados en zonas exclusivas de Lima. La propuesta, que surgió del oficialismo, fue una salida a las propuestas de los parlamentarios Luis Iberico (FIM) y Anel Townsend (Somos Perú), quienes solicitaron se conforme una subcomisión investigadora para que se dedique a este caso. La propuesta de Moisés Wolfenson (Perú 2000), para que antes que se presente el ministro Villanueva lo haga el periodista que realizó la investigación, puso en aprietos a su bancada, cuando los parlamentarios de la minoría

solicitaron que dicha invitación se someta a debate. Wolfenson tuvo que retirarse de la sala de sesiones cuando se sometió a votación su propuesta y regresar cuando ésta fue rechazada por la mayoría. La denuncia de Iberico indicó que desde 1993 hasta la fecha, el general Villanueva y su esposa, María del Pilar Mesa Ramírez, se han comprado 7 propiedades inmuebles, entre departamentos, una casa con piscina y hasta una tienda en el centro comercial El Polo, además de una camioneta valorizada en más de US\$ 50,000. Según los partes de la Oficina Nacional de Registros Públicos mostrados por el congresista Iberico, la mayor parte de las propiedades están a nombre de la esposa del militar, quien es ama de casa y no tiene registro alguno ante la Superintendencia Nacional de Administración Tributaria (Sunat). Iberico además mostró las pruebas de una conexión entre el hijo mayor del titular de Defensa, José Villanueva Villanueva, con el coronel Mario Arbulú Seminario a través de la empresa Long View Corporation, mediante la cual han comprado varios terrenos en el balneario de Cerro Azul, para construir un complejo de verano. La República, 22 de Agosto de 2000 <http://www.larepublica.com.pe/>

PUERTO RICO: ALEGAN QUE EL PARTIDO NUEVO PROGRESISTA JUSTIFICA CORRUPCIÓN CON PERSECUCIÓN

Cinismo, desesperación y la justificación de la corrupción fueron algunas de las explicaciones dadas por líderes y ex líderes universitarios independentistas a la nueva teoría de que los cargos federales por corrupción a miembros del Partido Nuevo Progresista (PNP) buscan desestabilizar el anexionismo como antes lo hicieron con el independentismo. "Decir que se persigue a los anexionistas es decir que se crea artificialmente una idea de que son corruptos, que se fabrica la imagen de corruptos", dijo Miguel Rivera, secretario nacional de organización de la Federación de Universitarios Pro Independencia (FUPI). La nueva teoría, agregó, equivale a decir "que no son tan corruptos". Según la nueva tesis, la Fiscalía Federal y del Negociado Federal de Investigaciones (FBI) han montado todo un operativo para influenciar las elecciones a favor del Partido Popular Democrático (PPD) y del "statu quo" con la radicación de cargos por corrupción contra alcaldes y líderes del PNP. El Nuevo Día, 22 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: CONDICIONAN SUBSIDIO DE \$130 MILLONES A VIVIENDA A CAMBIO DE AUSENCIA DE CORRUPCIÓN

Cuando regrese en septiembre, el Congreso decidirá el futuro de los \$130 millones en subsidios adicionales para vivienda pública en Puerto Rico, condicionando la aprobación a la erradicación de la corrupción en la Administración de Vivienda Pública (AVP). En septiembre el senador republicano por Missouri, Christopher Bond, discutirá con sus colegas las posibles vías de acción congresional sobre el acuerdo del Departamento de Vivienda y Desarrollo Urbano (HUD) de otorgar \$130 millones adicionales a Puerto Rico, informó ayer la oficina de Bond. En cualquier caso, el desembolso de los \$130 millones tiene que contar con garantías de que esos fondos no serán tocados por la corrupción en la AVP, señaló un ayudante congresional de Bond. "Entre las opciones que se están considerando está una certificación independiente de que el sistema de vivienda pública en Puerto Rico está libre de corrupción", señaló el ayudante de Bond. El Nuevo Día, 24 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: DÉFICITS Y ATRASOS EN INFORMES FINANCIEROS ANTE EL CONTRALOR

Siete municipios del país están en la lista de deudores de estados financieros de la Oficina del Contralor. En cuatro de ellos los alcaldes aspiran a la reelección y seis operaban con déficit en el

último informe que entregaron. La lista de deudores la encabeza el Municipio de Río Grande, donde el último informe que entregó el alcalde del Partido Nuevo Progresista (PNP) César Méndez fue el del año fiscal 1995-1996. El Municipio de Adjuntas, administrado por el alcalde del Partido Popular Democrático (PPD), Roberto Vera Monroig, y el de Juncos, que dirige el novoprogresista Gilberto Conde Román, también están en la lista. El último informe que entregaron ambos alcaldes a la Oficina del Contralor fue el del año fiscal 1996-97. Los municipios de Villalba, Guayanilla, Naguabo y Utuado deben los estados financieros de los años 1998-99 y 1999-2000. Seis de los siete municipios que son considerados deudores de informes, tenían déficit en el último estado financiero que entregaron. En el estado financiero 1996-97, Adjuntas tenía un déficit de \$3.3 millones, mientras que el de Juncos alcanzaba los \$2.1 millones. En el informe del año 1997-98 Villalba tenía un déficit de \$1.4 millones y el déficit en Guayanilla era de \$1.2 millones. En Naguabo las arcas municipales estaban en rojo con un déficit de \$656 mil y en Utuado con un déficit de \$2.9 millones. El Alcalde de Río Grande, quien adeuda cuatro informes, incluyendo el del año que concluyó el 30 de junio pasado, no aspirará a la reelección Tampoco lo harán los alcaldes novoprogresistas de L Naguabo y Utuado, José A. Meléndez y Juan L. Ortiz, respectivamente. En el caso de Villalba, el alcalde Bernardo Negrón Montalvo sí aspira a la reelección. Sin embargo, el PNP solicitó al Tribunal de Ponce que lo descalifique por ser uno de los acusados en el escándalo del Centro de Recaudación de Ingreso Municipales (CRIM). El contralor, Manuel Díaz Saldaña, dijo estar satisfecho de que la mayoría de los municipios tengan al día sus estados financieros. Díaz Saldaña recordó que cuando asumió esa posición, sólo 13 de los 78 municipios estaban al día. Aun así, el funcionario solicitó la ayuda de la Oficina del Comisionado de Asuntos Municipales para penalizar con algún tipo de multa a los municipios que no tengan sus estados financieros al día. El Contralor dijo que antes del 7 de septiembre su oficina presentará un informe de auditoría sobre el municipio de Río Grande. El Nuevo Día, 23 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: IMPONE COMISIÓN DE ÉTICA DE LA CÁMARA LOS REQUISITOS MÁS ESTRUCTOS DE TODO EL GOBIERNO PARA DAR INICIO A INVESTIGACIONES

A pesar de que la Constitución de Puerto Rico establece que la Asamblea Legislativa será la única juez de sus miembros, la Comisión de Etica de la Cámara de Representantes impone los requisitos más estrictos de todo el Gobierno para darle paso a cualquier investigación. Contrario a su contraparte en el Senado, la Comisión cameral requiere prueba "robusta" y "convinciente" para iniciar siquiera una investigación a fondo. Requiere también que el querellante consiga la evidencia y la presente a la Comisión en 30 días después de tomar conocimiento de la supuesta violación. Esta administración eliminó la prescripción para los delitos por corrupción y violaciones a la ética, pero si un querellante de un representante presenta su denuncia en el día 31, la Comisión cameral la tiene que declarar prescrita, según la ley que crea el organismo. La Comisión de Etica senatorial sólo exige "prueba justa y razonable", y no impone un término mínimo para radicar la denuncia, según su ley. Ni los jueces en la Rama Judicial ni los funcionarios públicos en la Rama Ejecutiva imponen términos restrictivos para radicar denuncias ni exigen prueba fuera de toda duda razonable para evaluar un caso por ética contra uno de los suyos, según sus reglamentos. Para presentar una querrela contra un juez sólo hay que identificar los hechos y juramentar la querrela. Para radicar una querrela contra un funcionario en la Rama Ejecutiva es lo mismo: se requiere un juramento, y sólo se exige una exposición de todos los hechos, según la Ley de la Oficina de Etica Gubernamental. La Cámara exige que al querellante le conste de "propio y personal conocimiento" la violación que imputa a un legislador. Y apercibe de un procesamiento por perjurio del Código Penal en la misma radicación de la queja. Como si fuera poco, la Comisión cameral impide al querellante hablar del caso, pero no lo

trata como parte a la hora de darle el derecho -como en todo proceso judicial- de obtener documentos de la otra parte, según el último querellante, Héctor Ferrer, quien radicó un caso contra el representante presidente de la Comisión cameral, Luis Aramburu. Ante la vergüenza pública por una discusión de un acto deshonesto de uno de sus miembros, la Comisión senatorial puede activarse sola, por decisión de los senadores. La de la Cámara no. La Cámara necesita que alguien haya tomado conocimiento personal del acto deshonesto y en menos de 30 días lo presente a la Comisión. Esta Comisión también tiene una veda para radicar las denuncias. Tres meses antes de las elecciones, la Comisión cameral no acepta querellas contra sus legisladores amparada en que no quiere convertirse en una herramienta para hacer política. Ese cierre comienza el 7 de septiembre. Sin embargo, la ley es tan cómoda para los legisladores que no define lo que es "prueba robusta y convincente" ni lo que es "propio y personal conocimiento". El Nuevo Día, 21 de Agosto de 2000 <http://www.endi.com/>

REGION ANDINA: HOJA INFORMATIVA SOBRE ESFUERZOS ANTINARCOTICOS

A continuación extractos de una hoja informativa emitida por el Departamento de Estado el 16 de agosto sobre los esfuerzos antinarcóticos en la región andina, la cual destaca el éxito de las tareas de erradicación de cultivos ilícitos de coca en Perú y Bolivia: ***** El cultivo neto de la coca andina y el potencial de producción de cocaína siguió declinando en 1999 y actualmente está en su nivel más bajo desde 1987. En general, el cultivo neto de coca andina declinó a 180.000 hectáreas en 1999, cifra 4 por ciento menor que la de 1998, y 15 por ciento menor que la de 1995. La producción potencial de cocaína bajó a 765 toneladas métricas, una baja del 7 por ciento a partir de la cifra de 1998, y una baja del 18 por ciento desde 1995. ***** La decidida erradicación de los cultivos ilícitos de coca, las operaciones de interceptación y los programas de desarrollo alternativo en Perú y Bolivia redujeron el cultivo de coca en esos países en 66 y 55 por ciento, respectivamente, desde 1995. En gran parte debido a los exitosos programas antinarcóticos en Perú y Bolivia, el cultivo de la coca en la región andina ha cambiado a los territorios controlados por la guerrilla y los paramilitares en Colombia. ***** Colombia actualmente abastece de drogas ilícitas a Estados Unidos más que ningún otro país del mundo. Noventa por ciento de la cocaína en el mercado de Estados Unidos viene de Colombia --como ocurre, de acuerdo con estimados, con hasta dos tercios de la heroína en la costa este. ***** Los problemas en Colombia afectan la vida de los norteamericanos en nuestro país y en el extranjero. Las drogas ilícitas le cuestan a nuestra sociedad 52.000 vidas y casi 110.000 millones de dólares al año, debido a los costos en salud, accidentes y productividad perdida. ***** Las organizaciones dedicadas al tráfico de drogas en Colombia son una perniciosa fuente de inestabilidad. Canalizan fondos a los insurgentes y a los paramilitares que actúan como policías no autorizados, para obtener protección y otros servicios. Mientras tanto, la constante intimidación y la influencia corruptora de los traficantes constituye una grave amenaza al imperio del derecho y las instituciones democráticas de libre mercado en Colombia. Servicio Noticioso desde Washington , 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

REPUBLICA DOMINICANA: LA FISCALÍA ANTICORRUPCIÓN DESATA UN DEBATE JURÍDICO

La creación de una Fiscalía especializada en la persecución y castigo de los casos de corrupción comenzó a crear controversia entre los juristas, algunos de los cuales consideran que las funciones de esa institución restarían competencia a los fiscales distritales y contravendrían a la Constitución. "El punto nervioso es que sus funciones se confrontarían con la competencia del fiscal, ya que tendría jurisdicción nacional", explicó el jurista Julio Cury, al exhortar a los legisladores a realizar un

examen detallado para impedir que la aprobación del proyecto determine alguna acción anticonstitucional. Cury indicó que el establecimiento de la nueva dependencia también podría necesitar de diversos cambios legales con la meta de evitar contradicciones entre la pieza legislativa que la fundamentará, la Constitución de la República y otras leyes. Recordó que de acuerdo con el artículo 55 de la Constitución, los funcionarios que dependen del poder Ejecutivo de ninguna forma pueden gozar de inamovilidad, como ocurre con el titular del ministerio público y los fiscales distritales. "No se puede obrar a la ligera al crear una nueva institución de esta categoría", agregó Cury, al insistir en la necesidad de que los legisladores analicen con detenimiento la pieza presentada el pasado 22 de agosto ante el Congreso Nacional por el consultor jurídico de la Presidencia, Guido Gómez. El proyecto de Ley para la Creación de la Fiscalía Nacional Anticorrupción prevé que la institución goce de autonomía e independencia económica, política y administrativa. La pieza legislativa, que consta de 20 artículos, también considera necesario que el titular de la dependencia, quien tendría jurisdicción nacional, sea elegido por el Senado de una terna presentada por el Presidente de la República por un período inamovible de cinco años. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: NUEVO PRESIDENTE PROPONE QUE EL FISCAL NACIONAL ANTICORRUPCIÓN SERÁ INAMOVIBLE DURANTE CINCO AÑOS

El Fiscal Nacional Anticorrupción será designado por un período de cinco años, e inamovible, por el Congreso Nacional, según el proyecto de ley sometido ayer ante el Senado de la República por el presidente Hipólito Mejía. El Fiscal Anticorrupción será inamovible por la naturaleza de sus funciones, salvo que cometa una falta grave y previa comprobación de la misma, y sólo podrá ser destituido por las causas graves. El funcionario se ocupará principalmente de las denuncias sobre los casos de peculado, cohecho, soborno, extorsión, concusión, agiotismo, fraudes en el sistema financiero, enriquecimiento ilícito, y acciones fraudulentas en general, que impacten los recursos del fisco o de las instituciones del sector público, incluyendo aquellas que participen colateralmente con el sector privado, las autónomas y descentralizadas, creadas por leyes especiales. De igual forma, el Fiscal Anticorrupción, en representación de la sociedad, podrá constituirse en parte civil contra todos aquellos que hayan actuado en perjuicio del patrimonio del Estado dominicano, sin ser necesariamente autorizado por el Presidente de la República, y todo lo reivindicado pasará al Fiscal Nacional. El mensaje presidencial que acompaña la pieza legislativa explica que el Fiscal Anticorrupción tendrá como objetivo la persecución eficaz de aquéllos servidores públicos que en el ejercicio de sus funciones incurran en la comisión de actos de corrupción. El mandatario explica a los senadores que el proyecto de ley facultad a la Fiscalía Nacional Anticorrupción para que, además de adoptar las acciones requeridas para la prevención, la investigación, la identificación e individualización de los actos de corrupción se encargue de la difusión de los valores y principios de probidad, integridad y transparencia en los manejos de los asuntos públicos. "Espero, pues, que los legisladores, compartan conmigo la importancia que tiene para el saneamiento de nuestra vida institucional, la adopción del nuevo estatuto legal que someto a su consideración, por lo que espero que impartan al mismo su voto de aprobación", dice el presidente Mejía en su mensaje a los congresistas. La Fiscalía Nacional Anticorrupción gozará de autonomía e independencia económica, política y administrativa, según lo establece el artículo 1 de la ley que lo instituye y actuará en representación de la ciudadanía. Tendrá competencia en todo el territorio de la República, y su sede en Santo Domingo, constituyendo delegaciones en los departamentos judiciales y distritos judiciales que considere convenientes. La Fiscalía Anticorrupción recibirá, tramitará y procederá a investigar denuncias en torno a actos de corrupción cometidos por mandatarios o servidores públicos,

magistrados, dignatarios, autoridades, funcionarios y empleados de los organismos del Estado y las personas particulares involucradas en los hechos que se investigan y de encontrarse indicios de responsabilidad penal en las referidas investigaciones pondrán sus conclusiones en conocimiento del ministerio público, de la Contraloría General de la República o del órgano jurisdiccional que fuere competente de acuerdo con la ley. El Fiscal Nacional Anticorrupción será designado por el Congreso Nacional por un período de cinco años, de una terna presentada por el Presidente de la República. El Listín, 23 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: TOMA POSESIÓN NUEVO TITULAR DEL DEPARTAMENTO DE PREVENCIÓN DE LA CORRUPCIÓN

En la toma de posesión, el nuevo titular del Departameto de Prevención de la Corrupción, Jesús Félix, se comprometió a que durante su gestión "nadie, ni de esta administración, ni de gobiernos pasados, incidirá en mi trabajo, ni con una llamada telefónica, ni con una tarjeta". Al ser juramentado en el cargo por el consultor jurídico de la Presidencia, Guido Gómez Mazara, Félix aseguró que "voy a reivindicar el anhelo de la población en el sentido de que el dinero del pueblo no se va quedar en los bolsillos de los funcionarios". Félix, cuyo departamento desaparecería en caso de que el Congreso apruebe la creación de la Fiscalía Nacional Anticorrupción, indicó que revisará todos los expedientes sobre corrupción que reposan en la Procuraduría General de la República y someterá ante la justicia a todas las nuevas denuncias que estén fundamentadas de manera suficiente. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

URUGUAY: DENUNCIAN PASIVIDAD DE ORGANISMOS FISCALIZADORES

"El contrabando y la ilegalidad están causando verdaderos destrozos en el comercio y la industria instalada en el interior del país, y el gobierno parece no tener una verdadera dimensión de esta situación" afirmó Helios Maderni, presidente de la Comisión de Relacionamiento con el Interior de la Cámara de Industrias del Uruguay. Maderni dijo que la industria ha declarado su falta de competitividad, pero en el interior, el contrabando y las prácticas desleales de comercio son alarmantes, y a ello se suma la inactividad. Como consecuencia, las ventas del comercio establecido y la producción están lejos de contrarrestar esos efectos perniciosos. "Creo que el gobierno no tiene conciencia cabal de lo que está pasando en el interior" sostuvo el dirigente, y se remitió a sendas declaraciones de instituciones empresariales de dos zonas del país. El 8 de julio, representantes de la CIU (Camara de Industrias del Uruguay), CEDU (Confederación Empresarial del Uruguay) y los Centros Comerciales de Lascano, Castillo, Rocha, Cerro Largo y Treinta y Tres resolvieron "reclamar a los gobiernos nacional y departamental, que se cumplan las leyes que combaten el contrabando y el informalismo que afectan y provocan la crisis actual de la industria y el comercio establecido". El 25 de julio, los Centros Comerciales del departamento de Colonia y la CIU se reunieron con legisladores del departamento por el tema contrabando y comercio informal. Preocupados por el "desmedido avance" de ambas actividades, se denuncia "la pasividad de los órganos encargados del contralor impositivo y de la seguridad social" frente a hechos evidentes de prácticas desleales de comercio. Maderni dijo que en las giras realizadas por el interior, las entidades locales han denunciado la impunidad con la cual actúan el contrabando y el informalismo, así como la corrupción que evidencian los controles aduaneros. Estas opiniones fueron trasladadas por los dirigentes capitalinos al director nacional de Aduanas, Jorge Sienra, reclamándole la aplicación de las medidas que prevé la propia ley al respecto. "Es imprescindible que se haga algo de inmediato para frenar estas actividades" subrayó Maderni. "Se habla de 'peces gordos' o de gente que hace contrabando en gran escala" agregó, sin que por ello se tomen las medidas adecuadas. Diario el País, 21 de Agosto de

2000 <http://www.diarioelpais.com/>

URUGUAY: LA ASOCIACIÓN DE TRABAJADORES DE LA SEGURIDAD SOCIAL DENUNCIÓ UN ``DESVÍO DE FONDOS``

Una delegación de la Asociación de Trabajadores de la Seguridad Social (ATSS) afirmó que los funcionarios que cumplen tareas inspectivas nunca recibieron los fondos destinados a locomoción y que esos dineros fueron "desviados" o producto de un "mal uso presupuestal". Daniel Inthamoussu, miembro de la asociación, dijo el lunes 14 en una Comisión de Diputados que el gremio hizo averiguaciones sobre el destino de los dineros para locomoción y concluyó que existe "un problema administrativo, un mal manejo de los fondos". Solicitó que se investigue qué se hizo con ese "crédito presupuestal". "El crédito presupuestal asignado para locomoción y para otra partida de compensación que percibimos, existe. Se nos dijo que hubo un problema administrativo, pero desde nuestro punto de vista hubo un desvío de fondos --han pagado otras cosas que no son locomoción--, una falta administrativa o un mal uso presupuestal, que se intentará tapar rebajando nuestras partidas y haciendo ver que se trata de un recorte", señaló el sindicalista. El Observador, 23 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: SE DEFIENDE EX MINISTRO DE TURISMO, DIJO QUE NO COMETIÓ DELITO DURANTE SU GESTIÓN

El ex ministro de Turismo, Benito Stern, dijo ayer que las trasposiciones de rubros que ordenó durante su gestión no significaron un "abuso de funciones" y que tampoco obtuvo por ello "beneficio personal alguno". En una declaración distribuida a los medios, Stern se defendió de la denuncia penal que presentaron las actuales autoridades del Ministerio de Turismo y del pedido de procesamiento en su contra del fiscal Enrique Moller, por el delito de abuso de funciones. Moller también pidió el procesamiento por coautoría de falsificación de documento, del ex director general de Turismo, Juan Rodríguez Siri, de un gerente y de un funcionario de esa cartera. En su declaración, Stern dijo que si bien "formalmente" el procedimiento de trasposición de rubros "puede ser cuestionable", la "necesidad lo impuso dado que hubo de optarse entre un Ministerio de Turismo sin actividad ni promoción suficiente (...) o una cartera que cumpliera legítima y plenamente con sus funciones, aunque tuviera para ello que alterar el destino de los gastos". "No hemos incurrido en conductas dolosas ni en abusos que significaran beneficio personal alguno. Si hay otros hechos, ocurridos en la vida administrativa, que merezcan esos calificativos, somos ajenos a ellos", afirmó Stern. El Observador, 18 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: UN EX MINISTRO DE TURISMO PODRÍA IR A LA CÁRCEL POR MALVERSACIÓN DE FONDOS

El ex ministro de Turismo, Benito Stern, podría ir a la cárcel por haber desviado fondos de la ley de subvenciones turísticas. El miércoles fue rechazado el recurso de nulidad presentado por la defensa del ex ministro, quien alega inmunidad constitucional. La fiscalía considera que el ex ministro no goza de inmunidad y que por lo tanto el proceso judicial debe continuar su marcha. Benito Stern fue titular de la cartera de Turismo durante el gobierno de Julio María Sanguinetti, y es miembro del Partido Colorado. La acusación partió del actual ministro Alfonso Varela, también del Partido Colorado, pero integrante de la Lista 15, que responde al actual Presidente Jorge Batlle. Según la Ley Anticorrupción y si se comprueba la culpabilidad del ex ministro, éste podría ir a prisión de tres meses a tres años. No podrá ocupar cargos públicos en un período de dos y cuatro años, y podría llegar a pagar una multa que va desde los 160 a los 50 mil dólares. Si Benito Stern es condenado a

prisión, sería el segundo caso de un político que va a la cárcel por cometer delitos de "cuello blanco". El primero fue el contador Enrique Braga, hombre vinculado al Partido Nacional y de confianza del ex presidente, Luis Alberto Lacalle. Lacalle estuvo en el poder entre 1990 y 1995. Su gobierno es catalogado como uno de los más corruptos de todos los tiempos. Informativos Net, España (Uy/QR/Au/Ppc/ap), 18 de Agosto de 2000 <http://www.informativos.net/>

ARGENTINA: THEY DENOUNCE A HIGH CORDOVAN CIVIL EMPLOYEE SUPPOSED INFLUENCE PEDDLING

A high civil employee of the governor Jose Manuel of the Sota was seriously it jeopardize and put in check the image of the government by a denunciation on a supposed influence peddling in please a construction company of which he comprised, which would have swindled in about 180,000 pesos to the inhabitants of a small locality of the provincial interior. The case, position in the open by the televising program "Telenoche investigates", involves to the accountant Jorge Eduardo Acosta, secretary of Finances, and to the Giacomo company, defendant of to have emitted around 150 bad checks of an account of the Bank of Cordova. They were harmed with those incobrables values the inhabitants of the High locality from Glad, located in the department Union and the proximities of Villa Maria, where the company had to its position the construction of the route towards the neighboring population of Arch. The work was adjudged to him during the management of the previous governor, the radical Ramon Mestre. Acosta, that was empowered of the company while it evolved in the Court of the province, was accused to have taken part so that the bank did not close the account to him to the constructor, fact that finally happened the 15 of December of the last year. Even, the bank disqualified by 15 days the company/signature of Acosta. The inspector in the banking organization, Fabian Maidana, clarified that checks were not paid in discovered and assured that dispositions of the Central bank were not violated. In his defense, the civil employee clarified that in 1995 he broke contact himself with the company - exhibited like test a notarized deed dated the 29 of December of 1995- and that since then did not sign more documents nor checks, thus it did not know the happened thing later. In addition, he denied to have exerted influences on the Bank of Cordova to order some benefit. Hardly returned of a trip of rest by Brazil, the governor was with this problem and said that, in case of having irregularities, them he will have to investigate Justice. In the case of the Bank of Cordova, he indicated that "if there is some civil employee who has violated the responsibilities that correspond to him, must have the corresponding sanctions". The minister of Finances, Jose Maria the Heras, endorsed his collaborator, although he extended that in the government he analyzes himself the future of the denounced civil employee. Nation 18 of August of 2000 <http://www.lanacion.com/>

ARGENTINA: TWO Ex--Ministers ACCUSED IN I DEAL OF ARMS

Two exministros and an old vice-minister of the government of president Carlos Menem were accused to comprise of a network of illegal sale of arms. Exministro of Outer Relations, Guido Di Tella, and the one that was minister of Defense, Ermán González, is under suspicion of to have sold arms to Ecuador and the Croatia, when both countries underwent international embargoes. According to done information public Friday, to the old vice-minister of Exteriors with I gave Tella, Juan Carlos Olima, also is accused to him to be involved in the case. The public prosecutor accuses them to ´haber signed documents that knew that they were falsos´ and to ´haber negligido his to have público´. The three defendant comprised of the government of Carlos Menem, on who always doubts weighed on presumed cases of corruption. One of the most serious accusations would be than the government had conspired to sell arms to the Croatia - that was under an embargo of Nations United because of the conflict in the Balkan Mountains. Other arms supposedly were found when they were transporadas to Ecuador, that was been in war against Peru in 1995. The government of Argentina at that moment denied all the accusations assuring that the arms had other destinations and that soon they were turned aside towards the Croatia and Ecuador. Analysts assure that behind the new judicial investigations is the will of new president Fernando of the Rúa to eradicate the corruption of the public administration. Even clarify scandals of the previous governments. BBC News, August 19, 2000 <http://www.bbc.co.uk/spanish/news000819argentina.shtml>

ARGENTINA: The ARGENTINE PRESIDENT ENDORSED To HIS CABINET BEFORE The CORRUPTION DENUNCIATIONS

The Argentine president, Fernando of the Rúa, ratified east Tuesday his confidence in all the ministerial cabinet before corruption denunciations. The agent chief executive asked for the ministers who collaborate with all the investigations on the denunciations of bribes in the Senate to approve the reform labor, the past month of May. Meanwhile, the two branches of the main Argentine Workers Union: the General Confederation of Work, CGT, divided in official and rebel, requested the derogation of the law of the Labor Reformation, if the denunciations are verified of which the opposition in the Senate was bribed to approve that norm in last May. The new labor law extends the period of test of the workers, foments the renovation of the collective agreements of work and favors the reduction of the supervisory contributions to the companies that take new employees. In spite of the new law, more than four million Argentineans they have problems at the moment to find a job. Radio Nederland, Holland, 23 of August of 2000 <http://www.rnw.nl/>

ARGENTINA: IN CASE OF PRESUMED PAYMENT OF BRIBE IN The SENATE, THEY PRESENTED/DISPLAYED SIX DENUNCIATIONS And JUSTICE ALREADY INVESTIGATES

Within the framework of the investigation by the presumed payment of bribes to approve the law of labor reform, six denunciations were made yesterday in the federal courts of Comodoro Py. The presentations were done by lawyers Marcelo Parrilli, Ricardo Monner Sans, Juan Carlos Churches, Eduardo Barcesat, the frepasista deputy Jorge Giles, and Frank the cavallista legislator Guillermo. Although all the denunciations fell by drawing in different courts, the Federal Camera will unify the investigation in the magistrate who was drawn for in the first place. Yesterday, in judicial sources one made sure that the cause will be into the hands of federal judge Carlos Liporaci. The denouncers agreed in asking for the call of president Fernando of the Rúa and in framing the conduct that is attributed to them to the senators in the bribe figure. Parrilli requested in addition that interrogates to vice-president Carlos "Chacho" Alvarez, to the head of Cabinet Rodolfo Terragno, to the Secretary of Labor Alberto Flamarique and to the justicialistas senators Jorge Yoma and Antonio Cafiero. Monner Sans contributed as it demonstrates the anonymous one that details the supposed maneuver that was followed to distribute the briberies. Whereas Churches indicated that to verify the payment of briberies the national institutions would be resembled "political toilets". Other denouncers also asked for the testimonial declaration of the leader of the

General Confederation of Workers (CGT) dissident, the truck driver Hugo Moyano, who months back formulated accusations on the circulation of drug trafficking money in the treatment of the new labor law. "We are as opposed to more serious the institutional crisis from the renewal of the democratic life", thought Francs. The Bugler, 23 of August of 2000 [to http://www.clarin.com.ar/](http://www.clarin.com.ar/)

ARGENTINA: IN SCANDAL OF BRIBES IN The SENATE, The GOVERNMENT LOOKS FOR TO TAKE The OFFENSIVE

Fernando of the Rúa retook yesterday the initiative as opposed to the denunciation of possible bribes in the Senate to approve the project official of labor reform, and after supporting with his ministers, he invited them to appear before the Anticorrupción Office (OA). The other part of the official offensive was left into the hands of vice-president, Carlos "Chacho" Alvarez, who last night announced that today she will present/display a denunciation before the Justice soliciing that investigates the presumed payment of sobornos. Mientras the lawyers finished the writing, Chacho Alvarez discussed with its collaborators if he will be he who appears today before the Courts or if is the denunciation by means of some of the lawyers. The presidential invitation to its ministers to concur to the Anticorrupción Office took place during the meeting of cabinet of yesterday, and the first consequence was that the head of the SIDE, Fernando de Santibañes, and the Secretary of Labor, Alberto Flamarique, made available of the organism. It is the first time that the President of the Nation assumes the necessity to investigate the subject outside the Senate. With this step, Of the Rúa it retook an own protagonism in an attempt to avoid to pay greater political costs by this case. During the last week, while from the Pink House they made an effort to lower the tension around the presumed case of bribes, the offensive had been into the hands of Alvarez, whom it pressed to promote the investigation. Of the Rúa it thus changed radically his strategy after perceiving the increasing impact of the denunciation, according to which some member of the oficialismo would have paid with bribes the vote of some senators, mainly of the Justicialista Party, to be able to approve the reform labor. The amount and destiny of the presumed bribes vary in agreement with the rumors: different sources mentioned sum of between two and five million dollars. Some maintain that the sum would have gone directed towards the justicialista block, whereas others affirm that also it would have arrived until the radical block. The Bugler, 23 of August of 2000 [to http://www.clarin.com.ar/](http://www.clarin.com.ar/)

ARGENTINA: EN INVESTIGACIÓN DE SOBORNOS EN EL SENADO. LA SECRETARIA DE INTELIGENCIA DEL ESTADO DARÁ A CONOCER SUS CUENTAS

La Secretaría de Inteligencia del Estado (SIDE), presentará hoy ante la Oficina Anticorrupción un detalle sobre el movimiento de sus fondos desde el comienzo de la administración de Fernando de Santibañes. La decisión de la SIDE de abrir sus cuentas responde a un pedido del titular de ese organismo, José Massoni, en el marco de la investigación sobre el presunto pago de coimas en el Senado durante el tratamiento de la ley laboral. El informe incluye el manejo de los aproximadamente 2 millones de pesos mensuales, que dispone la Secretaría en concepto de gastos reservados, que no requieren rendición. Hay una fuerte sospecha --alentada por el vicepresidente, Chacho Alvarez-- de que parte de esos fondos fueron usados para pagar el voto de senadores del Partido Justicialista --e incluso algunos de la Alianza-- para sacar la ley laboral. El detalle de la SIDE ocupa diez carillas en las que se intentaría demostrar que no hubo, en los meses que llevó el tratamiento de la ley, en los anteriores y en los que siguieron a su sanción, gastos que pudieran comprometer a la Secretaría. Fernando de la Rúa reclamó que todos sus hombres se pongan a disposición de la Oficina Anticorrupción, o donde se los requiera, para despejar sospechas sobre el papel del Gobierno en el escándalo. La tensión natural entre los principales referentes de un gobierno --más tratándose de una coalición de gobierno-- amenaza ahora con fragmentar algunas decisiones, al menos en relación a este escándalo. Por ahora a la de la Oficina Anticorrupción, que investiga desde la semana pasada el escándalo, se suman otras. Los dos bloques mayoritarios del

Senado --el del PJ y el de la Alianza-- decidieron trasladar la investigación al procurador Nicolás Becerra. La Procuración inició una investigación --que quedó en manos del fiscal Eduardo Taiano-- sobre el trámite que precedió a la sanción de la ley. El Clarín, 24 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: JUEZ DECIDIRÁ SI PROCESAN A EX SECRETARIA DE RECURSOS NATURALES POR ENRIQUECIMIENTO ILÍCITO

El juez federal Juan José Galeano decidirá en los próximos días la situación procesal de la ex secretaria de Recursos Naturales María Julia Alsogaray en la causa en que se investiga si se enriqueció en forma ilícita durante el gobierno del ex presidente Carlos Menem. Fuentes oficiales consultadas por Clarín dijeron que el plazo de Galeano para decidir si la procesa, sobresee o dicta la falta de mérito se vence mañana, pero no descartaron que el juez prorrogue el tema hasta principios de la semana próxima. El juez Galeano tiene que decidir si las declaraciones y presentaciones de María Julia justifican el considerable incremento que registraron sus bienes entre 1989 y 1999 de 300 mil a 2.500.000 pesos. Esto es así porque en los juicios por enriquecimiento ilícito se invierte la carga de la prueba y, por lo tanto, es el acusado el que tiene que justificar sus bienes. Para los fiscales Eamon Mullen y José Barbaccia, María Julia no justificó ingresos lícitos por 1.800.000 pesos en las presentaciones que viene haciendo desde que se abrió la causa, hace casi siete años. Y los fiscales creen que en los descargos que ya había hecho por escrito no demostró el origen lícito de 1.800.000 dólares. Dudan --además de la herencia anticipada de su padre-- de, por lo menos, dos fuentes que María Julia presentó para justificar su patrimonio. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: OPERACIÓN MANOS LIMPIAS PODRÍA INICIARSE EN ARGENTINA

Un proceso anticorrupción mani pulite (manos limpias), al estilo italiano, podría iniciarse en Argentina, a raíz de la denuncia sobre sobornos en el Senado para sancionar una reforma laboral, dijo ayer el vicepresidente, Carlos Alvarez. El mani pulite fue un proceso de investigación en gran escala de los casos de soborno y corrupción en el más alto nivel político y judicial de Italia, iniciado por el fiscal de Milán, Antonio Di Pietro, en 1992. El Universo, Ecuador (AP), 22 de Agosto de 2000 <http://www.eluniverso.com>

ARGENTINA: PIDEN A LA JUSTICIA QUE INVESTIGUE EL SOBORNO PAGADOS A SENADORES

Los supuestos sobornos pagados en el Senado ya llegaron a la Justicia. Guillermo Francos, diputado de Acción por la República, presentará hoy una denuncia ante los juzgados federales exigiendo que se investigue si es cierta o no la versión que señala que hubo senadores que recibieron favores personales a cambio de aprobar la reforma laboral que impulsaba el Gobierno. En su escrito, el dirigente cavallista solicita a la Justicia que investigue "si el Poder Ejecutivo pagó sobornos a senadores de la Nación para obtener su voto afirmativo a la sanción de la llamada ley de reforma laboral y eventualmente identificar y llevar a juicio a sus responsables". La denuncia de Francos es la primera que se realiza sobre el tema. El diputado trabajó en ella durante el fin de semana luego de constatar, con sorpresa, que ningún fiscal decidía actuar de oficio para investigar el tema. En su denuncia, Francos no aporta datos nuevos, sino que relata las noticias periodísticas publicadas sobre el tema. Cita el artículo de Joaquín Morales Solá publicado en La Nación y las transcripciones de la denuncia anónima que circuló por diversos ámbitos ligados al poder político. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: PRESIDENTE DE LA COMISIÓN DE ASUNTOS CONSTITUCIONALES DESCALIFICÓ DENUNCIAS DE COIMA EN EL SENADO

"Están todos locos, empezando por Alfonsín (Raúl) y De la Rúa (Fernando) que no descalifican

tamaño barbaridad", opinó el presidente de la Comisión de Asuntos Constitucionales, senador Jorge Yoma (PJ-La Rioja). Con estas palabras, Yoma desestimó el pedido realizado por el Presidente para que el Senado investigue el presunto pago de favores personales, con el objetivo de que se aprobase el proyecto de reforma laboral impulsado por el Gobierno de la Alianza en medio de fuertes críticas gremiales y de la oposición. El riojano rechazó la propuesta de De la Rúa, que durante los actos de homenaje al general José de San Martín dijo que "es el Senado el que debe dar los pasos para determinar con claridad" la existencia o no de sobornos en el trámite de aprobación de la ley en la Cámara alta. De la Rúa sugirió que debía actuar la Comisión de Asuntos Constitucionales, presidida por Yoma. Esa comisión es la responsable de tramitar todas las cuestiones de privilegio y, en consecuencia, está a cargo de las presentaciones que hicieron los senadores Antonio Cafiero y Jorge Villaverde para que se esclarecieran las versiones que circularon por el presunto pago de favores personales en ese cuerpo legislativo. "Si esto es cierto, el que está involucrado es el propio Gobierno y esto va a ser un verdadero desastre institucional", aseguró Yoma. El legislador riojano calificó de "disparate total" los rumores que circulaban en la Cámara alta en relación con esta supuesta operación. Aunque aclaró que si en el Senado "van a darle entidad al tema, hay que formar una comisión ad hoc que cite a todo el mundo, empezando por el Presidente". El titular de la Comisión de Asuntos Constitucionales opinó que no había que darle entidad a las versiones ni prestar atención a las denuncias anónimas que circularon sobre el tema. La Nación, 18 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: SURGE GRAVE ESCÁNDALO POR SOSPECHA DE SOBORNOS A SENADORES ARGENTINOS

Las insistentes sospechas de que senadores de la oposición peronista habrían sido sobornados para que votaran favorablemente la reforma laboral que el actual gobierno logró hacer aprobar por el Congreso hace tres meses, amenazaban hoy en convertirse en el peor escándalo político argentino de las últimas décadas. Tanto el gobierno del Presidente Fernando de la Rúa como el Partido Justicialista, que controla el Senado, parecían hoy desorientados ante las previsibles derivaciones del caso. Un sector de la actual administración, encabezado por el vicepresidente Carlos Alvarez, y un grupo minoritario de senadores peronistas, reclaman una investigación a fondo para esclarecer las denuncias, lo que provoca alarma en no pocos oficialistas y opositores. Todo comenzó cuando el columnista del diario La Nación, Joaquín Morales Solá, escribió hace algunas semanas que había fundadas sospechas de que un grupo de senadores peronistas habían "negociado" su apoyo a la reforma laboral, a cambio de dinero. La información del periodista provino, aparentemente, de dos legisladores peronistas no involucrados en esta maniobra, identificados como Antonio Cafiero y Jorge Villaverde, ambos de la provincia de Buenos Aires. La denuncia provocó alarma en el bloque senatorial peronista, cuyas autoridades visitaron la semana pasada al Mandatario De la Rúa, para pedirle que públicamente desautorizara las versiones. De la Rúa así lo hizo y declaró que no dudaba de la honorabilidad de sus adversarios. Pero dos prominentes figuras de la Alianza gobernante, el vicepresidente Alvarez y el ex presidente Raúl Alfonsín, titular de la Unión Cívica Radical (UCR), el partido de De la Rúa, demandaron una investigación. Alvarez manifestó que si las denuncias se confirmaban, significarían una "decadencia terminal" del sistema democrático. Alfonsín, a su vez, refirió que si se probaban los sobornos, renunciaría a la actividad política. De la Rúa, evidentemente preocupado, modificó su postura inicial e indicó que el Senado tendría que investigar las acusaciones contra algunos de sus integrantes. El senador peronista Jorge Yoma, titular de la comisión de asuntos constitucionales, respondió anunciando que citaría al Presidente como el principal imputado. En medios legislativos circuló un libelo anónimo, mencionando por su nombre a los presuntos involucrados en el ofrecimiento y cobro de sobornos. Menciona a algunos funcionarios gubernamentales y a senadores peronistas y de la UCR. El vicepresidente Alvarez, titular del centroizquierdista Frente del País Solidario (Frepasso), el otro integrante de la Alianza, hizo saber a sus amigos que no cejará hasta esclarecer este caso. El destino de la investigación

está en manos, aparentemente, de los senadores peronistas Cafiero y Villaverde, a quienes llamaría a declarar esta semana una comisión de la Cámara Alta. El Excelsior, México (AP), 21 de Agosto de 2000 <http://www.excelsior.com.mx/>

ARGENTINA: VICEPRESIDENTE DENUNCIA LA FALTA DE ``VOLUNTAD COLECTIVA`` PARA LUCHAR CONTRA LA CORRUPCION POLITICA

El vicepresidente argentino Carlos "Chacho" Alvarez ha realizado unas declaraciones en las que señala que aún no existe una "voluntad colectiva" para luchar contra la corrupción política del país. "El combate frontal contra las prácticas que la sociedad rechaza de la política no se ganó. Hay mecanismos de acción política que son reprochables y cuestionables en todos lados y todavía no se observa una voluntad colectiva de combate a fondo", ha declarado el vicepresidente. Carlos Álvarez ha criticado que esta actitud es "una de las causas de la degradación de la política o que la gente sospeche sobre la ineficiencia e improductividad de la política. Esto hace que a la política se la asimile con el mejor posicionamiento social de quienes la hacemos, al enriquecimiento ilícito o al incremento patrimonial". Asimismo, el líder frepasista ha mostrado su preocupación porque "las imperfecciones de la política no son desde un lugar excluyente de la sociedad, sino que se trasladan al sistema económico, institucional y social". Noticias Yahoo, (INFOSIC/EP), 20 de agosto de 2000 <http://es.news.yahoo.com/000820/4/i4ej.html>

ARGENTINA: VICEPRESIDENTE PROPUSO UN DESAFUERO COLECTIVO, ASÍ LA JUSTICIA INVESTIGARÍA A SENADORES POR PRESUNTOS SOBORNOS

El vicepresidente Carlos Alvarez reforzó ayer la estrategia del Gobierno para enfrentar las denuncias de pago de "favores personales" a los legisladores en busca de la sanción de la ley de reforma laboral. Y, en esa línea, sostuvo que los legisladores deberían perder sus fueros en forma colectiva para someterse a la Justicia. "Debería desaforsarse colectivamente la Cámara para que la Justicia pueda actuar en este tema", dijo Alvarez, tras expresar sus reticencias a que las sospechas sólo sean investigadas por el Congreso cuando, precisamente, atañen a esa institución. "Es muy difícil, al estar involucrada una parte de los senadores en este tema, que el propio cuerpo pueda llevar adelante una investigación objetiva", razonó. En ese sentido, se confesó "pesimista acerca de la posibilidad de autoinvestigación de los senadores". Aseguró que su intención es la de lograr una investigación "a fondo y sin concesiones", porque su prioridad es "mejorar las instituciones", dijo. "Salvando las distancias, esto es como pasó en Italia cuando comenzó el mani pulite (manos limpias), que empezó con un gran temor", comparó. Para ello, estimó que "un trámite bastante rápido para avanzar sería citar al senador (Antonio) Cafiero (Partido Justicialista-Buenos Aires), que puso el tema en el lugar de las sospechas". Precisamente, fueron los senadores Cafiero y Jorge Villaverde (PJ-Buenos Aires) quienes impulsaron la investigación, luego de los rumores de que hubo colegas suyos que supuestamente recibieron dinero a cambio de sus votos favorables a la reforma laboral. Hoy los dos senadores del PJ se reunirán con los presidentes de las bancadas del Congreso. En ese sentido, Alvarez rechazó sentir temor por las eventuales derivaciones de una investigación y dijo que el más preocupado en esclarecer la situación es el presidente Fernando de la Rúa, a quien, aclaró, no se citará al Congreso. "Nunca puede haber costos en la voluntad de mejorar el funcionamiento de las instituciones", consideró Alvarez. Inmediatamente agregó: "No estoy dispuesto a ser el presidente de un cuerpo que conviva con estas situaciones". Así, Alvarez, presidente de la Cámara alta, puso su propio cuerpo al escándalo que hace poco más de una semana colocó al Gobierno y al Congreso bajo un manto de sospechas. El vicepresidente aprovechó sus declaraciones públicas para defender la figura del ministro de Trabajo, Alberto Flamarique, señalado como el funcionario que habría pagado los presuntos sobornos a los senadores. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

BOLIVIA: DENUNCIAN PRESIDENTE DEL SENADO POR NEPOTISMO

En medio de la guerra sucia que se inició en el Parlamento entre miristas y adenistas, este sábado se denunció que el adenista presidente del Senado, Leopoldo Fernández Ferreira, habría cometido delito de nepotismo al haber brindado trabajo a 13 de sus "parientes cercanos". Sin embargo, confirmaron que sólo dos casos de los denunciados podrían ser indicados como nepotismo puesto que Liliana Zabala Beltran, "es pariente lejano de la esposa de Fernández Ferreira, pero que trabaja en el Senado desde 1993 con el ítem número 427 y un sueldo mensual de 4 mil bolivianos". El otro caso sería el de Evelin Ferreira de Azad que es prima hermana del titular del Senado. Sin embargo, se confirmó que trabaja en esa instancia legislativa desde 1997 con una remuneración mensual de 4.600 Bs. y con el ítem 109. No es desconocido que adenistas y miristas están enfrentados en la Cámara Baja por "pegas y mayores espacios de poder aprovechando la falta de decisión y negociación del ucesista Jaalil Melgar Mustafá". El Deber, 20 de agosto de 2000 http://www.eldeber.com.bo/20000820/nacional_6.html

BOLIVIA: FUNCIONARIOS DE LA ADMINISTRACIÓN PÚBLICA GANAN MÁS QUE EL PRESIDENTE

El diputado de Nueva Fuerza Republicana (NFR) Roberto Fernández Moscoso denunció que en la administración pública existen niveles salariales superiores al del Presidente de la República, por lo que pedirá a la Cámara Baja se haga una corrección salarial. Según el parlamentario, el Decreto Supremo 25056 determina que en el régimen salarial del país, en concordancia con el artículo 21 de la Ley 1826, se dispone que el sueldo mayor en el territorio nacional corresponderá al Presidente de la República, esto actualmente no se está cumpliendo. Sostuvo que el sueldo del Presidente, actualmente, es de Bs 29.900, de los ministros de Estado 20.900; sin embargo, existen en otras instituciones como la Superintendencia y el Banco Central de Bolivia en las que se perciben encima de los 30 mil bolivianos, hasta en unidades técnicas dependientes del Ministerio de Defensa ganan sueldos de más de 5 mil dólares americanos, lo que representa más de 30 mil bolivianos. El diputado enfatizó que, efectivamente, los sueldos de estas entidades son mayores al del Presidente de la República, por lo que frente a esta situación se impone la necesidad de que el Congreso Nacional analice con detenimiento y corrija estas irregularidades salariales. El diputado Roberto Fernández sostuvo que es indispensable que se plantee una revisión de estas irregularidades y que se cumpla la norma legal que indica claramente que el sueldo mayor debe ser del Presidente. Todos debemos ajustarnos a esa situación, no podemos permitir que haya islas de privilegiados económicamente en el país", señaló el parlamentario. Esta observación se la ha coordinado con otros parlamentarios, por lo que de manera conjunta se pedirá una información, incluso los ministros Herbert Müller han homologado sus sueldos, desconociendo normas, así como el ex ministro Candia han fijado niveles salariales por encima de lo que percibe el Primer Mandatario. Por todas estas razones "se pedirá una sanción e incluso un juicio de responsabilidades, no se puede dañar al Estado, por debajo del sueldo del Presidente tienen que estar los demás sueldos de la administración", señaló el diputado. Por otra parte, mencionó que debe haber la austeridad y se debe copiar lo que hacen los peruanos para controlar la crisis económica. Por ejemplo, Alberto Fujimori frente a la grave crisis económica ha dispuesto que los ministros, diputados subalternos y senadores dejen de tener celulares, porque el gasto económico es muy elevado. Otra medida es que los vehículos oficiales limiten el uso de combustible. Algo contrario sucede en el país, los vehículos oficiales se utilizan para ir al mercado, para llevar a las esposas de funcionarios públicos, acotó. El Diario, 23 de Agosto de 2000 <http://www.eldiario.net/>

BOLIVIA: RESPONSABLES VARIOS FUNCIONARIOS Y EX FUNCIONARIOS DE IRREGULARIDADES EN EL USO DE RECURSOS DEL TESORO NACIONAL

Cinco ex ministros de Estado, varios ex viceministros y ejecutivos de Defensa Civil, un ex prefecto y varios ex funcionarios de la Prefectura de Cochabamba fueron identificados como responsables administrativos, civiles y penales de las diferentes irregularidades cometidas en el uso de los

recursos del Tesoro General de la Nación y de la cooperación internacional para la atención de la emergencia del terremoto del 22 de mayo de 1998. La Comisión de Defensa y Fuerzas Armadas de la Cámara de Diputados entregó ayer sus conclusiones requiriendo el inicio de acciones civiles, administrativas y penales contra los involucrados. Las mayores responsabilidades penales recaen sobre los ex funcionarios de la Prefectura de Cochabamba. La Comisión halló también indicios de responsabilidad penal y civil contra ex ejecutivos de organismos que manejaron las donaciones; contra José Ernesto Ayoroa, ex director administrativo del Ministerio de Defensa Nacional, y Luis Montero Zanquis, ex director de Defensa Civil, responsabilidad civil por el sobreprecio en la compra de víveres y la contratación y pago de consultoría por 125.708 bolivianos; responsabilidad penal contra Luis Montero Zanquis, Luis Daza Montero, ex director de Defensa Civil, Guillermo Asturizaga, Ernesto Acosta, Miguel Nogales, Armando Deheza (del Ministerio de Defensa), y Guido Galleguillos, ex director de Bienes e Infraestructura del Ministerio de Defensa por indicios de malversación. En el caso de irregularidades en compra del avión Beechcraft, la Comisión vio indicios de responsabilidad administrativa contra Juan Vera Antezana, ex viceministro de Desarrollo Integral, y Oscar Guillarte Luján, ex comandante de la Fuerza Aérea y actual viceministro de Defensa. También estableció responsabilidad administrativa contra Fernando Kieffer, ex ministro de Defensa Nacional; Guillermo Cuentas, ex viceministro de Salud y actual ministro del área; Edgar Millares, ex ministro de Hacienda; Carlos Iturralde Ballivián, ex ministro de la Presidencia, y Herbert Müller, ex ministro de Hacienda, por contravenir las normas. También tienen responsabilidad administrativa contra Ramón Prada, ex viceministro de Transportes; Armando Méndez y Ramiro Cavero, ambos ex viceministros de Presupuesto. Los Tiempos, 24 de Agosto de 2000 <http://www.lostiempos-bolivia.com/>

BRASIL: PRESIDENTE CARDOSO LANZA UN CÓDIGO DE CONDUCTA PARA FUNCIONARIOS PÚBLICOS

El presidente brasileño, Fernando Henrique Cardoso, lanzó ayer un código de conducta para funcionarios públicos, en un esfuerzo por disipar la mala imagen dejada por un escándalo de corrupción que amenazó su gobierno los últimos meses. Cardoso emitió el código junto a un paquete de medidas que incluye la divulgación del gasto público en la Internet, para poner en evidencia la consternación de su gobierno ante el desvío de 100 millones de dólares de la construcción de un edificio judicial. "Con estas medidas estamos dando un choque de transparencia en la administración pública", declaró Cardoso en una ceremonia en el palacio presidencial de Planalto. Según el código de conducta, los funcionarios públicos deberán enviar a la Comisión de Ética Pública un informe de su patrimonio y no podrán recibir ingresos de otras fuentes que no sean su salario del gobierno mientras ejercen el cargo. Asimismo, se verán impedidos de asumir cargos como asesores de individuos u entidades que mantienen relaciones con el gobierno en los cuatro meses posteriores a su salida del cargo público. Cardoso respondió así al escándalo por el desvío de fondos destinados al Tribunal Regional de Trabajo (TRT) de Sao Paulo, al que calificó como un "símbolo de una crisis que pone en cuestión las instituciones republicanas". El Nacional, Venezuela (Reuters), 22 de Agosto de 2000 <http://www.el-nacional.com/>

CHILE: DESTITUYEN A ALCALDE DE VIÑA DEL MAR

Rodrigo González, hasta ahora alcalde de Viña del Mar, quedó definitivamente destituido del cargo por decisión unánime del Tribunal Calificador de Elecciones (Tricel), máximo organismo electoral del país, y en contra de cuya resolución no cabe recurso alguno. González (PPD) fue destituido por "notable abandono de sus deberes" por tres casos específicos: la situación del ex Hotel Miramar; por una rebaja de derechos municipales que hizo a dos empresas, a pesar de que la ordenanza municipal había restado tal potestad al jefe comunal, y por haber logrado la aprobación para otorgar un bono de productividad en favor del personal de la Municipalidad de Viña del Mar. El alcalde de Viña del Mar quedará oficialmente destituido inmediatamente después de que sea notificado de la resolución del Tricel, lo que podría ocurrir hoy, y deberá dejar en ese instante la

municipalidad, ya que la medida no sólo lo afecta en su calidad de alcalde, sino también como concejal. Rodrigo González, quien permaneció durante toda la tarde reunido con sus asesores y amigos más cercanos, señaló ayer que pese a acatar el fallo del Tricel, mantendrá su candidatura a la reelección, por sobre lo que opinen los dirigentes nacionales de su partido, el Partido por la Democracia (PPD). Poco después de conocida la destitución del alcalde de Viña del Mar, el PPD bajó su postulación como candidato a alcalde privilegiado por esa comuna en las próximas elecciones del 29 de octubre. Con esto, la Concertación deberá negociar cuál será ahora su candidato "privilegiado". El Mercurio, 24 de Agosto de 2000 <http://www.elmercurio.cl/>

CHINA: MUSEO DE LA CORRUPCIÓN SE CONVIERTE EN CENTRO TURÍSTICO DE PEKÍN

Cientos de personas abarrotan todos los días el "museo de la corrupción" de la capital china, donde se inauguró la exposición "La ciudad de Pekín golpea duro y advierte contra los delitos económicos", con la que se intenta calmar a la población, cada vez más irritada con la justicia. La muestra, con un despliegue inusitado de fotografías de personalidades corruptas de la vida política o del mundo empresarial chino, recoge también montones de billetes falsificados por delincuentes, cigarrillos introducidos en el país de contrabando y carnés de identidad de personas que se encuentran tras las rejas. La exposición, que abarca varias salas del Museo Militar de Pekín, desea ser la ventana de los esfuerzos del Gobierno por combatir ese mal fuertemente arraigado en China, donde la liberalización económica ha fomentado, especialmente entre la clase gobernante, el culto al dinero. Como si de una exposición de arte "pop" se tratara, las paredes del museo muestran desde carteles coloridos a vídeos con filmaciones de juicios y tarjetas de crédito falsas con las que grupos de delincuentes desvalijaban los bancos. La mayoría de los visitantes son personas mayores, explican los vigilantes, aunque también acuden jóvenes que desean echar un vistazo a los objetos del museo, que se está convirtiendo, desde que se inauguró hace unos días, en uno de los centros turísticos de Pekín. "Aunque las puertas del museo están vigiladas por militares, también hay gran número de oficiales y soldados que acuden como espectadores", indica el diario "South China Morning Post", editado en inglés en Hong Kong. La fuente agrega que, aunque los visitantes hacen vivos comentarios mientras recorren las salas, "de repente se impone el silencio cuando se entra en la estancia de veinte metros en la que se exponen los documentos que llevaron a la detención y expulsión del Partido Comunista Chino (PCCh) del vicepresidente de la Asamblea Nacional Popular (ANP, legislativo) Cheng Kejie". En la citada sala están colocadas las fotografías, como si de una película se tratara, de Cheng, condenado a muerte el pasado 31 de julio, y de su amante Li Ping, sentenciada a cadena perpetua una semana más tarde. Ambos fueron hallados culpables por una comisión parlamentaria de aceptar sobornos, regalos y joyas, incluidos diamantes, por valor de unos 41 millones de yuanes (4,9 millones de dólares). El "museo de la corrupción" de Pekín es sólo un botón de muestra de lo que está ocurriendo actualmente en China, donde el Gobierno quiere acercarse al pueblo para intentar aplacar el descontento de los ciudadanos, sobre todo de los trabajadores. Hoy, lunes, la Oficina Nacional de Auditorías (ONA) anunció un plan para investigar a gran parte de los miembros del Gobierno y del PCCh, que entrará en vigor cuando dejen el cargo y que afectará incluso a los jubilados. "Va a ser posible abrir investigaciones contra altos responsables de la Administración, como ministros y gobernadores", señaló el auditor general de la ONA, Li Jinhua, quien matizó que el proyecto todavía necesita algo de tiempo para madurar y se llevará a cabo de "forma gradual". Noticias Starmedia (EFE), 21 de Agosto de 2000 <http://www.starmedia.com/>

COLOMBIA: COMO UNO DE LOS MAYORES CASOS DE CORRUPCIÓN CALIFICO LA CONTRALORÍA LA SITUACIÓN DEL INSTITUTO PENITENCIARIO

Como uno de los mayores casos de corrupción y desgüeño administrativo encontrado en dependencias del Estado calificó la Contraloría General de la Nación la situación actual que presenta el Instituto Nacional Penitenciario y Carcelario (Inpec). Según la última auditoría, practicada al

Inpec, el organismo de control encontró irregularidades administrativas y financieras que, debido a su magnitud, "fue difícil cuantificar". Además, el hacinamiento, la falta de servicios de salud, educación y de programas de resocialización demuestran que el objeto social para el que fue creado el Inpec tampoco se cumple. El común denominador, en la Dirección General y en las seis regionales que manejan los 168 centros de reclusión, fue la violación sistemática de las normas de contratación, entre ellas concentración en las adjudicación de contratos y sobrecostos en la ejecución de obras y servicios. La auditoria encontró que durante 1998 y 1999 el Inpec suscribió contratos por \$48.075 millones para generar 5.600 nuevos cupos y aliviar la situación de hacinamiento en las cárceles. De acuerdo con un estudio del mismo Instituto, la mitad de los centros de reclusión fueron construidos hace más de 40 años y sólo el 6% tiene menos de diez años. Para el director del Inpec, el general de la Policía (r) Fabio Campo Silva, el informe de auditoria de la Contraloría es una clara radiografía del estado en el que encontró el Instituto al asumir su cargo, hace siete meses, y aclaró que esa situación cobija a los directores que lo antecedieron. Pero, aseguró que tomó medidas inmediatas encaminadas a frenar las irregularidades detectadas por el organismo de control en el período 1998-1999. Entre ellas, un corte de cuentas y la designación de un gerente de proyectos, quien se encargará de la revisión, ordenamiento y corrección de las fallas detectadas. El Colombiano, 24 de Agosto de 2000 <http://www.elcolombiano.com.co/>

COLOMBIA: EX ALCALDES ACUSADOS DE SUSTRAR BIENES MUNICIPALES SE DEFIENDEN

Los ex alcaldes de Playas y Durán, Gabino de la A y Oswaldo Peñaherrera, respectivamente, fueron los primeros en reaccionar ante las acusaciones formuladas por sus sucesores, Gregorio Andrade y Mariana Mendieta, en su orden. Gabino de la A Escalante desmintió que se hayan sustraído bienes del Municipio y aseguró que hay un inventario de todo lo que dejó, efectuado por el agente fiscal (e) de La Libertad, Franklin Grau, el 9 de agosto. También denunció ante la Comandancia de la Segunda Zona Militar el operativo efectuado por un contingente de la Base San Antonio, que impidió el acceso de los funcionarios al Municipio. Por su parte, Oswaldo Peñaherrera, ex alcalde de Durán, dijo que desde julio y hasta la fecha hay un auditor de la Contraloría en el Municipio pedido por él, por lo que menos pudieron desaparecer bienes de la institución. "Lo que es del Municipio está ahí y no sé cuál es la intención de la alcaldesa." El Universo, 18 de Agosto de 2000 <http://www.eluniverso.com/>

COLOMBIA: PIDEN INVESTIGAR A 16 FUNCIONARIOS DE LA REGISTRADURÍA NACIONAL, 4 EX REGISTRADORES Y AL ACTUAL REGISTRADOR

Por petición de la Contraloría General, la Procuraduría inició investigación disciplinaria contra 16 funcionarios de la Registraduría Nacional, 4 ex registradores y al actual Registrador, por presunta mala conducta por la firma de un contrato por valor de 67.246 millones de pesos con la empresa francesa Sagem que finalmente incumplió. Según denunció el contralor General Carlos Ossa Escobar, la Registraduría pudo haber violado la contratación estatal al prorrogar en casi el doble del tiempo, estipulado en 22 meses, el contrato con Sagem para desarrollar el proyecto de modernización tecnológica, "que a la fecha no se ha concluido y que, por ende, ha retrasado el proceso electoral", dice el informe electoral. La investigación disciplinaria fue abierta contra los ex registradores Orlando Abello Martínez, Mariela Hernández de Domínguez, Jaime Calderón Brugés y Clara María González, así como al actual Registrador, Iván Duque Escobar. Las presuntas irregularidades disciplinarias también cobijan a los directivos de la Registraduría Gustavo Villamil Rozo, José Alberto Morillo, Álvaro Molina Vásquez, Esperanza Mejía Reyes, Antonio William Gaviria Arana, Sonia Patricia Cáceres Martínez, María Cristina Duque González, Edith Mabel Ovalle Salazar, Gustavo Pedroza Gutiérrez, Álvaro Luis Monterrosa Arrieta, Harold Wilson Salazar Virguez, Miguel Arturo Linero de Cambil, Nagib Chalave González, Epaminondas Franco Ávila y Edgar Daniel

COLOMBIA: SECTOR DE JUSTICIA UNO DE LOS MAS AFECTADOS POR LA CORRUPCIÓN, SEGÚN ESTADÍSTICAS

Uno de los sectores afectados por la corrupción es el que tiene que ver con la justicia. Según estadísticas del Consejo Superior de la Judicatura desde 1992 hasta la fecha han sido sancionados 3.377 abogados y 587 funcionarios judiciales. Tanto los profesionales del Derecho como los auxiliares de la justicia inciden sobre el normal trámite de los procesos del ramo, causando irregularidades que benefician a sus clientes y a ellos mismos. "Colombia atraviesa por una situación crítica en términos de corrupción tanto a nivel político como administrativo, situación que se ve agravada por la percepción generalizada de unas instituciones poco confiables e ineficaces. Un sistema de justicia saludable tiene una gran incidencia sobre la eficiencia económica y el desarrollo de un país", señalaron fuentes de la Corporación Excelencia en la Justicia. Para el organismo es claro que las actuaciones corruptas atentan contra los tres principios que garantizan el buen desempeño de la justicia de una nación: independencia, autoridad para aplicar las decisiones y una organización eficiente. Así las cosas, la Corporación considera que es necesario desarrollar un sistema de incentivos dentro de la Rama Judicial que haga que tanto los funcionarios como los demás empleados administren justicia de manera responsable y eficiente. En segundo lugar, sugieren que se adopte un régimen disciplinario que sancione rigurosamente a los infractores y que facilite el desarrollo de los procesos dentro de la jurisdicción. Estas estrategias, según la Corporación, se deben acompañar de cambios en los niveles legales, administrativos y organizacionales del sector judicial. Una encuesta del Consejo Superior de la Judicatura realizada en 17.394 hogares de Barranquilla, Bucaramanga, Bogotá, Medellín, Cali y Pasto señala que el 43% de las personas entrevistadas piensan que la justicia no opera y, por lo tanto, no acuden a ella. Entre las razones que dieron están el costo de honorarios (45.1% de los encuestados), el desconocimiento de los derechos (45.1%), la demora de los procesos (39.1%) y la falta de credibilidad en el aparato judicial (30.2%). Fuera de lo anterior, el Consejo Superior de la Judicatura y la Procuraduría General de la Nación, organismos que ejercen control y vigilancia de tipo administrativo y disciplinario sobre la rama judicial, encuentran que ésta se encuentra colapsada. La Corporación Excelencia en la Justicia considera que eso se debe al alto índice de congestión en la jurisdicción disciplinaria, donde la carga laboral supera los 40 mil procesos. Entre 1994 y 1999, la saturación ha pasado de 13.500 a 26.657 procesos sin solución, al cierre del año. Y es que los entes de control no disponen de herramientas para sancionar rápida y drásticamente a los funcionarios correspondientes con el retiro de su cargo cuando existan indicios de prácticas antiéticas o corruptas. El Colombiano, 21 de Agosto de 2000 <http://www.elcolombiano.com.co/>

COSTA RICA: CONSULTA A AUTORIDADES. CORRUPCIÓN TIENE VARIOS PORTILLOS

La creación de instancias extraoficiales que suplantán a las instituciones públicas en la administración de recursos económicos y el manejo de esos dineros con fines político-electorales, son dos de los principales portillos a través de los cuales la corrupción penetra y causa estragos. Ese problema también se infiltra por medio del caos administrativo que impera en diversas entidades y de la falta de una lucha coordinada, en escala nacional, contra los actos ilícitos. De esa manera se resumen los criterios expresados por cinco autoridades nacionales que, como parte de sus funciones, investigan o tratan casos relacionados con actos indebidos. Se trata del fiscal general, Carlos Arias; el contralor general de la República, Luis Fernando Vargas; el procurador, Román Solís; la magistrada de la Sala Constitucional y presidenta de la Comisión Nacional para el Mejoramiento de la Justicia (Conamej), Ana Virginia Calzada, y la defensora de los habitantes, Sandra Pizsk. Fueron consultados, entre el jueves y el viernes pasados, sobre las áreas más frágiles que tiene nuestro país en materia de corrupción. También se les preguntó sobre posibles soluciones. De acuerdo con Arias, uno de los terrenos fértiles para la germinación de actos

corruptos son los programas de ayuda social dotados con recursos millonarios. Como ejemplo de esa situación, mencionó el caso de la crisis financiera del sector cooperativo de la vivienda, durante el gobierno anterior, a la cual calificó de "cuestión monstruosa, compleja". Carlos Arias también llamó la atención sobre un campo que, según él, cuando se investigue a fondo superará en dimensiones económicas a cualquiera de los escándalos que han ocurrido en Costa Rica en los últimos años: el contrabando de mercancías. De acuerdo al contralor Vargas, también señaló como surco de la corrupción el afán por atender a toda prisa viejas necesidades que afronta la población, con lo cual en diversas ocasiones se inventan procedimientos y se saltan regulaciones que algunos aprovechan para beneficio propio. En ese sentido, señaló como ejemplo las anomalías con fondos de Asignaciones Familiares. Para el Contralor, otro escenario propicio para la corrupción es la creación extraoficial de instancias para el manejo de fondos públicos -en sustitución de las oficiales- con el argumento de que estas son lentas y entran. En opinión de Vargas, todo se engloba dentro de una deficiencia básica: la pérdida de la capacidad de planificación en la administración pública. "Lo que se hace a como dé lugar genera desorden y el desorden es uno de los agentes de la corrupción". Por su parte Calzada informó de que Canamej trabaja en la elaboración de un proyecto para crear un grupo -con representantes del Estado y la sociedad civil- que coordine las políticas generales para prevenir actos de corrupción. La idea, dijo, no es que ese comité tenga facultades de investigación, sino que más bien se dedique a cuestiones como orientar a los ciudadanos sobre los caminos adecuados para plantear denuncias. "Uno de los problemas principales es que la gente carece de mucha información", declaró. "Queremos hacer conciencia sobre la necesidad de unificar y coordinar esfuerzos. Una lucha dividida es más débil", afirmó. La Nación, 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ECUADOR: COMISIÓN ANTICORRUPCIÓN TRATÓ 1676 CASOS DESDE 1997

Desde marzo de 1.997 hasta la fecha, la Comisión Anticorrupción (CCC) ha tramitado 1676 denuncias, de las cuales 460 están el trámite de investigación a través de los organismos como la Fiscalía, Contraloría General del Estado, la función Judicial, el Defensor del Pueblo y el Consejo Nacional de la Judicatura. El último proceso sobre el cual se pronunció la CCC fueron irregularidades al interior de la institución policial, donde se habría segmentado contratos con empresas proveedoras de bienes. Los temas de trabajo han abordado investigaciones de corrupción en todas las instituciones del sector público, y en muchas ocasiones, las observaciones de la Comisión han provocado resentimientos de las partes afectadas. La CCC tiene oficinas de trabajo en la mayoría de las provincias del país. En Portoviejo se crearon recientemente dos redes cívicas anticorrupción, y que integra a sectores sociales jóvenes de la capital manabita. Las redes que apoyan el trabajo se crearon a partir de la organización de un seminario taller que tuvo lugar el pasado 9 y 10 de agosto del presente año, donde intervinieron Alendra Cantos y Pedro Votruba, altos directivos de la CCC. Cabe añadir que también se creó la Comisión de coordinación interinstitucional que plantee alternativas para agilizar los procesos judiciales por casos de corrupción, iniciativa que nació a partir de un seminario taller entre la CCC, el Consejo Nacional de la Judicatura y la Corte Suprema de Justicia. La filosofía de la CCC es investigar y establecer presunciones de responsabilidad civil o penal respecto de la marcha y administración de los bienes y recursos del Estado. La Hora, 21 de Agosto de 2000 <http://www3.lahora.com.ec/>

ECUADOR: EL TRIBUNAL CONSTITUCIONAL ECUATORIANO CEDIÓ A LAS PRESIONES POLÍTICAS. LA CORRUPCIÓN SIGUE A SUS ANCHAS EN EL PAÍS

Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Aunque 6 de los 9 vocales del Tribunal Constitucional se mostraron a favor de la permanencia de la directiva de mayoría en el Congreso Nacional del Ecuador, dicho Tribunal optó por la "salida política" y apoyó a la minoría legislativa, representada

por el derechista Partido Social Cristiano, PSC. Así, Carlos Falquez Batallas, exvicepresidente del Congreso Nacional por el PSC, deberá reinstalar la Asamblea General y desconocer todo lo actuado por Susana González, como presidenta del Congreso electa por la mayoría de centroizquierda. Minutos más tarde de la decisión del Tribunal, Susana González declinó su nombramiento, aunque rechazó el muñequero político del Gobierno y su presión al resto de organismos constitucionales. Por su parte, los movimientos sociales, indígenas y campesinos, ya se están organizando para desarrollar protestas ante la decisión del organismo Constitucional y por la aplicación de la Ley Trole anunciada por el Presidente Gustavo Noboa. Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Los socialcristianos, en cambio, respaldan e impulsan la venta de dichas empresas pues son sus militantes los mayores interesados en comprarlas. Informativos Net, España, 23 de Agosto de 2000 <http://www.informativos.net/>

ECUADOR: ESCANDALO BANCARIO - OBRAS DE ARTE DADOS EN GARANTIA FUERON SOBREALORADAS

Nuevos elementos se suman al proceso judicial que se desarrolla en la Corte Suprema de Justicia en contra de los ex directivos de Filanbanco, William y Roberto Isaías Dasum, mediante los cuales se confirmarían las supuestas irregularidades cometidas en la valoración tanto de las obras de arte entregadas al Banco Central, como de los bienes que recibió en dación de pago la Agencia de Garantía de Depósitos (AGD). Una diferencia de \$ 24 millones existiría entre el valor contabilizado por Filanbanco Trust y el último avalúo efectuado por el Banco Central respecto de las obras de arte entregadas por los ex directivos de Filanbanco como parte del fideicomiso de 400 millones de dólares ofrecido a cambio del préstamo que recibió dicha institución bancaria en noviembre de 1999. La última valoración efectuada por peritos del Banco Central confirmaría la existencia de "manejos fraudulentos y artificiosos por parte de los Isaías Dasum", quienes "habrían inflado los avalúos para hacer creer que lo que en realidad vale 5 millones de dólares, se lo podía hacer pasar por 30 millones". Según la nueva información proporcionada por el superintendente de Bancos, Juan Falconí Puig a la Corte Suprema de Justicia, como prueba de las irregularidades que se habrían cometido a través de la dación en pago de obras de arte por parte de Filanbanco Trust, se desvirtuaría también la valoración efectuada por la empresa Global Silverhawk, que arrojó como resultado la suma de \$10 458 508 dólares en obras de arte, es decir, \$5 263 102 dólares más en relación con la última valoración efectuada por los técnicos del Banco Central. La Superintendencia precisó también en esta ocasión, que sobre los bienes inmuebles que componen el activo de las compañías entregadas en dación en pago a la Agencia de Garantía de Depósitos (excepto los locales comerciales de Puntilla Mall) existen situaciones de carácter legal que "limitan su dominio", entre los cuales se registran juicios de excepciones, juicios coactivos, juicios de expropiación, constitución de hipotecas y fundamentalmente condición resolutoria que podría otorgar a los antiguos propietarios la posibilidad de ejercer la acción de restitución, con lo cual se provocaría aún más perjuicio económico al Estado ecuatoriano. El estudio sobre los bienes estuvo a cargo Pedro Delgado, Intendente General de Supervisión y Entidades Financieras de la Superintendencia de Bancos, cuyo informe se adjuntó al proceso judicial que se desarrolla en contra de los hermanos Isaías Dasum y demás involucrados en el caso. "Intervención urgente" Los peritos del Banco Central reevaluaron 726 obras de arte en el Museo Nahim Isaías de Guayaquil, y 1477 del Museo Filanbanco, de Quito. Las ubicadas en Guayaquil, son en su mayor parte son pinturas que han obtenido una calificación que va de buena a excelente, siendo las más caras una pintura llamada Virgen con cautivos, \$ 42.000, y las esculturas de Santa Catalina de Siena y de La Dolorosa, con un valor de \$40.000 cada una. En cambio, el informe del Banco Central señala que las cientos de obras del Museo Filanbanco, de Quito, tienen una calificación mayoritaria de "no aceptable", "urgente intervención" y "necesita intervención". En el Museo Nahim Isaías se exponen 180 obras

que fueron evaluadas, según el informe del Banco Central. Las demás están en reserva. La mayoría de las obras del Museo Filanbanco, en Quito, tienen una calificación de buena, regular y mala. Muchas de ellas ni siquiera tienen avalúo y una buena parte necesitan una reparación urgente. Las obras son parte del patrimonio cultural y corresponden a diversas escuelas artísticas de la Colonia, especialmente de la Escuela Quiteña. Todas se refieren a motivos religiosos y las más caras corresponden a artistas como Caspicara El superintendente de Bancos, Juan Falconí Puig, expresó su preocupación por la lentitud con la que se estarían tramitando los procesos judiciales relacionados con irregularidades dentro del sistema financiero, entre los cuales se encuentra el de Filanbanco. En el momento existen 31 juicios penales relacionados con irregularidades dentro del sistema financiero, en la mayoría de los cuales no se han cerrado los sumarios, por ejemplo los casos de los bancos de Préstamos, Ecuacambio, del Azuay, del Tungurahua, Progreso, Unión, Popular, Previsora, Bancomex, etc. De dichos procesos, únicamente los casos Filanbanco y Continental se ventilan en la Corte Suprema de Justicia, los demás se encuentran radicados en los juzgados de las provincias del Guayas (13), Pichincha (13), El Oro (1), y Macas (1). (MUP) La Superintendencia también pidió al juez Noveno de lo Penal de Pichincha que se solicite a la Corte Suprema de Justicia se requiera al Gobierno de Estados Unidos que inicie el proceso de extradición de los ex banqueros, hermanos Roberto y William Isaías y de Arturo Quiroz Martín, ex directivo del Banco del Pacífico. La denuncia sostiene que varios medios de comunicación han advertido la presencia de los nombrados en la ciudad de Miami. El abogado de la Superintendencia invocó ante el juez la convención de Estradición entre el Ecuador y Estados Unidos suscrita el 28 de junio de 1872 y el tratado complementario de extradición suscrito por los dos países el 22 de septiembre de 1939. Los abogados de la Superintendencia pidieron también la certificación de que el Instituto de Patrimonio Cultural autorizó la transferencia de dominio de los más de dos mil bienes culturales que se usaron como garantía de pago. ECUADOR: EXTRACTO DE CONFERENCIA DE PRENSA DE SECRETARIA DE ESTADO ALBRIGHT

Esta pregunta en la conferencia del 18 de agosto de 2000 se refiere a los profugos ecuatorianos investigados en casos de corrupción: ***** PREGUNTA: Buenas tardes. El presidente de nuestro país, doctor Gustavo Noboa, se había comprometido a solicitar oficialmente al gobierno de Estados Unidos la cancelación de visas de todos aquellos fugitivos de la justicia ecuatoriana, quienes se encuentran al presente en territorio de Estados Unidos. Nosotros no sabemos si usted y las autoridades ecuatorianas tratarían sobre este asunto en la reunión de esta tarde, sin embargo, queremos conocer qué probabilidades existen de que el gobierno norteamericano acepte o acoja la petición hecha por el Ecuador de retirar las visas a los prófugos ecuatorianos, para que ellos vengan acá? Adicionalmente, qué posibilidades hay de que el gobierno norteamericano dé las facilidades necesarias para que podamos extraditar a aquellos prófugos de la justicia porque hasta el momento ha sido muy difícil, por no decir imposible, traerlos al país? ***** SECRETARIA ALBRIGHT: En primer lugar, quiero decirles que no discuto casos de visas, porque eso se hace a través de otro sistema dentro de nuestro gobierno. Realmente no discutimos de eso esta tarde, pero debo decirles que en los casos que se solicita la extradición, es importante que el gobierno lo haga bajo el tratado de extradición, y nosotros estaremos dispuestos a tratar sobre esos temas, pero no quiero hablar sobre casos de visa. ***** CANCELLER MOELLER: Este asunto ha sido manejado por el gobierno ecuatoriano fundamentalmente a través del ministerio de Justicia de Estados Unidos. A propósito, valga esta oportunidad para agradecer una vez más la excelente y permanente colaboración que hemos tenido de la ministra Janet Reno, quien se ha preocupado personalmente de esta situación. Debo anunciar a la prensa ecuatoriana que el día de hoy se dio paso al proceso de extradición de Peñaranda. Hasta el momento él estaba sometido a un proceso de deportación, que lamentablemente tiene que cumplir una serie de requisitos de acuerdo a las

leyes americanas. La cancillería, por disposición del presidente Noboa, presentó una solicitud de extradición aplicando el antiguo tratado que para ciertos casos no es viable, pero para éste sí lo va a ser. Y aunque tengamos que esperar unas semanas más, Peñaranda vendrá a pagar sus culpas a Ecuador. En cuanto al tema de las visas, efectivamente ésta no es la instancia para tratar el tema. La solicitud ya fue hecha hace algunos meses y estamos esperando respuesta de Estados Unidos. Servicio Noticioso desde Washington, 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

ECUADOR: SE AMPLÍA CASO CONTRA EL EX PRESIDENTE MAHUAD. COMISIÓN ANTICORRUPCIÓN REMITIRÁ INVESTIGACIONES A LA JUSTICIA

Con el propósito de probar los delitos que se habrían configurado con el congelamiento de recursos en el sistema financiero nacional y el feriado bancario, la Comisión Anticorrupción deberá remitir a la Corte Suprema de Justicia las investigaciones efectuadas sobre el caso, en el que están sindicados el ex presidente Jamil Mahuad y su ex ministra de Finanzas, Ana Lucía Armijos. El pedido para que se entregue el informe documentado y debidamente certificado lo hizo el Ministerio Público con el propósito de que la Corte Suprema cuente con los antecedentes e investigaciones que sirvieron de base para solicitar que se dicte el auto cabeza de proceso en contra de los inculpados. Asimismo, la fiscal general, Mariana Yépez, pidió se recepte el testimonio de Jorge Egas Peña, quien a la época del cometimiento de la infracción desempeñaba las funciones de Superintendente de Bancos. El cuestionario de preguntas para que se efectúe esta diligencia la elaborará el Ministerio Público. El Universo, 21 de Agosto de 2000 <http://www.eluniverso.com/>

EE.UU: HASTA LOS VOTOS PUEDAN COMPRARSE POR INTERNET

Un nuevo sitio promete "unir el capitalismo y la democracia" subastando votos para las elecciones presidenciales de los EE.UU. de este año. "La industria electoral gasta cientos de millones de dólares con la intención de influir la elección presidencial", puede leerse desde agosto en voteauction.com. "Este sistema es un desperdicio inútil de dinero para los candidatos y sus seguidores. [Voteauction.com](http://voteauction.com) se propone mejorar este sistema llevando directamente a los votantes el dinero de los contribuyentes a las campañas". El sitio le permite a los ciudadanos poner su voto en un lote de remate, estado por estado. El mayor postor determina qué candidato a la Casa Blanca se llevará los votos en masa de los participantes de voteauction.com. "No soy cínico", dice su fundador James Baumgartner, un graduado en ciencias políticas. "Soy realista. La mayoría de la gente tiene una visión sincera acerca de como los candidatos se venden. Los votantes deberían ser incluidos en esta situación y obtener parte de los réditos". Al menos un analista político elogió el mensaje propuesto por este sitio. "Es una muy buena forma de hacerle ver a los votantes todo lo que otros (los grandes contribuyentes) ganan con el sistema y qué poco obtienen los votantes en comparación", dice Sheila Krumholz, directora de investigación del Center for Responsive Politics, una organización apartidaria que estudia la influencia del dinero en la política. "Hay que darle reconocimiento a este tipo, por atraer la atención de la gente sobre este tema de manera provocativa", dice. Pero no todo el mundo está de acuerdo. "Deberían clausurarlo", dice Deborah Phillips, presidenta del Voting Integrity Project, un grupo de interés público, sin fines de lucro, que a menudo trata cuestiones relacionadas con la Internet. "Es el cinismo llevado a su máxima expresión. Es destructivo para el proceso democrático. Si los fiscales de los 50 estados no van tras este tipo y cada uno de los votantes participantes, no están haciendo su trabajo". Las autoridades ya han tomado nota sobre casos similares. El Departamento de Justicia de los EE.UU. se puso en contacto esta semana con eBay luego de que un puñado de usuarios ofreciera sus votos a la venta en ese sitio de subastas por Internet. Ni bien eBay tomó conocimiento de estos ítems cuestionables, los quitó del sitio inmediatamente, dijo su vocero, Kevin Pursglove. "Lo cierto es que incluso si la gente se lo toma como una broma, nosotros nos lo tomamos muy seriamente", dice Pursglove. "Esto es un hecho que podría traer aparejados cargos delictivos". Según las autoridades,

tanto quienes venden como quienes compran votos violan leyes estatales y federales, y podrían ser castigados con miles de dólares en multas o años en prisión. Baumgartner dice que él no vende ni compra votos, simplemente provee un foro donde otros pueden hacerlo, quedándose con un porcentaje de la transacción. También sostiene que se encuentra protegido por las recientes decisiones de la Suprema Corte que equiparan al dinero con la libertad de prensa, incluyendo una de los años 70 que sancionaba el uso del dinero en campañas políticas. Pero hasta sus simpatizantes tienen dudas. Krumholz anticipa que el sitio podría dar lugar a graves contiendas legales. "Me preocupa el autor del sitio", dice. Baumgartner, por su parte, se mantiene optimista. "Espero conseguir pronto anuncios e inversionistas", dice. Phillips dice que debería ir preparándose para recibir otra cosa. "Esto es un verdadero fraude electoral en la Internet. No me interesa como lo pinten. Espero que este tipo tenga unos buenos abogados que lo respalden". Noticias CNN, 19 de agosto de 2000 http://cnnespanol.com/2000/eeuu_canada/08/19/eleccion/index.html

EL SALVADOR: FISCALÍA INVESTIGA FIRMAS FALSAS EN EXPEDIENTE DE FEDERACIÓN DE FÚTBOL, INVESTIGADA POR POSIBLE MALVERSACIÓN

La Fiscalía investigará la posible manipulación de documentos por parte de la Corte de Cuentas, así como la alteración de firmas en los recibos que la Federación de Fútbol (FEDEFUT) presentó para desvanecer un faltante de 35 millones de colones. Fuentes de la Fiscalía confirmaron a este medio que hay, al menos, dos documentos que contienen firmas alteradas. Se trata de recibos emitidos por fuertes sumas de dinero en dólares. La Federación, supuestamente, entregó estos comprobantes a dos miembros del equipo técnico que dirigió a la selección nacional durante las eliminatorias por el Mundial Francia 98. La Fiscalía sospecha que las firmas de los técnicos que aparecen en los recibos son falsas. Más alteraciones. Este periódico conoció, además, de otros casos donde se advierte la alteración de firmas. Dos jugadores de la liga profesional de Estados Unidos que son seleccionados nacionales habrían recibido, según los directivos de la FEDEFUT, un total de 2 mil dólares cada uno. Después de escuchar varias declaraciones en torno a estos casos, la Fiscalía no aceptó los recibos como justificantes de egreso, debido a la sospecha de que las firmas también eran falsas. Sin embargo, el notario Pablo Noé Recinos da fe de que las firmas son originales. El fiscal general, Belisario Artiga, ha girado instrucciones nuevamente para que la investigación sobre el caso FEDEFUT llegue hasta las últimas consecuencias. Actualmente, el equipo de fiscales del Departamento de Procuración, asignado al caso, realiza el cotejo de documentos enviados por la misma Corte de Cuentas y otros obtenidos por la Fiscalía, para verificar la autenticidad de los documentos presentados por la FEDEFUT. La Fiscalía, según confirmaron fuentes del Ministerio Público, también seguirá otra línea de investigación: determinar alteraciones en los informes que los auditores enviaron a la Dirección de Responsabilidades de la Corte de Cuentas. Tal como informó este diario el pasado sábado, autoridades de la Corte obviaron señalamientos importantes emitidos por los auditores en un informe fechado en junio de este año. Los documentos alterados. La Prensa, 22 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: ANUNCIAN AUDITORÍA A CORTE DE CUENTAS

Un día después que este diario denunciara el estancamiento del proceso de auditoría a la Corte de Cuentas, el presidente de la Asamblea Legislativa se comprometió a resolver la situación. El diputado Ciro Zepeda anunció ayer que propondrá a la junta directiva de la Asamblea crear una comisión para ese propósito. Zepeda quiere que ya no se cuestione la credibilidad del Partido de Conciliación Nacional (PCN), partido que él dirige. Esa comisión deberá agilizar la contratación de una firma que audite a la Corte de Cuentas. Afirmó que buscarán asesoría internacional para iniciar el proceso. Zepeda dijo que la directiva de la Asamblea "debe dar plenos poderes... para que busque apoyo en las contralorías de otros países". Por tanto, el primer paso será contactar las instituciones contraloras de otros países. Zepeda está consciente que es difícil que el Gobierno les pueda facilitar un refuerzo presupuestario para sufragar los gastos que requiere la fiscalización de

la Corte. El democristiano Aristides Alvarenga, secretario de la Asamblea, confirmó que la directiva realizó ayer un "ejercicio financiero" que permitió concluir que la Asamblea tiene insuficiencia de fondos. Recordó que se le recortó alrededor de 26 millones de colones en el presupuesto de este año. Por eso pedirán que en el presupuesto de 2001 se prevea ese gasto. "Según se ha investigado, puede andar entre 10 ó 20 millones de colones" el costo de la fiscalización. La Prensa, 18 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: FISCALÍA INVESTIGA POSIBLE MALVERSACIÓN DE FONDOS EN FEDERACIÓN DE FÚTBOL

La Fiscalía dijo que continuará investigando una posible malversación de fondos en la Federación Salvadoreña de Fútbol (FSF) pese a que la Contraloría multó y obligó a directivos a reintegrar unos 345.000 dólares. "Estamos investigando a fondo (el caso) y con mucha seriedad", declaró a periodistas el fiscal general, Belisario Artiga; "creo que se puede demostrar lo que sucede y si hay culpables, los vamos a hallar". La Contraloría informó el viernes que encontró un faltante de más de 3 millones de colones (unos 345.000 dólares) durante el período 1996-1998 de la administración de la FSF. Una primera auditoría había revelado un faltante de 35 millones de colones (unos 4 millones de dólares), según la prensa local. La Contraloría impuso una multa de unos 4.500 dólares para cinco ex directivos por "responsabilidad administrativa" y obligó además a otros cuatro miembros, entre ellos el actual presidente Juan Torres, a reintegrar unos 345.000 dólares por "responsabilidad patrimonial". Pero Torres y otros dos miembros de la junta directiva no serán sancionados debido a que no reciben salarios en la FSF, dijo la Contraloría, basados en artículos del Reglamento para la Determinación de Responsabilidades. Sin embargo, Artiga señaló que la Fiscalía continuará con las investigaciones debido a "una posible malversación de fondos y administración fraudulenta" en la Federación Salvadoreña de Fútbol. Torres dijo a un periódico local que, "no tenemos absolutamente nada que devolver, lo que haremos es someternos al juicio de cuenta... quiero que esto se vea como un proceso, porque no ha terminado", señaló. La Nación. Costa Rica (AP), 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ESPAÑA: PIDEN DIEZ AÑOS DE INHABILITACIÓN PARA EL ALCALDE DE SALOBREÑA POR UN PRESUNTO DELITO DE PREVARICACIÓN

La Fiscalía de Granada solicitará diez años de inhabilitación para el alcalde de Salobreña, Manuel Pérez Cobo (del Partido Socialista Obrero Español -PSOE-), por un presunto delito de prevaricación cometido en su anterior etapa como regidor por cobrar a una constructora un impuesto de cuatro millones de pesetas sin estar autorizado. Tras varias suspensiones por diferentes cuestiones procesales, Pérez Cobo será juzgado por este caso ocurrido hace diez años en la Audiencia de Granada el próximo 22 de septiembre. El escrito de acusado relata que mayo de 1990 el alcalde de Salobreña concedió a la constructora Comofesa licencia de primera ocupación para la urbanización "Cala Verde", construida dentro de un proyecto más amplio "Vial Central Playa Salobreña", cuyas contribuciones especiales habían sido suspendidas un año antes por la Sala de lo Contencioso Administrativo de la antigua Audiencia Territorial de Granada (hoy TSJA). Aunque inicialmente denegó la licencia de primera ocupación solicitada por la constructora, el acusado "con conocimiento" de la suspensión de la Sala de lo Contencioso Administrativo "supeditó la concesión de la mencionada licencia al pago de 4.028.427 pesetas", una cantidad que fue ingresado por el municipio "no estando autorizado legalmente" para ello. En su escrito de conclusiones provisionales, la Fiscalía solicita seis años de inhabilitación por un delito de prevaricación y cuatro años de suspensión y multa de 500.000 pesetas por un delito del artículo 202 del antiguo Código Penal que castiga a los funcionarios que exijan el pago de impuestos no autorizados por las leyes o por las corporaciones respectivas. Andalucía 24 Horas, 22 de Agosto de 2000 <http://www.andalucia24horas.com/>

GUATEMALA: LIMITAN TRABAJO A AUDITORES SOCIALES EN EL CONGRESO

Por orden de la Junta Directiva del Congreso, el trabajo de auditoría social que efectúa en ese organismo la entidad cívica Acción Ciudadana (AC), se ha visto limitado. Desde la legislatura anterior, AC se dedica a monitorear el trabajo de los diputados. Entre otras cosas, esa organización civil lleva registro de las leyes aprobadas, así como de los diputados más productivos, los faltistas y los viajeros. Para hacer una evaluación del primer semestre del Congreso, Manfredo Marroquín, director de AC, solicitó el 10 de agosto diversos informes a la Junta Directiva, presidida por Efraín Ríos Montt. Un día más tarde, Carlos Wholers Monroy, secretario del Legislativo, respondió a Marroquín por medio de una misiva. "Para poder brindarle la información (...) es necesario que presente por escrito (...) las actividades a que se dedica la institución que usted dirige, copia de los estatutos bajo las cuales rige sus actividades, así como el instrumento legal por medio del cual se le autoriza para poder operar como institución dentro del país", se anota en la carta que firmó Wholers. "Nos extraña que ahora los eferregistas (del Frete Republicano Guatemalteco), no sepan quiénes somos. Incluso nuestra publicación Agenda Legislativa les sirvió para su trabajo cuando fueron opositores", se quejó Marroquín. A la vez, dijo que si los ahora oficialistas quieren fiscalizar a las organizaciones del Estado, deben dar el ejemplo; de lo contrario, "no tendrán autoridad moral, por impedir nuestro trabajo". También dijo que la actitud de la Directiva parlamentaria es violatoria del texto constitucional. "Toda información de las instituciones públicas es libre", enfatizó Marroquín. A su juicio, el Frente Republicano Guatemalteco está a tiempo de corregir la arbitrariedad en que incurre. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

GUATEMALA: CONTRALORÍA PIDE RATIFICAR CONVENIO CONTRA CORRUPCIÓN

Al inaugurar el II Foro Internacional sobre Ética y Lucha contra la Corrupción, el jefe de la Contraloría General de Cuentas de la Nación (CGCN), Marco Tulio Abadío, pidió públicamente al presidente Alfonso Portillo que promueva la ratificación de la Convención Americana contra ese flagelo, suscrita por iniciativa de la Organización de Estados Americanos. Según el funcionario, en los momentos actuales la adhesión se hace casi obligatoria por los compromisos sociales que conlleva, y también porque para combatir esa mala práctica y erradicar la impunidad es necesaria la cooperación entre las naciones. Tenemos que sacar a nuestro país de esa lista; este Gobierno tiene que manifestarse para ratificar esa lucha contra la corrupción, porque es vergonzoso que figure en ella, afirmó. Siglo Veintiuno pidió la vocera del mandatario, Fernanda Castejón, una respuesta oficial ante tal planteamiento. La funcionaria dijo que prefería consultar directamente a Portillo y devolver la llamada, lo cual no ocurrió. Al acto estaba invitado Portillo, pero otras actividades le impidieron asistir, según personal de la Secretaría de Comunicación Social. Ello molestó a Abadío, pero se cuidó de exteriorizarlo. En cambio, el alcalde capitalino, Fritz García-Gallont, a cuyo cargo estuvo la inauguración, aprovechó para hacer notoria la ausencia. Es innegable que muchas personas no están aquí presentes...Es posible que se tengan excusas tales como demasiada carga de trabajo, por compromisos adquiridos con anterioridad o simplemente por rehuir de una realidad que cada día los encierra más, pero que algún día tendrá que pedirles cuentas. Siglo XXI, 18 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: DENUNCIAN CORRUPCIÓN EN AUTORIDAD PARA EL MANEJO SUSTENTABLE DE LA CUENCA Y EL LAGO DE AMATITLÁN

Tráfico de influencias, nuevas licitaciones concesionadas a Servicios de Jardinería de la Cruz, sobrevaloración de obras e incumplimiento de contratos, son otras irregularidades halladas por auditores de la Presidencia en la Autoridad para el Manejo Sustentable de la Cuenca y el Lago de Amatitlán (Amsa), durante la gestión de Evelyn Reyna Chacón. La nueva documentación a la que tuvo acceso Siglo Veintiuno y que incluye un informe firmado por Adolfo Efraín Reyes López, asesor del Ejecutivo, fechado 28 de abril del 2000 y dirigido a Arturo Ruiz Wong, jefe de la Unidad Financiera de la Gerencia de la Presidencia, concluye: Los procesos de contratación de bienes y

servicios en Amsa para 1999 fueron realizados de forma ilegal en todos sus aspectos, con el fin de obtener beneficios propios para las autoridades de dicha institución y de un grupo de empresarios. Como argumento, el estudio señala: En todos los procesos de cotización se invitaron a las mismas compañías, lo que denota un marcado preferitismo e imparcialidad en las adjudicaciones. Siglo Veintiuno buscó ayer la opinión de Reyna Chacón; empero, Isabel Casas, quien actúa como intermediaria entre la aludida y los medios de comunicación, sostuvo que, de ahora en adelante, la ex funcionaria hablará sólo en presencia de su abogado. Una auditoría realizada por la Presidencia en Amsa reveló que, durante la gestión de la referida, la entidad gubernamental concesionó obras a socios de la ex funcionaria, así como que la infraestructura de la dependencia estatal fue utilizada para promocionar a Construnatura, ente no lucrativo presidido por Reyna Chacón. Además, se descubrió que la firma Servicios de Jardinería de la Cruz, ganadora de varios concursos, es propiedad del hijo de una conserje de Amsa y que, según el informe de Reyes López, tendría alguna relación con Reyna Chacón. El estudio citado también advierte que el gerente de Opcion 3 S.A., que licitó trabajos para Amsa por 987,735.00 quetzales, es Sergio R. Chávez, ex esposo de Reyna Chacón, versión que no se pudo confirmar con el aludido, pues no se encontraba en los momentos en que se le llamó a su trabajo. El reporte añade que algunas empresas contratadas por Amsa incumplieron los plazos establecidos en los contratos, sin que se les aplicaran las multas correspondientes. Luis Mijangos, secretario general de la Presidencia, no descartó que Reyna Chacón haya incurrido en colusión, tráfico de influencias y violaciones a la Ley de Contrataciones del Estado. De esa cuenta, añadió, se revisan todos los contratos para hablar con las empresas ganadoras y verificar que los montos pagados coincidan con las obras ejecutadas. Siglo XXI, 22 de Agosto de 2000 <http://www.sigloxxicom/>

GUATEMALA: ECUATORIANO NAPOLEÓN SALTOS GALARZA, ALTERACIÓN DE LEY `` ES UN ACTO CLARO DE CORRUPCIÓN ``

Manipular una ley cuando están en juego intereses de carácter económico es un acto de corrupción", afirmó ayer Napoleón Saltos Galarza, representante de la lucha anticorrupción de Ecuador. El experto, quien tuvo participación activa en el derrocamiento de los ex presidentes ecuatorianos Jamil Mahuad y Abdalá Bucaram, analizó el controvertido caso de la alteración del Decreto 43-2000, Ley del Impuesto a la Distribución de Bebidas Alcohólicas y Gaseosas, caso conocido como "Guategate", en el cual hay indicios de culpabilidad de varios legisladores del oficialista partido en el congreso FRG (Frente Republicano Guatemalteco). El experto ecuatoriano analizó la situación durante su disertación en un foro anticorrupción realizado ayer en el Gran Teatro Nacional Miguel Angel Asturias. Guatemala, refirió, "desgraciadamente", no escapa a la tendencia peligrosa e ilegítima de vinculación entre intereses económicos de sectores beneficiarios con los políticos. "Cuando esto sucede, pueden darse fenómenos como el que hoy día observamos de alteración de resoluciones para imponer intereses particulares", dijo. El ecuatoriano consideró que el caso de la alteración legislativa debe ser discutido seriamente por los guatemaltecos; "nosotros, como observadores internacionales, simplemente pudimos constatar que hay indicios de responsabilidades que tendrían que ser solventadas internamente", añadió. Para Saltos ahora toca el turno a las autoridades judiciales, quienes deberán determinar las responsabilidades en este hecho. "Más allá del aspecto jurídico, hay una responsabilidad política que afecta la credibilidad del Congreso, y de la propia ley", expresó. A la vez, recomendó al ente investigador actuar con transparencia y evitar la interferencia de otros poderes del Estado. La Prens Libre, 18 de Agosto de 2000 <http://www.prenslibre.com.gt/>

GUATEMALA: EN ESCÁNDALO DE ALTERACIÓN DE UNA LEY. CAIGA QUIEN CAIGA ACATAREMOS RESOLUCIÓN -PRESIDENTE PORTILLO-

Su promesa de respetar el resultado de las investigaciones y su decisión de aceptar el fallo de los órganos correspondientes, caiga quién caiga, ofreció ayer el presidente Alfonso Portillo, al

responder algunas de las inquietudes sobre las supuestas ilegalidades de la ley de bebidas alcohólicas. Adicionalmente, el vicepresidente Juan Francisco Reyes López estimó que toca a los acusadores probar las presuntas anomalías, pues, recordó, nadie es culpable hasta que se pruebe lo contrario. El Ministerio Público tiene la investigación y a nosotros no nos queda más que acatar la resolución, destacó Portillo, mientras reiteró que el Ejecutivo publicó el decreto tal y como llegó del Congreso. Agregó que el partido al que pertenece (Frente Republicano Guatemalteco es respetuoso de la ley, por lo que caiga quien caiga acatará lo resuelto, en alusión a un eventual fallo de culpabilidad contra el general Efraín Ríos Montt actual presidente del congreso. Siglo XXI, 23 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: ORGANISMO JUDICIAL CREA JUNTA DISCIPLINARIA PARA EVITAR ACTOS DE IMPUNIDAD, NEGLIGENCIA Y CORRUPCIÓN

Con el propósito de evitar actos de impunidad, negligencia y corrupción de los operadores de justicia del Organismo Judicial, OJ, fueron juramentados ayer los integrantes de la primera Junta Disciplinaria de ese poder. La actividad se llevó a cabo en horas de la mañana, allí donde estuvieron presentes el presidente de ese organismo, José Quesada Fernández, y los demás magistrados. El funcionario explicó que dicha ley establece tres procedimientos importantes, como los requisitos para ingresar a la Carrera Judicial y el procedimiento de evaluación. Agregó que un tercer punto es el proceso disciplinario, que enmarca cuáles podrían ser las sanciones para los jueces a quienes se compruebe su responsabilidad en una falta, que oscila desde una sanción verbal hasta ser separado del cargo. "En la Carrera Judicial está contemplado necesariamente el aspecto disciplinario, por ello creemos que esta comisión garantizará una disciplina sumamente rígida", enfatizó. "Si fuera necesario, en el análisis de las denuncias contra los jueces participará la Supervisión de Tribunales", expuso Quesada Fernández. Asimismo, indicó que hasta el momento no hay un lugar específico para instalar a los seis miembros de la Junta Disciplinaria, quienes hoy iniciarán formalmente sus funciones, por lo que en principio trabajarán en el edificio de la CSJ. Los profesionales nombrados como magistrados titulares son Telma Esperanza Aldana Hernández, Carlos Rubén García Peláez. De suplentes, Zully Eugenia Cantoral Arango, Héctor Mauricio Rodríguez Argueta. Además, la jueza titular, Rosalba Corsantes Zúñiga de Muñoz, y el juez suplente Jorge Mynor Acevedo. Dichos funcionarios se desligarán de sus anteriores cargos, y ejercerán funciones durante un año. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

HONDURAS: INVESTIGAN EX JEFES MILITARES DE HONDURAS POR MALVERSACIÓN

Cuatro antiguos jefes de las fuerzas armadas de Honduras son investigados por malversación de fondos públicos, informó una funcionaria de un organismo contralor. La investigación fue revelada por la contralora Vera Rubí coincidiendo con un escándalo que involucra al último ex jefe de las fuerzas armadas, general retirado Mario Hung, por el presunto extravío de unos ocho millones de lempiras (537.673 dólares) del Instituto de Previsión Militar (IPM). La Contraloría investiga a los últimos cuatro jefes de las fuerzas armadas que ocuparon el cargo de 1986 a 1998, entre 12 casos de presunta corrupción de funcionarios públicos. Rubí dijo que en las investigaciones de los mandos castrenses se descubrieron "irregularidades que tienen que documentarse", pero "es un poco complicado si no tenemos informaciones fidedignas de los bancos, porque no hemos podido confirmar algunos cheques". La funcionaria formuló la existencia de "irregularidades" en la administración de los fondos militares en estos cuatro mandatos en una conferencia de prensa en la que anunció su dimisión al cargo a partir del martes para lanzarse por la nominación presidencial del gobernante Partido Liberal. Los otros antiguos jefes de las fuerzas armadas que son investigados por la Contraloría son los generales retirados Arnulfo Cantarero, Humberto Regalado y Luis Discua. El cargo de jefe de las fuerzas armadas, que en las décadas de 1960, 1970 y 1980 fue de mayor poder e influencia que los mismos mandatarios civiles, fue suprimido en 1998 y sustituido por el de un ministro de Defensa. Hung se encuentra involucrado en un escándalo de presunta

malversación de caudales del IPM, un organismo que nuclea una serie de empresas bajo control militar y cuyo fondos se destinan a pagar las jubilaciones de los militares retirados. La actual administración del IPM asegura que cuando la junta directiva del cartel la presidía Hung se pagaron unos 5,2 millones de lempiras (336.021 dólares) en efectivo por pago de impuestos a la alcaldía de Tegucigalpa. Los funcionarios del IPM dicen que los fondos salieron del organismo, pero los de la alcaldía aseguran que no los recibieron. Hung aseguró el martes que autorizó el desembolso de los fondos para pagar los impuestos. La Nación, 18 de Agosto de 2000 <http://www.nacion.co.cr/>

HONDURAS: LA FISCALÍA GENERAL ACUSA AL INSTITUTO DE PREVISIÓN MILITAR DE CORRUPCIÓN ECONÓMICA

La Fiscalía General de Honduras ha determinado que el Instituto de Previsión Militar (IPM), ha realizado acciones de corrupción económica. Al momento existe un faltante de más de medio millón de dólares. Los principales comprometidos en este dolo son justamente los directores del IPM, los cuales administraban personalmente dichos recursos. El general Mario Hung Pacheco, el ex todopoderoso comandante el jefe de las Fuerzas Armadas, hasta 1999, ha dicho que él no tiene nada que ver en este asunto. Los demás exdirectores del Instituto de Previsión tampoco asumen sus responsabilidades, y más aún, exigen a la alcaldía de Tegucigalpa la devolución de dichos recursos y con un interés del 25% anual. Esto ha sido rechazado por las autoridades civiles de la capital hondureña. Las Fuerzas Armadas y en especial el Instituto de Previsión Militar es considerada como uno de los emporios comerciales más grandes de Honduras, el octavo del país. Su capital se estima en unos 300 millones de dólares, dinero que siempre fue manejado por los comandantes militares como dinero propio y de él sacaban pingües ganancias. Informativos Net, España (Hn/LY/Mt/Ppc/mc), 24 de Agosto de 2000 <http://www.informativos.net/>

HONDURAS: MINISTRO DE SEGURIDAD COMBATIRÁ LA CORRUPCIÓN POLICIAL

El ministro de Seguridad de Honduras, Gautama Fonseca, dijo el miércoles que combatirá la corrupción en la policía y que enjuiciará a cualquier efectivo cuya culpabilidad sea demostrada. Fonseca, un respetado abogado de 68 años, dijo que si a los policías se les encuentra en violación de la ley, ``van a padecer las consecuencias, no se tratará solamente de despidos, sino de seguirle el juicio que corresponda por corrupción ``. Fonseca, nombrado el martes nuevo ministro de Seguridad por el presidente Carlos Flores, asume el cargo en medio de una ola de violencia delictiva en Honduras, con asaltos frecuentes a bancos, secuestros, robos de vehículos, asaltos callejeros, atentados y otros crímenes. El clima de inseguridad se acentuó tras descubrirse que dos oficiales de la policía estaban ligados a bandas de narcotraficantes y se suspendió a otros dos. Mientras, el subdirector de la policía, Andrés Urtecho, pidió dos meses de excedencia mientras es sujeto de investigación. Pero Fonseca dijo que la culpa deben asumirla, también, quienes sobornan a los efectivos policiales para evadir castigo por alguna transgresión. Tanto organismos estatales como privados de defensa de los derechos humanos han reclamado al gobierno la depuración de la policía, que estuvo bajo mando de los militares desde 1963 hasta 1998, cuando un civil asumió el cargo de ministro de Seguridad. Noticias Yahoo, (Reuters), 24 de Agosto de 2000 <http://espanol.yahoo.com/noticias/>

INDONESIA: EX PRESIDENTE SUHARTO SERÁ JUZGADO EL 31 DE AGOSTO POR CORRUPCIÓN

El ex presidente de Indonesia caído en desgracia, Suharto, será juzgado por corrupción el 31 de agosto y tendrá que sentarse en el banquillo a pesar de los informes sobre su delicado estado de salud, dijo miembro del tribunal el miércoles. La acusación dice que, al menos, 130 personas serán llamadas para testificar en el que será el juicio del siglo en Indonesia. "Suharto debe someterse a juicio. He dicho que ordenaré a los abogados que le hagan acudir al juicio", dijo el juez jefe, Lalu Mariyun, de la Corte del Sur de Yakarta, en una rueda de prensa. El fiscal general del Estado ha

acusado formalmente a Suharto de apoderarse de más de 550 millones de dólares (unos 100.000 millones de pesetas) procedentes de fundaciones de caridad durante su paso por el poder. Los abogados de Suharto han declarado que su cliente estaba demasiado enfermo para someterse a un juicio, alegando que tiene problemas para contestar a cuestiones básicas. El ex general sufrió un ataque el pasado año y tuvo que ser hospitalizado por otro suceso. La presencia del viejo déspota en un banquillo será una imagen extraordinaria para los ciudadanos, muchos de los cuales no habían conocido a otros líder hasta que fue obligado a dejar el poder en 1998 ante las graves crisis económica y de violencia que estalló en el país. Esto profundizará en la humillación para el hombre que dirigió los destinos de Indonesia durante 32 años hacia un crecimiento económico y una estabilidad política sin precedentes que llevó a cabo con mano de hierro y con constantes violaciones de los derechos humanos. La acusación ha dicho que Suharto se enfrenta a más de 20 años de cárcel y a una multa de 30 millones de dólares. Otros funcionarios habían comentado previamente que Suharto podría ser encarcelado de por vida. Sin embargo, el presidente de Indonesia Abdurrahman Wahid ha dicho que perdonaría a Suharto si es condenado. Suharto y su familia han sido acusados de amasar una fortuna a través de prácticas de corrupción valorada en más de 45.000 millones de pesetas durante su mandato. Todos ellos han negado haber actuado de forma errónea. El cuarto país más poblado del mundo sigue luchando por recuperarse de la crisis que marcó el fin de la era de hierro de Suharto. Se ha producido una fuerte presión pública para sentar a Suharto en el banquillo y analistas políticos han declarado que el gobierno ha tenido que aceptar esta petición ante el temor de enfrentarse a nuevas protestas callejeras. En todo caso, algunos dicen que un posterior indulto probablemente sería aceptado por la mayoría aunque podría provocar protestas estudiantiles. Noticias Yahoo España, (Reuters), 23 de Agosto de 2000 <http://es.news.yahoo.com/>

ISRAEL: LÍDER DEL PARTIDO ULTRAORTODOXO DEBERÁ IR A LA CÁRCEL POR CORRUPCIÓN

Los líderes del partido ultraortodoxo sefardí Shas acogieron ayer con gran violencia verbal la decisión del presidente del Tribunal Supremo de Israel, Aharon Barak, de rechazar la apelación que había presentado el ex-ministro Arie Deri, condenado a tres años de prisión por corrupción. La decisión significa que Deri no tiene derecho a un nuevo juicio y deberá ingresar en la cárcel el próximo 3 de septiembre. En gran medida, la decisión de Aharon Barak (sin relación con el primer ministro Ehud Barak) provocó un guerra de declaraciones entre judíos ashkenazis, es decir, de origen europeo, y judíos sefardíes, o sea, judíos de origen oriental y de la península ibérica. El Comercio, España, 24 de Agosto de 2000 <http://www.elcomerciodigital.com/>

MÉXICO: CONSIGNADAS 877 DENUNCIAS POR DESVÍOS DE RECURSOS FEDERALES EN PROCESOS ELECTORALES

La Comisión Especial 2000 encargada de vigilar que no se desvíen recursos federales a los procesos electorales, entregó su informe final donde consignó que recibió 877 denuncias formales, de las cuales 407 ya son investigadas por las autoridades y dependencias mientras las 385 restantes fueron desechadas por improcedentes. Los programas sociales más denunciados fueron: Progresá, Procampo, Alianza para el Campo, Diconsa, Liconsa, Empleo Temporal, Crédito a la Palabra, Fonden y Conaza. Las dependencias y organismos más señalados por un presunto desvío de recursos públicos hacia las campañas son las secretarías de Desarrollo Social, Agricultura, Medio Ambiente, Defensa Nacional, Relaciones Exteriores así como Petroleos de México (PEMEX), Instituto Mexicano de Seguridad Social (IMSS), El Servicio Postal Mexicano (Sepomex), Comisión para la Regularización de la Tenencia de la Tierra (Corett), Comisión Nacional del Agua (Conagua), Comisión Federal de Electricidad (CFE), Instituto del Fondo Nacional de la Vivienda para los Trabajadores (Infonavit) y Desarrollo Integral de la Familia (DIF). Con motivo de las inundaciones en Tabasco la Cámara de Diputados recibió denuncias por un presunto desvío de la ayuda a los

damnificados con fines proselitistas, que están pendientes todavía de analizarse y determinar si hay elementos para fincar responsabilidades. En un reporte firmado por todas las fracciones -menos el PRI- los diputados concluyen que la negativa de las autoridades gubernamentales de los 3 niveles a vigilar y prevenir el desvío de recursos públicos con fines electorales "ha sido resultado de la costumbre de utilizar los programas sociales para beneficio del Partido Revolucionario Institucional, siendo en repetidas ocasiones éstos los mejores medios para hacer proselitismo a favor de sus candidatos tricolores". El texto que aparece en la Gaceta Parlamentaria los diputados salientes de la LVII legislatura recomiendan a sus sucesores "prevenir y sancionar" el uso ilegal de recursos del erario hacia las campañas electorales. El Excelsior, 22 de Agosto de 2000 <http://www.excelsior.com.mx/>

MÉXICO: CONTRALORÍA GENERAL INVESTIGA LICITACIONES EN LA SECRETARÍA DE SEGURIDAD PÚBLICA

La Contraloría General del Distrito Federal investiga a funcionarios de la Secretaría de Seguridad Pública, del área de adquisiciones, a raíz de las distintas quejas, inconformidades y denuncias que proveedores han interpuesto en su contra. La Contraloría del gobierno capitalino informó, que a pesar de que no se han podido corroborar presuntos actos de extorsión y corrupción por parte de los servidores públicos, ha llamado la atención que en los últimos 12 meses, por lo menos cinco empresas han presentado varios recursos de inconformidad respecto de las asignaciones de las licitaciones en ha emitido esa dependencia. El común denominador que prevalece en cada una de las quejas por parte de los proveedores, es en el sentido de que los encargados de otorgar las licitaciones benefician, de manera dudosa, a determinadas empresas. Esto ha originado que por lo menos este año la SSP no podrá adquirir 8 mil 771 chalecos antibala, 4 helicópteros y motopatrullas, debido a que los recursos destinados a estas licitaciones están "congelados" porque forman parte de juicios mercantiles y penales. A raíz de estas inconformidades, la Contraloría capitalina reconoció que se encuentran sujetos a investigación, Joel Santana Benhumea, director de Recursos Materiales; Federico Cecchetti Peregrini, subdirector de Adquisiciones; capitán piloto aviador, Carlos Antonio Medina Carrasales, director de Servicios Aéreos y Genaro Pérez Rocha, director general de Servicios de Apoyo, de la SSP. El Universal, 23 de Agosto de 2000 <http://www.el-universal.com.mx/>

MÉXICO: NO APLICARÁN CASTIGO A EX FUNCIONARIOS CORRUPTOS

Los diputados locales recibirán hoy un informe para conocer las causas que provocaron que prescribieran 300 expedientes de ex servidores públicos que laboraron durante la administración de Óscar Espinosa Villarreal. Más de 80 ex servidores públicos que trabajaron durante 1995 y 1996 en la gestión del ex regente no serán castigados ni encarcelados por cometer irregularidades administrativas o actos de corrupción, porque sus casos no fueron bien integrados para que la autoridad judicial actuara en su contra y a tiempo. Desde principios de este mes, los diputados que integran la Comisión de Vigilancia de la Contaduría Mayor pidieron una investigación al respecto a la Contraloría Interna de la Contaduría Mayor de Hacienda de la Asamblea Legislativa (CMHALDF), con el fin de que investigara las causas que provocaron esta situación. Trascendió que existe la sospecha de que el Departamento Jurídico de la misma Contaduría tuvo algo que ver en este problema, desde la gestión de la ex contadora Araceli Pitman y en la actual administración a cargo de Carlos Nava. Hay otras versiones que señalan que la actual Ley Orgánica de la Contaduría Mayor de Hacienda tiene diversos errores que obstaculiza la integración de los expedientes y que se entreguen a tiempo. En días pasados, José Narro sostuvo que con la información que van a solicitar sabrán si existe o no responsabilidad por parte de algún funcionario de la Contaduría Mayor o de la Contraloría General del gobierno capitalino. Por su parte, los legisladores perredistas Miguel Ángel Peláez y Ricardo Martínez Atalá, explicaron que durante la reunión de trabajo esperan conocer los resultados finales de esa investigación porque no es justo que ex servidores no sean sancionados,

en caso de que hayan cometido algún acto de corrupción. El Universal, 22 de Agosto de 2000
<http://www.el-universal.com.mx/>

NICARAGUA: CIUDADANOS NICARAGÜENSES PIENSAN QUE VIVEN EN EL SENO DE UN ESTADO CORRUPTO

Un informe sobre Desarrollo Humano en Nicaragua, dado a conocer por el Programa de las Naciones Unidas para el Desarrollo PNUD, afirma que el 90 por ciento de los ciudadanos nicaragüenses perciben que existe corrupción en el Estado. El informe expresa que la pobreza afecta casi a la mitad de la población. De estas un 17 por ciento se encuentra en la extrema pobreza, además de no contar con los servicios básicos como energía eléctrica, transporte y comunicaciones, entre otros. Asimismo, el PNUD, señala que el acceso de la población a los beneficios de apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, que habitan en los sectores urbanos y las zonas rurales. Por su parte Ana Quiroz, presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción, C CER, refutó las declaraciones del gobierno en el sentido de que los "nicaragüenses estamos mejor que hace algunos años atrás". Quiroz se preguntó: ¿dónde está la gente que ha mejorado? En este sentido, consideró poco confiables los datos en donde se menciona como logro, el hecho que se hayan mantenido los niveles de educación. Con el crecimiento poblacional, aunque se mantenga la cobertura en la enseñanza, también aumentan los niños y niñas que se quedan sin educación, indicó Ana Quiroz. Sobre la estrategia del gobierno, para la reducción de la pobreza Ana Quiroz, consideró que la corrupción y la pobreza son el principal obstáculo para el desarrollo. Esto se refleja en el incremento del desempleo, la migración y las difíciles condiciones de vida de la mayoría de nicaragüenses, indicó. Informativos Net, España (Ni/QR/Ong-Oi/Pe/mc), 22 de Agosto de 2000
<http://www.informativos.net/>

NICARAGUA: INFORME DE PROGRAMA DE NACIONES UNIDAS REFLEJA PERCEPCIÓN GENERALIZADA DE CORRUPCIÓN Y CRECIDA POBREZA

En general, la opinión de la ciudadanía expresada en encuestas anuales desde 1997 al 2000, han mostrado que cerca del 90 por ciento de los ciudadanos perciben que existe corrupción en el Estado. Este es uno de los datos reflejados en el informe de Desarrollo Humano en Nicaragua 2000, presentado por el Programa de Naciones Unidas para el Desarrollo (PNUD). El informe también expresa que la pobreza afecta casi la mitad de la población, un equivalente a 2.3 millones de personas. De éstas, un 17 por ciento, o sea 830 mil, se encuentran en la extrema pobreza. Así mismo se señala que a consecuencia de dos décadas de bajas inversiones, existe una infraestructura inadecuada en energía, transporte y comunicaciones. El acceso desigual de la población a los beneficios de la apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, entre las personas capacitadas y las carentes de formación, de los sectores urbanos y las zonas rurales. Aunque el documento muestra algunas dificultades del país, también fue altamente refutado por recalcar avances sociales que Ana Quirós, la presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción (C CER), consideró poco confiables. En el campo de la construcción de una democracia participativa y un Estado de Derecho, Nicaragua presenta avances en algunos campos, pero también muestra una institucionalidad frágil. Además, en ámbito del medio ambiente menciona que de continuar la ampliación de la frontera agrícola, el país tendrá más amenazas y riesgos de desastres naturales. Ante la falta de oportunidades en el país, la migración se convierte en un recurso para asegurar la sobrevivencia. Las remesas familiares de 1999 se calculan entre 300 millones y 600 millones de dólares. Por su parte, Carmelo Angulo Barturen, representante del PNUD, dijo que "la cooperación externa no llegó para quedarse. Esto puede crear vicios. Es importante que Nicaragua se desarrolle para que el país logre salir adelante por sí sola". Agregó que el informe del PNUD no es acusador, sino que presenta datos que puedan servir de base para que el país incida en los aspectos

primordiales. El Nuevo Diario, 18 de Agosto de 2000 <http://www.elnuevodiario.com.ni/>

NICARAGUA: PRESIDENTE ARNOLDO ALEMÁN, INCAPAZ DE COMBATIR LA CORRUPCIÓN SEGÚN ENCUESTA

Más de 72 por ciento de los nicaragüenses piensa que el Presidente Arnoldo Alemán ha sido incapaz de combatir la corrupción durante sus tres años de gobierno, según una encuesta de la firma costarricense Cid-Gallup divulgada hoy aquí. El sondeo, efectuado entre 1,245 personas de todo el país a inicios de este mes, reveló que 24 por ciento de la población considera "mala" la gestión del Mandatario para disminuir los ilícitos en el gobierno, mientras 48.3 por ciento la calificó como "pésima". Solamente uno por ciento de los encuestados catalogó de "excelente" la labor del Presidente y 7.5 opinó que es "buena", de acuerdo a la consulta que abordó diversos problemas locales y la opinión popular sobre las autoridades y líderes políticos del país. Para 42 por ciento de los consultados, las condiciones de vida (pobreza y desempleo) han empeorado en Nicaragua desde que Alemán asumió la Presidencia en 1997. Consultado sobre la encuesta, cuya primera parte fue publicada ayer en medios locales, Alemán desestimó las cifras que indican una baja popularidad del gobierno y del oficial Partido Liberal Constitucionalista (PLC) de cara a los comicios municipales del próximo 5 de noviembre. "El 5 de noviembre va a ser la mejor encuesta y la más verdadera", dijo al asegurar que en los comicios el PLC obtendrá más de 100 de las 147 alcaldías del país. "Mi partido ha hecho obras y el pueblo lo ve, no necesita encuestas para ganar", dijo. El Excelsior, México (DPA, Xinhua y AP) 24 de Agosto de 2000 <http://www.excelsior.com.mx/>

PANAMÁ: CONTRALOR DEBE ABSTENERSE DE PRONUNCIAMIENTOS APRESURADOS SOBRE INVESTIGACIÓN CONTRA ALTOS FUNCIONARIOS

Las tensiones entre la Contraloría y la Directiva de la Caja de Seguro Social no bajan de intensidad. Mientras el Subcontralor Enrique Lau anuncia "nuevos hallazgos" en la investigación promovida contra altos funcionarios de la Institución, éstos le exigen a la agencia fiscalizadora que se abstenga de pronunciamientos apresurados. Luis A. González González la Junta Directiva de la Caja de Seguro Social, por votación unánime, decidió pedir al Contralor General de la República, Alvin Weeden, que se abstenga de hacer algún pronunciamiento en cuanto a las investigaciones que adelanta sobre supuestos nuevos "hallazgos" en el Seguro, hasta tanto se hayan concluido las mismas y se cumpla fehacientemente con el debido proceso legal. La decisión fue dada a conocer mediante nota dirigida al Contralor, la cual fue leída y entregada a los medios de comunicación social por el presidente de la Junta Directiva, Rafael Medina, luego de culminar la sesión ordinaria de esta semana que duró casi cinco horas. Los demás miembros de la Junta estuvieron presentes. Asimismo, la decisión fue acordada por los directores después de que el Subcontralor, Enrique Lau, quien actuó como principal en la reunión, se retiró del salón tras manifestar que la Contraloría lleva a cabo una investigación "sobre hallazgos graves" dentro de la CSS que aparentemente involucra a altos funcionarios de la Institución. Cabe señalar que el director del Seguro, doctor Juan Jované, reiteró su interés de seguir cumpliendo con su trabajo como hasta ahora lo hace. De hecho, la Junta Directiva de la Caja aprobó, en la misma votación, pedir también un informe relacionado a los señalamientos expresados por el Subcontralor en dicha sesión. Lau, quien estuvo sólo por unas horas en la Junta no quiso adelantar mayores detalles sobre el caso al salir del salón de reuniones. Igualmente, la nota señala que al Subcontralor le fue aclarado que en ningún momento se ha pedido una investigación en su contra, tal como lo publicó un diario local, por lo que tampoco existe ninguna acción interna que lo involucre. El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: AUDITORÍA CONFIRMA ANOMALÍAS EN PASADA GESTIÓN DE LA CAJA DE SEGURO SOCIAL

El ex director de Relaciones Públicas de la Caja de Seguro Social (CSS) Santiago Quiróz contrató,

mientras ocupó ese cargo, los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según señala un informe preliminar de auditoría de la Contraloría que está próximo a ser concluido, informaron fuentes allegadas a las investigaciones. Consultado al respecto, Santiago Quiróz -en declaraciones previas- negó haber cometido tales irregularidades, y además aseguró que cuando las autoridades competentes lo consideren prudente, explicará las dudas surgidas en torno a su actuación como jefe de Relaciones Públicas de la CSS. Los trabajos de auditoría ya culminaron, aseguró una de las fuentes, y ahora se entrará en la etapa de recepción de declaración a las personas presuntamente relacionadas con estas anomalías. Entre estas anomalías hay cheques pagados sin documentos sustentadores por un monto de 220 mil 919 dólares con 10 centésimos. Culminada esta fase, explicó, se procederá a enviar el informe final al contralor, Alvin Weeden Gamboa, y éste le dará traspaso a las instancias judiciales correspondientes. De acuerdo con la fuente, el estudio consistió en la evaluación de la metodología utilizada por Relaciones Públicas de la Caja para la adquisición de bienes y servicios a través del proceso de compras menores; la verificación de las partidas presupuestarias comprometidas por el Departamento de Presupuesto y los pagos efectuados por la Dirección Nacional de Contabilidad. Las empresas beneficiadas con estos negocios son Corporación de Publicidad, S.A., Public Photo, S. A., y Public Production, S.A. Según el Registro Público -se anota en el informe- en las tres empresas aparecen como directivos Enith Marlene Atencio, Melva Flores y Elizabeth Atencio. Enith Marlene Atencio, según otras fuentes, es la prometida de Quiróz, mientras que Elizabeth Atencio es una de las hermanas de ésta. Melva Flores, por su parte, mantiene una relación de amistad con todos ellos. Tal relación fue negada igualmente por Quiróz. Los pagos de las órdenes de compras emitidas para la adquisición de panfletos, afiches, revistas y otros, realizadas por el departamento de Relaciones Públicas de la CSS, según el informe, totalizaron 234 mil 754 con 60 centésimos, y los beneficiados fueron los parientes de Quiróz. En la auditoría se descubrió, asimismo, la existencia de cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. Igualmente el estudio reflejó la división de la materia en las compras efectuadas que no permitieron la debida competencia y ello -a juicio de los funcionarios de Contraloría- "le restó transparencia a los procesos" al no publicarse en los medios escritos y evitó, a su vez, la participación de mayores oferentes. Por ejemplo, el 5 de noviembre de 1998 se emitió una orden de compra sin número a favor de la empresa Corporación de Publicidad para el suministro de 250 afiches, y esta presentó una cotización por un valor de mil dólares, pese a que la empresa ALFLO, S. A. había cotizado la suma de 680 dólares. A juicio de los auditores de Contraloría, en casos como el señalado "no se veló por los mejores intereses de la institución, al elegirse a un proveedor con un precio mayor". De igual forma, el 27 de noviembre de 1998 se suscribió una orden de compra a favor de Public Photo, S.A. por 3 mil 780 dólares para el suministro de 5 mil panfletos, sin embargo, el cheque de pago salió a nombre de Corporación de Publicidad, S.A., sin que mediara cesión de pago a favor de esta última. Quiróz, quien en la actualidad labora como asesor de los magistrados del Tribunal Electoral (TE), asumió la jefatura de Relaciones Públicas de la Caja tras la llegada de Ricardo Martinelli a esa institución. Durante la pasada campaña proselitista, ejerció funciones en la jefatura de prensa del aspirante presidencial Martín Torrijos. La fuente allegada a las investigaciones en la Contraloría fue enfática al señalar que "se han acreditado todas las irregularidades. Si están allí [consignadas] es porque esas irregularidades están probadas". La Prensa, 21 de Agosto de 2000 <http://www.sinfo.net/prensa/>

PANAMÁ: CONTRALOR DE LA REPÚBLICA ANUNCIA INVESTIGACIÓN CONTRA EL SUBCONTRALOR LAU

El Contralor de la República, Alvin Weeden, anunció en conferencia de prensa la iniciación de un proceso de investigación al Subcontralor Enrique Lau, debido a denuncias de que el mismo cuando fungía como subdirector de la CSS, recibió un equipo valorado en no menos de un millón de

balboas, sabiendo que estaba incompleto. Según el Contralor Weeden estas investigaciones no se realizarán porque directivos de la Caja de Seguro Social lo hayan solicitado, sino porque el mismo Subcontralor Lau, se lo pidió. A la vez manifiesta Weeden que en días anteriores el Subcontralor puso a disposición de su cargo (del Contralor), para que realizara estas investigaciones. Las declaraciones del Contralor Weeden surgen luego de que directivos de la Caja de Seguro Social emitieran una información en donde pedían a éste investigaran al Subcontralor, lo cual él desmintió. En informaciones sobre el caso, se da a conocer que los representantes de la empresa que entregó el equipo a la CSS (Tomógrafo axial), prefirieron no comentar nada sobre el asunto, pero una fuente de entero crédito mencionó que el equipo entregado cumplía con los requisitos exigidos y que de ello pueden dar fe consultores internacionales que así lo certificaron. Un memorándum que se refiere al Informe sobre la gestión realizada con referencia al recibo del tomógrafo axial computarizado, describe la forma como Lau favoreció la admisión del aparato y desatendió instrucciones de Marianela Morales (quien en la época fungía como directora de la CSS). El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: CONTRALORÍA CITA A EX JEFE DE RELACIONES PÚBLICAS DE LA CAJA DE SEGURO SOCIAL PARA QUE ACLARE PRESUNTAS IRREGULARIDADES

La Contraloría General citó a Santiago Quiróz, ex jefe de Relaciones Públicas de la Caja de Seguro Social (CSS), con el fin de que "aclare" su participación en el manejo presuntamente irregular en el proceso de compras efectuado por ese departamento entre los años 1998 y 1999. Tal información fue facilitada por una fuente allegada a las investigaciones, quien aseguró que la referida citación está suscrita por el propio contralor, Alvin Weeden Gamboa. Dicha citación, explicó la fuente, está dirigida a que Quiróz, quien ejerce funciones de asesoría de los magistrados del Tribunal Electoral (TE), tenga la oportunidad de facilitar los documentos que aclaren las anomalías registradas. La Contraloría realiza una investigación destinada a determinar responsabilidad en el proceso de compra llevado a cabo en el referido departamento de la CSS, cuando Quiróz ejercía las tareas de jefe del aludido departamento. Según las diligencias, recordó el informante, en el departamento de Relaciones Públicas de la CSS durante el período mencionado se efectuaron pagos por bienes, cuya recepción no está debidamente documentada con sus informes y las correspondientes facturas. Quiróz, mientras ocupó ese cargo, contrató los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según las investigaciones realizadas por la Contraloría. Entre las pruebas hay cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. La Prensa, 22 de Agosto de 2000 <http://www.sinfo.net/prensa/hoy/>

PARAGUAY: ASUMIÓ NUEVO CONTRALOR Y PROMETE INVESTIGAR A SU ANTECESOR. DESPIDEN A FRETES VENTRE CON EL GRITO DE CORRUPTO

La salida del ex contralor fue tan tumultuosa, tal como lo fue una gran parte de su administración. Entre empujones, empellones y gritos de ¡bandido, corrupto! por parte de los funcionarios detractores, Daniel Fretes Ventre dejó el cargo que ocupó por cinco años. Su sucesor, Francisco Javier Galiano, abogado de 43 años, anunció que investigará la gestión de su antecesor, quien está acusado de 19 delitos. Una batahola infernal generó la salida de Fretes Ventre de la Contraloría General de la República, luego de la forzada conferencia de prensa que en principio no tenía pensado realizar. Al dejar el local, el ex contralor, en forma increíble y maleducada y ya dentro del automóvil, realizó un "corte de manga" dirigido a los que, en ese momento, se encontraban en el patio de la institución. Este hecho generó una acalorada discusión, para que minutos después se inicie un intercambio de golpes de puño entre los propios funcionarios de la Contraloría, ante la pasiva mirada de los policías presentes en el lugar. Momentos antes, Fretes Ventre en conferencia de prensa y en forma inconcebible, primero acusó a la prensa de ser la culpable de todos los delitos

que se lo inculpa y amenazó a aquellos que lo denunciaron, aunque no quiso dar nombres. Más tarde dijo que las denuncias en su contra tienen un interés político, realizado por un grupo de personas, absteniéndose nuevamente de dar nombres. Al tiempo de anunciar transparencia en su gestión, el flamante contralor general de la República, Francisco Javier Galiano, dijo que investigará a su antecesor, quien está acusado de la comisión de unos 19 hechos punibles durante el ejercicio del cargo. Fretes Ventre se "salvó" de la investigación judicial gracias al apoyo de los libero-oviedistas de la Cámara de Diputados, quienes negaron el pedido de desafuero que realizaron autoridades judiciales. Fue luego que la Cámara de Diputados haya tomado el juramento al mismo y al subcontralor, Mario Estigarribia, durante la sesión ordinaria de este cuerpo legislativo. El mismo grupo de diputados que dio una manta de impunidad a Fretes Ventre es el que votó por al candidatura de Galiano para que llegue a la Contraloría. Ayer, luego del juramento, Galiano explicó que una comisión ya está realizando una especie de auditoría a la gestión de Fretes Ventre, a fin de determinar su responsabilidad en los hechos delictivos en los cuales se lo involucra. Diario ABC Color, 18 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PARAGUAY: DENUNCIAN PEDIDO DE COIMAS EN ADUANA DE LA CIUDAD DE MARISCAL

Graves denuncias pesan contra la aduana de la ciudad de Mariscal Estigarribia, donde a diario comerciantes son objeto de amenazas, chantaje y secuestro de documentos para obligarles a la entrega de jugosas coimas. Acorde a la denuncia radicada en la fiscalía local, solamente el último fin de semana los funcionarios aduaneros se apoderaron de 2.300 dólares y dos motores de la marca Honda; todo esto, lógicamente, sin expedir recibo alguno. En el primer caso, la aduana de la ciudad de Mariscal Estigarribia atajó un cargamento de 130.000 kilos de sal fina, proveniente de Bolivia. De los choferes bolivianos Armindo Centro, Rubén Flores y Mario Centro los funcionarios secuestraron la documentación personal, el título de los vehículos (tres camiones) y les obligaron a pagar 300 dólares, sin recibo, acorde a la denuncia realizada posteriormente ante el agente fiscal Gustavo Patiño. El hecho involucra a los funcionarios aduaneros Juan González y Ludserio Borba. El cargamento, que posteriormente fue liberado, entró de esta manera de contrabando al Chaco central, donde fue comercializado. En el segundo caso fue amenazado en la Picada 500 el comerciante boliviano Freddy Toledo, quien vino con 24 motores de la marca Honda, importados desde Villa Montes, Bolivia. Acorde a la denuncia, el comerciante fue amenazado en la Picada 500 supuestamente por agentes de la Dinar, quienes exigieron el pago de 10.000 dólares. Al no prosperar el chantaje, los agentes habrían avisado a la aduana en la ciudad de Mariscal Estigarribia, donde el cargamento fue atajado. Del chofer secuestraron toda su documentación personal y del vehículo, incluso la factura de la mercadería, que indicaba el valor de la mercadería con un valor de 9.990 dólares. El agente aduanero -en evidente estado de ebriedad, acorde a la denuncia- alegó la ilegalidad de la factura e insistió en que el cargamento era mercadería de contrabando y con un valor de 100 millones de guaraníes. El jefe de la aduana habría exigido el pago de 5.000 dólares y la entrega de algunos de los motores, y en reiteradas ocasiones habría dicho a los comerciantes que "la solución del problema depende de ustedes". Posteriormente, los socios comerciantes Ernst Loewen y Willy Toews trataron de pagar la tasa normal de importación, lo que fue rechazado por el agente aduanero. Del hecho fueron informados después el intendente de Mariscal Estigarribia y la jueza María Teresa Brítez, quien finalmente llegó al lugar del hecho y trató de solucionar el inconveniente. El agente Raúl Villanueva, finalmente, habría cobrado la suma de 2.000 dólares y se apoderó además de dos motores de la marca Honda, todo esto sin documentación alguna, acorde a la denuncia. Al recibir el dinero y la mercadería, los aduaneros devolvieron a los choferes sus documentos. De los hechos fue informado el mismo domingo el funcionario aduanero Sixto Cáceres, de la aduana de Asunción. Estos últimos hechos se suman a una serie de denuncias similares que mantienen en zozobra a comerciantes y empresas de transporte público que tratan de mantener relaciones comerciales con el vecino país a través del Chaco. Fuentes fidedignas aseguran que el puesto aduanero de la ciudad de Mariscal Estigarribia "recauda" por semana

entre 10 y 15.000 dólares, manteniendo en zozobra a la población de esta zona del país. Diario ABC Color, 23 de Agosto de 2000 <http://www.abc.com.py/>

PARAGUAY: HARÁN AUDITORÍA EN LA VICEPRESIDENCIA. HABRÍA MANEJO DOLOSO, SEGÚN LEGISLADOR

El Partido Liberal Radical Auténtico (PLRA) está en conocimiento de contrataciones de nuevos funcionarios que se han hecho desde que el cargo quedó vacante. El legislador Espínola informó que la Vicepresidencia ejecutó el 52 por ciento del presupuesto asignado para el presente año, que equivale a aproximadamente a un monto de 1.500 millones de guaraníes. Esta situación contrasta con otros órganos estatales que apenas han alcanzado a ejecutar más del 20 por ciento de lo presupuestado para el 2.000, debido al difícil momento que atraviesan las arcas del Estado.

Concretamente comparó con el Congreso nacional, que apenas ha usado el 26 por ciento de los recursos asignados para el presente año. "Ante todo, lo que el Vicepresidente debe hacer es una auditoría a fondo de la Vicepresidencia para ver cómo ha sucedido este milagro de la dilapidación del dinero del pueblo. Se han nombrado funcionarios sin que haya Vicepresidente, se imaginan la burla, la bofetada que esto significa para el pueblo. En ese lugar sigue un montón de gente que está chupándole la sangre al pueblo", dijo el legislador. Indicó que una vez que se aclaren todas estas cosas, el Vicepresidente podrá pensar cómo y con qué elementos cuenta para conformar su equipo de trabajo y empezar a trabajar por el bien del país. Diario Noticias, 22 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PARAGUAY: JURADO PROCESA AL FISCAL DENUNCIADO POR PRESUNTA COIMA

El Jurado de Enjuiciamiento de Magistrados inició la investigación del denunciado fiscal de Ciudad del Este, Edward Friedrich Armas Godoy y solicitó ayer a la Corte Suprema de Justicia la suspensión del mismo en el ejercicio de sus funciones. Asimismo, previo procesamiento, envió todos los antecedentes al juez penal de garantías de la circunscripción judicial del Alto Paraná y Canindeyú, para la apertura del sumario penal por la presunta comisión de varios delitos. Igualmente, el Jurado dispuso la suspensión de la tramitación de la causa en espera de una sentencia definitiva por parte de la jurisdicción penal, ya que la condena por delitos comunes conlleva separación del cargo.

Como antecedente se recuerda que la jueza Beatriz Venialgo, en compañía del fiscal de turno, encontró en la oficina de Armas Godoy en el Alto Paraná cinco mil dólares. La mencionada suma le fue entregada al fiscal Armas Godoy por un ciudadano brasileño en concepto de coima para lograr el levantamiento de la medida cautelar que pesaba contra las mercaderías incautadas de su propiedad. El mencionado fiscal le había solicitado para la liberación de las mercaderías quince mil dólares. Ante esta situación el ciudadano brasileño radicó la denuncia ante la jueza Venialgo y le entregó cinco mil dólares marcados a Armas Godoy, suma que durante el allanamiento fue encontrada en su oficina. "Esta resolución no constituye en modo alguno prejuzgamiento sobre el fondo de la cuestión, por el contrario, somete al denunciado a la Justicia Ordinaria, a los efectos de que, en ese ámbito, pueda esclarecerse los hechos que se le atribuyen", señala la resolución del Jurado de Enjuiciamiento de Magistrados. Diario Noticias, 22 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PERÚ: 4,000 VECINOS EXIGEN INVESTIGAR IRREGULARIDADES DE ALCALDE CHIROQUE

Unos 4,000 vecinos de San Juan de Lurigancho marcharon ayer al mediodía hasta la Contraloría de la República, para exigir a su titular Carmen Higaonna investigue la gestión del alcalde distrital Ricardo Chiroque. Los manifestantes, en su mayoría madres del Vaso de Leche, provistas de pancartas y altavoces, acusaron a Chiroque de malversar fondos y reclamaron cese en sus funciones edilicias. Las mujeres de ese distrito pidieron se les restituya los tres días de leche a la semana y los cuatro restantes de cereal, que ahora ha sido reducido a dos de leche y cinco de

cereal. La presidenta del gremio de madres del Vaso de Leche, Rosa Inga Morales, informó que anteriormente, los cereales tenían un alto índice nutritivo y de buen sabor, pero ahora les entregan productos embolsados sin registro ni marca y con residuos de tierra, debido al interés del alcalde por abaratar precios a costa de la calidad. Asimismo pidieron la destitución del cargo de presidenta del Comité de Administración del Vaso de Leche de María Elías y al jefe de la citada organización, Jaime Bernedos. Por su parte el alcalde Ricardo Chiroque ha negado todas las denuncias anteriores defendiendo su gestión como correcta y transparente. Reiterando que él mismo ha solicitado a la Contraloría General de la República se investigue el caso a fondo. La República, 18 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRA EX RECTOR DE UNIVERSIDAD RICARDO PALMA, LO SEÑALAN COMO RESPONSABLE DE DESFALCO

El rector de la Universidad Ricardo Palma, Iván Rodríguez Chávez, demandó a los magistrados de la primera Sala Penal de la Corte Suprema actuar de acuerdo a ley en el caso seguido contra el ex rector Sixto Ludeña Luque quien desfinanció con cerca de dos millones de soles a esta casa superior de estudios. Explicó que durante su gestión desde febrero del 91 hasta julio del 96 Ludeña Luque realizó pagos indebidos con dinero de la Universidad, entre ellas sus deudas personales a la Superintendencia de Administración Tributaria (Sunat). "Cuando ingresé en el rectorado la universidad estaba con sus bienes embargados, con una deuda de dos millones de dólares. Existen pruebas de estos hechos y por lo cual Ludeña estuvo preso en el Penal San Jorge, sin embargo, fue absuelto por el Tribunal Supremo", reveló. Preciso que la Sunat, la Universidad y el Ministerio Público han presentado recursos de nulidad a las sentencia absolutoria de los anteriores magistrados que fueron recusados por que adelantaron opinión, y ahora el caso está en manos de la Primera Sala Penal Transitoria especializada en delitos tributarios. Rodríguez Chávez dijo que otro de los problemas que encontró al asumir el rectorado de la universidad fue la deserción de estudiantes y el bajo número de postulantes, lo cual revertió con la reestructuración curricular y saneamiento económico y administrativo. La República, 24 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRALORA GENERAL EXPLICARÁ ATRASOS EN INFORMACIÓN DE CUENTA GENERAL

La Comisión Revisora de la Cuenta General de la República acordó ayer invitar a la Contralora General de la República, Carmen Higaonna y al Contador General de la Nación, para que expliquen las razones por las cuales existen atrasos en la presentación de la información de la Cuenta General de la República de 1999. El acuerdo fue adoptado ayer en la sesión vespertina de la comisión que preside el oficialista Willy Serrato, tras analizar un comunicado, publicado en los medios de comunicación, que da cuenta de que existen numerosas instituciones que no han presentado la información correspondiente sobre los gastos del dinero del Tesoro Público. Willy Serrato dijo que tiene la información de que hasta el momento por lo menos unas 160 instituciones públicas, la mayoría municipalidades, no han presentado la información requerida por la Contraloría. El Contador de la Nación, Oscar Pajuelo Ramírez, ha sido invitado para el próximo lunes, mientras que la Contralora Carmen Higaonna se presentará el 4 de setiembre. La República, 22 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: INFORMAN SOBRE MALOS MANEJOS DE EX ALCALDE DE HUARAZ

Para Oswaldo Villafuerte, quien fuera teniente alcalde de la gestión del ex alcalde de Huaraz Waldo Ríos, la declaración de vacancia a su cargo obedece a un afán de evitar que se fiscalicen los supuestos malos manejos en la gestión del ahora congresista Ríos. Villafuerte ofreció ayer una conferencia de prensa junto con el congresista Ernesto Gamarra. Ellos indicaron que tras haber denunciado serias irregularidades en el municipio de Huaraz, Villafuerte fue destituido. Sin embargo

fue repuesto tras demostrar que su vacancia fue una acción equivocada. "Una vez repuesto en mi cargo, Ríos solicitó que se reconsidere el caso, hecho que fue atendido casi de inmediato declarándose mi vacancia nuevamente el 14 de julio de este año", comentó Villafuerte. Tras estos hechos, Gamarra señaló que podría ser cierta la versión que fue el propio Vladimiro Montesinos quien le entregó a Ríos la resolución de la vacancia de Villafuerte. Admitió el error cometido por el Frente Independiente Moralizador (FIM) al haber aceptado en sus filas a Ríos quien tenía antecedentes negativos como alcalde. El Comercio, 24 de Agosto de 2000 <http://www.elcomercio.com/>

PERÚ: PIDEN INVESTIGAR A PRESIDENTE DEL COMANDO CONJUNTO DE LAS FUERZAS ARMADAS POR PRESUNTOS SIGNOS DE ENRIQUECIMIENTO

La congresista de Somos Perú, Anel Townsend, presentó ayer una moción para conformar una comisión especial que investigue el desbalance entre los ingresos y los bienes inmuebles del presidente del Comando Conjunto de las Fuerzas Armadas, general EP José Villanueva Ruesta. Suscriben la moción sus compañeros de bancada Manuel Masias, Ronnie Jurado, Jorge Chávez Sibina y Luis Guerrero, quienes solicitan el establecimiento de una comisión para que en un plazo de 30 días, emita un informe con conclusiones y recomendaciones sobre la propiedad, ingresos y patrimonio del alto oficial. El pedido parlamentario también incluye a la familia de Villanueva Ruesta, por los presuntos signos exteriores de riqueza y el desbalance entre remuneraciones y egresos que tendría el comandante general del Ejército. De acuerdo con la agencia Imediaperú, el general Villanueva poseería una importante cantidad de propiedades, como un inmueble de más de 2,500 metros cuadrados en Chosica, usado como casa de invierno por él y su familia, y que aparece como propiedad de la empresa Long View Corporation. Según la investigación periodística, el oficial también tiene otras siete propiedades de bienes inmuebles compradas por su esposa, una residencia ubicada en la urbanización Los Pinos, en Monterrico, y un local en el Centro Comercial El Polo, frente a la embajada de los Estados Unidos. La República, 23 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: POR ACUERDO DE COMISIÓN DE FISCALIZACIÓN MINISTRO DE DEFENSA INFORMARÁ SOBRE INMUEBLES ADQUIRIDOS

El ministro de Defensa, general José Villanueva Ruesta, deberá enviar a la comisión de Fiscalización del Congreso la información que permita conocer los bienes inmuebles que adquirió desde que asumió ese cargo público y que, según un medio de prensa, abarcaría a 7 inmuebles ubicados en zonas exclusivas de Lima. La propuesta, que surgió del oficialismo, fue una salida a las propuestas de los parlamentarios Luis Iberico (FIM) y Anel Townsend (Somos Perú), quienes solicitaron se conforme una subcomisión investigadora para que se dedique a este caso. La propuesta de Moisés Wolfenson (Perú 2000), para que antes que se presente el ministro Villanueva lo haga el periodista que realizó la investigación, puso en aprietos a su bancada, cuando los parlamentarios de la minoría solicitaron que dicha invitación se someta a debate. Wolfenson tuvo que retirarse de la sala de sesiones cuando se sometió a votación su propuesta y regresar cuando ésta fue rechazada por la mayoría. La denuncia de Iberico indicó que desde 1993 hasta la fecha, el general Villanueva y su esposa, María del Pilar Mesa Ramírez, se han comprado 7 propiedades inmuebles, entre departamentos, una casa con piscina y hasta una tienda en el centro comercial El Polo, además de una camioneta valorizada en más de US\$ 50,000. Según los partes de la Oficina Nacional de Registros Públicos mostrados por el congresista Iberico, la mayor parte de las propiedades están a nombre de la esposa del militar, quien es ama de casa y no tiene registro alguno ante la Superintendencia Nacional de Administración Tributaria (Sunat). Iberico además mostró las pruebas de una conexión entre el hijo mayor del titular de Defensa, José Villanueva Villanueva, con el coronel Mario Arbulú Seminario a través de la empresa Long View Corporation, mediante la cual han comprado varios terrenos en el balneario de Cerro Azul, para construir un complejo de verano.

La República, 22 de Agosto de 2000 <http://www.larepublica.com.pe/>

PUERTO RICO: ALEGAN QUE EL PARTIDO NUEVO PROGRESISTA JUSTIFICA CORRUPCIÓN CON PERSECUCIÓN

Cinismo, desesperación y la justificación de la corrupción fueron algunas de las explicaciones dadas por líderes y ex líderes universitarios independentistas a la nueva teoría de que los cargos federales por corrupción a miembros del Partido Nuevo Progresista (PNP) buscan desestabilizar el anexionismo como antes lo hicieron con el independentismo. "Decir que se persigue a los anexionistas es decir que se crea artificialmente una idea de que son corruptos, que se fabrica la imagen de corruptos", dijo Miguel Rivera, secretario nacional de organización de la Federación de Universitarios Pro Independencia (FUPI). La nueva teoría, agregó, equivale a decir "que no son tan corruptos". Según la nueva tesis, la Fiscalía Federal y del Negociado Federal de Investigaciones (FBI) han montado todo un operativo para influenciar las elecciones a favor del Partido Popular Democrático (PPD) y del "statu quo" con la radicación de cargos por corrupción contra alcaldes y líderes del PNP. El Nuevo Día, 22 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: CONDICIONAN SUBSIDIO DE \$130 MILLONES A VIVIENDA A CAMBIO DE AUSENCIA DE CORRUPCIÓN

Cuando regrese en septiembre, el Congreso decidirá el futuro de los \$130 millones en subsidios adicionales para vivienda pública en Puerto Rico, condicionando la aprobación a la erradicación de la corrupción en la Administración de Vivienda Pública (AVP). En septiembre el senador republicano por Missouri, Christopher Bond, discutirá con sus colegas las posibles vías de acción congresional sobre el acuerdo del Departamento de Vivienda y Desarrollo Urbano (HUD) de otorgar \$130 millones adicionales a Puerto Rico, informó ayer la oficina de Bond. En cualquier caso, el desembolso de los \$130 millones tiene que contar con garantías de que esos fondos no serán tocados por la corrupción en la AVP, señaló un ayudante congresional de Bond. "Entre las opciones que se están considerando está una certificación independiente de que el sistema de vivienda pública en Puerto Rico está libre de corrupción", señaló el ayudante de Bond. El Nuevo Día, 24 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: DÉFICITS Y ATRASOS EN INFORMES FINANCIEROS ANTE EL CONTRALOR

Siete municipios del país están en la lista de deudores de estados financieros de la Oficina del Contralor. En cuatro de ellos los alcaldes aspiran a la reelección y seis operaban con déficit en el último informe que entregaron. La lista de deudores la encabeza el Municipio de Río Grande, donde el último informe que entregó el alcalde del Partido Nuevo Progresista (PNP) César Méndez fue el del año fiscal 1995-1996. El Municipio de Adjuntas, administrado por el alcalde del Partido Popular Democrático (PPD), Roberto Vera Monroig, y el de Juncos, que dirige el novoprogresista Gilberto Conde Román, también están en la lista. El último informe que entregaron ambos alcaldes a la Oficina del Contralor fue el del año fiscal 1996-97. Los municipios de Villalba, Guayanilla, Naguabo y Utuado deben los estados financieros de los años 1998-99 y 1999-2000. Seis de los siete municipios que son considerados deudores de informes, tenían déficit en el último estado financiero que entregaron. En el estado financiero 1996-97, Adjuntas tenía un déficit de \$3.3 millones, mientras que el de Juncos alcanzaba los \$2.1 millones. En el informe del año 1997-98 Villalba tenía un déficit de \$1.4 millones y el déficit en Guayanilla era de \$1.2 millones. En Naguabo las arcas municipales estaban en rojo con un déficit de \$656 mil y en Utuado con un déficit de \$2.9 millones. El Alcalde de Río Grande, quien adeuda cuatro informes, incluyendo el del año que concluyó el 30 de junio pasado, no aspirará a la reelección Tampoco lo harán los alcaldes novoprogresistas de L. Naguabo y Utuado, José A. Meléndez y Juan L. Ortiz, respectivamente. En el caso de Villalba, el alcalde Bernardo Negrón Montalvo sí aspira a la reelección. Sin embargo, el PNP solicitó al Tribunal

de Ponce que lo descalifique por ser uno de los acusados en el escándalo del Centro de Recaudación de Ingreso Municipales (CRIM). El contralor, Manuel Díaz Saldaña, dijo estar satisfecho de que la mayoría de los municipios tengan al día sus estados financieros. Díaz Saldaña recordó que cuando asumió esa posición, sólo 13 de los 78 municipios estaban al día. Aun así, el funcionario solicitó la ayuda de la Oficina del Comisionado de Asuntos Municipales para penalizar con algún tipo de multa a los municipios que no tengan sus estados financieros al día. El Contralor dijo que antes del 7 de septiembre su oficina presentará un informe de auditoría sobre el municipio de Río Grande. El Nuevo Día, 23 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: IMPONE COMISIÓN DE ÉTICA DE LA CÁMARA LOS REQUISITOS MÁS ESTRUCTOS DE TODO EL GOBIERNO PARA DAR INICIO A INVESTIGACIONES

A pesar de que la Constitución de Puerto Rico establece que la Asamblea Legislativa será la única juez de sus miembros, la Comisión de Etica de la Cámara de Representantes impone los requisitos más estrictos de todo el Gobierno para darle paso a cualquier investigación. Contrario a su contraparte en el Senado, la Comisión cameral requiere prueba "robusta" y "convinciente" para iniciar siquiera una investigación a fondo. Requiere también que el querellante consiga la evidencia y la presente a la Comisión en 30 días después de tomar conocimiento de la supuesta violación. Esta administración eliminó la prescripción para los delitos por corrupción y violaciones a la ética, pero si un querellante de un representante presenta su denuncia en el día 31, la Comisión cameral la tiene que declarar prescrita, según la ley que crea el organismo. La Comisión de Etica senatorial sólo exige "prueba justa y razonable", y no impone un término mínimo para radicar la denuncia, según su ley. Ni los jueces en la Rama Judicial ni los funcionarios públicos en la Rama Ejecutiva imponen términos restrictivos para radicar denuncias ni exigen prueba fuera de toda duda razonable para evaluar un caso por ética contra uno de los suyos, según sus reglamentos. Para presentar una querrela contra un juez sólo hay que identificar los hechos y juramentar la querrela. Para radicar una querrela contra un funcionario en la Rama Ejecutiva es lo mismo: se requiere un juramento, y sólo se exige una exposición de todos los hechos, según la Ley de la Oficina de Etica Gubernamental. La Cámara exige que al querellante le conste de "propio y personal conocimiento" la violación que imputa a un legislador. Y apercibe de un procesamiento por perjurio del Código Penal en la misma radicación de la queja. Como si fuera poco, la Comisión cameral impide al querellante hablar del caso, pero no lo trata como parte a la hora de darle el derecho -como en todo proceso judicial- de obtener documentos de la otra parte, según el último querellante, Héctor Ferrer, quien radicó un caso contra el representante presidente de la Comisión cameral, Luis Aramburu. Ante la vergüenza pública por una discusión de un acto deshonoroso de uno de sus miembros, la Comisión senatorial puede activarse sola, por decisión de los senadores. La de la Cámara no. La Cámara necesita que alguien haya tomado conocimiento personal del acto deshonoroso y en menos de 30 días lo presente a la Comisión. Esta Comisión también tiene una veda para radicar las denuncias. Tres meses antes de las elecciones, la Comisión cameral no acepta querrelas contra sus legisladores amparada en que no quiere convertirse en una herramienta para hacer política. Ese cierre comienza el 7 de septiembre. Sin embargo, la ley es tan cómoda para los legisladores que no define lo que es "prueba robusta y convincente" ni lo que es "propio y personal conocimiento". El Nuevo Dia, 21 de Agosto de 2000 <http://www.endi.com/>

REGION ANDINA: HOJA INFORMATIVA SOBRE ESFUERZOS ANTINARCOTICOS

A continuación extractos de una hoja informativa emitida por el Departamento de Estado el 16 de agosto sobre los esfuerzos antinarcóticos en la región andina, la cual destaca el éxito de las tareas de erradicación de cultivos ilícitos de coca en Perú y Bolivia: ***** El cultivo neto de la coca andina y el potencial de producción de cocaína siguió declinando en 1999 y actualmente está en su nivel más bajo desde 1987. En general, el cultivo neto de coca andina declinó a 180.000 hectáreas en 1999, cifra 4 por ciento menor que la de 1998, y 15 por ciento menor que la de 1995. La

producción potencial de cocaína bajó a 765 toneladas métricas, una baja del 7 por ciento a partir de la cifra de 1998, y una baja del 18 por ciento desde 1995. ***** La decidida erradicación de los cultivos ilícitos de coca, las operaciones de interceptación y los programas de desarrollo alternativo en Perú y Bolivia redujeron el cultivo de coca en esos países en 66 y 55 por ciento, respectivamente, desde 1995. En gran parte debido a los exitosos programas antinarcóticos en Perú y Bolivia, el cultivo de la coca en la región andina ha cambiado a los territorios controlados por la guerrilla y los paramilitares en Colombia. ***** Colombia actualmente abastece de drogas ilícitas a Estados Unidos más que ningún otro país del mundo. Noventa por ciento de la cocaína en el mercado de Estados Unidos viene de Colombia --como ocurre, de acuerdo con estimados, con hasta dos tercios de la heroína en la costa este. ***** Los problemas en Colombia afectan la vida de los norteamericanos en nuestro país y en el extranjero. Las drogas ilícitas le cuestan a nuestra sociedad 52.000 vidas y casi 110.000 millones de dólares al año, debido a los costos en salud, accidentes y productividad perdida. ***** Las organizaciones dedicadas al tráfico de drogas en Colombia son una perniciosa fuente de inestabilidad. Canalizan fondos a los insurgentes y a los paramilitares que actúan como policías no autorizados, para obtener protección y otros servicios. Mientras tanto, la constante intimidación y la influencia corruptora de los traficantes constituye una grave amenaza al imperio del derecho y las instituciones democráticas de libre mercado en Colombia. Servicio Noticioso desde Washington , 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

REPUBLICA DOMINICANA: LA FISCALÍA ANTICORRUPCIÓN DESATA UN DEBATE JURÍDICO

La creación de una Fiscalía especializada en la persecución y castigo de los casos de corrupción comenzó a crear controversia entre los juristas, algunos de los cuales consideran que las funciones de esa institución restarían competencia a los fiscales distritales y contravendrían a la Constitución. "El punto nervioso es que sus funciones se confrontarían con la competencia del fiscal, ya que tendría jurisdicción nacional", explicó el jurista Julio Cury, al exhortar a los legisladores a realizar un examen detallado para impedir que la aprobación del proyecto determine alguna acción anticonstitucional. Cury indicó que el establecimiento de la nueva dependencia también podría necesitar de diversos cambios legales con la meta de evitar contradicciones entre la pieza legislativa que la fundamentará, la Constitución de la República y otras leyes. Recordó que de acuerdo con el artículo 55 de la Constitución, los funcionarios que dependan del poder Ejecutivo de ninguna forma pueden gozar de inamovilidad, como ocurre con el titular del ministerio público y los fiscales distritales. "No se puede obrar a la ligera al crear una nueva institución de esta categoría", agregó Cury, al insistir en la necesidad de que los legisladores analicen con detenimiento la pieza presentada el pasado 22 de agosto ante el Congreso Nacional por el consultor jurídico de la Presidencia, Guido Gómez. El proyecto de Ley para la Creación de la Fiscalía Nacional Anticorrupción prevé que la institución goce de autonomía e independencia económica, política y administrativa. La pieza legislativa, que consta de 20 artículos, también considera necesario que el titular de la dependencia, quien tendría jurisdicción nacional, sea elegido por el Senado de una terna presentada por el Presidente de la República por un período inamovible de cinco años. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: NUEVO PRESIDENTE PROPONE QUE EL FISCAL NACIONAL ANTICORRUPCIÓN SERÁ INAMOVIBLE DURANTE CINCO AÑOS

El Fiscal Nacional Anticorrupción será designado por un período de cinco años, e inamovible, por el Congreso Nacional, según el proyecto de ley sometido ayer ante el Senado de la República por el presidente Hipólito Mejía. El Fiscal Anticorrupción será inamovible por la naturaleza de sus funciones, salvo que cometa una falta grave y previa comprobación de la misma, y sólo podrá ser destituido por las causas graves. El funcionario se ocupará principalmente de las denuncias sobre

los casos de peculado, cohecho, soborno, extorsión, concusión, agiotismo, fraudes en el sistema financiero, enriquecimiento ilícito, y acciones fraudulentas en general, que impacten los recursos del fisco o de las instituciones del sector público, incluyendo aquellas que participen colateralmente con el sector privado, las autónomas y descentralizadas, creadas por leyes especiales. De igual forma, el Fiscal Anticorrupción, en representación de la sociedad, podrá constituirse en parte civil contra todos aquellos que hayan actuado en perjuicio del patrimonio del Estado dominicano, sin ser necesariamente autorizado por el Presidente de la República, y todo lo reivindicado pasará al Fiscal Nacional. El mensaje presidencial que acompaña la pieza legislativa explica que el Fiscal Anticorrupción tendrá como objetivo la persecución eficaz de aquéllos servidores públicos que en el ejercicio de sus funciones incurran en la comisión de actos de corrupción. El mandatario explica a los senadores que el proyecto de ley facultad a la Fiscalía Nacional Anticorrupción para que, además de adoptar las acciones requeridas para la prevención, la investigación, la identificación e individualización de los actos de corrupción se encargue de la difusión de los valores y principios de probidad, integridad y transparencia en los manejos de los asuntos públicos. "Espero, pues, que los legisladores, compartan conmigo la importancia que tiene para el saneamiento de nuestra vida institucional, la adopción del nuevo estatuto legal que someto a su consideración, por lo que espero que impartan al mismo su voto de aprobación", dice el presidente Mejía en su mensaje a los congresistas. La Fiscalía Nacional Anticorrupción gozará de autonomía e independencia económica, política y administrativa, según lo establece el artículo 1 de la ley que lo instituye y actuará en representación de la ciudadanía. Tendrá competencia en todo el territorio de la República, y su sede en Santo Domingo, constituyendo delegaciones en los departamentos judiciales y distritos judiciales que considere convenientes. La Fiscalía Anticorrupción recibirá, tramitará y procederá a investigar denuncias en torno a actos de corrupción cometidos por mandatarios o servidores públicos, magistrados, dignatarios, autoridades, funcionarios y empleados de los organismos del Estado y las personas particulares involucradas en los hechos que se investigan y de encontrarse indicios de responsabilidad penal en las referidas investigaciones pondrán sus conclusiones en conocimiento del ministerio público, de la Contraloría General de la República o del órgano jurisdiccional que fuere competente de acuerdo con la ley. El Fiscal Nacional Anticorrupción será designado por el Congreso Nacional por un período de cinco años, de una terna presentada por el Presidente de la República. El Listín, 23 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: TOMA POSESIÓN NUEVO TITULAR DEL DEPARTAMENTO DE PREVENCIÓN DE LA CORRUPCIÓN

En la toma de posesión, el nuevo titular del Departameto de Prevención de la Corrupción, Jesús Félix, se comprometió a que durante su gestión "nadie, ni de esta administración, ni de gobiernos pasados, incidirá en mi trabajo, ni con una llamada telefónica, ni con una tarjeta". Al ser juramentado en el cargo por el consultor jurídico de la Presidencia, Guido Gómez Mazara, Félix aseguró que "voy a reivindicar el anhelo de la población en el sentido de que el dinero del pueblo no se va quedar en los bolsillos de los funcionarios". Félix, cuyo departamento desaparecería en caso de que el Congreso apruebe la creación de la Fiscalía Nacional Anticorrupción, indicó que revisará todos los expedientes sobre corrupción que reposan en la Procuraduría General de la República y someterá ante la justicia a todas las nuevas denuncias que estén fundamentadas de manera suficiente. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

URUGUAY: DENUNCIAN PASIVIDAD DE ORGANISMOS FISCALIZADORES

"El contrabando y la ilegalidad están causando verdaderos destrozos en el comercio y la industria instalada en el interior del país, y el gobierno parece no tener una verdadera dimensión de esta situación" afirmó Helios Maderni, presidente de la Comisión de Relacionamento con el Interior de la Cámara de Industrias del Uruguay. Maderni dijo que la industria ha declarado su falta de competitividad, pero en el interior, el contrabando y las prácticas desleales de comercio son

alarmantes, y a ello se suma la inactividad. Como consecuencia, las ventas del comercio establecido y la producción están lejos de contrarrestar esos efectos perniciosos. "Creo que el gobierno no tiene conciencia cabal de lo que está pasando en el interior" sostuvo el dirigente, y se remitió a sendas declaraciones de instituciones empresariales de dos zonas del país. El 8 de julio, representantes de la CIU (Camara de Industrias del Uruguay), CEDU (Confederación Empresarial del Uruguay) y los Centros Comerciales de Lascano, Castillo, Rocha, Cerro Largo y Treinta y Tres resolvieron "reclamar a los gobiernos nacional y departamental, que se cumplan las leyes que combaten el contrabando y el informalismo que afectan y provocan la crisis actual de la industria y el comercio establecido". El 25 de julio, los Centros Comerciales del departamento de Colonia y la CIU se reunieron con legisladores del departamento por el tema contrabando y comercio informal. Preocupados por el "desmedido avance" de ambas actividades, se denuncia "la pasividad de los órganos encargados del contralor impositivo y de la seguridad social" frente a hechos evidentes de prácticas desleales de comercio. Maderni dijo que en las giras realizadas por el interior, las entidades locales han denunciado la impunidad con la cual actúan el contrabando y el informalismo, así como la corrupción que evidencian los controles aduaneros. Estas opiniones fueron trasladadas por los dirigentes capitalinos al director nacional de Aduanas, Jorge Sierra, reclamándole la aplicación de las medidas que prevé la propia ley al respecto. "Es imprescindible que se haga algo de inmediato para frenar estas actividades" subrayó Maderni. "Se habla de ´peces gordos´ o de gente que hace contrabando en gran escala" agregó, sin que por ello se tomen las medidas adecuadas. Diario el País, 21 de Agosto de 2000 <http://www.diarioelpais.com/>

URUGUAY: LA ASOCIACIÓN DE TRABAJADORES DE LA SEGURIDAD SOCIAL DENUNCIÓ UN DESVÍO DE FONDOS

Una delegación de la Asociación de Trabajadores de la Seguridad Social (ATSS) afirmó que los funcionarios que cumplen tareas inspectivas nunca recibieron los fondos destinados a locomoción y que esos dineros fueron "desviados" o producto de un "mal uso presupuestal". Daniel Inthamoussu, miembro de la asociación, dijo el lunes 14 en una Comisión de Diputados que el gremio hizo averiguaciones sobre el destino de los dineros para locomoción y concluyó que existe "un problema administrativo, un mal manejo de los fondos". Solicitó que se investigue qué se hizo con ese "crédito presupuestal". "El crédito presupuestal asignado para locomoción y para otra partida de compensación que percibimos, existe. Se nos dijo que hubo un problema administrativo, pero desde nuestro punto de vista hubo un desvío de fondos --han pagado otras cosas que no son locomoción--, una falta administrativa o un mal uso presupuestal, que se intentará tapar rebajando nuestras partidas y haciendo ver que se trata de un recorte", señaló el sindicalista. El Observador, 23 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: SE DEFIENDE EX MINISTRO DE TURISMO, DIJO QUE NO COMETIÓ DELITO DURANTE SU GESTIÓN

El ex ministro de Turismo, Benito Stern, dijo ayer que las trasposiciones de rubros que ordenó durante su gestión no significaron un "abuso de funciones" y que tampoco obtuvo por ello "beneficio personal alguno". En una declaración distribuida a los medios, Stern se defendió de la denuncia penal que presentaron las actuales autoridades del Ministerio de Turismo y del pedido de procesamiento en su contra del fiscal Enrique Moller, por el delito de abuso de funciones. Moller también pidió el procesamiento por coautoría de falsificación de documento, del ex director general de Turismo, Juan Rodríguez Siri, de un gerente y de un funcionario de esa cartera. En su declaración, Stern dijo que si bien "formalmente" el procedimiento de trasposición de rubros "puede ser cuestionable", la "necesidad lo impuso dado que hubo de optarse entre un Ministerio de Turismo sin actividad ni promoción suficiente (...) o una cartera que cumpliera legítima y plenamente con sus funciones, aunque tuviera para ello que alterar el destino de los gastos". "No hemos incurrido en conductas dolosas ni en abusos que significaran beneficio personal alguno. Si

hay otros hechos, ocurridos en la vida administrativa, que merezcan esos calificativos, somos ajenos a ellos", afirmó Stern. El Observador, 18 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: UN EX MINISTRO DE TURISMO PODRÍA IR A LA CÁRCEL POR MALVERSACIÓN DE FONDOS

El ex ministro de Turismo, Benito Stern, podría ir a la cárcel por haber desviado fondos de la ley de subvenciones turísticas. El miércoles fue rechazado el recurso de nulidad presentado por la defensa del ex ministro, quien alega inmunidad constitucional. La fiscalía considera que el ex ministro no goza de inmunidad y que por lo tanto el proceso judicial debe continuar su marcha. Benito Stern fue titular de la cartera de Turismo durante el gobierno de Julio María Sanguinetti, y es miembro del Partido Colorado. La acusación partió del actual ministro Alfonso Varela, también del Partido Colorado, pero integrante de la Lista 15, que responde al actual Presidente Jorge Batlle. Según la Ley Anticorrupción y si se comprueba la culpabilidad del ex ministro, éste podría ir a prisión de tres meses a tres años. No podrá ocupar cargos públicos en un período de dos y cuatro años, y podría llegar a pagar una multa que va desde los 160 a los 50 mil dólares. Si Benito Stern es condenado a prisión, sería el segundo caso de un político que va a la cárcel por cometer delitos de "cuello blanco". El primero fue el contador Enrique Braga, hombre vinculado al Partido Nacional y de confianza del ex presidente, Luis Alberto Lacalle. Lacalle estuvo en el poder entre 1990 y 1995. Su gobierno es catalogado como uno de los más corruptos de todos los tiempos. Informativos Net, España (Uy/QR/Au/Ppc/ap), 18 de Agosto de 2000 <http://www.informativos.net/>

ARGENTINA: DENUNCIAN A UN ALTO FUNCIONARIO CORDOBÉS SUPUESTO TRÁFICO DE INFLUENCIAS

Un alto funcionario del gobernador José Manuel de la Sota quedó seriamente comprometido y puso en jaque la imagen del gobierno por una denuncia sobre un supuesto tráfico de influencias en favor de una empresa constructora de la que formó parte, la cual habría estafado en unos 180.000 pesos a los habitantes de una pequeña localidad del interior provincial. El caso, puesto al descubierto por el programa televisivo "Telenoche investiga", involucra al contador Jorge Eduardo Acosta, secretario de Finanzas, y a la firma Giacomo, acusada de haber emitido alrededor de 150 cheques sin fondos de una cuenta del Banco de Córdoba. Resultaron perjudicados con esos valores incobrables los

habitantes de la localidad de Alto Alegre, ubicada en el departamento Unión y en las proximidades de Villa María, donde la empresa tenía a su cargo la construcción de la ruta hacia la vecina población de Cintra. La obra le fue adjudicada durante la gestión del gobernador anterior, el radical Ramón Mestre. Acosta, que era apoderado de la empresa mientras se desempeñaba en el Tribunal de la provincia, fue acusado de haber intervenido para que el banco no le cerrara la cuenta a la constructora, hecho que finalmente ocurrió el 15 de diciembre del año último. Incluso, el banco inhabilitó por 15 días la firma de Acosta. El interventor en la entidad bancaria, Fabián Maidana, aclaró que no se pagaron cheques en descubierto y aseguró que no se violaron disposiciones del Banco Central. En su defensa, el funcionario aclaró que en 1995 se desvinculó de la empresa -exhibió como prueba un acta notarial fechada el 29 de diciembre de 1995- y que desde entonces no firmó más documentos ni cheques, por lo cual desconoció lo ocurrido con posterioridad. Además, negó haber ejercido influencias sobre el Banco de Córdoba para ordenar algún beneficio. Apenas regresado de un viaje de descanso por Brasil, el gobernador se encontró con este problema y dijo que, en caso de haber irregularidades, las deberá investigar la Justicia. En el caso del Banco de Córdoba, indicó que "si hay algún funcionario que haya violado las responsabilidades que le corresponden, debe tener las sanciones correspondientes". El ministro de Finanzas, José María las Heras, respaldó a su colaborador, aunque trascendió que en el seno del gobierno se analiza el futuro del funcionario denunciado. La Nación 18 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: DOS EX-MINISTROS ACUSADOS EN TRAFICO DE ARMAS

Dos exministros y un antiguo vice-ministro del gobierno del presidente Carlos Menem fueron acusados de formar parte de una red de venta ilegal de armas. El exministro de Relaciones Exteriores, Guido Di Tella, y el que fue ministro de Defensa, Ermán González, se encuentran bajo sospecha de haber vendido armas a Ecuador y Croacia, cuando ambos países sufrían embargos internacionales. Según informaciones hechas públicas el viernes, al antiguo vice-ministro de Exteriores con Di Tella, Juan Carlos Olima, también se le acusa de estar involucrado en el caso. El fiscal los acusa de 'haber firmado documentos que sabían que eran falsos' y 'haber negligido su deber público'. Los tres acusados formaron parte del gobierno de Carlos Menem, sobre el cual siempre pesaron dudas sobre presuntos casos de corrupción. Una de las acusaciones más graves sería que el gobierno había conspirado para vender armas a Croacia -que se encontraba bajo un embargo de Naciones Unidas a causa del conflicto en los Balcanes. Otras armas fueron supuestamente encontradas cuando eran transportadas a Ecuador, que había estado en guerra contra Perú en 1995. El gobierno de Argentina en aquel momento negó todas las acusaciones asegurando que las armas tenían otras destinaciones y que luego fueron desviadas hacia Croacia y Ecuador. Analistas aseguran que detrás de las nuevas investigaciones judiciales se encuentra la voluntad del nuevo presidente Fernando de la Rúa de erradicar la corrupción de la administración pública. Incluso clarificando escándalos de los gobiernos anteriores. BBC News, August 19, 2000 <http://www.bbc.co.uk/spanish/news000819argentina.shtml>

ARGENTINA: EL PRESIDENTE ARGENTINO RESPALDÓ A SU GABINETE ANTE LAS DENUNCIAS DE CORRUPCIÓN

El presidente argentino, Fernando de la Rúa, ratificó este martes su confianza en todo el gabinete ministerial ante denuncias de corrupción. El mandatario solicitó a los ministros que colaboren con todas las investigaciones sobre las denuncias de sobornos en el Senado para aprobar la reforma laboral, el pasado mes de mayo. Entretanto, las dos ramas de la principal central obrera argentina: la Confederación General del Trabajo, CGT, dividida en oficial y rebelde, pidieron la derogación de la ley de Reforma Laboral, si se comprueban las denuncias de que la oposición en el Senado fue

sobornada para aprobar esa norma en mayo pasado. La nueva ley laboral amplía el período de prueba de los trabajadores, fomenta la renovación de los convenios colectivos de trabajo y favorece la reducción de los aportes patronales a las empresas que tomen nuevos empleados. A pesar de la nueva ley, más de cuatro millones de argentinos tienen actualmente problemas para conseguir trabajo. Radio Nederland, Holanda, 23 de Agosto de 2000 <http://www.rnw.nl/>

ARGENTINA: EN CASO DE PRESUNTO PAGO DE SOBORNO EN EL SENADO, PRESENTARON SEIS DENUNCIAS Y LA JUSTICIA YA INVESTIGA

En el marco de la investigación por el presunto pago de sobornos para aprobar la ley de reforma laboral, ayer se realizaron seis denuncias en los tribunales federales de Comodoro Py. Las presentaciones fueron hechas por los abogados Marcelo Parrilli, Ricardo Monner Sans, Juan Carlos Iglesias, Eduardo Barcesat, el diputado frepasista Jorge Giles, y el legislador cavallista Guillermo Francos. Pese a que todas las denuncias cayeron por sorteo en distintos juzgados, la Cámara Federal unificará la investigación en el magistrado que fue sorteado en primer lugar. Ayer, en fuentes judiciales se aseguraba que la causa quedará en manos del juez federal Carlos Liporaci. Los denunciantes coincidieron en solicitar la convocatoria del presidente Fernando de la Rúa y en enmarcar la conducta que se les atribuye a los senadores en la figura de cohecho. Parrilli pidió además que se interrogue al vicepresidente Carlos "Chacho" Alvarez, al jefe de Gabinete Rodolfo Terragno, al ministro de Trabajo Alberto Flamarique y a los senadores justicialistas Jorge Yoma y Antonio Cafiero. Monner Sans aportó como evidencia el anónimo que detalla la supuesta maniobra que se siguió para repartir las coimas. Mientras que Iglesias señaló que de comprobarse el pago de coimas las instituciones nacionales se asemejarían a "inodoros políticos". Otros denunciantes solicitaron también la declaración testimonial del líder de la Confederación General de Trabajadores (CGT) disidente, el camionero Hugo Moyano, quien meses atrás formuló acusaciones sobre la circulación de dinero sucio en el tratamiento de la nueva ley laboral. "Estamos frente a la crisis institucional más grave desde la reanudación de la vida democrática", opinó Francos. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: EN ESCÁNDALO DE SOBORNOS EN EL SENADO, EL GOBIERNO BUSCA PASAR A LA OFENSIVA

Fernando de la Rúa retomó ayer la iniciativa frente a la denuncia de posibles sobornos en el Senado para aprobar el proyecto oficial de reforma laboral, y después de solidarizarse con sus ministros, los invitó a presentarse ante la Oficina Anticorrupción (OA). La otra parte de la ofensiva oficial quedó en manos del vicepresidente, Carlos "Chacho" Alvarez, quien anoche anunció que hoy presentará una denuncia ante la Justicia solicitando que se investigue el presunto pago de sobornos. Mientras los abogados terminaban el escrito, Chacho Alvarez discutía con sus colaboradores si será él quien se presente hoy ante los Tribunales o si radicará la denuncia mediante alguno de los letrados. La invitación presidencial a sus ministros para concurrir a la Oficina Anticorrupción se produjo durante la reunión de gabinete de ayer, y la primera consecuencia fue que el jefe de la SIDE, Fernando de Santibañes, y el ministro de Trabajo, Alberto Flamarique, se pusieron a disposición del organismo. Es la primera vez que el Presidente de la Nación asume la necesidad de investigar el tema fuera del Senado. Con este paso, De la Rúa retomó un protagonismo propio en un intento por evitar pagar mayores costos políticos por este caso. Durante la semana pasada, mientras desde la Casa Rosada se esforzaban por bajar la tensión en torno al presunto caso de sobornos, la ofensiva había quedado en manos de Alvarez, quien presionó para promover la investigación. De la Rúa cambió así radicalmente su estrategia luego de percibir el impacto creciente de la denuncia, según la cual algún miembro del

oficialismo habría pagado con sobornos el voto de algunos senadores, sobre todo del Partido Justicialista, para poder aprobar la reforma laboral. El monto y destino de los presuntos sobornos varía de acuerdo con los rumores: distintas fuentes mencionaron sumas de entre dos y cinco millones de dólares. Algunos sostienen que la suma habría ido dirigida hacia el bloque justicialista, mientras que otros afirman que también habría llegado hasta el bloque radical. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: EN INVESTIGACIÓN DE SOBORNOS EN EL SENADO. LA SECRETARIA DE INTELIGENCIA DEL ESTADO DARÁ A CONOCER SUS CUENTAS

La Secretaría de Inteligencia del Estado (SIDE), presentará hoy ante la Oficina Anticorrupción un detalle sobre el movimiento de sus fondos desde el comienzo de la administración de Fernando de Santibañes. La decisión de la SIDE de abrir sus cuentas responde a un pedido del titular de ese organismo, José Massoni, en el marco de la investigación sobre el presunto pago de coimas en el Senado durante el tratamiento de la ley laboral. El informe incluye el manejo de los aproximadamente 2 millones de pesos mensuales, que dispone la Secretaría en concepto de gastos reservados, que no requieren rendición. Hay una fuerte sospecha --alentada por el vicepresidente, Chacho Alvarez-- de que parte de esos fondos fueron usados para pagar el voto de senadores del Partido Justicialista --e incluso algunos de la Alianza-- para sacar la ley laboral. El detalle de la SIDE ocupa diez carillas en las que se intentaría demostrar que no hubo, en los meses que llevó el tratamiento de la ley, en los anteriores y en los que siguieron a su sanción, gastos que pudieran comprometer a la Secretaría. Fernando de la Rúa reclamó que todos sus hombres se pongan a disposición de la Oficina Anticorrupción, o donde se los requiera, para despejar sospechas sobre el papel del Gobierno en el escándalo. La tensión natural entre los principales referentes de un gobierno --más tratándose de una coalición de gobierno-- amenaza ahora con fragmentar algunas decisiones, al menos en relación a este escándalo. Por ahora a la de la Oficina Anticorrupción, que investiga desde la semana pasada el escándalo, se suman otras. Los dos bloques mayoritarios del Senado --el del PJ y el de la Alianza-- decidieron trasladar la investigación al procurador Nicolás Becerra. La Procuración inició una investigación --que quedó en manos del fiscal Eduardo Taiano-- sobre el trámite que precedió a la sanción de la ley. El Clarín, 24 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: JUEZ DECIDIRÁ SI PROCESAN A EX SECRETARIA DE RECURSOS NATURALES POR ENRIQUECIMIENTO ILÍCITO

El juez federal Juan José Galeano decidirá en los próximos días la situación procesal de la ex secretaria de Recursos Naturales María Julia Alsogaray en la causa en que se investiga si se enriqueció en forma ilícita durante el gobierno del ex presidente Carlos Menem. Fuentes oficiales consultadas por Clarín dijeron que el plazo de Galeano para decidir si la procesa, sobresee o dicta la falta de mérito se vence mañana, pero no descartaron que el juez prorrogue el tema hasta principios de la semana próxima. El juez Galeano tiene que decidir si las declaraciones y presentaciones de María Julia justifican el considerable incremento que registraron sus bienes entre 1989 y 1999 de 300 mil a 2.500.000 pesos. Esto es así porque en los juicios por enriquecimiento ilícito se invierte la carga de la prueba y, por lo tanto, es el acusado el que tiene que justificar sus bienes. Para los fiscales Eamon Mullen y José Barbaccia, María Julia no justificó ingresos lícitos por 1.800.000 pesos en las presentaciones que viene haciendo desde que se abrió la causa, hace casi siete años. Y los fiscales creen que en los descargos que ya había hecho por escrito no demostró el origen lícito de 1.800.000 dólares. Dudan --además de la herencia anticipada de su padre-- de, por lo menos, dos fuentes que María Julia presentó para justificar su patrimonio. El Clarín, 23 de Agosto de 2000 <http://www.clarin.com.ar/>

ARGENTINA: OPERACIÓN MANOS LIMPIAS PODRÍA INICIARSE EN ARGENTINA

Un proceso anticorrupción mani pulite (manos limpias), al estilo italiano, podría iniciarse en Argentina, a raíz de la denuncia sobre sobornos en el Senado para sancionar una reforma laboral, dijo ayer el vicepresidente, Carlos Alvarez. El mani pulite fue un proceso de investigación en gran escala de los casos de soborno y corrupción en el más alto nivel político y judicial de Italia, iniciado por el fiscal de Milán, Antonio Di Pietro, en 1992. El Universo, Ecuador (AP), 22 de Agosto de 2000 <http://www.eluniverso.com>

ARGENTINA: PIDEN A LA JUSTICIA QUE INVESTIGUE EL SOBORNO PAGADOS A SENADORES

Los supuestos sobornos pagados en el Senado ya llegaron a la Justicia. Guillermo Francos, diputado de Acción por la República, presentará hoy una denuncia ante los juzgados federales exigiendo que se investigue si es cierta o no la versión que señala que hubo senadores que recibieron favores personales a cambio de aprobar la reforma laboral que impulsaba el Gobierno. En su escrito, el dirigente cavallista solicita a la Justicia que investigue "si el Poder Ejecutivo pagó sobornos a senadores de la Nación para obtener su voto afirmativo a la sanción de la llamada ley de reforma laboral y eventualmente identificar y llevar a juicio a sus responsables". La denuncia de Francos es la primera que se realiza sobre el tema. El diputado trabajó en ella durante el fin de semana luego de constatar, con sorpresa, que ningún fiscal decidía actuar de oficio para investigar el tema. En su denuncia, Francos no aporta datos nuevos, sino que relata las noticias periodísticas publicadas sobre el tema. Cita el artículo de Joaquín Morales Solá publicado en La Nación y las transcripciones de la denuncia anónima que circuló por diversos ámbitos ligados al poder político. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: PRESIDENTE DE LA COMISIÓN DE ASUNTOS CONSTITUCIONALES DESCALIFICÓ DENUNCIAS DE COIMA EN EL SENADO

"Están todos locos, empezando por Alfonsín (Raúl) y De la Rúa (Fernando) que no descalifican tamaña barbaridad", opinó el presidente de la Comisión de Asuntos Constitucionales, senador Jorge Yoma (PJ-La Rioja). Con estas palabras, Yoma desestimó el pedido realizado por el Presidente para que el Senado investigue el presunto pago de favores personales, con el objetivo de que se aprobase el proyecto de reforma laboral impulsado por el Gobierno de la Alianza en medio de fuertes críticas gremiales y de la oposición. El riojano rechazó la propuesta de De la Rúa, que durante los actos de homenaje al general José de San Martín dijo que "es el Senado el que debe dar los pasos para determinar con claridad" la existencia o no de sobornos en el trámite de aprobación de la ley en la Cámara alta. De la Rúa sugirió que debía actuar la Comisión de Asuntos Constitucionales, presidida por Yoma. Esa comisión es la responsable de tramitar todas las cuestiones de privilegio y, en consecuencia, está a cargo de las presentaciones que hicieron los senadores Antonio Cafiero y Jorge Villaverde para que se esclarecieran las versiones que circularon por el presunto pago de favores personales en ese cuerpo legislativo. "Si esto es cierto, el que está involucrado es el propio Gobierno y esto va a ser un verdadero desastre institucional", aseguró Yoma. El legislador riojano calificó de "disparate total" los rumores que circulaban en la Cámara alta en relación con esta supuesta operación. Aunque aclaró que si en el Senado "van a darle entidad al tema, hay que formar una comisión ad hoc que cite a todo el mundo, empezando por el Presidente". El titular de la Comisión de Asuntos Constitucionales opinó que no había que darle entidad a las versiones ni prestar atención a

las denuncias anónimas que circularon sobre el tema. La Nación, 18 de Agosto de 2000 <http://www.lanacion.com/>

ARGENTINA: SURGE GRAVE ESCÁNDALO POR SOSPECHA DE SOBORNOS A SENADORES ARGENTINOS

Las insistentes sospechas de que senadores de la oposición peronista habrían sido sobornados para que votaran favorablemente la reforma laboral que el actual gobierno logró hacer aprobar por el Congreso hace tres meses, amenazaban hoy en convertirse en el peor escándalo político argentino de las últimas décadas. Tanto el gobierno del Presidente Fernando de la Rúa como el Partido Justicialista, que controla el Senado, parecían hoy desorientados ante las previsibles derivaciones del caso. Un sector de la actual administración, encabezado por el vicepresidente Carlos Alvarez, y un grupo minoritario de senadores peronistas, reclaman una investigación a fondo para esclarecer las denuncias, lo que provoca alarma en no pocos oficialistas y opositores. Todo comenzó cuando el columnista del diario La Nación, Joaquín Morales Solá, escribió hace algunas semanas que había fundadas sospechas de que un grupo de senadores peronistas habían "negociado" su apoyo a la reforma laboral, a cambio de dinero. La información del periodista provino, aparentemente, de dos legisladores peronistas no involucrados en esta maniobra, identificados como Antonio Cafiero y Jorge Villaverde, ambos de la provincia de Buenos Aires. La denuncia provocó alarma en el bloque senatorial peronista, cuyas autoridades visitaron la semana pasada al Mandatario De la Rúa, para pedirle que públicamente desautorizara las versiones. De la Rúa así lo hizo y declaró que no dudaba de la honorabilidad de sus adversarios. Pero dos prominentes figuras de la Alianza gobernante, el vicepresidente Alvarez y el ex presidente Raúl Alfonsín, titular de la Unión Cívica Radical (UCR), el partido de De la Rúa, demandaron una investigación. Alvarez manifestó que si las denuncias se confirmaban, significarían una "decadencia terminal" del sistema democrático. Alfonsín, a su vez, refirió que si se probaban los sobornos, renunciaría a la actividad política. De la Rúa, evidentemente preocupado, modificó su postura inicial e indicó que el Senado tendría que investigar las acusaciones contra algunos de sus integrantes. El senador peronista Jorge Yoma, titular de la comisión de asuntos constitucionales, respondió anunciando que citaría al Presidente como el principal imputado. En medios legislativos circuló un libelo anónimo, mencionando por su nombre a los presuntos involucrados en el ofrecimiento y cobro de sobornos. Menciona a algunos funcionarios gubernamentales y a senadores peronistas y de la UCR. El vicepresidente Alvarez, titular del centroizquierdista Frente del País Solidario (Frepaso), el otro integrante de la Alianza, hizo saber a sus amigos que no cejará hasta esclarecer este caso. El destino de la investigación está en manos, aparentemente, de los senadores peronistas Cafiero y Villaverde, a quienes llamaría a declarar esta semana una comisión de la Cámara Alta. El Excelsior, México (AP), 21 de Agosto de 2000 <http://www.excelsior.com.mx/>

ARGENTINA: VICEPRESIDENTE DENUNCIA LA FALTA DE ``VOLUNTAD COLECTIVA`` PARA LUCHAR CONTRA LA CORRUPCION POLITICA

El vicepresidente argentino Carlos "Chacho" Alvarez ha realizado unas declaraciones en las que señala que aún no existe una "voluntad colectiva" para luchar contra la corrupción política del país. "El combate frontal contra las prácticas que la sociedad rechaza de la política no se ganó. Hay mecanismos de acción política que son reprochables y cuestionables en todos lados y todavía no se observa una voluntad colectiva de combate a fondo", ha declarado el vicepresidente. Carlos Álvarez ha criticado que esta actitud es "una de las causas de la degradación de la política o que la gente sospeche sobre la ineficiencia e improductividad de la política. Esto hace que a la política se la

asimile con el mejor posicionamiento social de quienes la hacemos, al enriquecimiento ilícito o al incremento patrimonial". Asimismo, el líder frepasista ha mostrado su preocupación porque "las imperfecciones de la política no son desde un lugar excluyente de la sociedad, sino que se trasladan al sistema económico, institucional y social". Noticias Yahoo, (INFOSIC/EP), 20 de agosto de 2000 <http://es.news.yahoo.com/000820/4/i4ej.html>

ARGENTINA: VICEPRESIDENTE PROPUSO UN DESAFUERO COLECTIVO, ASÍ LA JUSTICIA INVESTIGARÍA A SENADORES POR PRESUNTOS SOBORNOS

El vicepresidente Carlos Alvarez reforzó ayer la estrategia del Gobierno para enfrentar las denuncias de pago de "favores personales" a los legisladores en busca de la sanción de la ley de reforma laboral. Y, en esa línea, sostuvo que los legisladores deberían perder sus fueros en forma colectiva para someterse a la Justicia. "Debería desaforsarse colectivamente la Cámara para que la Justicia pueda actuar en este tema", dijo Alvarez, tras expresar sus reticencias a que las sospechas sólo sean investigadas por el Congreso cuando, precisamente, atañen a esa institución. "Es muy difícil, al estar involucrada una parte de los senadores en este tema, que el propio cuerpo pueda llevar adelante una investigación objetiva", razonó. En ese sentido, se confesó "pesimista acerca de la posibilidad de autoinvestigación de los senadores". Aseguró que su intención es la de lograr una investigación "a fondo y sin concesiones", porque su prioridad es "mejorar las instituciones", dijo. "Salvando las distancias, esto es como pasó en Italia cuando comenzó el mani pulite (manos limpias), que empezó con un gran temor", comparó. Para ello, estimó que "un trámite bastante rápido para avanzar sería citar al senador (Antonio) Cafiero (Partido Justicialista-Buenos Aires), que puso el tema en el lugar de las sospechas". Precisamente, fueron los senadores Cafiero y Jorge Villaverde (PJ-Buenos Aires) quienes impulsaron la investigación, luego de los rumores de que hubo colegas suyos que supuestamente recibieron dinero a cambio de sus votos favorables a la reforma laboral. Hoy los dos senadores del PJ se reunirán con los presidentes de las bancadas del Congreso. En ese sentido, Alvarez rechazó sentir temor por las eventuales derivaciones de una investigación y dijo que el más preocupado en esclarecer la situación es el presidente Fernando de la Rúa, a quien, aclaró, no se citará al Congreso. "Nunca puede haber costos en la voluntad de mejorar el funcionamiento de las instituciones", consideró Alvarez. Inmediatamente agregó: "No estoy dispuesto a ser el presidente de un cuerpo que conviva con estas situaciones". Así, Alvarez, presidente de la Cámara alta, puso su propio cuerpo al escándalo que hace poco más de una semana colocó al Gobierno y al Congreso bajo un manto de sospechas. El vicepresidente aprovechó sus declaraciones públicas para defender la figura del ministro de Trabajo, Alberto Flamarique, señalado como el funcionario que habría pagado los presuntos sobornos a los senadores. La Nación, 22 de Agosto de 2000 <http://www.lanacion.com/>

BOLIVIA: DENUNCIAN PRESIDENTE DEL SENADO POR NEPOTISMO

En medio de la guerra sucia que se inició en el Parlamento entre miristas y adenistas, este sábado se denunció que el adenista presidente del Senado, Leopoldo Fernández Ferreira, habría cometido delito de nepotismo al haber brindado trabajo a 13 de sus "parientes cercanos". Sin embargo, confirmaron que sólo dos casos de los denunciados podrían ser indicados como nepotismo puesto que Liliana Zabala Beltran, "es pariente lejana de la esposa de Fernández Ferreira, pero que trabaja en el Senado desde 1993 con el ítem número 427 y un sueldo mensual de 4 mil bolivianos". El otro caso sería el de Evelin Ferreira de Azad que es prima hermana del titular del Senado. Sin embargo, se confirmó que trabaja en esa instancia legislativa desde 1997 con una remuneración mensual de 4.600 Bs. y con el ítem 109. No es desconocido que adenistas y miristas están enfrentados en la Cámara Baja por "pegas y mayores espacios de poder aprovechando la falta de decisión y negociación del ucesista Jaalil

Melgar Mustafá". El Deber, 20 de agosto de 2000 http://www.eldeber.com.bo/20000820/nacional_6.html

BOLIVIA: FUNCIONARIOS DE LA ADMINISTRACIÓN PÚBLICA GANAN MÁS QUE EL PRESIDENTE

El diputado de Nueva Fuerza Republicana (NFR) Roberto Fernández Moscoso denunció que en la administración pública existen niveles salariales superiores al del Presidente de la República, por lo que pedirá a la Cámara Baja se haga una corrección salarial. Según el parlamentario, el Decreto Supremo 25056 determina que en el régimen salarial del país, en concordancia con el artículo 21 de la Ley 1826, se dispone que el sueldo mayor en el territorio nacional corresponderá al Presidente de la República, esto actualmente no se está cumpliendo. Sostuvo que el sueldo del Presidente, actualmente, es de Bs 29.900, de los ministros de Estado 20.900; sin embargo, existen en otras instituciones como la Superintendencia y el Banco Central de Bolivia en las que se perciben encima de los 30 mil bolivianos, hasta en unidades técnicas dependientes del Ministerio de Defensa ganan sueldos de más de 5 mil dólares americanos, lo que representa más de 30 mil bolivianos. El diputado enfatizó que, efectivamente, los sueldos de estas entidades son mayores al del Presidente de la República, por lo que frente a esta situación se impone la necesidad de que el Congreso Nacional analice con detenimiento y corrija estas irregularidades salariales. El diputado Roberto Fernández sostuvo que es indispensable que se plantee una revisión de estas irregularidades y que se cumpla la norma legal que indica claramente que el sueldo mayor debe ser del Presidente. Todos debemos ajustarnos a esa situación, no podemos permitir que haya islas de privilegiados económicamente en el país", señaló el parlamentario. Esta observación se la ha coordinado con otros parlamentarios, por lo que de manera conjunta se pedirá una información, incluso los ministros Herbert Müller han homologado sus sueldos, desconociendo normas, así como el ex ministro Candia han fijado niveles salariales por encima de lo que percibe el Primer Mandatario. Por todas estas razones "se pedirá una sanción e incluso un juicio de responsabilidades, no se puede dañar al Estado, por debajo del sueldo del Presidente tienen que estar los demás sueldos de la administración", señaló el diputado. Por otra parte, mencionó que debe haber la austeridad y se debe copiar lo que hacen los peruanos para controlar la crisis económica. Por ejemplo, Alberto Fujimori frente a la grave crisis económica ha dispuesto que los ministros, diputados subalternos y senadores dejen de tener celulares, porque el gasto económico es muy elevado. Otra medida es que los vehículos oficiales limiten el uso de combustible. Algo contrario sucede en el país, los vehículos oficiales se utilizan para ir al mercado, para llevar a las esposas de funcionarios públicos, acotó. El Diario, 23 de Agosto de 2000 <http://www.eldiario.net/>

BOLIVIA: RESPONSABLES VARIOS FUNCIONARIOS Y EX FUNCIONARIOS DE IRREGULARIDADES EN EL USO DE RECURSOS DEL TESORO NACIONAL

Cinco ex ministros de Estado, varios ex viceministros y ejecutivos de Defensa Civil, un ex prefecto y varios ex funcionarios de la Prefectura de Cochabamba fueron identificados como responsables administrativos, civiles y penales de las diferentes irregularidades cometidas en el uso de los recursos del Tesoro General de la Nación y de la cooperación internacional para la atención de la emergencia del terremoto del 22 de mayo de 1998. La Comisión de Defensa y Fuerzas Armadas de la Cámara de Diputados entregó ayer sus conclusiones requiriendo el inicio de acciones civiles, administrativas y penales contra los involucrados. Las mayores responsabilidades penales recaen sobre los ex funcionarios de la Prefectura de Cochabamba. La Comisión halló también indicios de responsabilidad penal y civil contra ex ejecutivos de organismos que manejaron las donaciones; contra José Ernesto Ayoroa, ex director administrativo del Ministerio de Defensa Nacional, y Luis Montero Zankis, ex

director de Defensa Civil, responsabilidad civil por el sobreprecio en la compra de víveres y la contratación y pago de consultoría por 125.708 bolivianos; responsabilidad penal contra Luis Montero Zankis, Luis Daza Montero, ex director de Defensa Civil, Guillermo Asturizaga. Ernesto Acosta, Miguel Nogales, Armando Deheza (del Ministerio de Defensa), y Guido Galleguillos, ex director de Bienes e Infraestructura del Ministerio de Defensa por indicios de malversación. En el caso de irregularidades en compra del avión Beechcraft, la Comisión vio indicios de responsabilidad administrativa contra Juan Vera Antezana, ex viceministro de Desarrollo Integral, y Oscar Guillarte Luján, ex comandante de la Fuerza Aérea y actual viceministro de Defensa. También estableció responsabilidad administrativa contra Fernando Kieffer, ex ministro de Defensa Nacional; Guillermo Cuentas, ex viceministro de Salud y actual ministro del área; Edgar Millares, ex ministro de Hacienda; Carlos Iturralde Ballivián, ex ministro de la Presidencia, y Herbert Müller, ex ministro de Hacienda, por contravenir las normas. También tienen responsabilidad administrativa contra Ramón Prada, ex viceministro de Transportes; Armando Méndez y Ramiro Cavero, ambos ex viceministros de Presupuesto. Los Tiempos, 24 de Agosto de 2000 <http://www.lostiempos-bolivia.com/>

BRASIL: PRESIDENTE CARDOSO LANZA UN CÓDIGO DE CONDUCTA PARA FUNCIONARIOS PÚBLICOS

El presidente brasileño, Fernando Henrique Cardoso, lanzó ayer un código de conducta para funcionarios públicos, en un esfuerzo por disipar la mala imagen dejada por un escándalo de corrupción que amenazó su gobierno los últimos meses. Cardoso emitió el código junto a un paquete de medidas que incluye la divulgación del gasto público en la Internet, para poner en evidencia la consternación de su gobierno ante el desvío de 100 millones de dólares de la construcción de un edificio judicial. "Con estas medidas estamos dando un choque de transparencia en la administración pública", declaró Cardoso en una ceremonia en el palacio presidencial de Planalto. Según el código de conducta, los funcionarios públicos deberán enviar a la Comisión de Ética Pública un informe de su patrimonio y no podrán recibir ingresos de otras fuentes que no sean su salario del gobierno mientras ejercen el cargo. Asimismo, se verán impedidos de asumir cargos como asesores de individuos u entidades que mantienen relaciones con el gobierno en los cuatro meses posteriores a su salida del cargo público. Cardoso respondió así al escándalo por el desvío de fondos destinados al Tribunal Regional de Trabajo (TRT) de Sao Paulo, al que calificó como un "símbolo de una crisis que pone en cuestión las instituciones republicanas". El Nacional, Venezuela (Reuters), 22 de Agosto de 2000 <http://www.el-nacional.com/>

CHILE: DESTITUYEN A ALCALDE DE VIÑA DEL MAR

Rodrigo González, hasta ahora alcalde de Viña del Mar, quedó definitivamente destituido del cargo por decisión unánime del Tribunal Calificador de Elecciones (Tricel), máximo organismo electoral del país, y en contra de cuya resolución no cabe recurso alguno. González (PPD) fue destituido por "notable abandono de sus deberes" por tres casos específicos: la situación del ex Hotel Miramar; por una rebaja de derechos municipales que hizo a dos empresas, a pesar de que la ordenanza municipal había restado tal potestad al jefe comunal, y por haber logrado la aprobación para otorgar un bono de productividad en favor del personal de la Municipalidad de Viña del Mar. El alcalde de Viña del Mar quedará oficialmente destituido inmediatamente después de que sea notificado de la resolución del Tricel, lo que podría ocurrir hoy, y deberá dejar en ese instante la municipalidad, ya que la medida no sólo lo afecta en su calidad de alcalde, sino también como concejal. Rodrigo González, quien permaneció durante toda la tarde reunido con sus asesores y amigos más cercanos, señaló ayer que pese a acatar el fallo del Tricel, mantendrá su candidatura a la reelección, por sobre lo que opinen los

dirigentes nacionales de su partido, el el Partido por la Democracia (PPD). Poco después de conocida la destitución del alcalde de Viña del Mar, el PPD bajó su postulación como candidato a alcalde privilegiado por esa comuna en las próximas elecciones del 29 de octubre. Con esto, la Concertación deberá negociar cuál será ahora su candidato "privilegiado". El Mercurio, 24 de Agosto de 2000 <http://www.elmercurio.cl/>

CHINA: MUSEO DE LA CORRUPCIÓN SE CONVIERTE EN CENTRO TURÍSTICO DE PEKÍN

Cientos de personas abarrotan todos los días el "museo de la corrupción" de la capital china, donde se inauguró la exposición "La ciudad de Pekín golpea duro y advierte contra los delitos económicos", con la que se intenta calmar a la población, cada vez más irritada con la justicia. La muestra, con un despliegue inusitado de fotografías de personalidades corruptas de la vida política o del mundo empresarial chino, recoge también montones de billetes falsificados por delincuentes, cigarrillos introducidos en el país de contrabando y carnés de identidad de personas que se encuentran tras las rejas. La exposición, que abarca varias salas del Museo Militar de Pekín, desea ser la ventana de los esfuerzos del Gobierno por combatir ese mal fuertemente arraigado en China, donde la liberalización económica ha fomentado, especialmente entre la clase gobernante, el culto al dinero. Como si de una exposición de arte "pop" se tratara, las paredes del museo muestran desde carteles coloridos a vídeos con filmaciones de juicios y tarjetas de crédito falsas con las que grupos de delincuentes desvalijaban los bancos. La mayoría de los visitantes son personas mayores, explican los vigilantes, aunque también acuden jóvenes que desean echar un vistazo a los objetos del museo, que se está convirtiendo, desde que se inauguró hace unos días, en uno de los centros turísticos de Pekín. "Aunque las puertas del museo están vigiladas por militares, también hay gran número de oficiales y soldados que acuden como espectadores", indica el diario "South China Morning Post", editado en inglés en Hong Kong. La fuente agrega que, aunque los visitantes hacen vivos comentarios mientras recorren las salas, "de repente se impone el silencio cuando se entra en la estancia de veinte metros en la que se exponen los documentos que llevaron a la detención y expulsión del Partido Comunista Chino (PCCh) del vicepresidente de la Asamblea Nacional Popular (ANP, legislativo) Cheng Kejie". En la citada sala están colocadas las fotografías, como si de una película se tratara, de Cheng, condenado a muerte el pasado 31 de julio, y de su amante Li Ping, sentenciada a cadena perpetua una semana más tarde. Ambos fueron hallados culpables por una comisión parlamentaria de aceptar sobornos, regalos y joyas, incluidos diamantes, por valor de unos 41 millones de yuanes (4,9 millones de dólares). El "museo de la corrupción" de Pekín es sólo un botón de muestra de lo que está ocurriendo actualmente en China, donde el Gobierno quiere acercarse al pueblo para intentar aplacar el descontento de los ciudadanos, sobre todo de los trabajadores. Hoy, lunes, la Oficina Nacional de Auditorías (ONA) anunció un plan para investigar a gran parte de los miembros del Gobierno y del PCCh, que entrará en vigor cuando dejen el cargo y que afectará incluso a los jubilados. "Va a ser posible abrir investigaciones contra altos responsables de la Administración, como ministros y gobernadores", señaló el auditor general de la ONA, Li Jinhua, quien matizó que el proyecto todavía necesita algo de tiempo para madurar y se llevará a cabo de "forma gradual". Noticias Starmedia (EFE), 21 de Agosto de 2000 <http://www.starmedia.com/>

COLOMBIA: COMO UNO DE LOS MAYORES CASOS DE CORRUPCIÓN CALIFICO LA CONTRALORÍA LA SITUACIÓN DEL INSTITUTO PENITENCIARIO

Como uno de los mayores casos de corrupción y desgreño administrativo encontrado en dependencias del Estado calificó la Contraloría General de la Nación la situación actual que presenta el Instituto

Nacional Penitenciario y Carcelario (Inpec). Según la última auditoria, practicada al Inpec, el organismo de control encontró irregularidades administrativas y financieras que, debido a su magnitud, "fue difícil cuantificar". Además, el hacinamiento, la falta de servicios de salud, educación y de programas de resocialización demuestran que el objeto social para el que fue creado el Inpec tampoco se cumple. El común denominador, en la Dirección General y en las seis regionales que manejan los 168 centros de reclusión, fue la violación sistemática de las normas de contratación, entre ellas concentración en las adjudicación de contratos y sobrecostos en la ejecución de obras y servicios. La auditoria encontró que durante 1998 y 1999 el Inpec suscribió contratos por \$48.075 millones para generar 5.600 nuevos cupos y aliviar la situación de hacinamiento en las cárceles. De acuerdo con un estudio del mismo Instituto, la mitad de los centros de reclusión fueron construidos hace más de 40 años y sólo el 6% tiene menos de diez años. Para el director del Inpec, el general de la Policía (r) Fabio Campo Silva, el informe de auditoria de la Contraloría es una clara radiografía del estado en el que encontró el Instituto al asumir su cargo, hace siete meses, y aclaró que esa situación cobija a los directores que lo antecedieron. Pero, aseguró que tomó medidas inmediatas encaminadas a frenar las irregularidades detectadas por el organismo de control en el período 1998-1999. Entre ellas, un corte de cuentas y la designación de un gerente de proyectos, quien se encargará de la revisión, ordenamiento y corrección de las fallas detectadas. El Colombiano, 24 de Agosto de 2000 <http://www.elcolombiano.com.co/>

COLOMBIA: EX ALCALDES ACUSADOS DE SUSTRAR BIENES MUNICIPALES SE DEFIENDEN

Los ex alcaldes de Playas y Durán, Gabino de la A y Oswaldo Peñaherrera, respectivamente, fueron los primeros en reaccionar ante las acusaciones formuladas por sus sucesores, Gregorio Andrade y Mariana Mendieta, en su orden. Gabino de la A Escalante desmintió que se hayan sustraído bienes del Municipio y aseguró que hay un inventario de todo lo que dejó, efectuado por el agente fiscal (e) de La Libertad, Franklin Grau, el 9 de agosto. También denunció ante la Comandancia de la Segunda Zona Militar el operativo efectuado por un contingente de la Base San Antonio, que impidió el acceso de los funcionarios al Municipio. Por su parte, Oswaldo Peñaherrera, ex alcalde de Durán, dijo que desde julio y hasta la fecha hay un auditor de la Contraloría en el Municipio pedido por él, por lo que menos pudieron desaparecer bienes de la institución. "Lo que es del Municipio está ahí y no sé cuál es la intención de la alcaldesa." El Universo, 18 de Agosto de 2000 <http://www.eluniverso.com/>

COLOMBIA: PIDEN INVESTIGAR A 16 FUNCIONARIOS DE LA REGISTRADURÍA NACIONAL, 4 EX REGISTRADORES Y AL ACTUAL REGISTRADOR

Por petición de la Contraloría General, la Procuraduría inició investigación disciplinaria contra 16 funcionarios de la Registraduría Nacional, 4 ex registradores y al actual Registrador, por presunta mala conducta por la firma de un contrato por valor de 67.246 millones de pesos con la empresa francesa Sagem que finalmente incumplió. Según denunció el contralor General Carlos Ossa Escobar, la Registraduría pudo haber violado la contratación estatal al prorrogar en casi el doble del tiempo, estipulado en 22 meses, el contrato con Sagem para desarrollar el proyecto de modernización tecnológica, "que a la fecha no se ha concluido y que, por ende, ha retrasado el proceso electoral", dice el informe electoral. La investigación disciplinaria fue abierta contra los ex registradores Orlando Abello Martínez, Mariela Hernández de Domínguez, Jaime Calderón Brugés y Clara María González, así como al actual Registrador, Iván Duque Escobar. Las presuntas irregularidades disciplinarias también cobijan a los directivos de la Registraduría Gustavo Villamil Rozo, José Alberto Morillo, Álvaro Molina Vásquez, Esperanza Mejía Reyes, Antonio William Gaviria Arana,

Sonia Patricia Cáceres Martínez, María Cristina Duque González, Edith Mabel Ovalle Salazar, Gustavo Pedroza Gutiérrez, Álvaro Luis Monterrosa Arrieta, Harold Wilson Salazar Virguez, Miguel Arturo Linero de Cambil, Nagib Chalave González, Epaminondas Franco Ávila y Edgar Daniel Bohórquez Encizo. El Colombiano, 23 de Agosto de 2000} <http://www.elcolombiano.com.co/>

COLOMBIA: SECTOR DE JUSTICIA UNO DE LOS MAS AFECTADOS POR LA CORRUPCIÓN, SEGÚN ESTADÍSTICAS

Uno de los sectores afectados por la corrupción es el que tiene que ver con la justicia. Según estadísticas del Consejo Superior de la Judicatura desde 1992 hasta la fecha han sido sancionados 3.377 abogados y 587 funcionarios judiciales. Tanto los profesionales del Derecho como los auxiliares de la justicia inciden sobre el normal trámite de los procesos del ramo, causando irregularidades que benefician a sus clientes y a ellos mismos. "Colombia atraviesa por una situación crítica en términos de corrupción tanto a nivel político como administrativo, situación que se ve agravada por la percepción generalizada de unas instituciones poco confiables e ineficaces. Un sistema de justicia saludable tiene una gran incidencia sobre la eficiencia económica y el desarrollo de un país", señalaron fuentes de la Corporación Excelencia en la Justicia. Para el organismo es claro que las actuaciones corruptas atentan contra los tres principios que garantizan el buen desempeño de la justicia de una nación: independencia, autoridad para aplicar las decisiones y una organización eficiente. Así las cosas, la Corporación considera que es necesario desarrollar un sistema de incentivos dentro de la Rama Judicial que haga que tanto los funcionarios como los demás empleados administren justicia de manera responsable y eficiente. En segundo lugar, sugieren que se adopte un régimen disciplinario que sancione rigurosamente a los infractores y que facilite el desarrollo de los procesos dentro de la jurisdicción. Estas estrategias, según la Corporación, se deben acompañar de cambios en los niveles legales, administrativos y organizacionales del sector judicial. Una encuesta del Consejo Superior de la Judicatura realizada en 17.394 hogares de Barranquilla, Bucaramanga, Bogotá, Medellín, Cali y Pasto señala que el 43% de las personas entrevistadas piensan que la justicia no opera y, por lo tanto, no acuden a ella. Entre las razones que dieron están el costo de honorarios (45.1% de los encuestados), el desconocimiento de los derechos (45.1%), la demora de los procesos (39.1%) y la falta de credibilidad en el aparato judicial (30.2%). Fuera de lo anterior, el Consejo Superior de la Judicatura y la Procuraduría General de la Nación, organismos que ejercen control y vigilancia de tipo administrativo y disciplinario sobre la rama judicial, encuentran que ésta se encuentra colapsada. La Corporación Excelencia en la Justicia considera que eso se debe al alto índice de congestión en la jurisdicción disciplinaria, donde la carga laboral supera los 40 mil procesos. Entre 1994 y 1999, la saturación ha pasado de 13.500 a 26.657 procesos sin solución, al cierre del año. Y es que los entes de control no disponen de herramientas para sancionar rápida y drásticamente a los funcionarios correspondientes con el retiro de su cargo cuando existan indicios de prácticas antiéticas o corruptas. El Colombiano, 21 de Agosto de 2000 <http://www.elcolombiano.com.co/>

COSTA RICA: CONSULTA A AUTORIDADES. CORRUPCIÓN TIENE VARIOS PORTILLOS

La creación de instancias extraoficiales que suplantán a las instituciones públicas en la administración de recursos económicos y el manejo de esos dineros con fines político-electorales, son dos de los principales portillos a través de los cuales la corrupción penetra y causa estragos. Ese problema también se infiltra por medio del caos administrativo que impera en diversas entidades y de la falta de una lucha coordinada, en escala nacional, contra los actos ilícitos. De esa manera se resumen los

criterios expresados por cinco autoridades nacionales que, como parte de sus funciones, investigan o tratan casos relacionados con actos indebidos. Se trata del fiscal general, Carlos Arias; el contralor general de la República, Luis Fernando Vargas; el procurador, Román Solís; la magistrada de la Sala Constitucional y presidenta de la Comisión Nacional para el Mejoramiento de la Justicia (Conamej), Ana Virginia Calzada, y la defensora de los habitantes, Sandra Pizsk. Fueron consultados, entre el jueves y el viernes pasados, sobre las áreas más frágiles que tiene nuestro país en materia de corrupción. También se les preguntó sobre posibles soluciones. De acuerdo con Arias, uno de los terrenos fértiles para la germinación de actos corruptos son los programas de ayuda social dotados con recursos millonarios. Como ejemplo de esa situación, mencionó el caso de la crisis financiera del sector cooperativo de la vivienda, durante el gobierno anterior, a la cual calificó de "cuestión monstruosa, compleja". Carlos Arias también llamó la atención sobre un campo que, según él, cuando se investigue a fondo superará en dimensiones económicas a cualquiera de los escándalos que han ocurrido en Costa Rica en los últimos años: el contrabando de mercancías. De acuerdo al contralor Vargas, también señaló como surco de la corrupción el afán por atender a toda prisa viejas necesidades que afronta la población, con lo cual en diversas ocasiones se inventan procedimientos y se saltan regulaciones que algunos aprovechan para beneficio propio. En ese sentido, señaló como ejemplo las anomalías con fondos de Asignaciones Familiares. Para el Contralor, otro escenario propicio para la corrupción es la creación extraoficial de instancias para el manejo de fondos públicos -en sustitución de las oficiales- con el argumento de que estas son lentas y entran. En opinión de Vargas, todo se engloba dentro de una deficiencia básica: la pérdida de la capacidad de planificación en la administración pública. "Lo que se hace a como dé lugar genera desorden y el desorden es uno de los agentes de la corrupción". Por su parte Calzada informó de que Canamej trabaja en la elaboración de un proyecto para crear un grupo -con representantes del Estado y la sociedad civil- que coordine las políticas generales para prevenir actos de corrupción. La idea, dijo, no es que ese comité tenga facultades de investigación, sino que más bien se dedique a cuestiones como orientar a los ciudadanos sobre los caminos adecuados para plantear denuncias. "Uno de los problemas principales es que la gente carece de mucha información", declaró. "Queremos hacer conciencia sobre la necesidad de unificar y coordinar esfuerzos. Una lucha dividida es más débil", afirmó. La Nación, 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ECUADOR: COMISIÓN ANTICORRUPCIÓN TRATÓ 1676 CASOS DESDE 1997

Desde marzo de 1.997 hasta la fecha, la Comisión Anticorrupción (CCC) ha tramitado 1676 denuncias, de las cuales 460 están el trámite de investigación a través de los organismos como la Fiscalía, Contraloría General del Estado, la función Judicial, el Defensor del Pueblo y el Consejo Nacional de la Judicatura. El último proceso sobre el cual se pronunció la CCC fueron irregularidades al interior de la institución policial, donde se habría segmentado contratos con empresas proveedoras de bienes. Los temas de trabajo han abordado investigaciones de corrupción en todas las instituciones del sector público, y en muchas ocasiones, las observaciones de la Comisión han provocado resentimientos de las partes afectadas. La CCC tiene oficinas de trabajo en la mayoría de las provincias del país. En Portoviejo se crearon recientemente dos redes cívicas anticorrupción, y que integra a sectores sociales jóvenes de la capital manabita. Las redes que apoyan el trabajo se crearon a partir de la organización de un seminario taller que tuvo lugar el pasado 9 y 10 de agosto del presente año, donde intervinieron Alendra Cantos y Pedro Votruba, altos directivos de la CCC. Cabe añadir que también se creó la Comisión de coordinación interinstitucional que plantee alternativas para agilizar los procesos judiciales por casos de corrupción, iniciativa que nació a partir de un seminario taller entre la CCC, el Consejo Nacional de la Judicatura y la Corte Suprema de Justicia. La filosofía

de la CCC es investigar y establecer presunciones de responsabilidad civil o penal respecto de la marcha y administración de los bienes y recursos del Estado. La Hora, 21 de Agosto de 2000 <http://www3.lahora.com.ec/>

ECUADOR: EL TRIBUNAL CONSTITUCIONAL ECUATORIANO CEDIÓ A LAS PRESIONES POLÍTICAS. LA CORRUPCIÓN SIGUE A SUS ANCHAS EN EL PAÍS

Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Aunque 6 de los 9 vocales del Tribunal Constitucional se mostraron a favor de la permanencia de la directiva de mayoría en el Congreso Nacional del Ecuador, dicho Tribunal optó por la "salida política" y apoyó a la minoría legislativa, representada por el derechista Partido Social Cristiano, PSC. Así, Carlos Falquez Batallas, exvicepresidente del Congreso Nacional por el PSC, deberá reinstalar la Asamblea General y desconocer todo lo actuado por Susana González, como presidenta del Congreso electa por la mayoría de centroizquierda. Minutos más tarde de la decisión del Tribunal, Susana González declinó su nombramiento, aunque rechazó el muñequero político del Gobierno y su presión al resto de organismos constitucionales. Por su parte, los movimientos sociales, indígenas y campesinos, ya se están organizando para desarrollar protestas ante la decisión del organismo Constitucional y por la aplicación de la Ley Trole anunciada por el Presidente Gustavo Noboa. Los diputados del bloque de centroizquierda se oponen a la aplicación de la Ley Trole, pues consideran que permitirá que el Estado venda sus empresas más fuertes y que financian el Presupuesto Nacional del Estado. Los socialcristianos, en cambio, respaldan e impulsan la venta de dichas empresas pues son sus militantes los mayores interesados en comprarlas. Informativos Net, España, 23 de Agosto de 2000 <http://www.informativos.net/>

ECUADOR: ESCANDALO BANCARIO - OBRAS DE ARTE DADOS EN GARANTIA FUERON SOBREVALORADAS

Nuevos elementos se suman al proceso judicial que se desarrolla en la Corte Suprema de Justicia en contra de los ex directivos de Filanbanco, William y Roberto Isaías Dasum, mediante los cuales se confirmarían las supuestas irregularidades cometidas en la valoración tanto de las obras de arte entregadas al Banco Central, como de los bienes que recibió en dación de pago la Agencia de Garantía de Depósitos (AGD). Una diferencia de \$ 24 millones existiría entre el valor contabilizado por Filanbanco Trust y el último avalúo efectuado por el Banco Central respecto de las obras de arte entregadas por los ex directivos de Filanbanco como parte del fideicomiso de 400 millones de dólares ofrecido a cambio del préstamo que recibió dicha institución bancaria en noviembre de 1999. La última valoración efectuada por peritos del Banco Central confirmaría la existencia de "manejos fraudulentos y artificiosos por parte de los Isaías Dasum", quienes "habrían inflado los avalúos para hacer creer que lo que en realidad vale 5 millones de dólares, se lo podía hacer pasar por 30 millones". Según la nueva información proporcionada por el superintendente de Bancos, Juan Falconí Puig a la Corte Suprema de Justicia, como prueba de las irregularidades que se habrían cometido a través de la dación en pago de obras de arte por parte de Filanbanco Trust, se desvirtuaría también la valoración efectuada por la empresa Global Silverhawk, que arrojó como resultado la suma de \$10 458 508 dólares en obras de arte, es decir, \$5 263 102 dólares más en relación con la última valoración efectuada por los técnicos del Banco Central. La Superintendencia precisó también en esta ocasión, que sobre los bienes inmuebles que componen el activo de las compañías entregadas en dación en pago a la Agencia de Garantía de Depósitos (excepto los locales comerciales de Puntilla Mall) existen situaciones de carácter legal que "limitan su dominio", entre los cuales se registran

juicios de excepciones, juicios coactivos, juicios de expropiación, constitución de hipotecas y fundamentalmente condición resolutoria que podría otorgar a los antiguos propietarios la posibilidad de ejercer la acción de restitución, con lo cual se provocaría aún más perjuicio económico al Estado ecuatoriano. El estudio sobre los bienes estuvo a cargo Pedro Delgado, Intendente General de Supervisión y Entidades Financieras de la Superintendencia de Bancos, cuyo informe se adjuntó al proceso judicial que se desarrolla en contra de los hermanos Isaías Dasum y demás involucrados en el caso. "Intervención urgente" Los peritos del Banco Central reevaluaron 726 obras de arte en el Museo Nahim Isaías de Guayaquil, y 1477 del Museo Filanbanco, de Quito. Las ubicadas en Guayaquil, son en su mayor parte son pinturas que han obtenido una calificación que va de buena a excelente, siendo las más caras una pintura llamada Virgen con cautivos, \$ 42.000, y las esculturas de Santa Catalina de Siena y de La Dolorosa, con un valor de \$40.000 cada una. En cambio, el informe del Banco Central señala que las cientos de obras del Museo Filanbanco, de Quito, tienen una calificación mayoritaria de "no aceptable", "urgente intervención" y "necesita intervención". En el Museo Nahim Isaías se exponen 180 obras que fueron evaluadas, según el informe del Banco Central. Las demás están en reserva. La mayoría de las obras del Museo Filanbanco, en Quito, tienen una calificación de buena, regular y mala. Muchas de ellas ni siquiera tienen avalúo y una buena parte necesitan una reparación urgente. Las obras son parte del patrimonio cultural y corresponden a diversas escuelas artísticas de la Colonia, especialmente de la Escuela Quiteña. Todas se refieren a motivos religiosos y las más caras corresponden a artistas como Caspicara El superintendente de Bancos, Juan Falconí Puig, expresó su preocupación por la lentitud con la que se estarían tramitando los procesos judiciales relacionados con irregularidades dentro del sistema financiero, entre los cuales se encuentra el de Filanbanco. En el momento existen 31 juicios penales relacionados con irregularidades dentro del sistema financiero, en la mayoría de los cuales no se han cerrado los sumarios, por ejemplo los casos de los bancos de Préstamos, Ecuacambio, del Azuay, del Tungurahua, Progreso, Unión, Popular, Previsora, Bancomex, etc. De dichos procesos, únicamente los casos Filanbanco y Continental se ventilan en la Corte Suprema de Justicia, los demás se encuentran radicados en los juzgados de las provincias del Guayas (13), Pichincha (13), El Oro (1), y Macas (1). (MUP) La Superintendencia también pidió al juez Noveno de lo Penal de Pichincha que se solicite a la Corte Suprema de Justicia se requiera al Gobierno de Estados Unidos que inicie el proceso de extradición de los ex banqueros, hermanos Roberto y William Isaías y de Arturo Quiroz Martín, ex directivo del Banco del Pacífico. La denuncia sostiene que varios medios de comunicación han advertido la presencia de los nombrados en la ciudad de Miami. El abogado de la Superintendencia invocó ante el juez la convención de Estradición entre el Ecuador y Estados Unidos suscrita el 28 de junio de 1872 y el tratado complementario de extradición suscrito por los dos países el 22 de septiembre de 1939. Los abogados de la Superintendencia pidieron también la certificación de que el Instituto de Patrimonio Cultural autorizó la transferencia de dominio de los más de dos mil bienes culturales que se usaron como garantía de pago. ECUADOR: EXTRACTO DE CONFERENCIA DE PRENSA DE SECRETARIA DE ESTADO ALBRIGHT

Esta pregunta en la conferencia del 18 de agosto de 2000 se refiere a los profugos ecuatorianos investigados en casos de corrupción: ***** PREGUNTA: Buenas tardes. El presidente de nuestro país, doctor Gustavo Noboa, se había comprometido a solicitar oficialmente al gobierno de Estados Unidos la cancelación de visas de todos aquellos fugitivos de la justicia ecuatoriana, quienes se encuentran al presente en territorio de Estados Unidos. Nosotros no sabemos si usted y las

autoridades ecuatorianas tratarían sobre este asunto en la reunión de esta tarde, sin embargo, queremos conocer qué probabilidades existen de que el gobierno norteamericano acepte o acoja la petición hecha por el Ecuador de retirar las visas a los prófugos ecuatorianos, para que ellos vengán acá? Adicionalmente, qué posibilidades hay de que el gobierno norteamericano dé las facilidades necesarias para que podamos extraditar a aquellos prófugos de la justicia porque hasta el momento ha sido muy difícil, por no decir imposible, traerlos al país? ***** SECRETARIA ALBRIGHT: En primer lugar, quiero decirles que no discuto casos de visas, porque eso se hace a través de otro sistema dentro de nuestro gobierno. Realmente no discutimos de eso esta tarde, pero debo decirles que en los casos que se solicita la extradición, es importante que el gobierno lo haga bajo el tratado de extradición, y nosotros estaremos dispuestos a tratar sobre esos temas, pero no quiero hablar sobre casos de visa. ***** CANCELLER MOELLER: Este asunto ha sido manejado por el gobierno ecuatoriano fundamentalmente a través del ministerio de Justicia de Estados Unidos. A propósito, valga esta oportunidad para agradecer una vez más la excelente y permanente colaboración que hemos tenido de la ministra Janet Reno, quien se ha preocupado personalmente de esta situación. Debo anunciar a la prensa ecuatoriana que el día de hoy se dio paso al proceso de extradición de Peñaranda. Hasta el momento él estaba sometido a un proceso de deportación, que lamentablemente tiene que cumplir una serie de requisitos de acuerdo a las leyes americanas. La cancillería, por disposición del presidente Noboa, presentó una solicitud de extradición aplicando el antiguo tratado que para ciertos casos no es viable, pero para éste sí lo va a ser. Y aunque tengamos que esperar unas semanas más, Peñaranda vendrá a pagar sus culpas a Ecuador. En cuanto al tema de las visas, efectivamente ésta no es la instancia para tratar el tema. La solicitud ya fue hecha hace algunos meses y estamos esperando respuesta de Estados Unidos. Servicio Noticioso desde Washington, 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

ECUADOR: SE AMPLÍA CASO CONTRA EL EX PRESIDENTE MAHUAD. COMISIÓN ANTICORRUPCIÓN REMITIRÁ INVESTIGACIONES A LA JUSTICIA

Con el propósito de probar los delitos que se habrían configurado con el congelamiento de recursos en el sistema financiero nacional y el feriado bancario, la Comisión Anticorrupción deberá remitir a la Corte Suprema de Justicia las investigaciones efectuadas sobre el caso, en el que están sindicados el ex presidente Jamil Mahuad y su ex ministra de Finanzas, Ana Lucía Armijos. El pedido para que se entregue el informe documentado y debidamente certificado lo hizo el Ministerio Público con el propósito de que la Corte Suprema cuente con los antecedentes e investigaciones que sirvieron de base para solicitar que se dicte el auto cabeza de proceso en contra de los inculpados. Asimismo, la fiscal general, Mariana Yépez, pidió se recepte el testimonio de Jorge Egas Peña, quien a la época del cometimiento de la infracción desempeñaba las funciones de Superintendente de Bancos. El cuestionario de preguntas para que se efectúe esta diligencia la elaborará el Ministerio Público. El Universo, 21 de Agosto de 2000 <http://www.eluniverso.com/>

EE.UU: HASTA LOS VOTOS PUEDAN COMPRARSE POR INTERNET

Un nuevo sitio promete "unir el capitalismo y la democracia" subastando votos para las elecciones presidenciales de los EE.UU. de este año. "La industria electoral gasta cientos de millones de dólares con la intención de influir la elección presidencial", puede leerse desde agosto en voteauction.com. "Este sistema es un desperdicio inútil de dinero para los candidatos y sus seguidores. Voteauction.com se propone mejorar este sistema llevando directamente a los votantes el dinero de los contribuyentes a las campañas". El sitio le permite a los ciudadanos poner su voto en un lote de

remate, estado por estado. El mayor postor determina qué candidato a la Casa Blanca se llevará los votos en masa de los participantes de **voteauction.com**. "No soy cínico", dice su fundador James Baumgartner, un graduado en ciencias políticas. "Soy realista. La mayoría de la gente tiene una visión sincera acerca de como los candidatos se venden. Los votantes deberían ser incluidos en esta situación y obtener parte de los réditos". Al menos un analista político elogió el mensaje propuesto por este sitio. "Es una muy buena forma de hacerle ver a los votantes todo lo que otros (los grandes contribuyentes) ganan con el sistema y qué poco obtienen los votantes en comparación", dice Sheila Krumholz, directora de investigación del Center for Responsive Politics, una organización apartidaria que estudia la influencia del dinero en la política. "Hay que darle reconocimiento a este tipo, por atraer la atención de la gente sobre este tema de manera provocativa", dice. Pero no todo el mundo está de acuerdo. "Deberían clausurarlo", dice Deborah Phillips, presidenta del Voting Integrity Project, un grupo de interés público, sin fines de lucro, que a menudo trata cuestiones relacionadas con la Internet. "Es el cinismo llevado a su máxima expresión. Es destructivo para el proceso democrático. Si los fiscales de los 50 estados no van tras este tipo y cada uno de los votantes participantes, no están haciendo su trabajo". Las autoridades ya han tomado nota sobre casos similares. El Departamento de Justicia de los EE.UU. se puso en contacto esta semana con eBay luego de que un puñado de usuarios ofreciera sus votos a la venta en ese sitio de subastas por Internet. Ni bien eBay tomó conocimiento de estos ítems cuestionables, los quitó del sitio inmediatamente, dijo su vocero, Kevin Pursglove. "Lo cierto es que incluso si la gente se lo toma como una broma, nosotros nos lo tomamos muy seriamente", dice Pursglove. "Esto es un hecho que podría traer aparejados cargos delictivos". Según las autoridades, tanto quienes venden como quienes compran votos violan leyes estatales y federales, y podrían ser castigados con miles de dólares en multas o años en prisión. Baumgartner dice que él no vende ni compra votos, simplemente provee un foro donde otros pueden hacerlo, quedándose con un porcentaje de la transacción. También sostiene que se encuentra protegido por las recientes decisiones de la Suprema Corte que equiparan al dinero con la libertad de prensa, incluyendo una de los años 70 que sancionaba el uso del dinero en campañas políticas. Pero hasta sus simpatizantes tienen dudas. Krumholz anticipa que el sitio podría dar lugar a graves contiendas legales. "Me preocupa el autor del sitio", dice. Baumgartner, por su parte, se mantiene optimista. "Espero conseguir pronto anuncios e inversionistas", dice. Phillips dice que debería ir preparándose para recibir otra cosa. "Esto es un verdadero fraude electoral en la Internet. No me interesa como lo pinten. Espero que este tipo tenga unos buenos abogados que lo respalden". Noticias CNN, 19 de agosto de 2000 http://cnnenespanol.com/2000/eeuu_canada/08/19/eleccion/index.html

EL SALVADOR: FISCALÍA INVESTIGA FIRMAS FALSAS EN EXPEDIENTE DE FEDERACIÓN DE FÚTBOL, INVESTIGADA POR POSIBLE MALVERSACIÓN

La Fiscalía investigará la posible manipulación de documentos por parte de la Corte de Cuentas, así como la alteración de firmas en los recibos que la Federación de Fútbol (FEDEFUT) presentó para desvanecer un faltante de 35 millones de colones. Fuentes de la Fiscalía confirmaron a este medio que hay, al menos, dos documentos que contienen firmas alteradas. Se trata de recibos emitidos por fuertes sumas de dinero en dólares. La Federación, supuestamente, entregó estos comprobantes a dos miembros del equipo técnico que dirigió a la selección nacional durante las eliminatorias por el Mundial Francia 98. La Fiscalía sospecha que las firmas de los técnicos que aparecen en los recibos son falsas. Más alteraciones. Este periódico conoció, además, de otros casos donde se advierte la alteración de firmas. Dos jugadores de la liga profesional de Estados Unidos que son seleccionados nacionales habrían recibido, según los directivos de la FEDEFUT, un total de 2 mil dólares cada uno.

Después de escuchar varias declaraciones en torno a estos casos, la Fiscalía no aceptó los recibos como justificantes de egreso, debido a la sospecha de que las firmas también eran falsas. Sin embargo, el notario Pablo Noé Recinos da fe de que las firmas son originales. El fiscal general, Belisario Artiga, ha girado instrucciones nuevamente para que la investigación sobre el caso FEDEFUT llegue hasta las últimas consecuencias. Actualmente, el equipo de fiscales del Departamento de Procuración, asignado al caso, realiza el cotejo de documentos enviados por la misma Corte de Cuentas y otros obtenidos por la Fiscalía, para verificar la autenticidad de los documentos presentados por la FEDEFUT. La Fiscalía, según confirmaron fuentes del Ministerio Público, también seguirá otra línea de investigación: determinar alteraciones en los informes que los auditores enviaron a la Dirección de Responsabilidades de la Corte de Cuentas. Tal como informó este diario el pasado sábado, autoridades de la Corte obviaron señalamientos importantes emitidos por los auditores en un informe fechado en junio de este año. Los documentos alterados. La Prensa, 22 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: ANUNCIAN AUDITORÍA A CORTE DE CUENTAS

Un día después que este diario denunciara el estancamiento del proceso de auditoría a la Corte de Cuentas, el presidente de la Asamblea Legislativa se comprometió a resolver la situación. El diputado Ciro Zepeda anunció ayer que propondrá a la junta directiva de la Asamblea crear una comisión para ese propósito. Zepeda quiere que ya no se cuestione la credibilidad del Partido de Conciliación Nacional (PCN), partido que él dirige. Esa comisión deberá agilizar la contratación de una firma que audite a la Corte de Cuentas. Afirmó que buscarán asesoría internacional para iniciar el proceso. Zepeda dijo que la directiva de la Asamblea "debe dar plenos poderes... para que busque apoyo en las contralorías de otros países". Por tanto, el primer paso será contactar las instituciones contraloras de otros países. Zepeda está consciente que es difícil que el Gobierno les pueda facilitar un refuerzo presupuestario para sufragar los gastos que requiere la fiscalización de la Corte. El democristiano Aristides Alvarenga, secretario de la Asamblea, confirmó que la directiva realizó ayer un "ejercicio financiero" que permitió concluir que la Asamblea tiene insuficiencia de fondos. Recordó que se le recortó alrededor de 26 millones de colones en el presupuesto de este año. Por eso pedirán que en el presupuesto de 2001 se prevea ese gasto. "Según se ha investigado, puede andar entre 10 ó 20 millones de colones" el costo de la fiscalización. La Prensa, 18 de Agosto de 2000 <http://www.laprensa.com.sv/>

EL SALVADOR: FISCALÍA INVESTIGA POSIBLE MALVERSACIÓN DE FONDOS EN FEDERACIÓN DE FÚTBOL

La Fiscalía dijo que continuará investigando una "posible malversación de fondos" en la Federación Salvadoreña de Fútbol (FSF) pese a que la Contraloría multó y obligó a directivos a reintegrar unos 345.000 dólares. "Estamos investigando a fondo (el caso) y con mucha seriedad", declaró a periodistas el fiscal general, Belisario Artiga; "creo que se puede demostrar lo que sucede y si hay culpables, los vamos a hallar". La Contraloría informó el viernes que encontró un faltante de más de 3 millones de colones (unos 345.000 dólares) durante el período 1996-1998 de la administración de la FSF. Una primera auditoría había revelado un faltante de 35 millones de colones (unos 4 millones de dólares), según la prensa local. La Contraloría impuso una multa de unos 4.500 dólares para cinco ex directivos por "responsabilidad administrativa" y obligó además a otros cuatro miembros, entre ellos el actual presidente Juan Torres, a reintegrar unos 345.000 dólares por "responsabilidad patrimonial". Pero Torres y otros dos miembros de la junta directiva no serán sancionados debido a que no reciben salarios en la FSF, dijo la Contraloría, basados en artículos del Reglamento para la

Determinación de Responsabilidades. Sin embargo, Artiga señaló que la Fiscalía continuará con las investigaciones debido a ``una posible malversación de fondos y administración fraudulenta`` en la Federación Salvadoreña de Fútbol. Torres dijo a un periódico local que, ``no tenemos absolutamente nada que devolver, lo que haremos es someternos al juicio de cuenta... quiero que esto se vea como un proceso, porque no ha terminado``, señaló. La Nación. Costa Rica (AP), 21 de Agosto de 2000 <http://www.nacion.co.cr/>

ESPAÑA: PIDEN DIEZ AÑOS DE INHABILITACIÓN PARA EL ALCALDE DE SALOBREÑA POR UN PRESUNTO DELITO DE PREVARICACIÓN

La Fiscalía de Granada solicitará diez años de inhabilitación para el alcalde de Salobreña, Manuel Pérez Cobo (del Partido Socialista Obrero Español -PSOE-), por un presunto delito de prevaricación cometido en su anterior etapa como regidor por cobrar a una constructora un impuesto de cuatro millones de pesetas sin estar autorizado. Tras varias suspensiones por diferentes cuestiones procesales, Pérez Cobo será juzgado por este caso ocurrido hace diez años en la Audiencia de Granada el próximo 22 de septiembre. El escrito de acusado relata que mayo de 1990 el alcalde de Salobreña concedió a la constructora Comofesa licencia de primera ocupación para la urbanización "Cala Verde", construida dentro de un proyecto más amplio "Vial Central Playa Salobreña", cuyas contribuciones especiales habían sido suspendidas un año antes por la Sala de lo Contencioso Administrativo de la antigua Audiencia Territorial de Granada (hoy TSJA). Aunque inicialmente denegó la licencia de primera ocupación solicitada por la constructora, el acusado "con conocimiento" de la suspensión de la Sala de lo Contencioso Administrativo "supeditó la concesión de la mencionada licencia al pago de 4.028.427 pesetas", una cantidad que fue ingresado por el municipio "no estando autorizado legalmente" para ello. En su escrito de conclusiones provisionales, la Fiscalía solicita seis años de inhabilitación por un delito de prevaricación y cuatro años de suspensión y multa de 500.000 pesetas por un delito del artículo 202 del antiguo Código Penal que castiga a los funcionarios que exijan el pago de impuestos no autorizados por las leyes o por las corporaciones respectivas. Andalucía 24 Horas, 22 de Agosto de 2000 <http://www.andalucia24horas.com/>

GUATEMALA: LIMITAN TRABAJO A AUDITORES SOCIALES EN EL CONGRESO

Por orden de la Junta Directiva del Congreso, el trabajo de auditoría social que efectúa en ese organismo la entidad cívica Acción Ciudadana (AC), se ha visto limitado. Desde la legislatura anterior, AC se dedica a monitorear el trabajo de los diputados. Entre otras cosas, esa organización civil lleva registro de las leyes aprobadas, así como de los diputados más productivos, los faltistas y los viajeros. Para hacer una evaluación del primer semestre del Congreso, Manfredo Marroquín, director de AC, solicitó el 10 de agosto diversos informes a la Junta Directiva, presidida por Efraín Ríos Montt. Un día más tarde, Carlos Wholers Monroy, secretario del Legislativo, respondió a Marroquín por medio de una misiva. "Para poder brindarle la información (...) es necesario que presente por escrito (...) las actividades a que se dedica la institución que usted dirige, copia de los estatutos bajo las cuales rige sus actividades, así como el instrumento legal por medio del cual se le autoriza para poder operar como institución dentro del país", se anota en la carta que firmó Wholers. "Nos extraña que ahora los eferregistas (del Frete Republicano Guatemalteco), no sepan quiénes somos. Incluso nuestra publicación Agenda Legislativa les sirvió para su trabajo cuando fueron opositores", se quejó Marroquín. A la vez, dijo que si los ahora oficialistas quieren fiscalizar a las organizaciones del Estado, deben dar el ejemplo; de lo contrario, "no tendrán autoridad moral, por impedir nuestro trabajo". También dijo que la actitud de la Directiva parlamentaria es violatoria del

texto constitucional. "Toda información de las instituciones públicas es libre", enfatizó Marroquín. A su juicio, el Frente Republicano Guatemalteco está a tiempo de corregir la arbitrariedad en que incurre. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

GUATEMALA: CONTRALORÍA PIDE RATIFICAR CONVENIO CONTRA CORRUPCIÓN

Al inaugurar el II Foro Internacional sobre Ética y Lucha contra la Corrupción, el jefe de la Contraloría General de Cuentas de la Nación (CGCN), Marco Tulio Abadío, pidió públicamente al presidente Alfonso Portillo que promueva la ratificación de la Convención Americana contra ese flagelo, suscrita por iniciativa de la Organización de Estados Americanos. Según el funcionario, en los momentos actuales la adhesión se hace casi obligatoria por los compromisos sociales que conlleva, y también porque para combatir esa mala práctica y erradicar la impunidad es necesaria la cooperación entre las naciones. Tenemos que sacar a nuestro país de esa lista; este Gobierno tiene que manifestarse para ratificar esa lucha contra la corrupción, porque es vergonzoso que figure en ella, afirmó. Siglo Veintiuno pidió la vocera del mandatario, Fernanda Castejón, una respuesta oficial ante tal planteamiento. La funcionaria dijo que prefería consultar directamente a Portillo y devolver la llamada, lo cual no ocurrió. Al acto estaba invitado Portillo, pero otras actividades le impidieron asistir, según personal de la Secretaría de Comunicación Social. Ello molestó a Abadío, pero se cuidó de exteriorizarlo. En cambio, el alcalde capitalino, Fritz García-Gallont, a cuyo cargo estuvo la inauguración, aprovechó para hacer notoria la ausencia. Es innegable que muchas personas no están aquí presentes...Es posible que se tengan excusas tales como demasiada carga de trabajo, por compromisos adquiridos con anterioridad o simplemente por rehuir de una realidad que cada día los encierra más, pero que algún día tendrá que pedirles cuentas. Siglo XXI, 18 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: DENUNCIAN CORRUPCIÓN EN AUTORIDAD PARA EL MANEJO SUSTENTABLE DE LA CUENCA Y EL LAGO DE AMATITLÁN

Tráfico de influencias, nuevas licitaciones concesionadas a Servicios de Jardinería de la Cruz, sobrevaloración de obras e incumplimiento de contratos, son otras irregularidades halladas por auditores de la Presidencia en la Autoridad para el Manejo Sustentable de la Cuenca y el Lago de Amatitlán (Amsa), durante la gestión de Evelyn Reyna Chacón. La nueva documentación a la que tuvo acceso Siglo Veintiuno y que incluye un informe firmado por Adolfo Efraín Reyes López, asesor del Ejecutivo, fechado 28 de abril del 2000 y dirigido a Arturo Ruiz Wong, jefe de la Unidad Financiera de la Gerencia de la Presidencia, concluye: Los procesos de contratación de bienes y servicios en Amsa para 1999 fueron realizados de forma ilegal en todos sus aspectos, con el fin de obtener beneficios propios para las autoridades de dicha institución y de un grupo de empresarios. Como argumento, el estudio señala: En todos los procesos de cotización se invitaron a las mismas compañías, lo que denota un mercado preferitismo e imparcialidad en las adjudicaciones. Siglo Veintiuno buscó ayer la opinión de Reyna Chacón; empero, Isabel Casas, quien actúa como intermediaria entre la aludida y los medios de comunicación, sostuvo que, de ahora en adelante, la ex funcionaria hablará sólo en presencia de su abogado. Una auditoría realizada por la Presidencia en Amsa reveló que, durante la gestión de la referida, la entidad gubernamental concesionó obras a socios de la ex funcionaria, así como que la infraestructura de la dependencia estatal fue utilizada para promocionar a Construnatura, ente no lucrativo presidido por Reyna Chacón. Además, se descubrió que la firma Servicios de Jardinería de la Cruz, ganadora de varios concursos, es propiedad del hijo de una conserje de Amsa y que, según el informe de Reyes López, tendría alguna relación con Reyna Chacón. El estudio citado también advierte que el gerente de Opcion 3 S.A., que licitó

trabajos para Amsa por 987,735.00 quetzales, es Sergio R. Chávez, ex esposo de Reyna Chacón, versión que no se pudo confirmar con el aludido, pues no se encontraba en los momentos en que se le llamó a su trabajo. El reporte añade que algunas empresas contratadas por Amsa incumplieron los plazos establecidos en los contratos, sin que se les aplicaran las multas correspondientes. Luis Mijangos, secretario general de la Presidencia, no descartó que Reyna Chacón haya incurrido en colusión, tráfico de influencias y violaciones a la Ley de Contrataciones del Estado. De esa cuenta, añadió, se revisan todos los contratos para hablar con las empresas ganadoras y verificar que los montos pagados coincidan con las obras ejecutadas. Siglo XXI, 22 de Agosto de 2000 <http://www.sigloxxicom/>

GUATEMALA: ECUATORIANO NAPOLEÓN SALTOS GALARZA, ALTERACIÓN DE LEY ``ES UN ACTO CLARO DE CORRUPCIÓN``

Manipular una ley cuando están en juego intereses de carácter económico es un acto de corrupción", afirmó ayer Napoleón Saltos Galarza, representante de la lucha anticorrupción de Ecuador. El experto, quien tuvo participación activa en el derrocamiento de los ex presidentes ecuatorianos Jamil Mahuad y Abdalá Bucaram, analizó el controvertido caso de la alteración del Decreto 43-2000, Ley del Impuesto a la Distribución de Bebidas Alcohólicas y Gaseosas, caso conocido como "Guategate", en el cual hay indicios de culpabilidad de varios legisladores del oficialista partido en el congreso FRG (Frente Republicano Guatemalteco). El experto ecuatoriano analizó la situación durante su disertación en un foro anticorrupción realizado ayer en el Gran Teatro Nacional Miguel Angel Asturias. Guatemala, refirió, "desgraciadamente", no escapa a la tendencia peligrosa e ilegítima de vinculación entre intereses económicos de sectores beneficiarios con los políticos. "Cuando esto sucede, pueden darse fenómenos como el que hoy día observamos de alteración de resoluciones para imponer intereses particulares", dijo. El ecuatoriano consideró que el caso de la alteración legislativa debe ser discutido seriamente por los guatemaltecos; "nosotros, como observadores internacionales, simplemente pudimos constatar que hay indicios de responsabilidades que tendrían que ser solventadas internamente", añadió. Para Saltos ahora toca el turno a las autoridades judiciales, quienes deberán determinar las responsabilidades en este hecho. "Más allá del aspecto jurídico, hay una responsabilidad política que afecta la credibilidad del Congreso, y de la propia ley", expresó. A la vez, recomendó al ente investigador actuar con transparencia y evitar la interferencia de otros poderes del Estado. La Prens Libre, 18 de Agosto de 2000 <http://www.prens Libre.com.gt/>

GUATEMALA: EN ESCÁNDALO DE ALTERACIÓN DE UNA LEY. CAIGA QUIEN CAIGA ACATAREMOS RESOLUCIÓN -PRESIDENTE PORTILLO-

Su promesa de respetar el resultado de las investigaciones y su decisión de aceptar el fallo de los órganos correspondientes, caiga quién caiga, ofreció ayer el presidente Alfonso Portillo, al responder algunas de las inquietudes sobre las supuestas ilegalidades de la ley de bebidas alcohólicas. Adicionalmente, el vicepresidente Juan Francisco Reyes López estimó que toca a los acusadores probar las presuntas anomalías, pues, recordó, nadie es culpable hasta que se pruebe lo contrario. El Ministerio Público tiene la investigación y a nosotros no nos queda más que acatar la resolución, destacó Portillo, mientras reiteró que el Ejecutivo publicó el decreto tal y como llegó del Congreso. Agregó que el partido al que pertenece (Frente Republicano Guatemalteco es respetuoso de la ley, por lo que caiga quien caiga acatará lo resuelto, en alusión a un eventual fallo de culpabilidad contra el general Efraín Ríos Montt actual presidente del congreso. Siglo XXI, 23 de Agosto de 2000 <http://www.sigloxxi.com/>

GUATEMALA: ORGANISMO JUDICIAL CREA JUNTA DISCIPLINARIA PARA EVITAR ACTOS DE IMPUNIDAD, NEGLIGENCIA Y CORRUPCIÓN

Con el propósito de evitar actos de impunidad, negligencia y corrupción de los operadores de justicia del Organismo Judicial, OJ, fueron juramentados ayer los integrantes de la primera Junta Disciplinaria de ese poder. La actividad se llevó a cabo en horas de la mañana, allí donde estuvieron presentes el presidente de ese organismo, José Quesada Fernández, y los demás magistrados. El funcionario explicó que dicha ley establece tres procedimientos importantes, como los requisitos para ingresar a la Carrera Judicial y el procedimiento de evaluación. Agregó que un tercer punto es el proceso disciplinario, que enmarca cuáles podrían ser las sanciones para los jueces a quienes se compruebe su responsabilidad en una falta, que oscila desde una sanción verbal hasta ser separado del cargo. "En la Carrera Judicial está contemplado necesariamente el aspecto disciplinario, por ello creemos que esta comisión garantizará una disciplina sumamente rígida", enfatizó. "Si fuera necesario, en el análisis de las denuncias contra los jueces participará la Supervisión de Tribunales", expuso Quesada Fernández. Asimismo, indicó que hasta el momento no hay un lugar específico para instalar a los seis miembros de la Junta Disciplinaria, quienes hoy iniciarán formalmente sus funciones, por lo que en principio trabajarán en el edificio de la CSJ. Los profesionales nombrados como magistrados titulares son Telma Esperanza Aldana Hernández, Carlos Rubén García Peláez. De suplentes, Zully Eugenia Cantoral Arango, Héctor Mauricio Rodríguez Argueta. Además, la jueza titular, Rosalba Corsantes Zúñiga de Muñoz, y el juez suplente Jorge Mynor Acevedo. Dichos funcionarios se desligarán de sus anteriores cargos, y ejercerán funciones durante un año. Prensa Libre, 22 de Agosto de 2000 <http://www.prensalibre.com.gt/>

HONDURAS: INVESTIGAN EX JEFES MILITARES DE HONDURAS POR MALVERSACIÓN

Cuatro antiguos jefes de las fuerzas armadas de Honduras son investigados por malversación de fondos públicos, informó una funcionaria de un organismo contralor. La investigación fue revelada por la contralora Vera Rubí coincidiendo con un escándalo que involucra al último ex jefe de las fuerzas armadas, general retirado Mario Hung, por el presunto extravío de unos ocho millones de lempiras (537.673 dólares) del Instituto de Previsión Militar (IPM). La Contraloría investiga a los últimos cuatro jefes de las fuerzas armadas que ocuparon el cargo de 1986 a 1998, entre 12 casos de presunta corrupción de funcionarios públicos. Rubí dijo que en las investigaciones de los mandos castrenses se descubrieron "irregularidades que tienen que documentarse", pero "es un poco complicado si no tenemos informaciones fidedignas de los bancos, porque no hemos podido confirmar algunos cheques". La funcionaria formuló la existencia de "irregularidades" en la administración de los fondos militares en estos cuatro mandatos en una conferencia de prensa en la que anunció su dimisión al cargo a partir del martes para lanzarse por la nominación presidencial del gobernante Partido Liberal. Los otros antiguos jefes de las fuerzas armadas que son investigados por la Contraloría son los generales retirados Arnulfo Cantarero, Humberto Regalado y Luis Discua. El cargo de jefe de las fuerzas armadas, que en las décadas de 1960, 1970 y 1980 fue de mayor poder e influencia que los mismos mandatarios civiles, fue suprimido en 1998 y sustituido por el de un ministro de Defensa. Hung se encuentra involucrado en un escándalo de presunta malversación de caudales del IPM, un organismo que nuclea una serie de empresas bajo control militar y cuyo fondos se destinan a pagar las jubilaciones de los militares retirados. La actual administración del IPM asegura que cuando la junta directiva del cartel la presidía Hung se pagaron unos 5,2 millones de lempiras (336.021 dólares) en efectivo por pago de impuestos a la alcaldía de Tegucigalpa. Los funcionarios del IPM dicen que los fondos salieron del organismo, pero los de la alcaldía aseguran que

no los recibieron. Hung aseguró el martes que autorizó el desembolso de los fondos para pagar los impuestos. La Nación, 18 de Agosto de 2000 <http://www.nacion.co.cr/>

HONDURAS: LA FISCALÍA GENERAL ACUSA AL INSTITUTO DE PREVISIÓN MILITAR DE CORRUPCIÓN ECONÓMICA

La Fiscalía General de Honduras ha determinado que el Instituto de Previsión Militar (IPM), ha realizado acciones de corrupción económica. Al momento existe un faltante de más de medio millón de dólares. Los principales comprometidos en este dolo son justamente los directores del IPM, los cuales administraban personalmente dichos recursos. El general Mario Hung Pacheco, el ex todopoderoso comandante el jefe de las Fuerzas Armadas, hasta 1999, ha dicho que él no tiene nada que ver en este asunto. Los demás exdirectores del Instituto de Previsión tampoco asumen sus responsabilidades, y más aún, exigen a la alcaldía de Tegucigalpa la devolución de dichos recursos y con un interés del 25% anual. Esto ha sido rechazado por las autoridades civiles de la capital hondureña. Las Fuerzas Armadas y en especial el Instituto de Previsión Militar es considerada como uno de los emporios comerciales más grandes de Honduras, el octavo del país. Su capital se estima en unos 300 millones de dólares, dinero que siempre fue manejado por los comandantes militares como dinero propio y de él sacaban pingües ganancias. Informativos Net, España (Hn/LY/Mt/Ppc/mc), 24 de Agosto de 2000 <http://www.informativos.net/>

HONDURAS: MINISTRO DE SEGURIDAD COMBATIRÁ LA CORRUPCIÓN POLICIAL

El ministro de Seguridad de Honduras, Gautama Fonseca, dijo el miércoles que combatirá la corrupción en la policía y que enjuiciará a cualquier efectivo cuya culpabilidad sea demostrada. Fonseca, un respetado abogado de 68 años, dijo que si a los policías se les encuentra en violación de la ley, ``van a padecer las consecuencias, no se tratará solamente de despidos, sino de seguirle el juicio que corresponda por corrupción``. Fonseca, nombrado el martes nuevo ministro de Seguridad por el presidente Carlos Flores, asume el cargo en medio de una ola de violencia delictiva en Honduras, con asaltos frecuentes a bancos, secuestros, robos de vehículos, asaltos callejeros, atentados y otros crímenes. El clima de inseguridad se acentuó tras descubrirse que dos oficiales de la policía estaban ligados a bandas de narcotraficantes y se suspendió a otros dos. Mientras, el subdirector de la policía, Andrés Urtecho, pidió dos meses de excedencia mientras es sujeto de investigación. Pero Fonseca dijo que la culpa deben asumirla, también, quienes sobornan a los efectivos policiales para evadir castigo por alguna transgresión. Tanto organismos estatales como privados de defensa de los derechos humanos han reclamado al gobierno la depuración de la policía, que estuvo bajo mando de los militares desde 1963 hasta 1998, cuando un civil asumió el cargo de ministro de Seguridad. INDONESIA: EX PRESIDENTE SUHARTO SERÁ JUZGADO EL 31 DE AGOSTO POR CORRUPCIÓN

El ex presidente de Indonesia caído en desgracia, Suharto, será juzgado por corrupción el 31 de agosto y tendrá que sentarse en el banquillo a pesar de los informes sobre su delicado estado de salud, dijo miembro del tribunal el miércoles. La acusación dice que, al menos, 130 personas serán llamadas para testificar en el que será el juicio del siglo en Indonesia. "Suharto debe someterse a juicio. He dicho que ordenaré a los abogados que le hagan acudir al juicio", dijo el juez jefe, Lalu Mariyun, de la Corte del Sur de Yakarta, en una rueda de prensa. El fiscal general del Estado ha acusado formalmente a Suharto de apoderarse de más de 550 millones de dólares (unos 100.000 millones de

pesetas) procedentes de fundaciones de caridad durante su paso por el poder. Los abogados de Suharto han declarado que su cliente estaba demasiado enfermo para someterse a un juicio, alegando que tiene problemas para contestar a cuestiones básicas. El ex general sufrió un ataque el pasado año y tuvo que ser hospitalizado por otro suceso. La presencia del viejo déspota en un banquillo será una imagen extraordinaria para los ciudadanos, muchos de los cuales no habían conocido a otros líder hasta que fue obligado a dejar el poder en 1998 ante las graves crisis económica y de violencia que estalló en el país. Esto profundizará en la humillación para el hombre que dirigió los destinos de Indonesia durante 32 años hacia un crecimiento económico y una estabilidad política sin precedentes que llevó a cabo con mano de hierro y con constantes violaciones de los derechos humanos. La acusación ha dicho que Suharto se enfrenta a más de 20 años de cárcel y a una multa de 30 millones de dólares. Otros funcionarios habían comentado previamente que Suharto podría ser encarcelado de por vida. Sin embargo, el presidente de Indonesia Abdurrahman Wahid ha dicho que perdonaría a Suharto si es condenado. Suharto y su familia han sido acusados de amasar una fortuna a través de prácticas de corrupción valorada en más de 45.000 millones de pesetas durante su mandato. Todos ellos han negado haber actuado de forma errónea. El cuarto país más poblado del mundo sigue luchando por recuperarse de la crisis que marcó el fin de la era de hierro de Suharto. Se ha producido una fuerte presión pública para sentar a Suharto en el banquillo y analistas políticos han declarado que el gobierno ha tenido que aceptar esta petición ante el temor de enfrentarse a nuevas protestas callejeras. En todo caso, algunos dicen que un posterior indulto probablemente sería aceptado por la mayoría aunque podría provocar protestas estudiantiles. Noticias Yahoo España, (Reuters), 23 de Agosto de 2000 <http://es.news.yahoo.com/>

ISRAEL: LÍDER DEL PARTIDO ULTRAORTODOXO DEBERÁ IR A LA CÁRCEL POR CORRUPCIÓN

Los líderes del partido ultraortodoxo sefardí Shas acogieron ayer con gran violencia verbal la decisión del presidente del Tribunal Supremo de Israel, Aharon Barak, de rechazar la apelación que había presentado el ex-ministro Arie Deri, condenado a tres años de prisión por corrupción. La decisión significa que Deri no tiene derecho a un nuevo juicio y deberá ingresar en la cárcel el próximo 3 de septiembre. En gran medida, la decisión de Aharon Barak (sin relación con el primer ministro Ehud Barak) provocó un guerra de declaraciones entre judíos ashkenazis, es decir, de origen europeo, y judíos sefardíes, o sea, judíos de origen oriental y de la península ibérica. El Comercio, España, 24 de Agosto de 2000 <http://www.elcomerciodigital.com/>

MÉXICO: CONSIGNADAS 877 DENUNCIAS POR DESVÍOS DE RECURSOS FEDERALES EN PROCESOS ELECTORALES

La Comisión Especial 2000 encargada de vigilar que no se desvíen recursos federales a los procesos electorales, entregó su informe final donde consignó que recibió 877 denuncias formales, de las cuales 407 ya son investigadas por las autoridades y dependencias mientras las 385 restantes fueron desechadas por improcedentes. Los programas sociales más denunciados fueron: Progresá, Procampo, Alianza para el Campo, Diconsa, Liconsa, Empleo Temporal, Crédito a la Palabra, Fonden y Conaza. Las dependencias y organismos más señalados por un presunto desvío de recursos públicos hacia las campañas son las secretarías de Desarrollo Social, Agricultura, Medio Ambiente, Defensa Nacional, Relaciones Exteriores así como Petroleos de México (PEMEX), Instituto Mexicano de Seguridad Social (IMSS), El Servicio Postal Mexicano (Sepomex), Comisión para la Regularización de la Tenencia de la Tierra (Corett), Comisión Nacional del Agua (Conagua), Comisión Federal de Electricidad (CFE), Instituto del Fondo Nacional de la Vivienda para los

Trabajadores (Infonavit) y Desarrollo Integral de la Familia (DIF). Con motivo de las inundaciones en Tabasco la Cámara de Diputados recibió denuncias por un presunto desvío de la ayuda a los damnificados con fines proselitistas, que están pendientes todavía de analizarse y determinar si hay elementos para fincar responsabilidades. En un reporte firmado por todas las fracciones -menos el PRI- los diputados concluyen que la negativa de las autoridades gubernamentales de los 3 niveles a vigilar y prevenir el desvío de recursos públicos con fines electorales "ha sido resultado de la costumbre de utilizar los programas sociales para beneficio del Partido Revolucionario Institucional, siendo en repetidas ocasiones éstos los mejores medios para hacer proselitismo a favor de sus candidatos tricolores". El texto que aparece en la Gaceta Parlamentaria los diputados salientes de la LVII legislatura recomiendan a sus sucesores "prevenir y sancionar" el uso ilegal de recursos del erario hacia las campañas electorales. El Excelsior, 22 de Agosto de 2000 <http://www.excelsior.com.mx/>

MÉXICO: CONTRALORÍA GENERAL INVESTIGA LICITACIONES EN LA SECRETARÍA DE SEGURIDAD PÚBLICA

La Contraloría General del Distrito Federal investiga a funcionarios de la Secretaría de Seguridad Pública, del área de adquisiciones, a raíz de las distintas quejas, inconformidades y denuncias que proveedores han interpuesto en su contra. La Contraloría del gobierno capitalino informó, que a pesar de que no se han podido corroborar presuntos actos de extorsión y corrupción por parte de los servidores públicos, ha llamado la atención que en los últimos 12 meses, por lo menos cinco empresas han presentado varios recursos de inconformidad respecto de las asignaciones de las licitaciones en ha emitido esa dependencia. El común denominador que prevalece en cada una de las quejas por parte de los proveedores, es en el sentido de que los encargados de otorgar las licitaciones benefician, de manera dudosa, a determinadas empresas. Esto ha originado que por lo menos este año la SSP no podrá adquirir 8 mil 771 chalecos antibala, 4 helicópteros y motopatruillas, debido a que los recursos destinados a estas licitaciones están "congelados" porque forman parte de juicios mercantiles y penales. A raíz de estas inconformidades, la Contraloría capitalina reconoció que se encuentran sujetos a investigación, Joel Santana Benhumea, director de Recursos Materiales; Federico Cecchetti Peregrini, subdirector de Adquisiciones; capitán piloto aviador, Carlos Antonio Medina Carrasales, director de Servicios Aéreos y Genaro Pérez Rocha, director general de Servicios de Apoyo, de la SSP. El Universal, 23 de Agosto de 2000 <http://www.el-universal.com.mx/>

MÉXICO: NO APLICARÁN CASTIGO A EX FUNCIONARIOS CORRUPTOS

Los diputados locales recibirán hoy un informe para conocer las causas que provocaron que prescribieran 300 expedientes de ex servidores públicos que laboraron durante la administración de Óscar Espinosa Villarreal. Más de 80 ex servidores públicos que trabajaron durante 1995 y 1996 en la gestión del ex regente no serán castigados ni encarcelados por cometer irregularidades administrativas o actos de corrupción, porque sus casos no fueron bien integrados para que la autoridad judicial actuara en su contra y a tiempo. Desde principios de este mes, los diputados que integran la Comisión de Vigilancia de la Contaduría Mayor pidieron una investigación al respecto a la Contraloría Interna de la Contaduría Mayor de Hacienda de la Asamblea Legislativa (CMHALDF), con el fin de que investigara las causas que provocaron esta situación. Trascendió que existe la sospecha de que el Departamento Jurídico de la misma Contaduría tuvo algo que ver en este problema, desde la gestión de la ex contadora Araceli Pitman y en la actual administración a cargo de Carlos Nava. Hay otras versiones que señalan que la actual Ley Orgánica de la Contaduría Mayor de Hacienda tiene diversos errores que obstaculiza la integración de los expedientes y que se entreguen a

tiempo. En días pasados, José Narro sostuvo que con la información que van a solicitar sabrán si existe o no responsabilidad por parte de algún funcionario de la Contaduría Mayor o de la Contraloría General del gobierno capitalino. Por su parte, los legisladores perredistas Miguel Ángel Peláez y Ricardo Martínez Atalá, explicaron que durante la reunión de trabajo esperan conocer los resultados finales de esa investigación porque no es justo que ex servidores no sean sancionados, en caso de que hayan cometido algún acto de corrupción. El Universal, 22 de Agosto de 2000 <http://www.el-universal.com.mx/>

NICARAGUA: CIUDADANOS NICARAGÜENSES PIENSAN QUE VIVEN EN EL SENO DE UN ESTADO CORRUPTO

Un informe sobre Desarrollo Humano en Nicaragua, dado a conocer por el Programa de las Naciones Unidas para el Desarrollo PNUD, afirma que el 90 por ciento de los ciudadanos nicaragüenses perciben que existe corrupción en el Estado. El informe expresa que la pobreza afecta casi a la mitad de la población. De estas un 17 por ciento se encuentra en la extrema pobreza, además de no contar con los servicios básicos como energía eléctrica, transporte y comunicaciones, entre otros. Asimismo, el PNUD, señala que el acceso de la población a los beneficios de apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, que habitan en los sectores urbanos y las zonas rurales. Por su parte Ana Quiroz, presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción, CCER, refutó las declaraciones del gobierno en el sentido de que los "nicaragüenses estamos mejor que hace algunos años atrás". Quiroz se preguntó: ¿dónde está la gente que ha mejorado? En este sentido, consideró poco confiables los datos en donde se menciona como logro, el hecho que se hayan mantenido los niveles de educación. Con el crecimiento poblacional, aunque se mantenga la cobertura en la enseñanza, también aumentan los niños y niñas que se quedan sin educación, indicó Ana Quiroz. Sobre la estrategia del gobierno, para la reducción de la pobreza Ana Quiroz, consideró que la corrupción y la pobreza son el principal obstáculo para el desarrollo. Esto se refleja en el incremento del desempleo, la migración y las difíciles condiciones de vida de la mayoría de nicaragüenses, indicó. Informativos Net, España (Ni/QR/Ong-Oi/Pe/mc), 22 de Agosto de 2000 <http://www.informativos.net/>

NICARAGUA: INFORME DE PROGRAMA DE NACIONES UNIDAS REFLEJA PERCEPCIÓN GENERALIZADA DE CORRUPCIÓN Y CRECIDA POBREZA

En general, la opinión de la ciudadanía expresada en encuestas anuales desde 1997 al 2000, han mostrado que cerca del 90 por ciento de los ciudadanos perciben que existe corrupción en el Estado. Este es uno de los datos reflejados en el informe de Desarrollo Humano en Nicaragua 2000, presentado por el Programa de Naciones Unidas para el Desarrollo (PNUD). El informe también expresa que la pobreza afecta casi la mitad de la población, un equivalente a 2.3 millones de personas. De éstas, un 17 por ciento, o sea 830 mil, se encuentran en la extrema pobreza. Así mismo se señala que a consecuencia de dos décadas de bajas inversiones, existe una infraestructura inadecuada en energía, transporte y comunicaciones. El acceso desigual de la población a los beneficios de la apertura económica y a las nuevas tecnologías de comunicación están profundizando la brecha entre ricos y pobres, entre las personas capacitadas y las carentes de formación, de los sectores urbanos y las zonas rurales. Aunque el documento muestra algunas dificultades del país, también fue altamente refutado por recalcar avances sociales que Ana Quirós, la presidenta de la Coordinadora Civil para la Emergencia y la Reconstrucción (CCER), consideró poco confiables. En el campo de la construcción de una democracia participativa y un Estado de Derecho, Nicaragua presenta avances en algunos campos, pero también muestra una institucionalidad frágil. Además, en

ámbito del medio ambiente menciona que de continuar la ampliación de la frontera agrícola, el país tendrá más amenazas y riesgos de desastres naturales. Ante la falta de oportunidades en el país, la migración se convierte en un recurso para asegurar la sobrevivencia. Las remesas familiares de 1999 se calculan entre 300 millones y 600 millones de dólares. Por su parte, Carmelo Angulo Barturen, representante del PNUD, dijo que "la cooperación externa no llegó para quedarse. Esto puede crear vicios. Es importante que Nicaragua se desarrolle para que el país logre salir adelante por sí sola". Agregó que el informe del PNUD no es acusador, sino que presenta datos que puedan servir de base para que el país incida en los aspectos primordiales. El Nuevo Diario, 18 de Agosto de 2000 <http://www.elnuevodiario.com.ni/>

NICARAGUA: PRESIDENTE ARNOLDO ALEMÁN, INCAPAZ DE COMBATIR LA CORRUPCIÓN SEGÚN ENCUESTA

Más de 72 por ciento de los nicaragüenses piensa que el Presidente Arnoldo Alemán ha sido incapaz de combatir la corrupción durante sus tres años de gobierno, según una encuesta de la firma costarricense Cid-Gallup divulgada hoy aquí. El sondeo, efectuado entre 1,245 personas de todo el país a inicios de este mes, reveló que 24 por ciento de la población considera "mala" la gestión del Mandatario para disminuir los ilícitos en el gobierno, mientras 48.3 por ciento la calificó como "pésima". Solamente uno por ciento de los encuestados catalogó de "excelente" la labor del Presidente y 7.5 opinó que es "buena", de acuerdo a la consulta que abordó diversos problemas locales y la opinión popular sobre las autoridades y líderes políticos del país. Para 42 por ciento de los consultados, las condiciones de vida (pobreza y desempleo) han empeorado en Nicaragua desde que Alemán asumió la Presidencia en 1997. Consultado sobre la encuesta, cuya primera parte fue publicada ayer en medios locales, Alemán desestimó las cifras que indican una baja popularidad del gobierno y del oficial Partido Liberal Constitucionalista (PLC) de cara a los comicios municipales del próximo 5 de noviembre. "El 5 de noviembre va a ser la mejor encuesta y la más verdadera", dijo al asegurar que en los comicios el PLC obtendrá más de 100 de las 147 alcaldías del país. "Mi partido ha hecho obras y el pueblo lo ve, no necesita encuestas para ganar", dijo. El Excelsior, México (DPA, Xinhua y AP) 24 de Agosto de 2000 <http://www.excelsior.com.mx/>

PANAMÁ: ``CONTRALOR DEBE ABSTENERSE DE PRONUNCIAMIENTOS APRESURADOS SOBRE INVESTIGACIÓN CONTRA ALTOS FUNCIONARIOS``

Las tensiones entre la Contraloría y la Directiva de la Caja de Seguro Social no bajan de intensidad. Mientras el Subcontralor Enrique Lau anuncia "nuevos hallazgos" en la investigación promovida contra altos funcionarios de la Institución, éstos le exigen a la agencia fiscalizadora que se abstenga de pronunciamientos apresurados. Luis A. González González la Junta Directiva de la Caja de Seguro Social, por votación unánime, decidió pedir al Contralor General de la República, Alvin Weeden, que se abstenga de hacer algún pronunciamiento en cuanto a las investigaciones que adelanta sobre supuestos nuevos "hallazgos" en el Seguro, hasta tanto se hayan concluido las mismas y se cumpla fehacientemente con el debido proceso legal. La decisión fue dada a conocer mediante nota dirigida al Contralor, la cual fue leída y entregada a los medios de comunicación social por el presidente de la Junta Directiva, Rafael Medina, luego de culminar la sesión ordinaria de esta semana que duró casi cinco horas. Los demás miembros de la Junta estuvieron presentes. Asimismo, la decisión fue acordada por los directores después de que el Subcontralor, Enrique Lau, quien actuó como principal en la reunión, se retiró del salón tras manifestar que la Contraloría lleva a cabo una investigación "sobre hallazgos graves" dentro de la CSS que aparentemente involucra a altos funcionarios de la Institución. Cabe señalar que el director del Seguro, doctor Juan Jované, reiteró su interés de seguir

cumpliendo con su trabajo como hasta ahora lo hace. De hecho, la Junta Directiva de la Caja aprobó, en la misma votación, pedir también un informe relacionado a los señalamientos expresados por el Subcontralor en dicha sesión. Lau, quien estuvo sólo por unas horas en la Junta no quiso adelantar mayores detalles sobre el caso al salir del salón de reuniones. Igualmente, la nota señala que al Subcontralor le fue aclarado que en ningún momento se ha pedido una investigación en su contra, tal como lo publicó un diario local, por lo que tampoco existe ninguna acción interna que lo involucre. El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: AUDITORÍA CONFIRMA ANOMALÍAS EN PASADA GESTIÓN DE LA CAJA DE SEGURO SOCIAL

El ex director de Relaciones Públicas de la Caja de Seguro Social (CSS) Santiago Quiróz contrató, mientras ocupó ese cargo, los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según señala un informe preliminar de auditoría de la Contraloría que está próximo a ser concluido, informaron fuentes allegadas a las investigaciones. Consultado al respecto, Santiago Quiróz -en declaraciones previas- negó haber cometido tales irregularidades, y además aseguró que cuando las autoridades competentes lo consideren prudente, explicará las dudas surgidas en torno a su actuación como jefe de Relaciones Públicas de la CSS. Los trabajos de auditoría ya culminaron, aseguró una de las fuentes, y ahora se entrará en la etapa de recepción de declaración a las personas presuntamente relacionadas con estas anomalías. Entre estas anomalías hay cheques pagados sin documentos sustentadores por un monto de 220 mil 919 dólares con 10 centésimos. Culminada esta fase, explicó, se procederá a enviar el informe final al contralor, Alvin Weeden Gamboa, y éste le dará traspaso a las instancias judiciales correspondientes. De acuerdo con la fuente, el estudio consistió en la evaluación de la metodología utilizada por Relaciones Públicas de la Caja para la adquisición de bienes y servicios a través del proceso de compras menores; la verificación de las partidas presupuestarias comprometidas por el Departamento de Presupuesto y los pagos efectuados por la Dirección Nacional de Contabilidad. Las empresas beneficiadas con estos negocios son Corporación de Publicidad, S.A., Publich Photo, S.A., y Publich Production, S.A. Según el Registro Público -se anota en el informe- en las tres empresas aparecen como directivos Enith Marlene Atencio, Melva Flores y Elizabeth Atencio. Enith Marlene Atencio, según otras fuentes, es la prometida de Quiróz, mientras que Elizabeth Atencio es una de las hermanas de ésta. Melva Flores, por su parte, mantiene una relación de amistad con todos ellos. Tal relación fue negada igualmente por Quiróz. Los pagos de las órdenes de compras emitidas para la adquisición de panfletos, afiches, revistas y otros, realizadas por el departamento de Relaciones Públicas de la CSS, según el informe, totalizaron 234 mil 754 con 60 centésimos, y los beneficiados fueron los parientes de Quiróz. En la auditoría se descubrió, asimismo, la existencia de cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. Igualmente el estudio reflejó la división de la materia en las compras efectuadas que no permitieron la debida competencia y ello -a juicio de los funcionarios de Contraloría- "le restó transparencia a los procesos" al no publicarse en los medios escritos y evitó, a su vez, la participación de mayores oferentes. Por ejemplo, el 5 de noviembre de 1998 se emitió una orden de compra sin número a favor de la empresa Corporación de Publicidad para el suministro de 250 afiches, y esta presentó una cotización por un valor de mil dólares, pese a que la empresa ALFLO, S.A. había cotizado la suma de 680 dólares. A juicio de los auditores de Contraloría, en casos como el señalado "no se veló por los mejores intereses de la institución, al elegirse a un proveedor con un precio mayor". De igual forma, el 27 de noviembre de 1998 se suscribió una orden de compra a favor de Publich Photo, S.A. por 3 mil 780 dólares para el suministro de 5 mil panfletos,

sin embargo, el cheque de pago salió a nombre de Corporación de Publicidad, S.A., sin que mediara cesión de pago a favor de esta última. Quiróz, quien en la actualidad labora como asesor de los magistrados del Tribunal Electoral (TE), asumió la jefatura de Relaciones Públicas de la Caja tras la llegada de Ricardo Martinelli a esa institución. Durante la pasada campaña proselitista, ejerció funciones en la jefatura de prensa del aspirante presidencial Martín Torrijos. La fuente allegada a las investigaciones en la Contraloría fue enfática al señalar que "se han acreditado todas las irregularidades. Si están allí [consignadas] es porque esas irregularidades están probadas". La Prensa, 21 de Agosto de 2000 <http://www.sinfo.net/prensa/>

PANAMÁ: CONTRALOR DE LA REPÚBLICA ANUNCIA INVESTIGACIÓN CONTRA EL SUBCONTRALOR LAU

El Contralor de la República, Alvin Weeden, anunció en conferencia de prensa la iniciación de un proceso de investigación al Subcontralor Enrique Lau, debido a denuncias de que el mismo cuando fungía como subdirector de la CSS, recibió un equipo valorado en no menos de un millón de balboas, sabiendo que estaba incompleto. Según el Contralor Weeden estas investigaciones no se realizarán porque directivos de la Caja de Seguro Social lo hayan solicitado, sino porque el mismo Subcontralor Lau, se lo pidió. A la vez manifiesta Weeden que en días anteriores el Subcontralor puso a disposición de su cargo (del Contralor), para que realizara estas investigaciones. Las declaraciones del Contralor Weeden surgen luego de que directivos de la Caja de Seguro Social emitieran una información en donde pedían a éste investigaran al Subcontralor, lo cual él desmintió. En informaciones sobre el caso, se da a conocer que los representantes de la empresa que entregó el equipo a la CSS (Tomógrafo axial), prefirieron no comentar nada sobre el asunto, pero una fuente de entero crédito mencionó que el equipo entregado cumplía con los requisitos exigidos y que de ello pueden dar fe consultores internacionales que así lo certificaron. Un memorándum que se refiere al Informe sobre la gestión realizada con referencia al recibo del tomógrafo axial computarizado, describe la forma como Lau favoreció la admisión del aparato y desatendió instrucciones de Marianela Morales (quien en la época fungía como directora de la CSS). El Siglo, 18 de Agosto de 2000 <http://www.elsiglo.com/>

PANAMÁ: CONTRALORÍA CITA A EX JEFE DE RELACIONES PÚBLICAS DE LA CAJA DE SEGURO SOCIAL PARA QUE ACLARE PRESUNTAS IRREGULARIDADES

La Contraloría General citó a Santiago Quiróz, ex jefe de Relaciones Públicas de la Caja de Seguro Social (CSS), con el fin de que "aclare" su participación en el manejo presuntamente irregular en el proceso de compras efectuado por ese departamento entre los años 1998 y 1999. Tal información fue facilitada por una fuente allegada a las investigaciones, quien aseguró que la referida citación está suscrita por el propio contralor, Alvin Weeden Gamboa. Dicha citación, explicó la fuente, está dirigida a que Quiróz, quien ejerce funciones de asesoría de los magistrados del Tribunal Electoral (TE), tenga la oportunidad de facilitar los documentos que aclaren las anomalías registradas. La Contraloría realiza una investigación destinada a determinar responsabilidad en el proceso de compra llevado a cabo en el referido departamento de la CSS, cuando Quiróz ejercía las tareas de jefe del aludido departamento. Según las diligencias, recordó el informante, en el departamento de Relaciones Públicas de la CSS durante el período mencionado se efectuaron pagos por bienes, cuya recepción no está debidamente documentada con sus informes y las correspondientes facturas. Quiróz, mientras ocupó ese cargo, contrató los servicios de tres empresas del mismo grupo comercial, cuyos directivos eran allegados suyos, según las investigaciones realizadas por la Contraloría. Entre las pruebas hay cheques pagados sin los documentos sustentadores y se encontró la utilización de partidas

presupuestarias de otros departamentos, sin hacerse las transferencias correspondientes. La Prensa, 22 de Agosto de 2000 <http://www.sinfo.net/prensa/hoy/>

PARAGUAY: ASUMIÓ NUEVO CONTRALOR Y PROMETE INVESTIGAR A SU ANTECESOR. DESPIDEN A FRETES VENTRE CON EL GRITO DE CORRUPTO

La salida del ex contralor fue tan tumultuosa, tal como lo fue una gran parte de su administración. Entre empujones, empellones y gritos de ¡bandido, corrupto! por parte de los funcionarios detractores, Daniel Fretes Ventre dejó el cargo que ocupó por cinco años. Su sucesor, Francisco Javier Galiano, abogado de 43 años, anunció que investigará la gestión de su antecesor, quien está acusado de 19 delitos. Una batahola infernal generó la salida de Fretes Ventre de la Contraloría General de la República, luego de la forzada conferencia de prensa que en principio no tenía pensado realizar. Al dejar el local, el ex contralor, en forma increíble y maleducada y ya dentro del automóvil, realizó un "corte de manga" dirigido a los que, en ese momento, se encontraban en el patio de la institución. Este hecho generó una acalorada discusión, para que minutos después se inicie un intercambio de golpes de puño entre los propios funcionarios de la Contraloría, ante la pasiva mirada de los policías presentes en el lugar. Momentos antes, Fretes Ventre en conferencia de prensa y en forma inconcebible, primero acusó a la prensa de ser la culpable de todos los delitos que se lo inculpa y amenazó a aquellos que lo denunciaron, aunque no quiso dar nombres. Más tarde dijo que las denuncias en su contra tienen un interés político, realizado por un grupo de personas, absteniéndose nuevamente de dar nombres. Al tiempo de anunciar transparencia en su gestión, el flamante contralor general de la República, Francisco Javier Galiano, dijo que investigará a su antecesor, quien está acusado de la comisión de unos 19 hechos punibles durante el ejercicio del cargo. Fretes Ventre se "salvó" de la investigación judicial gracias al apoyo de los libero-oviedistas de la Cámara de Diputados, quienes negaron el pedido de desafuero que realizaron autoridades judiciales. Fue luego que la Cámara de Diputados haya tomado el juramento al mismo y al subcontralor, Mario Estigarribia, durante la sesión ordinaria de este cuerpo legislativo. El mismo grupo de diputados que dio una manta de impunidad a Fretes Ventre es el que votó por al candidatura de Galiano para que llegue a la Contraloría. Ayer, luego del juramento, Galiano explicó que una comisión ya está realizando una especie de auditoría a la gestión de Fretes Ventre, a fin de determinar su responsabilidad en los hechos delictivos en los cuales se lo involucra. Diario ABC Color, 18 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PARAGUAY: DENUNCIAN PEDIDO DE COIMAS EN ADUANA DE LA CIUDAD DE MARISCAL

Graves denuncias pesan contra la aduana de la ciudad de Mariscal Estigarribia, donde a diario comerciantes son objeto de amenazas, chantaje y secuestro de documentos para obligarles a la entrega de jugosas coimas. Acorde a la denuncia radicada en la fiscalía local, solamente el último fin de semana los funcionarios aduaneros se apoderaron de 2.300 dólares y dos motores de la marca Honda; todo esto, lógicamente, sin expedir recibo alguno. En el primer caso, la aduana de la ciudad de Mariscal Estigarribia atajó un cargamento de 130.000 kilos de sal fina, proveniente de Bolivia. De los choferes bolivianos Armindo Centro, Rubén Flores y Mario Centro los funcionarios secuestraron la documentación personal, el título de los vehículos (tres camiones) y les obligaron a pagar 300 dólares, sin recibo, acorde a la denuncia realizada posteriormente ante el agente fiscal Gustavo Patiño. El hecho involucra a los funcionarios aduaneros Juan González y Ludserio Borba. El cargamento, que posteriormente fue liberado, entró de esta manera de contrabando al Chaco central, donde fue comercializado. En el segundo caso fue amenazado en la Picada 500 el comerciante

boliviano Freddy Toledo, quien vino con 24 motores de la marca Honda, importados desde Villa Montes, Bolivia. Acorde a la denuncia, el comerciante fue amenazado en la Picada 500 supuestamente por agentes de la Dinar, quienes exigieron el pago de 10.000 dólares. Al no prosperar el chantaje, los agentes habrían avisado a la aduana en la ciudad de Mariscal Estigarribia, donde el cargamento fue atajado. Del chofer secuestraron toda su documentación personal y del vehículo, incluso la factura de la mercadería, que indicaba el valor de la mercadería con un valor de 9.990 dólares. El agente aduanero -en evidente estado de ebriedad, acorde a la denuncia- alegó la ilegalidad de la factura e insistió en que el cargamento era mercadería de contrabando y con un valor de 100 millones de guaraníes. El jefe de la aduana habría exigido el pago de 5.000 dólares y la entrega de algunos de los motores, y en reiteradas ocasiones habría dicho a los comerciantes que "la solución del problema depende de ustedes". Posteriormente, los socios comerciantes Ernst Loewen y Willy Toews trataron de pagar la tasa normal de importación, lo que fue rechazado por el agente aduanero. Del hecho fueron informados después el intendente de Mariscal Estigarribia y la jueza María Teresa Brítez, quien finalmente llegó al lugar del hecho y trató de solucionar el inconveniente. El agente Raúl Villanueva, finalmente, habría cobrado la suma de 2.000 dólares y se apoderó además de dos motores de la marca Honda, todo esto sin documentación alguna, acorde a la denuncia. Al recibir el dinero y la mercadería, los aduaneros devolvieron a los choferes sus documentos. De los hechos fue informado el mismo domingo el funcionario aduanero Sixto Cáceres, de la aduana de Asunción. Estos últimos hechos se suman a una serie de denuncias similares que mantienen en zozobra a comerciantes y empresas de transporte público que tratan de mantener relaciones comerciales con el vecino país a través del Chaco. Fuentes fidedignas aseguran que el puesto aduanero de la ciudad de Mariscal Estigarribia "recauda" por semana entre 10 y 15.000 dólares, manteniendo en zozobra a la población de esta zona del país. Diario ABC Color, 23 de Agosto de 2000 <http://www.abc.com.py/>

PARAGUAY: HARÁN AUDITORÍA EN LA VICEPRESIDENCIA. HABRÍA MANEJO DOLOSO, SEGÚN LEGISLADOR

El Partido Liberal Radical Auténtico (PLRA) está en conocimiento de contrataciones de nuevos funcionarios que se han hecho desde que el cargo quedó vacante. El legislador Espínola informó que la Vicepresidencia ejecutó el 52 por ciento del presupuesto asignado para el presente año, que equivale a aproximadamente a un monto de 1.500 millones de guaraníes. Esta situación contrasta con otros órganos estatales que apenas han alcanzado a ejecutar más del 20 por ciento de lo presupuestado para el 2.000, debido al difícil momento que atraviesan las arcas del Estado. Concretamente comparó con el Congreso nacional, que apenas ha usado el 26 por ciento de los recursos asignados para el presente año. "Ante todo, lo que el Vicepresidente debe hacer es una auditoría a fondo de la Vicepresidencia para ver cómo ha sucedido este milagro de la dilapidación del dinero del pueblo. Se han nombrado funcionarios sin que haya Vicepresidente, se imaginan la burla, la bofetada que esto significa para el pueblo. En ese lugar sigue un montón de gente que está chupándole la sangre al pueblo", dijo el legislador. Indicó que una vez que se aclaren todas estas cosas, el Vicepresidente podrá pensar cómo y con qué elementos cuenta para conformar su equipo de trabajo y empezar a trabajar por el bien del país. PARAGUAY: JURADO PROCESA AL FISCAL DENUNCIADO POR PRESUNTA COIMA

El Jurado de Enjuiciamiento de Magistrados inició la investigación del denunciado fiscal de Ciudad del Este, Edward Friedrich Armas Godoy y solicitó ayer a la Corte Suprema de Justicia la suspensión del mismo en el ejercicio de sus funciones. Asimismo, previo procesamiento, envió todos los

antecedentes al juez penal de garantías de la circunscripción judicial del Alto Paraná y Canindeyú, para la apertura del sumario penal por la presunta comisión de varios delitos. Igualmente, el Jurado dispuso la suspensión de la tramitación de la causa en espera de una sentencia definitiva por parte de la jurisdicción penal, ya que la condena por delitos comunes conlleva separación del cargo. Como antecedente se recuerda que la jueza Beatriz Venialgo, en compañía del fiscal de turno, encontró en la oficina de Armas Godoy en el Alto Paraná cinco mil dólares. La mencionada suma le fue entregada al fiscal Armas Godoy por un ciudadano brasileño en concepto de coima para lograr el levantamiento de la medida cautelar que pesaba contra las mercaderías incautadas de su propiedad. El mencionado fiscal le había solicitado para la liberación de las mercaderías quince mil dólares. Ante esta situación el ciudadano brasileño radicó la denuncia ante la jueza Venialgo y le entregó cinco mil dólares marcados a Armas Godoy, suma que durante el allanamiento fue encontrada en su oficina. "Esta resolución no constituye en modo alguno prejuzgamiento sobre el fondo de la cuestión, por el contrario, somete al denunciado a la Justicia Ordinaria, a los efectos de que, en ese ámbito, pueda esclarecerse los hechos que se le atribuyen", señala la resolución del Jurado de Enjuiciamiento de Magistrados. Diario Noticias, 22 de Agosto de 2000 <http://www.diarionoticias.com.py/>

PERÚ: 4,000 VECINOS EXIGEN INVESTIGAR IRREGULARIDADES DE ALCALDE CHIROQUE

Unos 4,000 vecinos de San Juan de Lurigancho marcharon ayer al mediodía hasta la Contraloría de la República, para exigir a su titular Carmen Higaonna investigue la gestión del alcalde distrital Ricardo Chiroque. Los manifestantes, en su mayoría madres del Vaso de Leche, provistas de pancartas y altavoces, acusaron a Chiroque de malversar fondos y reclamaron cese en sus funciones edilicias. Las mujeres de ese distrito pidieron se les restituya los tres días de leche a la semana y los cuatro restantes de cereal, que ahora ha sido reducido a dos de leche y cinco de cereal. La presidenta del gremio de madres del Vaso de Leche, Rosa Inga Morales, informó que anteriormente, los cereales tenían un alto índice nutritivo y de buen sabor, pero ahora les entregan productos embolsados sin registro ni marca y con residuos de tierra, debido al interés del alcalde por abaratar precios a costa de la calidad. Asimismo pidieron la destitución del cargo de presidenta del Comité de Administración del Vaso de Leche de María Elías y al jefe de la citada organización, Jaime Bernedos. Por su parte el alcalde Ricardo Chiroque ha negado todas las denuncias anteriores defendiendo su gestión como correcta y transparente. Reiterando que él mismo ha solicitado a la Contraloría General de la República se investigue el caso a fondo. La República, 18 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRA EX RECTOR DE UNIVERSIDAD RICARDO PALMA, LO SEÑALAN COMO RESPONSABLE DE DESFALCO

El rector de la Universidad Ricardo Palma, Iván Rodríguez Chávez, demandó a los magistrados de la primera Sala Penal de la Corte Suprema actuar de acuerdo a ley en el caso seguido contra el ex rector Sixto Ludeña Luque quien desfinanció con cerca de dos millones de soles a esta casa superior de estudios. Explicó que durante su gestión desde febrero del 91 hasta julio del 96 Ludeña Luque realizó pagos indebidos con dinero de la Universidad, entre ellas sus deudas personales a la Superintendencia de Administración Tributaria (Sunat). "Cuando ingresé en el rectorado la universidad estaba con sus bienes embargados, con una deuda de dos millones de dólares. Existen pruebas de estos hechos y por lo cual Ludeña estuvo preso en el Penal San Jorge, sin embargo, fue absuelto por el Tribunal Supremo", reveló. Preciso que la Sunat, la Universidad y el Ministerio Público han presentado recursos de nulidad a las sentencia absolutoria de los anteriores magistrados que fueron recusados por que adelantaron opinión, y ahora el caso está en manos de la Primera Sala

Penal Transitoria especializada en delitos tributarios. Rodríguez Chávez dijo que otro de los problemas que encontró al asumir el rectorado de la universidad fue la deserción de estudiantes y el bajo número de postulantes, lo cual reversionó con la reestructuración curricular y saneamiento económico y administrativo. La República, 24 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: CONTRALORA GENERAL EXPLICARÁ ATRASOS EN INFORMACIÓN DE CUENTA GENERAL

La Comisión Revisora de la Cuenta General de la República acordó ayer invitar a la Contralora General de la República, Carmen Higaonna y al Contador General de la Nación, para que expliquen las razones por las cuales existen atrasos en la presentación de la información de la Cuenta General de la República de 1999. El acuerdo fue adoptado ayer en la sesión vespertina de la comisión que preside el oficialista Willy Serrato, tras analizar un comunicado, publicado en los medios de comunicación, que da cuenta de que existen numerosas instituciones que no han presentado la información correspondiente sobre los gastos del dinero del Tesoro Público. Willy Serrato dijo que tiene la información de que hasta el momento por lo menos unas 160 instituciones públicas, la mayoría municipalidades, no han presentado la información requerida por la Contraloría. El Contador de la Nación, Oscar Pajuelo Ramírez, ha sido invitado para el próximo lunes, mientras que la Contralora Carmen Higaonna se presentará el 4 de setiembre. La República, 22 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: INFORMAN SOBRE MALOS MANEJOS DE EX ALCALDE DE HUARAZ

Para Oswaldo Villafuerte, quien fuera teniente alcalde de la gestión del ex alcalde de Huaraz Waldo Ríos, la declaración de vacancia a su cargo obedece a un afán de evitar que se fiscalicen los supuestos malos manejos en la gestión del ahora congresista Ríos. Villafuerte ofreció ayer una conferencia de prensa junto con el congresista Ernesto Gamarra. Ellos indicaron que tras haber denunciado serias irregularidades en el municipio de Huaraz, Villafuerte fue destituido. Sin embargo fue repuesto tras demostrar que su vacancia fue una acción equivocada. "Una vez repuesto en mi cargo, Ríos solicitó que se reconsidere el caso, hecho que fue atendido casi de inmediato declarándose mi vacancia nuevamente el 14 de julio de este año", comentó Villafuerte. Tras estos hechos, Gamarra señaló que podría ser cierta la versión que fue el propio Vladimiro Montesinos quien le entregó a Ríos la resolución de la vacancia de Villafuerte. Admitió el error cometido por el Frente Independiente Moralizador (FIM) al haber aceptado en sus filas a Ríos quien tenía antecedentes negativos como alcalde. El Comercio, 24 de Agosto de 2000 <http://www.elcomercio Peru.com/>

PERÚ: PIDEN INVESTIGAR A PRESIDENTE DEL COMANDO CONJUNTO DE LAS FUERZAS ARMADAS POR PRESUNTOS SIGNOS DE ENRIQUECIMIENTO

La congresista de Somos Perú, Anel Townsend, presentó ayer una moción para conformar una comisión especial que investigue el desbalance entre los ingresos y los bienes inmuebles del presidente del Comando Conjunto de las Fuerzas Armadas, general EP José Villanueva Ruesta. Suscriben la moción sus compañeros de bancada Manuel Masías, Ronnie Jurado, Jorge Chávez Sibina y Luis Guerrero, quienes solicitan el establecimiento de una comisión para que en un plazo de 30 días, emita un informe con conclusiones y recomendaciones sobre la propiedad, ingresos y patrimonio del alto oficial. El pedido parlamentario también incluye a la familia de Villanueva Ruesta, por los presuntos signos exteriores de riqueza y el desbalance entre remuneraciones y egresos que tendría el comandante general del Ejército. De acuerdo con la agencia Imediaperú, el general Villanueva poseería una importante cantidad de propiedades, como un inmueble de más de 2,500

metros cuadrados en Chosica, usado como casa de invierno por él y su familia, y que aparece como propiedad de la empresa Long View Corporation. Según la investigación periodística, el oficial también tiene otras siete propiedades de bienes inmuebles compradas por su esposa, una residencia ubicada en la urbanización Los Pinos, en Monterrico, y un local en el Centro Comercial El Polo, frente a la embajada de los Estados Unidos. La República, 23 de Agosto de 2000 <http://www.larepublica.com.pe/>

PERÚ: POR ACUERDO DE COMISIÓN DE FISCALIZACIÓN MINISTRO DE DEFENSA INFORMARÁ SOBRE INMUEBLES ADQUIRIDOS

El ministro de Defensa, general José Villanueva Ruesta, deberá enviar a la comisión de Fiscalización del Congreso la información que permita conocer los bienes inmuebles que adquirió desde que asumió ese cargo público y que, según un medio de prensa, abarcaría a 7 inmuebles ubicados en zonas exclusivas de Lima. La propuesta, que surgió del oficialismo, fue una salida a las propuestas de los parlamentarios Luis Iberico (FIM) y Anel Townsend (Somos Perú), quienes solicitaron se conforme una subcomisión investigadora para que se dedique a este caso. La propuesta de Moisés Wolfenson (Perú 2000), para que antes que se presente el ministro Villanueva lo haga el periodista que realizó la investigación, puso en aprietos a su bancada, cuando los parlamentarios de la minoría solicitaron que dicha invitación se someta a debate. Wolfenson tuvo que retirarse de la sala de sesiones cuando se sometió a votación su propuesta y regresar cuando ésta fue rechazada por la mayoría. La denuncia de Iberico indicó que desde 1993 hasta la fecha, el general Villanueva y su esposa, María del Pilar Mesa Ramírez, se han comprado 7 propiedades inmuebles, entre departamentos, una casa con piscina y hasta una tienda en el centro comercial El Polo, además de una camioneta valorizada en más de US\$ 50,000. Según los partes de la Oficina Nacional de Registros Públicos mostrados por el congresista Iberico, la mayor parte de las propiedades están a nombre de la esposa del militar, quien es ama de casa y no tiene registro alguno ante la Superintendencia Nacional de Administración Tributaria (Sunat). Iberico además mostró las pruebas de una conexión entre el hijo mayor del titular de Defensa, José Villanueva Villanueva, con el coronel Mario Arbulú Seminario a través de la empresa Long View Corporation, mediante la cual han comprado varios terrenos en el balneario de Cerro Azul, para construir un complejo de verano. La República, 22 de Agosto de 2000 <http://www.larepublica.com.pe/>

PUERTO RICO: ALEGAN QUE EL PARTIDO NUEVO PROGRESISTA JUSTIFICA CORRUPCIÓN CON PERSECUCIÓN

Cinismo, desesperación y la justificación de la corrupción fueron algunas de las explicaciones dadas por líderes y ex líderes universitarios independentistas a la nueva teoría de que los cargos federales por corrupción a miembros del Partido Nuevo Progresista (PNP) buscan desestabilizar el anexionismo como antes lo hicieron con el independentismo. "Decir que se persigue a los anexionistas es decir que se crea artificialmente una idea de que son corruptos, que se fabrica la imagen de corruptos", dijo Miguel Rivera, secretario nacional de organización de la Federación de Universitarios Pro Independencia (FUPI). La nueva teoría, agregó, equivale a decir "que no son tan corruptos". Según la nueva tesis, la Fiscalía Federal y del Negociado Federal de Investigaciones (FBI) han montado todo un operativo para influenciar las elecciones a favor del Partido Popular Democrático (PPD) y del "statu quo" con la radicación de cargos por corrupción contra alcaldes y líderes del PNP. El Nuevo Día, 22 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: CONDICIONAN SUBSIDIO DE \$130 MILLONES A VIVIENDA A

CAMBIO DE AUSENCIA DE CORRUPCIÓN

Cuando regrese en septiembre, el Congreso decidirá el futuro de los \$130 millones en subsidios adicionales para vivienda pública en Puerto Rico, condicionando la aprobación a la erradicación de la corrupción en la Administración de Vivienda Pública (AVP). En septiembre el senador republicano por Missouri, Christopher Bond, discutirá con sus colegas las posibles vías de acción congressional sobre el acuerdo del Departamento de Vivienda y Desarrollo Urbano (HUD) de otorgar \$130 millones adicionales a Puerto Rico, informó ayer la oficina de Bond. En cualquier caso, el desembolso de los \$130 millones tiene que contar con garantías de que esos fondos no serán tocados por la corrupción en la AVP, señaló un ayudante congressional de Bond. "Entre las opciones que se están considerando está una certificación independiente de que el sistema de vivienda pública en Puerto Rico está libre de corrupción", señaló el ayudante de Bond. El Nuevo Día, 24 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: DÉFICITS Y ATRASOS EN INFORMES FINANCIEROS ANTE EL CONTRALOR

Siete municipios del país están en la lista de deudores de estados financieros de la Oficina del Contralor. En cuatro de ellos los alcaldes aspiran a la reelección y seis operaban con déficit en el último informe que entregaron. La lista de deudores la encabeza el Municipio de Río Grande, donde el último informe que entregó el alcalde del Partido Nuevo Progresista (PNP) César Méndez fue el del año fiscal 1995-1996. El Municipio de Adjuntas, administrado por el alcalde del Partido Popular Democrático (PPD), Roberto Vera Monroig, y el de Juncos, que dirige el novoprogresista Gilberto Conde Román, también están en la lista. El último informe que entregaron ambos alcaldes a la Oficina del Contralor fue el del año fiscal 1996-97. Los municipios de Villalba, Guayanilla, Naguabo y Utuado deben los estados financieros de los años 1998-99 y 1999-2000. Seis de los siete municipios que son considerados deudores de informes, tenían déficit en el último estado financiero que entregaron. En el estado financiero 1996-97, Adjuntas tenía un déficit de \$3.3 millones, mientras que el de Juncos alcanzaba los \$2.1 millones. En el informe del año 1997-98 Villalba tenía un déficit de \$1.4 millones y el déficit en Guayanilla era de \$1.2 millones. En Naguabo las arcas municipales estaban en rojo con un déficit de \$656 mil y en Utuado con un déficit de \$2.9 millones. El Alcalde de Río Grande, quien adeuda cuatro informes, incluyendo el del año que concluyó el 30 de junio pasado, no aspirará a la reelección Tampoco lo harán los alcaldes novoprogresistas de L Naguabo y Utuado, José A. Meléndez y Juan L. Ortiz, respectivamente. En el caso de Villalba, el alcalde Bernardo Negrón Montalvo sí aspira a la reelección. Sin embargo, el PNP solicitó al Tribunal de Ponce que lo descalifique por ser uno de los acusados en el escándalo del Centro de Recaudación de Ingreso Municipales (CRIM). El contralor, Manuel Díaz Saldaña, dijo estar satisfecho de que la mayoría de los municipios tengan al día sus estados financieros. Díaz Saldaña recordó que cuando asumió esa posición, sólo 13 de los 78 municipios estaban al día. Aun así, el funcionario solicitó la ayuda de la Oficina del Comisionado de Asuntos Municipales para penalizar con algún tipo de multa a los municipios que no tengan sus estados financieros al día. El Contralor dijo que antes del 7 de septiembre su oficina presentará un informe de auditoría sobre el municipio de Río Grande. El Nuevo Día, 23 de Agosto de 2000 <http://endi.zonai.com/>

PUERTO RICO: IMPONE COMISIÓN DE ÉTICA DE LA CÁMARA LOS REQUISITOS MÁS ESTRUCTOS DE TODO EL GOBIERNO PARA DAR INICIO A INVESTIGACIONES

A pesar de que la Constitución de Puerto Rico establece que la Asamblea Legislativa será la única juez de sus miembros, la Comisión de Etica de la Cámara de Representantes impone los requisitos

más estrictos de todo el Gobierno para darle paso a cualquier investigación. Contrario a su contraparte en el Senado, la Comisión cameral requiere prueba "robusta" y "convinciente" para iniciar siquiera una investigación a fondo. Requiere también que el querellante consiga la evidencia y la presente a la Comisión en 30 días después de tomar conocimiento de la supuesta violación. Esta administración eliminó la prescripción para los delitos por corrupción y violaciones a la ética, pero si un querellante de un representante presenta su denuncia en el día 31, la Comisión cameral la tiene que declarar prescrita, según la ley que crea el organismo. La Comisión de Etica senatorial sólo exige "prueba justa y razonable", y no impone un término mínimo para radicar la denuncia, según su ley. Ni los jueces en la Rama Judicial ni los funcionarios públicos en la Rama Ejecutiva imponen términos restrictivos para radicar denuncias ni exigen prueba fuera de toda duda razonable para evaluar un caso por ética contra uno de los suyos, según sus reglamentos. Para presentar una querrela contra un juez sólo hay que identificar los hechos y juramentar la querrela. Para radicar una querrela contra un funcionario en la Rama Ejecutiva es lo mismo: se requiere un juramento, y sólo se exige una exposición de todos los hechos, según la Ley de la Oficina de Etica Gubernamental. La Cámara exige que al querellante le conste de "propio y personal conocimiento" la violación que imputa a un legislador. Y apercibe de un procesamiento por perjurio del Código Penal en la misma radicación de la queja. Como si fuera poco, la Comisión cameral impide al querellante hablar del caso, pero no lo trata como parte a la hora de darle el derecho -como en todo proceso judicial- de obtener documentos de la otra parte, según el último querellante, Héctor Ferrer, quien radicó un caso contra el representante presidente de la Comisión cameral, Luis Aramburu. Ante la vergüenza pública por una discusión de un acto deshonoroso de uno de sus miembros, la Comisión senatorial puede activarse sola, por decisión de los senadores. La de la Cámara no. La Cámara necesita que alguien haya tomado conocimiento personal del acto deshonoroso y en menos de 30 días lo presente a la Comisión. Esta Comisión también tiene una veda para radicar las denuncias. Tres meses antes de las elecciones, la Comisión cameral no acepta querrelas contra sus legisladores amparada en que no quiere convertirse en una herramienta para hacer política. Ese cierre comienza el 7 de septiembre. Sin embargo, la ley es tan cómoda para los legisladores que no define lo que es "prueba robusta y convincente" ni lo que es "propio y personal conocimiento". El Nuevo Dia, 21 de Agosto de 2000

REGION ANDINA: HOJA INFORMATIVA SOBRE ESFUERZOS ANTINARCOTICOS

A continuación extractos de una hoja informativa emitida por el Departamento de Estado el 16 de agosto sobre los esfuerzos antinarcóticos en la región andina, la cual destaca el éxito de las tareas de erradicación de cultivos ilícitos de coca en Perú y Bolivia: ***** El cultivo neto de la coca andina y el potencial de producción de cocaína siguió declinando en 1999 y actualmente está en su nivel más bajo desde 1987. En general, el cultivo neto de coca andina declinó a 180.000 hectáreas en 1999, cifra 4 por ciento menor que la de 1998, y 15 por ciento menor que la de 1995. La producción potencial de cocaína bajó a 765 toneladas métricas, una baja del 7 por ciento a partir de la cifra de 1998, y una baja del 18 por ciento desde 1995. ***** La decidida erradicación de los cultivos ilícitos de coca, las operaciones de interceptación y los programas de desarrollo alternativo en Perú y Bolivia redujeron el cultivo de coca en esos países en 66 y 55 por ciento, respectivamente, desde 1995. En gran parte debido a los exitosos programas antinarcóticos en Perú y Bolivia, el cultivo de la coca en la región andina ha cambiado a los territorios controlados por la guerrilla y los paramilitares en Colombia. ***** Colombia actualmente abastece de drogas ilícitas a Estados Unidos más que ningún otro país del mundo. Noventa por ciento de la cocaína en el mercado de Estados Unidos viene de Colombia --como ocurre, de acuerdo con estimados, con hasta dos tercios de la heroína en la costa

este. ***** Los problemas en Colombia afectan la vida de los norteamericanos en nuestro país y en el extranjero. Las drogas ilícitas le cuestan a nuestra sociedad 52.000 vidas y casi 110.000 millones de dólares al año, debido a los costos en salud, accidentes y productividad perdida. ***** Las organizaciones dedicadas al tráfico de drogas en Colombia son una pernicioso fuente de inestabilidad. Canalizan fondos a los insurgentes y a los paramilitares que actúan como policías no autorizados, para obtener protección y otros servicios. Mientras tanto, la constante intimidación y la influencia corruptora de los traficantes constituye una grave amenaza al imperio del derecho y las instituciones democráticas de libre mercado en Colombia. Servicio Noticioso desde Washington , 21 de agosto de 2000 <http://www.usinfo.state.gov/cgi-bin/washfile/display.pl?p=/products/washfile/language/s>

REPUBLICA DOMINICANA: LA FISCALÍA ANTICORRUPCIÓN DESATA UN DEBATE JURÍDICO

La creación de una Fiscalía especializada en la persecución y castigo de los casos de corrupción comenzó a crear controversia entre los juristas, algunos de los cuales consideran que las funciones de esa institución restarían competencia a los fiscales distritales y contravendrían a la Constitución. "El punto nervioso es que sus funciones se confrontarían con la competencia del fiscal, ya que tendría jurisdicción nacional", explicó el jurista Julio Cury, al exhortar a los legisladores a realizar un examen detallado para impedir que la aprobación del proyecto determine alguna acción anticonstitucional. Cury indicó que el establecimiento de la nueva dependencia también podría necesitar de diversos cambios legales con la meta de evitar contradicciones entre la pieza legislativa que la fundamentará, la Constitución de la República y otras leyes. Recordó que de acuerdo con el artículo 55 de la Constitución, los funcionarios que dependan del poder Ejecutivo de ninguna forma pueden gozar de inamovilidad, como ocurre con el titular del ministerio público y los fiscales distritales. "No se puede obrar a la ligera al crear una nueva institución de esta categoría", agregó Cury, al insistir en la necesidad de que los legisladores analicen con detenimiento la pieza presentada el pasado 22 de agosto ante el Congreso Nacional por el consultor jurídico de la Presidencia, Guido Gómez. El proyecto de Ley para la Creación de la Fiscalía Nacional Anticorrupción prevé que la institución goce de autonomía e independencia económica, política y administrativa. La pieza legislativa, que consta de 20 artículos, también considera necesario que el titular de la dependencia, quien tendría jurisdicción nacional, sea elegido por el Senado de una terna presentada por el Presidente de la República por un período inamovible de cinco años. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: NUEVO PRESIDENTE PROPONE QUE EL FISCAL NACIONAL ANTICORRUPCIÓN SERÁ INAMOVIBLE DURANTE CINCO AÑOS

El Fiscal Nacional Anticorrupción será designado por un período de cinco años, e inamovible, por el Congreso Nacional, según el proyecto de ley sometido ayer ante el Senado de la República por el presidente Hipólito Mejía. El Fiscal Anticorrupción será inamovible por la naturaleza de sus funciones, salvo que cometa una falta grave y previa comprobación de la misma, y sólo podrá ser destituido por las causas graves. El funcionario se ocupará principalmente de las denuncias sobre los casos de peculado, cohecho, soborno, extorsión, concusión, agiotismo, fraudes en el sistema financiero, enriquecimiento ilícito, y acciones fraudulentas en general, que impacten los recursos del fisco o de las instituciones del sector público, incluyendo aquellas que participen colateralmente con el sector privado, las autónomas y descentralizadas, creadas por leyes especiales. De igual forma, el Fiscal Anticorrupción, en representación de la sociedad, podrá constituirse en parte civil contra todos aquellos que hayan actuado en perjuicio del patrimonio del Estado dominicano, sin ser

necesariamente autorizado por el Presidente de la República, y todo lo reivindicado pasará al Fiscal Nacional. El mensaje presidencial que acompaña la pieza legislativa explica que el Fiscal Anticorrupción tendrá como objetivo la persecución eficaz de aquellos servidores públicos que en el ejercicio de sus funciones incurran en la comisión de actos de corrupción. El mandatario explica a los senadores que el proyecto de ley facultad a la Fiscalía Nacional Anticorrupción para que, además de adoptar las acciones requeridas para la prevención, la investigación, la identificación e individualización de los actos de corrupción se encargue de la difusión de los valores y principios de probidad, integridad y transparencia en los manejos de los asuntos públicos. "Espero, pues, que los legisladores, compartan conmigo la importancia que tiene para el saneamiento de nuestra vida institucional, la adopción del nuevo estatuto legal que someto a su consideración, por lo que espero que impartan al mismo su voto de aprobación", dice el presidente Mejía en su mensaje a los congresistas. La Fiscalía Nacional Anticorrupción gozará de autonomía e independencia económica, política y administrativa, según lo establece el artículo 1 de la ley que lo instituye y actuará en representación de la ciudadanía. Tendrá competencia en todo el territorio de la República, y su sede en Santo Domingo, constituyendo delegaciones en los departamentos judiciales y distritos judiciales que considere convenientes. La Fiscalía Anticorrupción recibirá, tramitará y procederá a investigar denuncias en torno a actos de corrupción cometidos por mandatarios o servidores públicos, magistrados, dignatarios, autoridades, funcionarios y empleados de los organismos del Estado y las personas particulares involucradas en los hechos que se investigan y de encontrarse indicios de responsabilidad penal en las referidas investigaciones pondrán sus conclusiones en conocimiento del ministerio público, de la Contraloría General de la República o del órgano jurisdiccional que fuere competente de acuerdo con la ley. El Fiscal Nacional Anticorrupción será designado por el Congreso Nacional por un período de cinco años, de una terna presentada por el Presidente de la República. El Listín, 23 de Agosto de 2000 <http://listin.com.do/>

REPUBLICA DOMINICANA: TOMA POSESIÓN NUEVO TITULAR DEL DEPARTAMENTO DE PREVENCIÓN DE LA CORRUPCIÓN

En la toma de posesión, el nuevo titular del Departameto de Prevención de la Corrupción, Jesús Félix, se comprometió a que durante su gestión "nadie, ni de esta administración, ni de gobiernos pasados, incidirá en mi trabajo, ni con una llamada telefónica, ni con una tarjeta". Al ser juramentado en el cargo por el consultor jurídico de la Presidencia, Guido Gómez Mazara, Félix aseguró que "voy a reivindicar el anhelo de la población en el sentido de que el dinero del pueblo no se va quedar en los bolsillos de los funcionarios". Félix, cuyo departamento desaparecería en caso de que el Congreso apruebe la creación de la Fiscalía Nacional Anticorrupción, indicó que revisará todos los expedientes sobre corrupción que reposan en la Procuraduría General de la República y someterá ante la justicia a todas las nuevas denuncias que estén fundamentadas de manera suficiente. El Listín, 24 de Agosto de 2000 <http://listin.com.do/>

URUGUAY: DENUNCIAN PASIVIDAD DE ORGANISMOS FISCALIZADORES

"El contrabando y la ilegalidad están causando verdaderos destrozos en el comercio y la industria instalada en el interior del país, y el gobierno parece no tener una verdadera dimensión de esta situación" afirmó Helios Maderni, presidente de la Comisión de Relacionamiento con el Interior de la Cámara de Industrias del Uruguay. Maderni dijo que la industria ha declarado su falta de competitividad, pero en el interior, el contrabando y las prácticas desleales de comercio son alarmantes, y a ello se suma la inactividad. Como consecuencia, las ventas del comercio establecido y la producción están lejos de contrarrestar esos efectos perniciosos. "Creo que el gobierno no tiene

conciencia cabal de lo que está pasando en el interior" sostuvo el dirigente, y se remitió a sendas declaraciones de instituciones empresariales de dos zonas del país. El 8 de julio, representantes de la CIU (Camara de Industrias del Uruguay), CEDU (Confederación Empresarial del Uruguay) y los Centros Comerciales de Lascano, Castillo, Rocha, Cerro Largo y Treinta y Tres resolvieron "reclamar a los gobiernos nacional y departamental, que se cumplan las leyes que combaten el contrabando y el informalismo que afectan y provocan la crisis actual de la industria y el comercio establecido". El 25 de julio, los Centros Comerciales del departamento de Colonia y la CIU se reunieron con legisladores del departamento por el tema contrabando y comercio informal. Preocupados por el "desmedido avance" de ambas actividades, se denuncia "la pasividad de los órganos encargados del contralor impositivo y de la seguridad social" frente a hechos evidentes de prácticas desleales de comercio. Maderni dijo que en las giras realizadas por el interior, las entidades locales han denunciado la impunidad con la cual actúan el contrabando y el informalismo, así como la corrupción que evidencian los controles aduaneros. Estas opiniones fueron trasladadas por los dirigentes capitalinos al director nacional de Aduanas, Jorge Sienra, reclamándole la aplicación de las medidas que prevé la propia ley al respecto. "Es imprescindible que se haga algo de inmediato para frenar estas actividades" subrayó Maderni. "Se habla de ´peces gordos´ o de gente que hace contrabando en gran escala" agregó, sin que por ello se tomen las medidas adecuadas. Diario el País, 21 de Agosto de 2000 <http://www.diarioelpais.com/>

URUGUAY: LA ASOCIACIÓN DE TRABAJADORES DE LA SEGURIDAD SOCIAL DENUNCIÓ UN ``DESVÍO DE FONDOS``

Una delegación de la Asociación de Trabajadores de la Seguridad Social (ATSS) afirmó que los funcionarios que cumplen tareas inspectivas nunca recibieron los fondos destinados a locomoción y que esos dineros fueron "desviados" o producto de un "mal uso presupuestal". Daniel Inthamoussu, miembro de la asociación, dijo el lunes 14 en una Comisión de Diputados que el gremio hizo averiguaciones sobre el destino de los dineros para locomoción y concluyó que existe "un problema administrativo, un mal manejo de los fondos". Solicitó que se investigue qué se hizo con ese "crédito presupuestal". "El crédito presupuestal asignado para locomoción y para otra partida de compensación que percibimos, existe. Se nos dijo que hubo un problema administrativo, pero desde nuestro punto de vista hubo un desvío de fondos --han pagado otras cosas que no son locomoción--, una falta administrativa o un mal uso presupuestal, que se intentará tapar rebajando nuestras partidas y haciendo ver que se trata de un recorte", señaló el sindicalista. El Observador, 23 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: SE DEFIENDE EX MINISTRO DE TURISMO, DIJO QUE NO COMETIÓ DELITO DURANTE SU GESTIÓN

El ex ministro de Turismo, Benito Stern, dijo ayer que las trasposiciones de rubros que ordenó durante su gestión no significaron un "abuso de funciones" y que tampoco obtuvo por ello "beneficio personal alguno". En una declaración distribuida a los medios, Stern se defendió de la denuncia penal que presentaron las actuales autoridades del Ministerio de Turismo y del pedido de procesamiento en su contra del fiscal Enrique Moller, por el delito de abuso de funciones. Moller también pidió el procesamiento por coautoría de falsificación de documento, del ex director general de Turismo, Juan Rodríguez Siri, de un gerente y de un funcionario de esa cartera. En su declaración, Stern dijo que si bien "formalmente" el procedimiento de trasposición de rubros "puede ser cuestionable", la "necesidad lo impuso dado que hubo de optarse entre un Ministerio de Turismo sin actividad ni promoción suficiente (...) o una cartera que cumpliera legítima y plenamente con sus funciones,

aunque tuviera para ello que alterar el destino de los gastos". "No hemos incurrido en conductas dolosas ni en abusos que significaran beneficio personal alguno. Si hay otros hechos, ocurridos en la vida administrativa, que merezcan esos calificativos, somos ajenos a ellos", afirmó Stern. El Observador, 18 de Agosto de 2000 <http://www.observador.com.uy/>

URUGUAY: UN EX MINISTRO DE TURISMO PODRÍA IR A LA CÁRCEL POR MALVERSACIÓN DE FONDOS

El ex ministro de Turismo, Benito Stern, podría ir a la cárcel por haber desviado fondos de la ley de subvenciones turísticas. El miércoles fue rechazado el recurso de nulidad presentado por la defensa del ex ministro, quien alega inmunidad constitucional. La fiscalía considera que el ex ministro no goza de inmunidad y que por lo tanto el proceso judicial debe continuar su marcha. Benito Stern fue titular de la cartera de Turismo durante el gobierno de Julio María Sanguinetti, y es miembro del Partido Colorado. La acusación partió del actual ministro Alfonso Varela, también del Partido Colorado, pero integrante de la Lista 15, que responde al actual Presidente Jorge Batlle. Según la Ley Anticorrupción y si se comprueba la culpabilidad del ex ministro, éste podría ir a prisión de tres meses a tres años. No podrá ocupar cargos públicos en un período de dos y cuatro años, y podría llegar a pagar una multa que va desde los 160 a los 50 mil dólares. Si Benito Stern es condenado a prisión, sería el segundo caso de un político que va a la cárcel por cometer delitos de "cuello blanco". El primero fue el contador Enrique Braga, hombre vinculado al Partido Nacional y de confianza del ex presidente, Luis Alberto Lacalle. Lacalle estuvo en el poder entre 1990 y 1995. Su gobierno es catalogado como uno de los más corruptos de todos los tiempos. Informativos Net, España (Uy/QR/Au/Ppc/ap), 18 de Agosto de 2000 <http://www.informativos.net/>

What kind of mailer software is THAT broken?

(mail.listserv.gmd.de[192.88.97.5]) -- shouldn't a SMTP dialog start with HELO, then MAIL FROM: and RCPT TO: ??

Transcript of session follows.

In: Private Rundfunkanbieter fordern rasche Erneuerung der Medienpolitik

Out: 502 Error: command not implemented

In:

Out: 500 Error: bad syntax

In: Eine rasche Erneuerung der Medienpolitik hat der Pr?sident des Verbandes

Out: 502 Error: command not implemented

In: Privater Rundfunk und Telekommunikation (VPRT), J?rgen Doetz, angemahnt.

Out: 502 Error: command not implemented

In: Derzeit sei ein erlahmender Reformeifer auf diesem Feld festzustellen,

Out: 502 Error: command not implemented

In: sagte er am Freitag zum Abschluss der Jahreshauptversammlung in Berlin.

Out: 502 Error: command not implemented

In: Die Politik sei dabei, dieses wichtige Thema auf die lange Bank zu

Out: 502 Error: command not implemented

In: schieben. Deshalb habe der VPRT den Entwurf f?r einen

Out: 502 Error: command not implemented

In: Medienstaatsvertrag erarbeitet, der m?glichst rasch in konkrete

Out: 502 Error: command not implemented

In: Ergebnisse umgesetzt werden soll. Dieses erste Konzept f?r eine

Out: 502 Error: command not implemented

In: umfassende Neuordnung soll alle bestehende gesetzlichen Regelungen

Out: 502 Error: command not implemented

In: abl?sen. Ziel sei es, sagte Doetz, "bestehende Schieflagen zu

Out: 502 Error: command not implemented

In: beseitigen". Ein zentraler Punkt des Entwurfes ist die Gew?hrleistung

Out: 502 Error: command not implemented

In: des freien Zugangs der Rundfunkveranstalter zu den Kabelnetzen und

Out: 502 Error: command not implemented

In: digitalen Plattformen. Ein derzeit akutes Problem bestehe in der

Out: 502 Error: command not implemented

In: Auseinandersetzung mit den privaten Erwerbern der liberalisierten

Out: 502 Error: command not implemented

In: Kabelnetze. Die Investitionen zum Ausbau der Netze machten neue

Out: 502 Error: command not implemented

In: Gesch?ftsmodelle notwendig. Doetz sagte, der private Rundfunk sehe mit

Out: 502 Error: command not implemented

In: Sorge, wie dabei versucht werde, das Rundfunkangebot zu Gunsten anderer

Out: 502 Error: command not implemented

In: Felder auszuf?llen. "Das ist aber der falsche Weg", sagte Doetz. "Ohne

Out: 502 Error: command not implemented

In: uns sollte das Angebot nicht neu geordnet werden." Der VPRT fordert,
Out: 502 Error: command not implemented
In: dass ein Drittel des ausgebauten Kabelnetzes f?r den Rundfunk und seine
Out: 502 Error: command not implemented
In: Angebote reserviert bleiben muss. Diese Forderung schlie?e ausdr?cklich
Out: 502 Error: command not implemented
In: auch die ?ffentlich-rechtlichen Anbieter ein, denn der Vorsto? der
Out: 502 Error: command not implemented
In: privaten Kabelnetzbetreiber richte sich gegen den Rundfunk insgesamt.

What kind of mailer software is THAT broken?

(mail.listserv.gmd.de[192.88.97.5]) -- shouldn't a SMTP dialog start with HELO, then MAIL FROM: and RCPT TO: ??

Transcript of session follows.

Out: 502 Error: command not implemented

In:

Out: 500 Error: bad syntax

In: Eine rasche Erneuerung der Medienpolitik hat der Pr?sident des Verbandes

Out: 502 Error: command not implemented

In: Privater Rundfunk und Telekommunikation (VPRT), J?rgen Doetz, angemahnt.

Out: 502 Error: command not implemented

In: Derzeit sei ein erlahmender Reformeifer auf diesem Feld festzustellen,

Out: 502 Error: command not implemented

In: sagte er am Freitag zum Abschluss der Jahreshauptversammlung in Berlin.

Out: 502 Error: command not implemented

In: Die Politik sei dabei, dieses wichtige Thema auf die lange Bank zu

Out: 502 Error: command not implemented

In: schieben. Deshalb habe der VPRT den Entwurf f?r einen

Out: 502 Error: command not implemented

In: Medienstaatsvertrag erarbeitet, der m?glichst rasch in konkrete

Out: 502 Error: command not implemented

In: Ergebnisse umgesetzt werden soll. Dieses erste Konzept f?r eine

Out: 502 Error: command not implemented

In: umfassende Neuordnung soll alle bestehende gesetzlichen Regelungen

Out: 502 Error: command not implemented

In: abl?sen. Ziel sei es, sagte Doetz, "bestehende Schieflagen zu
Out: 502 Error: command not implemented
In: beseitigen". Ein zentraler Punkt des Entwurfes ist die Gew?hrleistung
Out: 502 Error: command not implemented
In: des freien Zugangs der Rundfunkveranstalter zu den Kabelnetzen und
Out: 502 Error: command not implemented
In: digitalen Plattformen. Ein derzeit akutes Problem bestehe in der
Out: 502 Error: command not implemented
In: Auseinandersetzung mit den privaten Erwerbern der liberalisierten
Out: 502 Error: command not implemented
In: Kabelnetze. Die Investitionen zum Ausbau der Netze machten neue
Out: 502 Error: command not implemented
In: Gesch?ftsmodelle notwendig. Doetz sagte, der private Rundfunk sehe mit
Out: 502 Error: command not implemented
In: Sorge, wie dabei versucht werde, das Rundfunkangebot zu Gunsten anderer
Out: 502 Error: command not implemented
In: Felder auszud?nnen. "Das ist aber der falsche Weg", sagte Doetz. "Ohne
Out: 502 Error: command not implemented
In: uns sollte das Angebot nicht neu geordnet werden." Der VPRT fordert,
Out: 502 Error: command not implemented
In: dass ein Drittel des ausgebauten Kabelnetzes f?r den Rundfunk und seine
Out: 502 Error: command not implemented
In: Angebote reserviert bleiben muss. Diese Forderung schlie?e ausdr?cklich
Out: 502 Error: command not implemented
In: auch die ?ffentlich-rechtlichen Anbieter ein, denn der Vorsto? der
Out: 502 Error: command not implemented

Shortly before the release of Postfix, one of the alpha testers (Elon Gishri) received lots of SMTP protocol error notifications from Postfix, and they all looked like sessions that began with mail body material (in his case, lots of HTML-formatted mail).

The listserv at gmd.de was one of the few sending machines involved. Tcpcdump recordings showed that the SMTP client indeed began a session with mail content instead of HELO. The problem was never resolved, whether it was due to a BANDWIZ bandwidth management system or due to LSMTP mixing up data streams.

If this happens more often, it's worthwhile to capture the SMTP sessions with tcpcdump.

Wietse

Ralf Hildebrandt:

Shortly before the release of Postfix, one of the alpha testers (Elon Gishri) received lots of SMTP protocol error notifications from Postfix, and they all looked like sessions that began with mail body material (in his case, lots of HTML-formatted mail).

The listserv at gmd.de was one of the few sending machines involved. Tcpdump recordings showed that the SMTP client indeed began a session with mail content instead of HELO. The problem was never resolved, whether it was due to a BANDWIZ bandwidth management

system or due to LSMTP mixing up data streams.

If this happens more often, it's worthwhile to capture the SMTP sessions with tcpdump.

Wietse

Ralf Hildebrandt:

[I Don't Like Your Examples!](#)
I, thankfully before buying the book, was able to peruse a copy of your latest PL/SQL programming book. I think you have forgotten one basic principle when you planned the examples. This was supposed to be a book about PL/SQL, not blatant sociopolitical rantings. If I had bought the book, I would be returning it immediately for a complete refund. It doesn't matter whether I agreed or disagreed with your views (in some cases I agreed, in some cases I strongly disagreed). I found the examples so distracting that I was unable to get the information I needed out of the book. Please in the future, remember that we, the book buyers, are looking for information about using PL/SQL. I am as tired of the emp and dept tables as you are, but less distracting

What a cool idea! I love it, I wish he'd send me a camera! [The Photo Trust Project](#)

Every month (or so), I'm going to send a disposable camera out to a different person that I've met through the web or been inspired by. The photo part of the title is easy to understand, but the 'trust' element actually comes into play even more often. I have to trust that I'll actually get my camera back, and everyone taking a picture on the roll has to trust that the people ahead of them will continue through completion.

[Zen and the Art of Index Investing](#)

But in investing, as in theology, there's an awful lot to be said for consistency. It's equally difficult, the indexers add, to try to time your investments. Better by far to practice dollar-cost averaging. If you invest regularly, then eventually you'll find you have bought on the dips as well as the peaks. But look what's really happening: lots of money going into index funds when the market seems to be surging ahead, much less when it's lagging. Why? I suspect that the hardest

2000 US Marines land in [Yemen, sparking occupation fears from the citizens.](#)

"The longer they stay, the more problems there will be," said Awadi, a shopkeeper standing in the sultry Tawil marketplace. "It's OK for ordinary Americans to be here, but soldiers with guns, people won't like that. The religious Muslims won't like that."

Submitted on Oct 22 2000 - 23.26 by cj

More children die [with a rock as weapon and a proud parent.](#) oh lament the insanity of it all...

"My son was a man who defended Jerusalem and I am ready to sacrifice more," said Imad, 52, who has nine more sons and eight daughters. "At least he died with a stone in his fist."

Submitted on Oct 22 2000 - 23.10 by cj

from the American Petroleum Institute (API) industry group served as a reminder of how vulnerable the world's largest oil consumer will be to any supply disruptions in the next few months. Inventories are almost 21 million barrels below year-ago levels and just two million above a 24-year low hit in August.'

What some of the pros are [buying and selling...](#)

Microsoft's numbers [come out today...](#)

'Indeed, Microsoft itself has turned into the biggest drag on the Dow Jones Industrial Average this year, lopping off a total of 392.52 from the blue-chip index since the beginning of the year.'

SUBWAY [SERIES!!!](#)

'And so a half-century after Willie, Mickey and the Duke dominated baseball, it will be Bernie, Benny and El Duque in the first Subway Series since the Yankees beat the Brooklyn Dodgers in 1956.'

Chase (CMB) who was already eyed skeptically for paying 4 times the value for JP Morgan now [also misses forecasts...](#)

'The No. 2 U.S. commercial bank said earnings excluding one-

consumers who are especially concerned about safety should install security software to protect their computers.'

Submitted on Oct 23 2000 - 08.16 by diva

Pretty cool...a woman in Canada saves the life of an attempted suicide in Scotland [via a chat room...](#)

'The man, who had taken the lethal Valium and alcohol cocktail while depressed, asked for help in the chat-room. He was apparently having difficulty typing and was slurring his words while speaking via his computer microphone. The woman in Calgary called the emergency services in Canada and informed them of the situation. Quick-thinking staff at Calgary Emergency Medical Serve contacted Scottish police, who whipped an ambulance round to the man's home and took him to hospital in Bannockburn, northwest of Edinburgh, where he was treated.'

Submitted on Oct 23 2000 - 08.13 by diva

Taking a movement you don't understand and co-opting it to fit your own personal

part of the indexing faith for most folks to embrace is the most Zen-like: Only in the Fullness of Time will we know that we did the right thing. I have trouble with that part myself. But then I reflect that about 30% of the U.S. equity holdings of institutional funds — many of them run by people who have to invest with one eye on an actuarial table — are pegged to an index, and the proportion is growing.

[radio broadcasting](#)

market with RealAudio 8, a higher quality low bandwidth solution aimed at reducing broadcasting costs...

Bandwidth can account for as much as 95 percent of the cost of broadcasting existing content on the Internet. RealNetworks says the new file format will allow broadcasters to deliver the same quality sound at two-thirds of the bandwidth cost. Because RealNetworks software is widely used by broadcasters, a 30 percent cost savings could make the industry more viable.

Pretty cool...a woman in Canada saves the life of an attempted suicide in Scotland [via a chat room...](#)

'The man, who had taken the lethal Valium and alcohol cocktail while depressed, asked for help in the chat-room. He was apparently having difficulty typing and was slurring his words while speaking via his computer microphone. The woman in Calgary called the emergency services in Canada and informed them of the situation. Quick-thinking staff at Calgary Emergency Medical Serve contacted Scottish police, who whipped an ambulance round to the man's home and took him to hospital in Bannockburn,

dollar-cost averaging. If you invest regularly, then eventually you'll find you have bought on the dips as well as the peaks. But look what's really happening: lots of money going into index funds when the market seems to be surging ahead, much less when it's lagging. Why? I suspect that the hardest part of the indexing faith for most folks to embrace is the most Zen-like: Only in the Fullness of Time will we know that we did the right thing. I have trouble with that part myself. But then I reflect that about 30% of the U. S. equity holdings of institutional funds â€” many of them run by people who have to invest with one eye on an actuarial table â€” are pegged to an index, and the proportion is growing.

Femenino.net.art: feminización de la cultura y red Internet

Remedios Zafra

Femenino.net.art: feminización de la cultura y red Internet forma parte de la tesis doctoral "Arte, Internet y Colectividad: nuevas prácticas artísticas de la red y nuevas formas de Colectividad y Acción Social".

Teniendo en cuenta que lo femenino ha sido uno de los "otros" visibilizados en las últimas décadas, origen y sentido de relevantes cambios sociales, nos encontramos con la dificultad que supone "definirse" para la mujer o para cualquier "otro" que haya estado excluido del juego social. A partir de esta dificultad indagamos en el doble juego de deconstrucción de su imagen pasada y la afirmación de un "querer ser" (darse forma a sí mismo), sólo posible como proceso (siempre inacabado). De esta manera vemos cómo se favorecen 'identidades' que rehuyen el esencialismo y se definen en lo provisional. Teniendo en cuenta que muchas manifestaciones de la provisionalidad y multiplicidad en nuestra cultura, incluida la adopción de personalidades online, están contribuyendo a un replanteamiento general de las tradicionales concepciones unitarias de la identidad, las experiencias en la red Internet nos ayudan a elaborar estas nuevas visiones del "yo".

En Internet el mundo (nosotros) sólo existe en nuestros representantes (temporales), en el e-mail, en el chat, en la WWW,.... en la interacción concluida. El mundo en Internet es "un chapoteo, una polvareda", una estela que se autodestruye cuando finaliza la comunicación. En Internet aquella idea de Deleuze en relación al pensamiento Leibniziano que sugiere una percepción por texturas y no por estructuras, tendría un referente. Las texturas son las que conforman múltiples posibles formas de ser y hacer en la red, son las que liberan el inconsciente (como quien se disfraza para dar rienda suelta a sus facetas más escondidas y liberadoras). Texturas y pliegues que se convierten en autónomos y desbordan al cuerpo, bien para destruirlo, reestablecerlo o elevarlo, pero siempre para darle la vuelta y moldear su interior.

Para indagar en todo ello hemos ideado una estructura conceptual que engloba dos apartados que atenderán a los siguientes criterios de organización: en un primero esbozaremos un análisis desde enfoques históricos y sociológicos de la relación mantenida entre mujer, arte y tecnología en los últimos cincuenta años.

1. CONSTRUCCIONES SOBRE EL GÉNERO, LA TECNOLOGÍA, EL TRABAJO Y EL ARTE EN LO RELATIVO A LA MUJER

En un segundo nos acercaremos a las prácticas y recorridos artísticos y políticos online y especularemos sobre el papel de las mujeres en los nuevos espacios tecnológicos y artísticos de la red Internet, así como sobre las posibilidades de dar por cumplidas las esperanzas emancipatorias, deconstructivistas y feminizadoras de la mujer en la red.

2. EL PODER DE LO SUBVERSIVO EN LA FEMINIZACIÓN DE LOS NUEVOS ESPACIOS ARTÍSTICOS Y TECNOLÓGICOS

Para ello nos acercaremos a las distintas visiones que sobre el ciberfeminismo se están gestando y analizaremos proyectos de net.art que tratan de manera explícita el tema del género y en los que colisionan "arte, feminismo e Internet" y aquellos que, si bien no introducen explícitamente cuestiones feministas en sus obras, investigan líneas propias del metalenguaje de la red, indagando sobre los límites que separan lo real de lo virtual, los nuevos lenguajes que cuestionan las formas convencionales de narratividad, y la re-creación de subjetividades ficticias y virtuales en un nuevo espacio epistemológico y existencial del ser.

En estos dos apartados apuntaremos distintos conceptos sobre la feminización para llegar al que surge subversivamente de lo 'no dicho' y proclama su espacio de acción en las nuevas estructuras tecnológicas donde se están construyendo los sistemas de comunicación del futuro. Para ello acudimos al pensamiento de Derrida y de Kristeva para los que la mujer es la sede privilegiada desde la cual es posible desmontar el pensamiento occidental falocéntrico. También encontramos importantes referencias en las propuestas de escritura femenina de Cixous según la cual se pretendía desarticular (deconstruir) el discurso dominante, bajo una primacía, no de la mirada sino de lo simultáneo, lo que fluye, lo que se opone a todo tipo de figura o idea rígidamente

construido. Esta propuesta, que nosotros vinculamos a las escrituras online, plantean una estrategia de destrucción del modo de funcionamiento del discurso tradicional, una relación de una "economía femenina" cercana al cuerpo, a lo que fluye, al ritmo, y opuesta a la economía masculina apoyada en lo filosófico, lo simbólico y lo discursivo. Esta sería una escritura que hablaría de lo inconsciente, lo reprimido, lo excluido, de los miedos y deseos no materializados. Escritura que se relacionaría con "lo otro viviente", lo "otro salvado" lo "otro ya no amenazado por la destrucción", proponiendo una feminidad que sería el "verdadero objetivo de ambos sexos".

En esta propuesta de feminización de la cultura podemos encontrar coincidencias en la crítica filosófica del esencialismo de Derrida. Tal vez, paradójicamente, pues aunque la idea de esencia es rechazada por la teoría posestructuralista, (recordemos que para Derrida el esencialismo era cómplice de la metafísica occidental y plantear la oposición hombre-mujer suponía plantear un falso universalismo -seguir prisionero de la metafísica con su ilusión de presencia, ser identidades estables-) el programa de "écriture feminine" que se basa en los mismos fundamentos, sí se mueve ocasionalmente hacia posturas esencialistas.

No podemos pensar ninguna realidad auténtica que no contemple la importante dimensión que todo (cualquier) real excluye. Es lo excluido (lo "otro") lo que marca las economías del deseo, así como de los cambios sociales y políticos, lo que marca la tensión mantenida del progreso.

En una sociedad en red, en una época donde no tiene sentido hablar de arte, artista, objeto y sujeto en los mismos términos que hace una década, la diferenciación biológica y sexual basada en la confrontación dual resulta insuficiente y se torna poco concreta. Las identidades fijas y condicionadas, reforzadas por una imagen del género como herramienta de subordinación, propiciatorias de una actuación políticamente diferencial (y por supuesto no neutral), dejan paso a identidades múltiples, re-hechas, re-articuladas, que intervienen su anterior lógica binaria y la subvierten.

Estrategias de (auto)creación basadas en el injerto, en la re-contextualización de fragmentos, en el copy-paste, convierten el interfaz, como campo maquínico de mediación intersubjetiva, en un nuevo espacio epistemológico del ser. Cuerpos articulados con escrituras digitales que interrumpen los discursos de la dualidad cuestionando la inmóvil "mismidad" del sujeto en las múltiples morfologías del interfaz, condicionando su inscripción social al efímero de su duración, a su genuina temporalidad y total contingencia.

En el ciberespacio somos cuerpos (géneros) hechos a través de la máquina, con palabras e imágenes, con fusiones y códigos que nos inscriben social y culturalmente mediante una tecno-anatomía. El ratón es a la vida digital (social -en red-) un inmediato y efectivo bisturí que, mediante código y palabras, modela sujetos online cual ciber-cirugía orlaniana.

Históricamente el género ha sido un instrumento de jerarquización proveedor de formas falsas y concretas a los cuerpos. Ahora, en una época donde se cuestiona todo lo aceptado como inamovible, el género se convierte en algo así como un "espectáculo diario" compuesto de imágenes que se dibujan en la pulsión del cambio posible, imágenes en permanente construcción.

En este nuevo espacio hablar de lo femenino nos remite a hablar de "la feminización" de la red Internet, de la acción desjerarquizadora de la misma, en términos de resistencia, deconstructivos. Términos que no supondrían, por tanto, recuperar los atributos tradicionales de la mujer, sino deconstruir el ser "feminizado" (revelador de una estructura de poder-sometimiento) y ejercitar la voluntad de "querer ser" en un espacio concebido sin jerarquías, un espacio al que se le presupone (sobre todo en sus inicios) una menor carga de prejuicios sobre las formas posibles de ser en el mundo. Esta feminización, tal como sugiere Derrida, debe "por un gesto doble, una ciencia doble, una escritura doble, practicar una inversión de la oposición clásica y un desplazamiento general del sistema".

Si recordamos la construcción de la conciencia feminista anterior y posterior a los setenta tiene en la naturaleza de la identidad femenina un punto de inflexión en su tratamiento y consideración. A principios de esta década (los setenta) las artistas empezaron a ser verdaderamente conscientes de la artificialidad y del poder represivo de la "construcción social del género". Uno de sus objetivos sería descubrir en una imagen de sí mismas (gravemente deteriorada por el pasado, la historia y la imposición social de un papel a cumplir) una auténtica voz que pudieran utilizar como sustento para una nueva construcción de su identidad.

De esta manera, concebir una feminización de las prácticas artísticas de la red implica, más allá de suponer solamente la presencia femenina en dichas prácticas, indagar si su presencia y su labor incita una deconstrucción de los modelos de enfrentamiento dual en torno al género.

- Deconstrucción mediante dispositivos digitales, protocolos, lenguajes hipertextuales, correo electrónico, código ... todos ellos piezas clave en la producción de l@s net.artistas a lo largo de la última década. Dispositivos donde la "matriz" como comienzo, origen, principio de sentido - también digital- es una de las metáforas de acción y teorización recurrente y de mayor carga simbólica. Con esta analogía nos adelantamos a la dualidad bajo la que hemos construido nuestra estructura social y moral, cuya raíz descubrimos en el código binario de nuestro sexo y en el código digital de la máquina.
- Deconstrucción mediante nuevos lenguajes. Palabras que se dimensionalizan, sistemas conceptuales que abandonan nociones como linealidad, centro, margen o jerarquía y las reemplazan por otras apoyadas en multilinealidad, enlaces, nodos y redes de relaciones.
- Deconstrucción mediante dispositivos de comunicación global en red, mediante activismo informatizado. No sin motivo las prácticas artísticas más relevantes que desde los años sesenta se han manifestado y consolidado mediante debates estéticos, en lo relativo a la producción femenina, han estado protagonizadas por "mujeres con conciencia de serlo", es decir por artistas que han desarrollado su trabajo desde perspectivas críticas y feministas, desde discursos de la resistencia. En este sentido, Maria Damon nos habla de las "ciberfems de la utopía futurista": un tipo de posfeministas que basan sus acciones en la consideración de la red Internet como espacio óptimo para sacar partido a la incorporeidad del sujeto y la posibilidad de su realización para sí y para el contexto al que se vincula mediante la tecnología. Sadie Plant ejemplifica en sus teorías la importancia de este vínculo "ciber-fems" constatando a través del mismo algunas de las más agudas reivindicaciones de las mujeres en relación a la tecnología, así como la necesidad de tenerla presente en la construcción contemporánea del género, por cuanto su emancipación se verá facilitada en la gestación del ciberespacio como nuevo espacio de acción.

Las producciones de las net.artistas habitantes de esta "frontera", generada a partir de los diversos mundos posibles en torno a la red, tendrían en este contexto una doble lectura. Por una parte, las prácticas que evidencian un tratamiento explícito del género y que se posicionan desde una perspectiva crítica y feminista. Por otra, las producciones que introducen estas cuestiones de manera implícita en la investigación de líneas propias del metalenguaje de la red, en los nuevos lenguajes que cuestionan las formas convencionales de narratividad, y en la re-creación de subjetividades ficticias en el nuevo espacio epistemológico y existencial del ser.

Por otra parte, no podemos olvidar que la feminización que promueven estas prácticas no es exclusiva de la mujer, y entre las producciones y actitudes de artistas como VNSMatrix, Anne de Haan, Shu Lee Cheang, Victoria Vesna o Kathy Rae Huffman, y entre las proclamas "The vagina is the boss on the Internet" o "The clitoris is a direct line to the matrix", encontramos también exponentes -más sutiles- en los Keikos Suzukis y las Sociedades Anónimas del ciberespacio, en cuyos gestos descubrimos también el carácter diferencial y deconstructivo de Internet.

Y es que aquí, en la frontera de los mundos posibles, no es difícil imaginar un futuro cuyas producciones artísticas tengan detrás de sí, no artistas, ni hombres, ni mujeres, sólo productores y sociedades anónimas con nostalgia, o tal vez no, de su cuerpo.

En la red lo "no dicho" adquiere otra dimensión, parece como si lindásemos su frontera (su abismo), como si acercarnos a "esa ausencia" fuera ahora más fácil. Un mundo por construir siempre es lo más sugerente, un espacio en blanco para quien ha visto rellenar y usurpar su espacio a otros, es, cuando menos, una oportunidad para adueñarse de sus actos, de su vida. Y aun cuando esta sensación es efímera, y podemos decir que dura 'un instante', 'un infraleve', lo que dura la ilusión del espacio virgen antes de ser mancillado por la ausencia de imaginación y la repetición de los mismos parangones sociales y los mismos temores a la diferencia, el deseo sigue perviviendo, y en relación a la red, el deseo es el motor de la construcción de un lugar de "lo individual" y de "lo común" para todos.

Hacking vs Hacktivism: Sniffing the net

Outline of my research during my grant period in MECAD

Jenny Marketou

2000-2001

<http://smellbytes.banff.org>
Sniffing/Splashing 2000 (CD-ROM)

"As hackers become politicized and as activists become computerized, we are going to see an increase in the number of cyber-activists who engage in what will become more widely known as Electronic Civil Disobedience."
Stefan Wray, 1998

The discussion of the political impact of the internet has focused on a number of issues: Access, technological determinism, encryption, commodification, software, intellectual property, the public sphere, decentralization, anarchy, hacktivism, gender." On the other hand the net is the paradise of no-copyright, plagiarism, confusion and exchange. Hacking means reappropriating, reforming and regenerating not only culture but also redefining systems and processes, and it can account for a new coinage when the process is an open system. There is no question that Hacktivism is a new breed of activism -- wired and confrontational.

My current investigation has been focused on hacking vs hacktivism and the role those actions have played in the construct of a sociopolitical imaginary in our networked culture . I am particularly interested a how the above tactics have been dynamically appropriated and how the computer underground hacktivism has been infiltrated and interpreted in the work of many internet artists and collective groups working on the net as a meaningful political activity and radical practice.

Some of the following topics I would like to address:

- 1- Defining characteristics of the internet and therefore of "hacktivism".
- 2- Hacking vs Activism vs Electronic Civil Disobedience vs meaningful political practice.
- 3 Hacking + hacktivist culture and the e- community that hackers + hacktivist claim to embody.
- 4- What about e-Girl e-Geeks?
- 5 -Hacktivism as a conceptual art practice and artists as cultural hackers.
- 6- Hacktivism as performance, as hard sport, as an activist intervention, as radical practice/subversion, as erotic fantasy.
- 7- Stunts and Pranks and other tactics.
- 8- Sensationalism and e-Media Hype.
- 9- Other artistic - isms -contemporary or historical as basis for comparison.

In reference to the above research the following interviews have been published and projects and panels have been presented by the artists.

- 1-Interview Jenny Marketou with Cornelia Sollfrank, Artist, "Hacking Sublime", SYNOPSIS 1, catalog, Museum of Contemporary Art, Athens, Greece, September 2000.

2- Interview Jenny Marketou with Claudia Giannetti, Director, MECAD, Hactivism No 5 MECAD e-journal on-line, MECAD, Sabadell, Spain, 2001.

3- Open Source Lounge: Game Patching and Hacking Sublime and Viewers as Artists, a collective project, organised by Jenny Marketou in collaboration with Steve Dietz, curator of New Media Initiatives, Walker Art Center, USA. This project was first presented during the Medi@terra 2000, Art and Technology Festival, Athens, Greece.

4- NO CENSORS/ DYSTOPIA, 2001. A panel discussion with Marina Griznic, Natalie Bookchin and Jenny Marketou organized by Christine Wang, Curator New Media Initiatives, Alternative Museum, New York City.

The Net Alternative, or, Who's manipulating who? Corporate Sponsors, Public Relations, and Art

Natalie Bookchin

From a talk held at Künstlerhaus Bethanien Feb 2001
<http://www.bethanien.de/mal/netsplit.html>

In preparation for this talk I was sent a series of speculative questions by Gerrit Gohlke proposing issues to be covered on this panel. He suggests that thus far, net art has failed to deliver what it had originally promised. It has not destabilized and offered a way out of the traditional art system or provided access to a social reality through the networks. Proposing a "net split" he argues that many of net art's protagonists have either turned away from art and towards political activism or entered a mainstream art world with worn-out strategies, and he ends by suggesting that perhaps the Internet has been overrated as an aesthetic medium.

I wanted to begin with this summery because it contains some common assumptions about net art that I would like to call into question. First, I should begin by saying that there is no doubt the net is here to stay and artists are and will continue using it. The question proposed as the topic for the panel can not begin to account for the fact that the net has become an indispensable tool and material for numerous artists. Moreover, as audiences on the net get larger so do the possibilities for artists to tap into them. As activities on the net become more formalized, so do the possibilities for artists to manipulate those same forms. Thus, the more relevant question for me is less whether net art is making enough innovative strides at the moment, or if net art failed, but rather how has the net altered artistic production?

I also wonder how useful it is to qualify and limit our understanding of the diverse ways that artists are using now the net by applying the label net art to all these different artistic activities. Such practices include the regular emergence of international collectives and networks of artists developing projects across distances, performative network manipulations (such as this past summer's borderhack project in Tijuana which was as much of an international net performance as it was a live local event), or even the ways in which the net still functions as a cheap and easy method for artists to have direct contact with audiences, regardless of whether they choose to be or are accepted in the traditional art system.

It is not uncommon today in some circles to harp back nostalgically to the early days of net art when there was an apparent wave of creativity that has now subsided, those days when a small international group of people named and produced a lot of "net dot art". Where have they all gone?

But there is another way to think about this. I think the fact that art production on the net was thrust into the limelight very quickly and for a short period of time had more to do with both very creative manipulation of networks and with a growing awareness of how information could travel over the net, than with a rush of artists' websites sweeping the net. These creative manipulations were used in such a way that propelled a particular group of people into a highly visible place, and this activity was then, quite self consciously labeled net.art.

This is not to dismiss early net.art as mere self promotion. Rather I am arguing that the "art" was

located less in the individual web sites and more in the fierce collective manipulation of all aspects of the networks: mailing lists, spam, email, websites, links, web rings and mirrored sites: all devices for trespassing into and parasiting networks for alternative ends. This concerted effort created the earliest net art "movement", a first wave of artists who knew how to work the net.

As Health Bunting wrote to me in an email in 1997,

"i think self promotion is a viable tactic for infiltration in this current art star system. many of my european friends who have not yet suffered advanced capitalism (thatcherism) still have an aversion to these methods."

By focusing primarily on network manipulation, these works took on and engaged the materials of the net. Their self referentiality was an important aspect of an art grappling with new materials and a new medium.

Artists are of course still manipulating the net, but in the most compelling works, the focus is no longer just on the process itself, nor on artists simply directing attention to themselves. For example, it is not enough just to hijack people to your site, as it was in 1995. (Moreover so called hijacking has since been appropriated by the porn industry. Last year a porn company was sued for "hijacking" unwitting audiences who claimed they were taken to porn sites against their will, and their jobs were put into jeopardy when they were discovered by their bosses viewing this same porn). The question for artists now is what to do with your captive audience once you have their attention.

I would like to refer back now to another speculation that I received in the preliminary email about this panel, which suggested that many net artists have moved away from art into political activism. This position assumes that one is either making art or making politics and sets up a great divide between the two spheres. In fact, I think that the net has facilitated just the opposite - that is, an ease in which one can move between different spheres and contexts in the same work, not just referring to, but actually entering into them. It is of little effect for artists to refer to the political only from privileged spaces dedicated to the viewing of art nor the expected social spaces delegated to political activism. The net has made it simple to shuffle between these different areas, permitting artists to show up where they are neither expected nor particularly wanted.

As artists have become more adapt at working the material of the net, questions of how to use this manipulation to engage in different levels and subjects have become more critical. Early net artists' investigations into alternative distribution systems are now being put to use by newer art collectives, but the subject is now not distribution itself, but rather a distributed political or social critique.

Today there are artists whose creative and subversive uses of the net intentionally rub themselves against the grain not just of the art system but of the larger mainstream in a way that produces a quite visible effect. This work reaches sizable audiences unthinkable before the net, stretching as far and wide as the offices of major political candidates, the Pentagon, the director general of the WTO, and frequently showing up in the channels of mainstream media. One recent example is the project voteauction.com, which used all the conventions of the online auction house to highlight and provoke a corrupt system posing as a democracy, and in turn, created a not insignificant ripple in art, mainstream media and political realms.

There is an important legacy of artists who have been concerned not just with the depiction of political content, but with the politics of distribution and display. Since we are in Berlin, I will mention Berlin's own John Heartfield. A proto-net artist of sorts, he made political performance out of the manipulation of his public identity by cutting his name Helmut Herzfeld and pasting a new anglicized one, John Heartfield, in a show of disgust for the nationalist proto-fascist regime under which he was living. Perhaps more relevant to today's conversation were his innovative methods of distribution, whereby he used the new mass media to disseminate his subversive and political photomontages, aiming for and reaching not the galleries and museums, but the streets.

Finally I would like turn to a brief discussion of a project I am currently developing, first because it attempts use the methods I have been outlining and second because it is a project that would be unthinkable without the Internet. It first requires a little bit of background information .

There are a series of shows and commissions on the subject of genetics currently underway in the States. As part of this initiative, I was invited by a NY public art organization to develop a public art project.

Along the way, I made an intermediary piece (with Jin Lee), a power point presentation called Biotaylorism, which addresses how, by combining Taylorist and Fordist methods with biotechnology, organic life is now being internally optimized for better business solutions. The project was included in a traveling exhibit called "Paradise Now, Picturing the Genetic Revolution" in NY this past fall. As it turned out, the show had a range of biotechnology corporate sponsorship, backing an unusually extensive amount of promotion, included full page ads in the NY Times and a panel discussion featuring no artists, but instead biotechnology industry luminaries such as Craig Venter. (CEO of Celera).

This show is not unique. As I mentioned, there are currently underway a number of other such well funded shows and grants to artists to produce work in this area. Regardless of the good intentions of the curators, the bill is being partially footed by biotech companies and their PR firms. And in Europe, Ars Electronica has had biotechnology as its theme for the last 2 years. One of its main sponsors is none other than the Swiss biotech giant, Novartis.

Although corporate sponsored shows on biotechnology are by now nothing new, (see Yvonne Volkart's essay "Art Strategies of the New World Order, or, What do resistant art works look like?") this new burst of sponsorship for "gene-art" coincides with a major PR campaign begun last year by a consortium of the world's seven top biotechnology companies called "Good Ideas are Growing". The industry saw it as a critical time to push for public acceptance of genetic research and development, particularly in the States. While there had been general complacency on the part of Americans in the past in regards to genetically modified foods and research, the mood was starting to change. The aim was thus to avoid a public relations disaster such as the one that had taken place in Europe over the past few years, where biotechnology was met with fierce public resistance. The campaign consists of so called educational science exhibitions, ads, and the sponsorship of genetics-theme based cultural programs such as art exhibitions, conferences and art commissions.

The question was then what do these corporations want from artists, and how can we possibly avoid giving it to them?

Corporate sponsors are pretty certain that artists will serve as a comfortable buffer offering the public non-threatening points of entry into these otherwise threatening industries. With artists making biotechnology and genetics the subject of aesthetic contemplation and creative visual representation, what might have seemed disturbing becomes engaging, accessible and easier to accept as our present reality. Colorful and so called "open discussions" on the complex ethical dilemmas are likely to assuage public anxieties, conveying the impression that democratic discussion is taking place. The very question of whether biotechnology or genetics should continue in their present tracks is not even broached. This instead becomes a given - an inevitability. Less aesthetic questions concerning economic interests are generally not discussed. And by keeping these discussions in the safe spaces delegated to art, even the most critical of questions will not threaten the industry.

In developing a project, it has been essential for me to think tactically about how to negate the instant neutralization of this highly politicized subject. All the issues discussed above - context, distribution, and form - have been essential considerations. For this reason, I realized that I need to make a project that can function autonomously - and move easily in or outside of the sphere of "art". Second, it is critical to make central to the project the issues of economic and corporate interests and how they shape and define the science. Thirdly because images are always easier to co-opt than action, I will set up a structure that will encourage participants to become both invested in and involved with politicized and socially charged actions.

I decided to make an on-line game-called Superpetz (also with Jin Lee) modeled on a virtual Tamagotchi game, where the virtual pet is a human worker and you, the player, become a manager. You begin the game by selecting traits that you think are most desirable for your worker/pet. Next you must run your pet through a genetic screening test, which although unreliable and costly, will determine whether he or she qualifies for health insurance or is employable, and at what level. The test results of course may affect your pet's happiness, anxiety and energy levels. Knowing the potential risks may motivate you to make certain lifestyle choices, should you have enough points to afford to do so.

The game takes place in a virtual work place, where you must earn points to feed, replenish and manipulate your pet. Feeding keeps up energy and happiness levels so that your pet can work efficiently and earn more points. Working your pet depletes its energy and food levels and overwork or over supervision can lower efficiency, happiness and health levels.

There are numerous options for modifying your pet's body and mood to potentially affect its value, performance and job ranking, but these modifications entail costly and at times risky procedures. Overmodification or an abuse of rejuvenators can lead to inefficiency, job demotion, job or insurance loss, and an untimely death.

If you don't have enough money - for example in the case of a pet that has not been given a job or health insurance as a result of the genetic screening test - or if you simply want to earn more points, you can leave the workplace and temporarily enter another game environment where you have other options for earning points. There, you can play a "knowledge game" on the subject of work, science, health or reproduction. Or you can venture into the thrills and challenges of real life actions and participate in a variety of on or off line interventions or subversive projects on the subject, thus earning mega-points for your pet.

One final word in on the net: the net is the only site where we could realistically develop such a project that could function with ease either as a real game, as an investigation into the interests of corporate biotechnology and genetics industries and as an art project, and that in its different faces could potentially attract a broad and not always prepared audience. Using the format of a game puts players inside the story, implicating them in this political narrative, and the net allows me to subsequently direct these same audiences/players to an extensive database of information and to activities on the subject, and potentially propel them towards various actions -all under the same umbrella. To close, I don't think it is time to either celebrate or bemoan art on the net as simply a new genre in the museums, nor is it time for artists interested in productive critical strategies to close the book (turn off the switch) on net art.

Yvonne Volkart, "Art Strategies of the New World Order, or, What do resistant art works look like?"

Dioses, cyborgs y monstruos (Gods, Cyborgs and Monsters)

Idoia García de Cortázar

El proyecto presentado bajo el título "Dioses, cyborgs y monstruos" es una tesis doctoral que explora la dimensión artística de las nuevas tecnologías, así como examina las articulaciones reales, posibles e imaginarias entre los seres humanos (cuerpos) y las móquinas. El trabajo está dividido en tres partes:

La primera parte está dedicada al análisis de los nuevos rituales tecnológicos en los que la dicotomía tradicional mente/cuerpo ha sido reemplazada por la tricotomía mente/cuerpo/móquina.

El ritual tecnológico funciona como las cosmologías primitivas: intenta explicar, predecir y controlar el mundo. Define una experiencia señalada por la expectativa de un placer mágico, casi se diría que por una especie de redención o catarsis controlada y, al mismo tiempo, por la compulsión y la adicción, la hipnosis o la anestesia, la frustración reiterada y permanente ante el nuevo dios, junto con una suerte de ataraxia frente a una realidad de todos modos evanescente. Espectáculo mediático que se ajusta a las definiciones clásicas del término ritual, participa de sus propiedades y funciones, y presenta peculiaridades propias.

El espectáculo tecnológico es una demostración del orden sociocultural, dramatización del triunfo de la móquina, tragedia de haber perdido el cuerpo y la naturaleza, de ser y no ser humanos, simulacro, escena ritual, donde un hecho puntual permite la observación de la cultura global.

La segunda parte trata del uso del cuerpo, no como objeto de deseo, sino como objeto de diseño. Un cuerpo invadido por la tecnología y con modificaciones (prótesis tecnológicas): los cyborgs.

Un cyborg es un organismo cibernético, un híbrido mitad máquina, mitad organismo. Pero el cyborg puede ser también una ficción capaz de construir nuestra realidad social y biológica como un recurso imaginario que trabaja con la noción de híbrido, buscando superar los dualismos omnipresentes en el pensamiento tradicional.

La tecnología invierte las polaridades del mundo en que vivimos: las máquinas de finales del siglo XX han tornado totalmente ambigua la diferencia entre lo natural y lo artificial, la mente y el cuerpo, el desarrollo interno y el diseño externo, y muchas otras distinciones que se aplicaban a los organismos y a las máquinas. Nuestras máquinas están inquietantemente vivas y nosotros mismos terriblemente inertes.

Y por último se reflexiona sobre los monstruos o los fantasmas, los cuerpos en la red.

El mundo es reducido a un ritual mediático mediante estrategias de representación electrónica de la realidad. Se produce una escenificación de lo real y de nuestra presencia simulada en ella, que define de una forma espectacular la participación social del espectador transmutando lo privado en público. El evento mediático no es una reproducción ni una extensión de los sentidos, sino que configura una prodigiosa maquinaria conceptual, iconográfica y semiológica como sustituto de la realidad.

Curiosamente, justo cuando penetramos en el espacio incorpóreo de las abstracciones binarias, el cuerpo se convierte en uno de los temas referentes a la constante intrusión en el mundo artificial del ordenador, por medio de la telepresencia, la telerrobótica y la creación de cuerpos virtuales.

En la red, el cuerpo simboliza las diversas intersecciones entre el mundo virtual y el real, es representado, reinventado, conectado e incluso alterado física y virtualmente. Se convierte en arquitectura, en un espacio navegable, en la metáfora de la entrega total.

Relaciones de Incertidumbre

Dina Roisman

"Todo había sido un problema de conexiones fallidas, de mala sincronización, de andar a ciegas. Siempre perdiendo la ocasión de encontrarnos por muy poco. Siempre a unos centímetros de descubrirlo todo. A eso es a lo que se reduce la historia, creo. A una serie de oportunidades perdidas. Teníamos todas las piezas desde el principio, pero nadie supo encajarlas..."

Paul Auster, *El palacio de la luna* 1

Relación número uno: nociones generales

Los puntos de partida de este proyecto han sido el concepto de **azar**, como generador de sensaciones, y la **relación entre incertidumbre y certeza** (como dicotomía dialéctica).

Con estos dos elementos como ejes fundamentales, el trabajo no pretende brindar respuestas, sino plantear el problema y sus múltiples (quizá infinitas) posibilidades. Por este motivo, la estructura que lo rige está compuesta por preguntas:

¿Qué es el azar? ¿Es un producto de nuestra ignorancia o un derecho propio de la naturaleza? ¿El azar es una necesidad intrínseca del hombre (un imaginario) o existe realmente? ¿Es una búsqueda voluntaria? ¿Es posible que exista un principio "armonizador", que organice los eventos azarosos dentro de una grilla ordenada? ¿Puede definirse el grado de probabilidad de un acontecimiento?

Estos interrogantes han generado una larga historia de estudios, hipótesis y discusiones: Por qué las cosas son como son, y no de otra manera completamente distinta. Un enigma que han querido desvelar las ciencias exactas, la religión y la filosofía, pero hasta ahora nadie ha llegado a resolver.

• Relación número dos: objetivos propuestos

Se trata de poner en crisis, mediante la interactividad y la posibilidad de un *efecto random* (no predecible), la sensación de seguridad frente a lo esperado.

A través de situaciones azarosas, o *aparentemente* azarosas (de eso se trata), se busca activar el sentimiento de incertidumbre o de certeza ante diferentes condiciones propuestas, y provocar de esta forma reacciones diversas en cada individuo.

• Relación número tres: el otro

La interacción del usuario es fundamental. El proyecto perdería sentido si no existiera este vínculo. El propósito consiste en lograr una participación activa en cada página (ingresando textos y números, armando rompecabezas) y no sólo una navegación hacia adelante o hacia atrás. En cada momento se deben tomar decisiones que influyen inevitablemente en el recorrido, de manera de que cada navegante elige caminos diferentes de los de los demás, e incluso de los que él mismo ya realizó con anterioridad.

Cada uno hace su propia navegación, construye su recorrido. Esto significa que también construye su propia noción de orden, de azar: su realidad, que implica, como fin último, la construcción de su identidad.

• Relación número cuatro: el soporte electrónico

Al trabajar en el medio digital, el concepto de azar se traduce en la experiencia de la aleatoriedad (tanto en la imagen como en el sonido) en la posibilidad de crear un espacio con un recorrido no-lineal, que al ser atravesado permite el descubrimiento de nuevas piezas.

Cada página del proyecto fue planteada como un pseudo juego, una invitación a navegar detenidamente y a investigar sus elementos (siempre hay objetos y enlaces ocultos).

El ordenador adquiere en ciertos momentos *personalidad propia* (piensa un número, concede un deseo); esta personificación se relaciona con lo inesperado, con la sorpresa, con la angustia frente a la posibilidad de ser dirigidos por un *ordenador* que predetermine nuestras elecciones.

Relación número cinco: el juego

Es un elemento fundamental de este trabajo. Para ahondar en el concepto de lo lúdico, se ha tomado el texto del teórico James Carse, que define **dos tipos de juego: finito e infinito**:

"Un **juego finito** es un juego que tiene reglas fijas y límites, que se juega con el propósito de ganar y terminar la partida."

"Un **juego infinito** no tiene reglas fijas ni límites. En este juego, cada uno juega con las reglas y el objetivo es continuar la partida."

"Los que participan de juegos finitos tratan de controlar el juego, de predecir todo lo que va a

ocurrir, y aventajarse. Tratan de determinar el futuro basándose en el pasado. Los jugadores de juegos infinitos disfrutan sorprendiéndose. Continuamente se sumergen en lo desconocido, con tal de que esto garantice la continuidad del juego. El significado de los cambios del pasado cambia dependiendo de lo que ocurra en el futuro.
Todos los juegos son voluntarios. Siempre habrá consecuencias si uno no juega o no sigue las reglas, y siempre será necesaria una elección previa. Hay ciertas reglas definidas, aparentemente externas, que debemos elegir si respetamos o no. Si no se respetan, se abandona el juego."

"Pero: no hay ninguna regla que diga que hay que seguir las reglas." **2**

En **[relaciones de incertidumbre]** se propone un juego infinito, pero precisamente porque todos los juegos son voluntarios, depende de cada uno el tipo de juego en el que quiera participar, o la desición de abandonarlo en cualquier momento.

El *puzzle* o rompecabezas representa aquí un enigma, invita a actuar, a mover las piezas, con la particularidad de que está siempre presente la posibilidad de que no pueda llegar a armarse nunca (no hay ninguna pauta que indique cuál es la forma correcta de armarlo).

• Relación número seis: el proceso

Para la realización del trabajo se comenzó con una primera etapa de investigación teórica, recopilación y selección de textos. Se tomaron 4 ejes como guía estructural:

- a) Filosófico y psicológico (se analizaron textos de Carl Jung, Paul Watzlawik y Henri Bergson, entre otros).
- b) Lúdico (en relación a los *juegos de azar*, sobre textos de James P. Carse, John Conway).
- c) Artístico (textos y métodos de William Burroughs, la aleatoriedad en la música desde producciones de John Cage, la cinematografía de Kristof Kieslowski y la producción literaria de Paul Auster, entre otros).
- d) Científico (las ciencias exactas y las múltiples corrientes relacionadas con el azar y sus derivados a través de Gregory Chaitin, Jorge Wagensberg, François Jacob).

El paso siguiente consistió en materializar las teorías y los conceptos más fuertes de los distintos ejes en la gráfica.

Se trabajó sobre una iconografía relacionada con los juegos de azar, específicamente los dados (utilizados para apuestas y juegos de este tipo desde hace por lo menos 5000 años), y con símbolos matemáticos.

Las imágenes utilizadas son de creación propia, y el sonido fue generado y editado por la autora, paralelamente al desarrollo gráfico.

• Relación número siete: una conclusión posible

Como se planteó desde el inicio, el objetivo de este proyecto no es brindar una respuesta, una única visión acerca del tema: se propone, por el contrario, multiplicar las preguntas.

La idea consiste en que se puedan investigar las páginas y detenerse en ellas, sin una trayectoria establecida, de forma tal que el camino se genere en cada uno, en cada navegación individual.

Conexiones fallidas. Sucesos arbitrarios.
La necesidad inevitable de elegir
el tres, (y no el cuatro)
y sentarse a ver qué pasa.

• Conceptos y aclaraciones

El título: la fórmula elegida para el título del proyecto forma parte de una serie de fórmulas presentadas por Werner Heisenberg en 1927.

En este ejemplo **p** y **q** representan el **momento** (o velocidad) y **posición**, respectivamente, de un electrón o partícula. La fórmula señala que si se mide con máxima precisión una de las dos coordenadas (velocidad o posición) de una partícula, no se puede obtener simultáneamente un valor preciso para la otra coordenada.

Por lo tanto: cuanto más exactamente se determina la velocidad de una partícula, tanto menos exactamente puede determinarse la posición de la misma partícula y viceversa. Esta relación se ha considerado muchas veces como prueba de que hay indeterminismo en el universo físico.

Sincronía: de acuerdo a las investigaciones y los textos de Carl Jung, se define como un principio explicativo. Implica una conexión entre eventos que parecen sin sentido para el observador: precognición, coincidencias de sueños independientes, la recurrente aparición de números en un corto período en una larga secuencia. Pero su encuentro no es casual.

En general, las sincronías, en lugar de brindar una sensación de tranquilidad y armonía, generan exactamente lo opuesto: angustia, repulsión, desesperación.

Sistema: grupo de piezas que, en el interior de un mecanismo, trabajan en función una con la otra para asegurar el (*buen*) funcionamiento del mecanismo completo.
En el campo científico: conjunto de principios y teorías destinadas a brindar una explicación que permita aclarar un fenómeno.

Algunas nociones sobre el azar

-*juego de azar*: que no requiere ni cálculo ni dirección.

-*números al azar*: números estocásticos.

-acontecimiento particular e inexplicable.

-causa de algo que se produce sin razón aparente, fuerza que produce acontecimientos que no obedecen a ninguna regla. Un acontecimiento depende del azar (o es aleatorio), cuando su realización, o no realización, en circunstancias precisas, no puede predecirse con certeza.

-un acontecimiento se produce al azar cuando no existe ningún vínculo entre la naturaleza de su categoría y la causa determinante de esa categoría.

Femenino.net.art: feminización of the culture and network Internet

Remedies Drip jar

Femenino.net.art: feminización of the culture and network Internet comprises of the doctoral thesis "Art, Internet and Colectivity: new artistic practices of the network and new forms of Colectivity and Social Action".

Considering that the feminine thing has been one of "other" visibilizados in the last decades, origin and sense of excellent changes of articles of incorporation, we were with the difficulty that suppose "to define themselves" for the woman or for any "another one" that been has excluded from the social game. From this difficulty we investigated in the double game of deconstrucción of its last image and the affirmation of "wanting to be" (to occur form to itself), only possible like process (always unfinished). This way we see how they favor 'identidades' that avoids the esencialismo and they are defined in the provisional thing. Considering that many manifestations of the provisional state and multiplicity in our culture, including the adoption of personalities online, are contributing to a general reframing of the traditional unitary conceptions of the identity, the experiences in network Internet help us to elaborate these new visions of "I".

In Internet the world (we) only exists in our representatives (temporary), in the email, chat, in the WWW... in the concluded interaction. The world in Internet is "I wade, one polvareda", a wake that autodestruye when the communication finalizes. In Internet that idea of Deleuze in relation to the Leibniziano thought that suggests a perception by textures and not by structures, would have a referring one. The textures are those that conform manifold possible forms to be and to do in the network, are those that release the unconscious one (like who disguises itself to give loose rein more to his hidden and liberating facets). Textures and you fold that they become independent and they overflow to the body, or to destroy it, to reestablecer it or to elevate it, but always to give the return him and to mold its interior.

In order to investigate in all it we have devised a conceptual structure that includes two sections that will take care of the following criteria of organization: in first we will outline an analysis from historical and sociological approaches of the relation maintained between woman, art and technology in the last fifty years.

1. CONSTRUCTIONS ON The SORT, The TECHNOLOGY, The WORK And The ART WITH RESPECT TO The WOMAN

In a second we will approach the practices and artistic and political routes online and will speculate on the paper of the women in the new technological and artistic spaces of network Internet, as well as on the possibilities of giving by fulfilled the hopes emancipatorias, deconstructivistas and feminizadoras of the woman in the network.

2. The POWER OF The REBEL IN The FEMINIZACIÓN OF The NEW ARTISTIC And TECHNOLOGICAL SPACES

For it we will approach the different visions that on the ciberfeminismo are being developed and we will analyze projects of net.art that deal with explicit way the subject of the sort and in which "art.feminism and Internet" collide and those that, although explicitly do not introduce feministas questions in their works, investigate own lines of the metalanguage of the network, investigating on the limits which they separate the real thing of the virtual thing, the new languages which they question the conventional forms of narratividad, and the recreation of fictitious and virtual subjectivities in a new epistemologic and existencial space of the being.

In these two sections we will point different concepts on the feminización to arrive at which arises subversively from 'dichó and does not proclaim its space of action in the new technological structures where the systems of communication of the future are being constructed. For it we went to the thought of Derrida and Kristeva for which the woman is the privileged seat from which it is possible to disassemble the falocéntrico western thought. Also we found important references in the proposals of feminine writing of Cixous according to which it was tried to disarticulate (to deconstruir) the dominant speech, under one primacia, of the glance but of simultaneous, which flows, which is not against all type of figure or rigidly constructed idea. This proposal, that we tied to the writings online, raises a strategy of destruction of the way of operation of the traditional

speech, a relation of a "feminine economy" near the body, to which it flows, to the rate, and opposed to the supported masculine economy in the philosophical thing, symbolic and the discursive. This would be a writing that would speak of the unconscious thing, the repressed thing, the excluded thing, of the fears and desires nonmaterialized. Scripture that would be related to "the other living thing", the "other bran" the "other no longer threatened by the destruction", proposing a feminidad that would be the "true objective of both sexes".

In this proposal of feminización of the culture we can find coincidences in the philosophical critic of the esencialismo of Derrida. Perhaps, paradójicamente, because although the essence idea is rejected by the posestructuralista theory, (we remember that for Derrida the esencialismo was accomplice of western metaphysics and to raise the opposition man-woman supposed to raise a false universalismo - to follow prisoner of metaphysics with its illusion of presence, to be stable identities -) the program of "écriture feminine" that are based such on foundations, yes moves occasionally towards esencialistas positions.

We cannot think no authentic reality that it does not contemplate the important dimension that everything (nobody) real excludes. He is the excluded thing (the "other") what the economies of desire mark, as well as of and political the changes of articles of incorporation, which marks the maintained tension of the progress.

In a society in network, at a time where it does not have sense to speak of art, artist, object and subject in such terms that for one decade, the biological differentiation and sexual cradle in the dual confrontation is insufficient and it becomes little makes specific. The fixed identities and conditional, reinforced by an image of the sort like subordination tool, propiciatorias of a performance politically differential (and of course nonneutral), open the way to multiple identities, remade, re-articulated, that take part their previous binary logic and they subspill it.

Strategies of (auto)creación based on the graft, the re-contextualización of fragments, the Copy-paste, turn the interface, like maquinico field of intersubjective mediation, in a new epistemologic space of the being. Bodies articulated with digital writings that interrupt the speeches of the dualidad questioning the immovable "mismidad" of the subject in the multiple morphologies of the interface, conditioning their social inscription to the ephemeral one of their duration, to their genuine temporalidad and total contingency.

In the cyberspace we are bodies (sorts) facts through the machine, with words and images, fusions and codes that register to us social and culturally by means of an tecno-anatomy. The mouse is to the digital life (social - in network -) an immediate and effective bistoury that, by means of code and words, models subjects online as orlaniana ciber-surgery.

Historically the sort has been a hierarchial structuring instrument supplier of false and concrete forms to the bodies. Now, a time where all the accepted one like unremovable is questioned, the sort becomes something as well as a "daily spectacle" composed of images which they are drawn in the pulsión of the possible change, images in permanent construction.

In this new space to speak of the feminine thing sends to speak to us of "the feminización" of network Internet, of the desjerarquizadora action of the same one, in terms of resistance, deconstructivos. Terms that would not suppose, therefore, to recover the traditional attributes of the woman, but to deconstruir "the feminizado" being (revealing of a power-submission structure) and to exercise the will "to want to be" in a space conceived without hierarchies, a space to which a smaller load of prejudices is estimated to him (mainly in its beginnings) on the forms possible to be in the world. This feminización, as it suggests Derrida, must "by a double gesture, a double science, a double writing, to practice an investment of the classic opposition and a general displacement of the system".

If we remembered the construction of the feminista conscience previous and later to the seventy it has in the nature of the feminine identity a point of flexion in its treatment and consideration. At the beginning of this decade (the seventy) the artists began to be truly conscious of the artificialidad and the repressive power of the "social construction of the sort". One of its objectives would be to discover in an image of themselves (seriously deteriorated by the past, the history and the social imposition of a paper to fulfill) an authentic voice that could use as sustenance for a new construction of their identity.

This way, to conceive a feminización of the artistic practices of the network implies, beyond only supposing the feminine presence in these practices, investigating if its presence and its work urge a deconstrucción of the models of dual confrontation around the sort.

- Deconstrucción by means of digital devices, hypertextual protocols, languages, electronic mail, code... all of them pieces nails in the production of l@s net.artistas throughout the last decade. Devices where the "matrix" like beginning, origin, principle of sense - also digital it is one of the metaphors of action and recurrent teorización and greater symbolic load. With this analogy we went ahead to the dualidad under which we have constructed our social and moral structure, whose root we discovered in the binary code of our sex and in the digital code of the machine.
- Deconstrucción by means of new languages. Words that are dimensionalizan, conceptual systems that leave slight knowledge like linearity, center, margin or hierarchy and replace them by supported others in multilinearity, I connect, nodes and networks of relations.
- Deconstrucción mediante dispositivos de comunicación global en red, mediante activismo informatizado. No sin motivo las prácticas artísticas más relevantes que desde los años sesenta se han manifestado y consolidado mediante debates estéticos, en lo relativo a la producción femenina, han estado protagonizadas por "mujeres con conciencia de serlo", es decir por artistas que han desarrollado su trabajo desde perspectivas críticas y feministas, desde discursos de la resistencia. En este sentido, Maria Damon nos habla de las "ciberfems de la utopía futurista": un tipo de posfeministas que basan sus acciones en la consideración de la red Internet como espacio óptimo para sacar partido a la incorporeidad del sujeto y la posibilidad de su realización para sí y para el contexto al que se vincula mediante la tecnología. Sadie Plant ejemplifica en sus teorías la importancia de este vínculo "ciber-fems" constatando a través del mismo algunas de las más agudas reivindicaciones de las mujeres en relación a la tecnología, así como la necesidad de tenerla presente en la construcción contemporánea del género, por cuanto su emancipación se verá facilitada en la gestación del ciberespacio como nuevo espacio de acción.

Las producciones de las net.artistas habitantes de esta "frontera", generada a partir de los diversos mundos posibles en torno a la red, tendrían en este contexto una doble lectura. Por una parte, las prácticas que evidencian un tratamiento explícito del género y que se posicionan desde una perspectiva crítica y feminista. Por otra, las producciones que introducen estas cuestiones de manera implícita en la investigación de líneas propias del metalenguaje de la red, en los nuevos lenguajes que cuestionan las formas convencionales de narratividad, y en la re-creación de subjetividades ficticias en el nuevo espacio epistemológico y existencial del ser.

Por otra parte, no podemos olvidar que la feminización que promueven estas prácticas no es exclusiva de la mujer, y entre las producciones y actitudes de artistas como VNSMatrix, Anne de Haan, Shu Lee Cheang, Victoria Vesna o Kathy Rae Huffman, y entre las proclamas "The vagina is the boss on the Internet" o "The clitoris is a direct line to the matrix", encontramos también exponentes -más sutiles- en los Keikos Suzukis y las Sociedades Anónimas del ciberespacio, en cuyos gestos descubrimos también el carácter diferencial y deconstructivo de Internet.

Y es que aquí, en la frontera de los mundos posibles, no es difícil imaginar un futuro cuyas producciones artísticas tengan detrás de sí, no artistas, ni hombres, ni mujeres, sólo productores y sociedades anónimas con nostalgia, o tal vez no, de su cuerpo.

En la red lo "no dicho" adquiere otra dimensión, parece como si lindásemos su frontera (su abismo), como si acercarnos a "esa ausencia" fuera ahora más fácil. Un mundo por construir siempre es lo más sugerente, un espacio en blanco para quien ha visto rellenar y usurpar su espacio a otros, es, cuando menos, una oportunidad para adueñarse de sus actos, de su vida. Y aun cuando esta sensación es efímera, y podemos decir que dura 'un instante', 'un infraleve', lo que dura la ilusión del espacio virgen antes de ser mancillado por la ausencia de imaginación y la repetición de los mismos parangones sociales y los mismos temores a la diferencia, el deseo sigue perviviendo, y en relación a la red, el deseo es el motor de la construcción de un lugar de "lo individual" y de "lo común" para todos.

Hacking vs Hacktivism: Sniffing the net

Outline of my research during my grant period in MECAD

Jenny Marketou

2000-2001

<http://smellbytes.banff.org>

Sniffing/Splashing 2000 (CD-ROM)

"As hackers become politicized and as activists become computerized, we are going to see an increase in the number of cyber-activists who engage in what will become more widely known as Electronic Civil Disobedience."

Stefan Wray, 1998

The discussion of the political impact of the internet has focused on a number of issues: Access, technological determinism, encryption, comodification, software, intellectual property, the public sphere, decentralization, anarchy, hacktivism, gender." On the other hand the net is the paradise of no-copyright, plagiarism, confusion and exchange. Hacking means reappropriating, reforming and regenerating not only culture but also redefining systems and processes, and it can account for a new coinage when the process is an open system. There is no question that Hacktivism is a new breed of activism -- wired and confrontational.

My current investigation has been focused on hacking vs hacktivism and the role those actions have played in the construct of a sociopolitical imaginary in our networked culture . I am particularly interested a how the above tactics have been dynamically appropriated and how the computer underground hacktivism has been infiltrated and interpreted in the work of many internet artists and collective groups working on the net as a meaningful political activity and radical practice.

Some of the following topics I would like to address:

- 1- Defining characteristics of the internet and therefore of "hacktivism".
- 2- Hacking vs Activism vs Electronic Civil Disobedience vs meaningful political practice.
- 3 Hacking + hacktivist culture and the e- community that hackers + hacktivist claim to embody.
- 4- What about e-Girl e-Geeks?
- 5 -Hacktivism as a conceptual art practice and artists as cultural hackers.
- 6- Hacktivism as performance, as hard sport, as an activist intervention, as radical practice/subversion, as erotic fantasy.
- 7- Stunts and Pranks and other tactics.
- 8- Sensationalism and e-Media Hype.
- 9- Other artistic - isms -contemporary or historical as basis for comparison.

In reference to the above research the following interviews have been published and projects and panels have been presented by the artists.

1-Interview Jenny Marketou with Cornelia Sollfrank, Artist, "Hacking Sublime", SYNOPSIS 1, catalog, Museum of Contemporary Art, Athens, Greece, September 2000.

2- Interview Jenny Marketou with Claudia Giannetti, Director, MECAD,

Hactivism No 5 MECAD e-journal on-line, MECAD, Sabadell, Spain, 2001.

3- Open Source Lounge: Game Patching and Hacking Sublime and Viewers as Artists, a collective project, organised by Jenny Marketou in collaboration with Steve Dietz, curator of New Media Initiatives, Walker Art Center, USA. This project was first presented during the Medi@terra 2000, Art and Technology Festival, Athens, Greece.

4- NO CENSORS/ DYSTOPIA, 2001. A panel discussion with Marina Griznic, Natalie Bookchin and Jenny Marketou organized by Christine Wang, Curator New Media Initiatives, Alternative Museum, New York City.

The Net Alternative, or, Who's manipulating who? Corporate Sponsors, Public Relations, and Art

Natalie Bookchin

From a talk held at Künstlerhaus Bethanien Feb 2001
<http://www.bethanien.de/mal/netsplit.html>

In preparation for this talk I was sent a series of speculative questions by Gerrit Gohlke proposing issues to be covered on this panel. He suggests that thus far, net art has failed to deliver what it had originally promised. It has not destabilized and offered a way out of the traditional art system or provided access to a social reality through the networks. Proposing a "net split" he argues that many of net art's protagonists have either turned away from art and towards political activism or entered a mainstream art world with worn-out strategies, and he ends by suggesting that perhaps the Internet has been overrated as an aesthetic medium.

I wanted to begin with this summery because it contains some common assumptions about net art that I would like to call into question. First, I should begin by saying that there is no doubt the net is here to stay and artists are and will continue using it. The question proposed as the topic for the panel can not begin to account for the fact that the net has become an indispensable tool and material for numerous artists. Moreover, as audiences on the net get larger so do the possibilities for artists to tap into them. As activities on the net become more formalized, so do the possibilities for artists to manipulate those same forms. Thus, the more relevant question for me is less whether net art is making enough innovative strides at the moment, or if net art failed, but rather how has the net altered artistic production?

I also wonder how useful it is to qualify and limit our understanding of the diverse ways that artists are using now the net by applying the label net art to all these different artistic activities. Such practices include the regular emergence of international collectives and networks of artists developing projects across distances, performative network manipulations (such as this past summer's borderhack project in Tijuana which was as much of an international net performance as it was a live local event), or even the ways in which the net still functions as a cheap and easy method for artists to have direct contact with audiences, regardless of whether they choose to be or are accepted in the traditional art system.

It is not uncommon today in some circles to harp back nostalgically to the early days of net art when there was an apparent wave of creativity that has now subsided, those days when a small international group of people named and produced a lot of "net dot art". Where have they all gone?

But there is another way to think about this. I think the fact that art production on the net was thrust into the limelight very quickly and for a short period of time had more to do with both very creative manipulation of networks and with a growing awareness of how information could travel over the net, than with a rush of artists' websites sweeping the net. These creative manipulations were used in such a way that propelled a particular group of people into a highly visible place, and this activity was then, quite self consciously labeled net.art.

This is not to dismiss early net.art as mere self promotion. Rather I am arguing that the "art" was located less in the individual web sites and more in the fierce collective manipulation of all aspects

of the networks: mailing lists, spam, email, websites, links, web rings and mirrored sites: all devices for trespassing into and parasiting networks for alternative ends. This concerted effort created the earliest net art "movement", a first wave of artists who knew how to work the net.

As Health Bunting wrote to me in an email in 1997,

"i think self promotion is a viable tactic for infiltration in this current art star system. many of my european friends who have not yet suffered advanced capitalism (thatcherism) still have an aversion to these methods."

By focusing primarily on network manipulation, these works took on and engaged the materials of the net. Their self referentiality was an important aspect of an art grappling with new materials and a new medium.

Artists are of course still manipulating the net, but in the most compelling works, the focus is no longer just on the process itself, nor on artists simply directing attention to themselves. For example, it is not enough just to hijack people to your site, as it was in 1995. (Moreover so called hijacking has since been appropriated by the porn industry. Last year a porn company was sued for "hijacking" unwitting audiences who claimed they were taken to porn sites against their will, and their jobs were put into jeopardy when they were discovered by their bosses viewing this same porn). The question for artists now is what to do with your captive audience once you have their attention.

I would like to refer back now to another speculation that I received in the preliminary email about this panel, which suggested that many net artists have moved away from art into political activism. This position assumes that one is either making art or making politics and sets up a great divide between the two spheres. In fact, I think that the net has facilitated just the opposite - that is, an ease in which one can move between different spheres and contexts in the same work, not just referring to, but actually entering into them. It is of little effect for artists to refer to the political only from privileged spaces dedicated to the viewing of art nor the expected social spaces delegated to political activism. The net has made it simple to shuffle between these different areas, permitting artists to show up where they are neither expected nor particularly wanted.

As artists have become more adapt at working the material of the net, questions of how to use this manipulation to engage in different levels and subjects have become more critical. Early net artists' investigations into alternative distribution systems are now being put to use by newer art collectives, but the subject is now not distribution itself, but rather a distributed political or social critique.

Today there are artists whose creative and subversive uses of the net intentionally rub themselves against the grain not just of the art system but of the larger mainstream in a way that produces a quite visible effect. This work reaches sizable audiences unthinkable before the net, stretching as far and wide as the offices of major political candidates, the Pentagon, the director general of the WTO, and frequently showing up in the channels of mainstream media. One recent example is the project voteauction.com, which used all the conventions of the online auction house to highlight and provoke a corrupt system posing as a democracy, and in turn, created a not insignificant ripple in art, mainstream media and political realms.

There is an important legacy of artists who have been concerned not just with the depiction of political content, but with the politics of distribution and display. Since we are in Berlin, I will mention Berlin's own John Heartfield. A proto-net artist of sorts, he made political performance out of the manipulation of his public identity by cutting his name Helmut Herzfeld and pasting a new anglicized one, John Heartfield, in a show of disgust for the nationalist proto-fascist regime under which he was living. Perhaps more relevant to today's conversation were his innovative methods of distribution, whereby he used the new mass media to disseminate his subversive and political photomontages, aiming for and reaching not the galleries and museums, but the streets.

Finally I would like turn to a brief discussion of a project I am currently developing, first because it attempts use the methods I have been outlining and second because it is a project that would be unthinkable without the Internet. It first requires a little bit of background information .

There are a series of shows and commissions on the subject of genetics currently underway in the States. As part of this initiative, I was invited by a NY public art organization to develop a public art project.

Along the way, I made an intermediary piece (with Jin Lee), a power point presentation called Biotaylorism, which addresses how, by combining Taylorist and Fordist methods with biotechnology, organic life is now being internally optimized for better business solutions. The project was included in a traveling exhibit called "Paradise Now, Picturing the Genetic Revolution" in NY this past fall. As it turned out, the show had a range of biotechnology corporate sponsorship, backing an unusually extensive amount of promotion, included full page ads in the NY Times and a panel discussion featuring no artists, but instead biotechnology industry luminaries such as Craig Venter. (CEO of Celera).

This show is not unique. As I mentioned, there are currently underway a number of other such well funded shows and grants to artists to produce work in this area. Regardless of the good intentions of the curators, the bill is being partially footed by biotech companies and their PR firms. And in Europe, Ars Electronica has had biotechnology as its theme for the last 2 years. One of its main sponsors is none other than the Swiss biotech giant, Novartis.

Although corporate sponsored shows on biotechnology are by now nothing new, (see Yvonne Volkart's essay "Art Strategies of the New World Order, or, What do resistant art works look like?") this new burst of sponsorship for "gene-art" coincides with a major PR campaign begun last year by a consortium of the world's seven top biotechnology companies called "Good Ideas are Growing". The industry saw it as a critical time to push for public acceptance of genetic research and development, particularly in the States. While there had been general complacency on the part of Americans in the past in regards to genetically modified foods and research, the mood was starting to change. The aim was thus to avoid a public relations disaster such as the one that had taken place in Europe over the past few years, where biotechnology was met with fierce public resistance. The campaign consists of so called educational science exhibitions, ads, and the sponsorship of genetics-theme based cultural programs such as art exhibitions, conferences and art commissions.

The question was then what do these corporations want from artists, and how can we possibly avoid giving it to them?

Corporate sponsors are pretty certain that artists will serve as a comfortable buffer offering the public non-threatening points of entry into these otherwise threatening industries. With artists making biotechnology and genetics the subject of aesthetic contemplation and creative visual representation, what might have seemed disturbing becomes engaging, accessible and easier to accept as our present reality. Colorful and so called "open discussions" on the complex ethical dilemmas are likely to assuage public anxieties, conveying the impression that democratic discussion is taking place. The very question of whether biotechnology or genetics should continue in their present tracks is not even broached. This instead becomes a given - an inevitability. Less aesthetic questions concerning economic interests are generally not discussed. And by keeping these discussions in the safe spaces delegated to art, even the most critical of questions will not threaten the industry.

In developing a project, it has been essential for me to think tactically about how to negate the instant neutralization of this highly politicized subject. All the issues discussed above - context, distribution, and form - have been essential considerations. For this reason, I realized that I need to make a project that can function autonomously - and move easily in or outside of the sphere of "art". Second, it is critical to make central to the project the issues of economic and corporate interests and how they shape and define the science. Thirdly because images are always easier to co-opt than action, I will set up a structure that will encourage participants to become both invested in and involved with politicized and socially charged actions.

I decided to make an on-line game-called Superpetz (also with Jin Lee) modeled on a virtual Tamagotchi game, where the virtual pet is a human worker and you, the player, become a manager. You begin the game by selecting traits that you think are most desirable for your worker/pet. Next you must run your pet through a genetic screening test, which although unreliable and costly, will determine whether he or she qualifies for health insurance or is employable, and at what level. The test results of course may affect your pet's happiness, anxiety and energy levels. Knowing the potential risks may motivate you to make certain lifestyle choices, should you have enough points to afford to do so.

The game takes place in a virtual work place, where you must earn points to feed, replenish and manipulate your pet. Feeding keeps up energy and happiness levels so that your pet can work efficiently and earn more points. Working your pet depletes its energy and food levels and overwork or over supervision can lower efficiency, happiness and health levels.

There are numerous options for modifying your pet's body and mood to potentially affect its

value, performance and job ranking, but these modifications entail costly and at times risky procedures. Overmodification or an abuse of rejuvenators can lead to inefficiency, job demotion, job or insurance loss, and an untimely death.

If you don't have enough money - for example in the case of a pet that has not been given a job or health insurance as a result of the genetic screening test - or if you simply want to earn more points, you can leave the workplace and temporarily enter another game environment where you have other options for earning points. There, you can play a "knowledge game" on the subject of work, science, health or reproduction. Or you can venture into the thrills and challenges of real life actions and participate in a variety of on or off line interventions or subversive projects on the subject, thus earning mega-points for your pet.

One final word in on the net: the net is the only site where we could realistically develop such a project that could function with ease either as a real game, as an investigation into the interests of corporate biotechnology and genetics industries and as an art project, and that in its different faces could potentially attract a broad and not always prepared audience. Using the format of a game puts players inside the story, implicating them in this political narrative, and the net allows me to subsequently direct these same audiences/players to an extensive database of information and to activities on the subject, and potentially propel them towards various actions -all under the same umbrella. To close, I don't think it is time to either celebrate or bemoan art on the net as simply a new genre in the museums, nor is it time for artists interested in productive critical strategies to close the book (turn off the switch) on net art.

Dioses, cyborgs y monstruos (Gods, Cyborgs and Monsters)

Idoia García de Cortázar

El proyecto presentado bajo el título "Dioses, cyborgs y monstruos" es una tesis doctoral que explora la dimensión artística de las nuevas tecnologías, así como examina las articulaciones reales, posibles e imaginarias entre los seres humanos (cuerpos) y las móquinas. El trabajo está dividido en tres partes:

La primera parte está dedicada al análisis de los nuevos rituales tecnológicos en los que la dicotomía tradicional mente/cuerpo ha sido reemplazada por la tricotomía mente/cuerpo/móquina.

El ritual tecnológico funciona como las cosmologías primitivas: intenta explicar, predecir y controlar el mundo. Define una experiencia señalada por la expectativa de un placer mágico, casi se diría que por una especie de redención o catarsis controlada y, al mismo tiempo, por la compulsión y la adicción, la hipnosis o la anestesia, la frustración reiterada y permanente ante el nuevo dios, junto con una suerte de ataraxia frente a una realidad de todos modos evanescente. Espectáculo mediático que se ajusta a las definiciones clásicas del término ritual, participa de sus propiedades y funciones, y presenta peculiaridades propias.

El espectáculo tecnológico es una demostración del orden sociocultural, dramatización del triunfo de la móquina, tragedia de haber perdido el cuerpo y la naturaleza, de ser y no ser humanos, simulacro, escena ritual, donde un hecho puntual permite la observación de la cultura global.

La segunda parte trata del uso del cuerpo, no como objeto de deseo, sino como objeto de diseño.

Un cuerpo invadido por la tecnología y con modificaciones (prótesis tecnológicas): los cyborgs.

Un cyborg es un organismo cibernético, un híbrido mitad móquina, mitad organismo. Pero el cyborg puede ser también una ficción capaz de construir nuestra realidad social y biológica como un recurso imaginario que trabaja con la noción de híbrido, buscando superar los dualismos omnipresentes en el pensamiento tradicional.

La tecnología invierte las polaridades del mundo en que vivimos: las móquinas de finales del siglo XX han tornado totalmente ambigua la diferencia entre lo natural y lo artificial, la mente y el cuerpo, el desarrollo interno y el diseño externo, y muchas otras distinciones que se aplicaban a los organismos y a las móquinas. Nuestras móquinas están inquietantemente vivas y nosotros mismos terriblemente inertes.

Y por último se reflexiona sobre los monstruos o los fantasmas, los cuerpos en la red.

El mundo es reducido a un ritual mediático mediante estrategias de representación electrónica de la realidad. Se produce una escenificación de lo real y de nuestra presencia simulada en ella, que define de una forma espectacular la participación social del espectador transmutando lo privado en público. El evento mediático no es una reproducción ni una extensión de los sentidos, sino que configura una prodigiosa maquinaria conceptual, iconográfica y semiológica como sustituto de la realidad.

Curiosamente, justo cuando penetramos en el espacio incorpóreo de las abstracciones binarias, el cuerpo se convierte en uno de los temas referentes a la constante intrusión en el mundo artificial del ordenador, por medio de la telepresencia, la telerrobótica y la creación de cuerpos virtuales.

En la red, el cuerpo simboliza las diversas intersecciones entre el mundo virtual y el real, es representado, reinventado, conectado e incluso alterado física y virtualmente. Se convierte en arquitectura, en un espacio navegable, en la metófora de la entrega total.

Relaciones de Incertidumbre

Dina Roisman

"Todo había sido un problema de conexiones fallidas, de mala sincronización, de andar a ciegas. Siempre perdiendo la ocasión de encontrarnos por muy poco. Siempre a unos centímetros de descubrirlo todo. A eso es a lo que se reduce la historia, creo. A una serie de oportunidades perdidas. Teníamos todas las piezas desde el principio, pero nadie supo encajarlas..."

Paul Auster, *El palacio de la luna* 1

Relación número uno: nociones generales

Los puntos de partida de este proyecto han sido el concepto de **azar**, como generador de sensaciones, y la **relación entre incertidumbre y certeza** (como dicotomía dialéctica).

Con estos dos elementos como ejes fundamentales, el trabajo no pretende brindar respuestas, sino plantear el problema y sus múltiples (quizá infinitas) posibilidades. Por este motivo, la estructura que lo rige está compuesta por preguntas:

¿Qué es el azar? ¿Es un producto de nuestra ignorancia o un derecho propio de la naturaleza? ¿El azar es una necesidad intrínseca del hombre (un imaginario) o existe realmente? ¿Es una búsqueda voluntaria? ¿Es posible que exista un principio "armonizador", que organice los eventos azarosos dentro de una grilla ordenada? ¿Puede definirse el grado de probabilidad de un acontecimiento?

Estos interrogantes han generado una larga historia de estudios, hipótesis y discusiones: Por qué las cosas son como son, y no de otra manera completamente distinta. Un enigma que han querido desvelar las ciencias exactas, la religión y la filosofía, pero hasta ahora nadie ha llegado a resolver.

• Relación número dos: objetivos propuestos

Se trata de poner en crisis, mediante la interactividad y la posibilidad de un *efecto random* (no predecible), la sensación de seguridad frente a lo esperado.

A través de situaciones azarosas, o *aparentemente* azarosas (de eso se trata), se busca activar el sentimiento de incertidumbre o de certeza ante diferentes condiciones propuestas, y provocar de esta forma reacciones diversas en cada individuo.

• Relación número tres: el otro

La interacción del usuario es fundamental. El proyecto perdería sentido si no existiera este vínculo. El propósito consiste en lograr una participación activa en cada página (ingresando textos y números, armando rompecabezas) y no sólo una navegación hacia adelante o hacia atrás. En cada momento se deben tomar decisiones que influyen inevitablemente en el recorrido, de manera de que cada navegante elige caminos diferentes de los de los demás, e incluso de los que él mismo ya realizó con anterioridad.

Cada uno hace su propia navegación, construye su recorrido. Esto significa que también construye su propia noción de orden, de azar: su realidad, que implica, como fin último, la construcción de su identidad.

• Relación número cuatro: el soporte electrónico

Al trabajar en el medio digital, el concepto de azar se traduce en la experiencia de la aleatoriedad (tanto en la imagen como en el sonido) en la posibilidad de crear un espacio con un recorrido no-lineal, que al ser atravesado permite el descubrimiento de nuevas piezas.

Cada página del proyecto fue planteada como un pseudo juego, una invitación a navegar detenidamente y a investigar sus elementos (siempre hay objetos y enlaces ocultos).

El ordenador adquiere en ciertos momentos *personalidad propia* (piensa un número, concede un deseo); esta personificación se relaciona con lo inesperado, con la sorpresa, con la angustia frente a la posibilidad de ser dirigidos por un *ordenador* que predetermine nuestras elecciones.

Relación número cinco: el juego

Es un elemento fundamental de este trabajo. Para ahondar en el concepto de lo lúdico, se ha tomado el texto del teórico James Carse, que define **dos tipos de juego: finito e infinito**:

"Un **juego finito** es un juego que tiene reglas fijas y límites, que se juega con el propósito de ganar y terminar la partida."

"Un **juego infinito** no tiene reglas fijas ni límites. En este juego, cada uno juega con las reglas y el objetivo es continuar la partida."

"Los que participan de juegos finitos tratan de controlar el juego, de predecir todo lo que va a ocurrir, y aventajarse. Tratan de determinar el futuro basándose en el pasado."

Los jugadores de juegos infinitos disfrutan sorprendiéndose. Continuamente se sumergen en lo desconocido, con tal de que esto garantice la continuidad del juego. El significado de los cambios del pasado cambia dependiendo de lo que ocurra en el futuro.

Todos los juegos son voluntarios. Siempre habrá consecuencias si uno no juega o no sigue las reglas, y siempre será necesaria una elección previa. Hay ciertas reglas definidas, aparentemente externas, que debemos elegir si respetamos o no. Si no se respetan, se abandona el juego."

"Pero: no hay ninguna regla que diga que hay que seguir las reglas." 2

En **[relaciones de incertidumbre]** se propone un juego infinito, pero precisamente porque todos los juegos son voluntarios, depende de cada uno el tipo de juego en el que quiera participar, o la desición de abandonarlo en cualquier momento.

El *puzzle* o rompecabezas representa aquí un enigma, invita a actuar, a mover las piezas, con la particularidad de que está siempre presente la posibilidad de que no pueda llegar a armarse nunca (no hay ninguna pauta que indique cuál es la forma correcta de armarlo).

• Relación número seis: el proceso

Para la realización del trabajo se comenzó con una primera etapa de investigación teórica, recopilación y selección de textos. Se tomaron 4 ejes como guía estructural:

a) Filosófico y psicológico (se analizaron textos de Carl Jung, Paul Watzlawik y Henri Bergson, entre otros).

b) Lúdico (en relación a los *juegos de azar*, sobre textos de James P. Carse, John Conway).

c) Artístico (textos y métodos de William Burroughs, la aleatoriedad en la música desde producciones de John Cage, la cinematografía de Kristof Kieslowski y la producción literaria de Paul Auster, entre otros).

d) Científico (las ciencias exactas y las múltiples corrientes relacionadas con el azar y sus derivados a través de Gregory Chaitin, Jorge Wagensberg, François Jacob).

El paso siguiente consistió en materializar las teorías y los conceptos más fuertes de los distintos ejes en la gráfica.

Se trabajó sobre una iconografía relacionada con los juegos de azar, específicamente los dados (utilizados para apuestas y juegos de este tipo desde hace por lo menos 5000 años), y con símbolos matemáticos.

Las imágenes utilizadas son de creación propia, y el sonido fue generado y editado por la autora, paralelamente al desarrollo gráfico.

• Relación número siete: una conclusión posible

Como se planteó desde el inicio, el objetivo de este proyecto no es brindar una respuesta, una única visión acerca del tema: se propone, por el contrario, multiplicar las preguntas.

La idea consiste en que se puedan investigar las páginas y detenerse en ellas, sin una trayectoria establecida, de forma tal que el camino se genere en cada uno, en cada navegación individual.

Conexiones fallidas. Sucesos arbitrarios.
La necesidad inevitable de elegir
el tres, (y no el cuatro)
y sentarse a ver qué pasa.

• Conceptos y aclaraciones

El título: la fórmula elegida para el título del proyecto forma parte de una serie de fórmulas presentadas por Werner Heisenberg en 1927.

En este ejemplo **p** y **q** representan el **momento** (o velocidad) y **posición**, respectivamente, de un electrón o partícula. La fórmula señala que si se mide con máxima precisión una de las dos coordenadas (velocidad o posición) de una partícula, no se puede obtener simultáneamente un valor preciso para la otra coordenada.

Por lo tanto: cuanto más exactamente se determina la velocidad de una partícula, tanto menos exactamente puede determinarse la posición de la misma partícula y viceversa. Esta relación se ha considerado muchas veces como prueba de que hay indeterminismo en el universo físico.

Sincronía: de acuerdo a las investigaciones y los textos de Carl Jung, se define como un principio explicativo. Implica una conexión entre eventos que parecen sin sentido para el observador: precognición, coincidencias de sueños independientes, la recurrente aparición de números en un corto período en una larga secuencia.

Pero su encuentro no es casual.

En general, las sincronías, en lugar de brindar una sensación de tranquilidad y armonía, generan exactamente lo opuesto: angustia, repulsión, desesperación.

Sistema: grupo de piezas que, en el interior de un mecanismo, trabajan en función una con la otra para asegurar el (*buen*) funcionamiento del mecanismo completo.

En el campo científico: conjunto de principios y teorías destinadas a brindar una explicación que permita aclarar un fenómeno.

Algunas nociones sobre el azar

-*juego de azar:* que no requiere ni cálculo ni dirección.

-*números al azar:* números estocásticos.

-acontecimiento particular e inexplicable.

-causa de algo que se produce sin razón aparente, fuerza que produce acontecimientos que no obedecen a ninguna regla. Un acontecimiento depende del azar (o es aleatorio), cuando su realización, o no realización, en circunstancias precisas, no puede predecirse con certeza.

-un acontecimiento se produce al azar cuando no existe ningún vínculo entre la naturaleza de su categoría y la causa determinante de esa categoría.

Femenino.net.art: feminización de la cultura y red Internet

Remedios Zafrá

Femenino.net.art: feminización de la cultura y red Internet forma parte de la tesis doctoral "Arte, Internet y Colectividad: nuevas prácticas artísticas de la red y nuevas formas de Colectividad y Acción Social".

Teniendo en cuenta que lo femenino ha sido uno de los "otros" visibilizados en las últimas décadas, origen y sentido de relevantes cambios sociales, nos encontramos con la dificultad que supone "definirse" para la mujer o para cualquier "otro" que haya estado excluido del juego social. A partir de esta dificultad indagamos en el doble juego de deconstrucción de su imagen pasada y la afirmación de un "querer ser" (darse forma a sí mismo), sólo posible como proceso (siempre inacabado). De esta manera vemos cómo se favorecen 'identidades' que rehuyen el esencialismo y se definen en lo provisional. Teniendo en cuenta que muchas manifestaciones de la provisionalidad y multiplicidad en nuestra cultura, incluida la adopción de personalidades online, están contribuyendo a un replanteamiento general de las tradicionales concepciones unitarias de la identidad, las experiencias en la red Internet nos ayudan a elaborar estas nuevas visiones del "yo".

En Internet el mundo (nosotros) sólo existe en nuestros representantes (temporales), en el e-mail, en el chat, en la WWW,.... en la interacción concluida. El mundo en Internet es "un chapoteo, una polvareda", una estela que se autodestruye cuando finaliza la comunicación. En Internet aquella idea de Deleuze en relación al pensamiento Leibniziano que sugiere una percepción por texturas y no por estructuras, tendría un referente. Las texturas son las que conforman múltiples posibles formas de ser y hacer en la red, son las que liberan el inconsciente (como quien se disfraza para dar rienda suelta a sus facetas más escondidas y liberadoras). Texturas y pliegues que se convierten en autónomos y desbordan al cuerpo, bien para destruirlo, reestablecerlo o elevarlo, pero siempre para darle la vuelta y moldear su interior.

Para indagar en todo ello hemos ideado una estructura conceptual que engloba dos apartados que atenderán a los siguientes criterios de organización: en un primero esbozaremos un análisis desde enfoques históricos y sociológicos de la relación mantenida entre mujer, arte y tecnología en los últimos cincuenta años.

1. CONSTRUCCIONES SOBRE EL GÉNERO, LA TECNOLOGÍA, EL TRABAJO Y EL ARTE EN LO RELATIVO A LA MUJER

En un segundo nos acercaremos a las prácticas y recorridos artísticos y políticos online y especularemos sobre el papel de las mujeres en los nuevos espacios tecnológicos y artísticos de la red Internet, así como sobre las posibilidades de dar por cumplidas las esperanzas emancipatorias, deconstructivistas y feminizadoras de la mujer en la red.

2. EL PODER DE LO SUBVERSIVO EN LA FEMINIZACIÓN DE LOS NUEVOS ESPACIOS ARTÍSTICOS

Y TECNOLÓGICOS

Para ello nos acercaremos a las distintas visiones que sobre el ciberfeminismo se están gestando y analizaremos proyectos de net.art que tratan de manera explícita el tema del género y en los que colisionan "arte, feminismo e Internet" y aquellos que, si bien no introducen explícitamente cuestiones feministas en sus obras, investigan líneas propias del metalenguaje de la red, indagando sobre los límites que separan lo real de lo virtual, los nuevos lenguajes que cuestionan las formas convencionales de narratividad, y la re-creación de subjetividades ficticias y virtuales en un nuevo espacio epistemológico y existencial del ser.

En estos dos apartados apuntaremos distintos conceptos sobre la feminización para llegar al que surge subversivamente de lo 'no dicho' y proclama su espacio de acción en las nuevas estructuras tecnológicas donde se están construyendo los sistemas de comunicación del futuro. Para ello acudimos al pensamiento de Derrida y de Kristeva para los que la mujer es la sede privilegiada desde la cual es posible desmontar el pensamiento occidental falocéntrico. También encontramos importantes referencias en las propuestas de escritura femenina de Cixous según la cual se pretendía desarticular (deconstruir) el discurso dominante, bajo una primacía, no de la mirada sino de lo simultáneo, lo que fluye, lo que se opone a todo tipo de figura o idea rígidamente construido. Esta propuesta, que nosotros vinculamos a las escrituras online, plantean una estrategia de destrucción del modo de funcionamiento del discurso tradicional, una relación de una "economía femenina" cercana al cuerpo, a lo que fluye, al ritmo, y opuesta a la economía masculina apoyada en lo filosófico, lo simbólico y lo discursivo. Esta sería una escritura que hablaría de lo inconsciente, lo reprimido, lo excluido, de los miedos y deseos no materializados. Escritura que se relacionaría con "lo otro viviente", lo "otro salvado" lo "otro ya no amenazado por la destrucción", proponiendo una feminidad que sería el "verdadero objetivo de ambos sexos".

En esta propuesta de feminización de la cultura podemos encontrar coincidencias en la crítica filosófica del esencialismo de Derrida. Tal vez, paradójicamente, pues aunque la idea de esencia es rechazada por la teoría posestructuralista, (recordemos que para Derrida el esencialismo era cómplice de la metafísica occidental y plantear la oposición hombre-mujer suponía plantear un falso universalismo -seguir prisionero de la metafísica con su ilusión de presencia, ser identidades estables-) el programa de "écriture feminine" que se basa en los mismos fundamentos, sí se mueve ocasionalmente hacia posturas esencialistas.

No podemos pensar ninguna realidad auténtica que no contemple la importante dimensión que todo (cualquier) real excluye. Es lo excluido (lo "otro") lo que marca las economías del deseo, así como de los cambios sociales y políticos, lo que marca la tensión mantenida del progreso.

En una sociedad en red, en una época donde no tiene sentido hablar de arte, artista, objeto y sujeto en los mismos términos que hace una década, la diferenciación biológica y sexual basada en la confrontación dual resulta insuficiente y se torna poco concreta. Las identidades fijas y condicionadas, reforzadas por una imagen del género como herramienta de subordinación, propiciatorias de una actuación políticamente diferencial (y por supuesto no neutral), dejan paso a identidades múltiples, re-hechas, re-articuladas, que intervienen su anterior lógica binaria y la subvierten.

Estrategias de (auto)creación basadas en el injerto, en la re-contextualización de fragmentos, en el copy-paste, convierten el interfaz, como campo maquínico de mediación intersubjetiva, en un nuevo espacio epistemológico del ser. Cuerpos articulados con escrituras digitales que interrumpen los discursos de la dualidad cuestionando la inmóvil "mismidad" del sujeto en las múltiples morfologías del interfaz, condicionando su inscripción social al efímero de su duración, a su genuina temporalidad y total contingencia.

En el ciberespacio somos cuerpos (géneros) hechos a través de la máquina, con palabras e imágenes, con fusiones y códigos que nos inscriben social y culturalmente mediante una tecno-anatomía. El ratón es a la vida digital (social -en red-) un inmediato y efectivo bisturí que, mediante código y palabras, modela sujetos online cual ciber-cirugía orlaniana.

Históricamente el género ha sido un instrumento de jerarquización proveedor de formas falsas y concretas a los cuerpos. Ahora, en una época donde se cuestiona todo lo aceptado como inamovible, el género se convierte en algo así como un "espectáculo diario" compuesto de imágenes que se dibujan en la pulsión del cambio posible, imágenes en permanente construcción.

En este nuevo espacio hablar de lo femenino nos remite a hablar de "la feminización" de la red Internet, de la acción desjerarquizadora de la misma, en términos de resistencia, deconstructivos. Términos que no supondrían, por tanto, recuperar los atributos tradicionales de la mujer, sino deconstruir el ser "feminizado" (revelador de una estructura de poder-sometimiento) y ejercitar la

voluntad de "querer ser" en un espacio concebido sin jerarquías, un espacio al que se le presupone (sobre todo en sus inicios) una menor carga de prejuicios sobre las formas posibles de ser en el mundo. Esta feminización, tal como sugiere Derrida, debe "por un gesto doble, una ciencia doble, una escritura doble, practicar una inversión de la oposición clásica y un desplazamiento general del sistema".

Si recordamos la construcción de la conciencia feminista anterior y posterior a los setenta tiene en la naturaleza de la identidad femenina un punto de inflexión en su tratamiento y consideración. A principios de esta década (los setenta) las artistas empezaron a ser verdaderamente conscientes de la artificialidad y del poder represivo de la "construcción social del género". Uno de sus objetivos sería descubrir en una imagen de sí mismas (gravemente deteriorada por el pasado, la historia y la imposición social de un papel a cumplir) una auténtica voz que pudieran utilizar como sustento para una nueva construcción de su identidad.

De esta manera, concebir una feminización de las prácticas artísticas de la red implica, más allá de suponer solamente la presencia femenina en dichas prácticas, indagar si su presencia y su labor incita una deconstrucción de los modelos de enfrentamiento dual en torno al género.

- Deconstrucción mediante dispositivos digitales, protocolos, lenguajes hipertextuales, correo electrónico, código ... todos ellos piezas clave en la producción de I@s net.artistas a lo largo de la última década. Dispositivos donde la "matriz" como comienzo, origen, principio de sentido - también digital- es una de las metáforas de acción y teorización recurrente y de mayor carga simbólica. Con esta analogía nos adelantamos a la dualidad bajo la que hemos construido nuestra estructura social y moral, cuya raíz descubrimos en el código binario de nuestro sexo y en el código digital de la máquina.

- Deconstrucción mediante nuevos lenguajes. Palabras que se dimensionalizan, sistemas conceptuales que abandonan nociones como linealidad, centro, margen o jerarquía y las reemplazan por otras apoyadas en multilinealidad, enlaces, nodos y redes de relaciones.

- Deconstrucción mediante dispositivos de comunicación global en red, mediante activismo informatizado. No sin motivo las prácticas artísticas más relevantes que desde los años sesenta se han manifestado y consolidado mediante debates estéticos, en lo relativo a la producción femenina, han estado protagonizadas por "mujeres con conciencia de serlo", es decir por artistas que han desarrollado su trabajo desde perspectivas críticas y feministas, desde discursos de la resistencia. En este sentido, Maria Damon nos habla de las "ciberfems de la utopía futurista": un tipo de posfeministas que basan sus acciones en la consideración de la red Internet como espacio óptimo para sacar partido a la incorporeidad del sujeto y la posibilidad de su realización para sí y para el contexto al que se vincula mediante la tecnología. Sadie Plant ejemplifica en sus teorías la importancia de este vínculo "ciber-fems" constatando a través del mismo algunas de las más agudas reivindicaciones de las mujeres en relación a la tecnología, así como la necesidad de tenerla presente en la construcción contemporánea del género, por cuanto su emancipación se verá facilitada en la gestación del ciberespacio como nuevo espacio de acción.

Las producciones de las net.artistas habitantes de esta "frontera", generada a partir de los diversos mundos posibles en torno a la red, tendrían en este contexto una doble lectura. Por una parte, las prácticas que evidencian un tratamiento explícito del género y que se posicionan desde una perspectiva crítica y feminista. Por otra, las producciones que introducen estas cuestiones de manera implícita en la investigación de líneas propias del metalenguaje de la red, en los nuevos lenguajes que cuestionan las formas convencionales de narratividad, y en la re-creación de subjetividades ficticias en el nuevo espacio epistemológico y existencial del ser.

Por otra parte, no podemos olvidar que la feminización que promueven estas prácticas no es exclusiva de la mujer, y entre las producciones y actitudes de artistas como VNSMatrix, Anne de Haan, Shu Lee Cheang, Victoria Vesna o Kathy Rae Huffman, y entre las proclamas "The vagina is the boss on the Internet" o "The clitoris is a direct line to the matrix", encontramos también exponentes -más sutiles- en los Keikos Suzukis y las Sociedades Anónimas del ciberespacio, en cuyos gestos descubrimos también el carácter diferencial y deconstructivo de Internet.

Y es que aquí, en la frontera de los mundos posibles, no es difícil imaginar un futuro cuyas producciones artísticas tengan detrás de sí, no artistas, ni hombres, ni mujeres, sólo productores y sociedades anónimas con nostalgia, o tal vez no, de su cuerpo.

En la red lo "no dicho" adquiere otra dimensión, parece como si lindásemos su frontera (su abismo), como si acercarnos a "esa ausencia" fuera ahora más fácil. Un mundo por construir siempre es lo más sugerente, un espacio en blanco para quien ha visto rellenar y usurpar su espacio a otros, es, cuando menos, una oportunidad para adueñarse de sus actos, de su vida. Y

aun cuando esta sensación es efímera, y podemos decir que dura 'un instante', 'un infraleve', lo que dura la ilusión del espacio virgen antes de ser mancillado por la ausencia de imaginación y la repetición de los mismos parangones sociales y los mismos temores a la diferencia, el deseo sigue perviviendo, y en relación a la red, el deseo es el motor de la construcción de un lugar de "lo individual" y de "lo común" para todos.

Hacking vs Hacktivism: Sniffing the net

Outline of my research during my grant period in MECAD

Jenny Marketou

2000-2001

<http://smellbytes.banff.org>
Sniffing/Splashing 2000 (CD-ROM)

"As hackers become politicized and as activists become computerized, we are going to see an increase in the number of cyber-activists who engage in what will become more widely known as Electronic Civil Disobedience."
Stefan Wray, 1998

The discussion of the political impact of the internet has focused on a number of issues: Access, technological determinism, encryption, comodification, software, intellectual property, the public sphere, decentralization, anarchy, hacktivism, gender." On the other hand the net is the paradise of no-copyright, plagiarism, confusion and exchange. Hacking means reappropriating, reforming and regenerating not only culture but also redefining systems and processes, and it can account for a new coinage when the process is an open system. There is no question that Hacktivism is a new breed of activism -- wired and confrontational.

My current investigation has been focused on hacking vs hacktivism and the role those actions have played in the construct of a sociopolitical imaginary in our networked culture . I am particularly interested a how the above tactics have been dynamically appropriated and how the computer underground hacktivism has been infiltrated and interpreted in the work of many internet artists and collective groups working on the net as a meaningful political activity and radical practice.

Some of the following topics I would like to address:

- 1- Defining characteristics of the internet and therefore of "hacktivism".
- 2- Hacking vs Activism vs Electronic Civil Disobedience vs meaningful political practice.

- 3 Hacking + hacktivist culture and the e- community that hackers + hacktivist claim to embody.
- 4- What about e-Girl e-Geeks?
- 5 -Hacktivism as a conceptual art practice and artists as cultural hackers.
- 6- Hacktivism as performance, as hard sport, as an activist intervention, as radical practice/subversion, as erotic fantasy.
- 7- Stunts and Pranks and other tactics.
- 8- Sensationalism and e-Media Hype.
- 9- Other artistic - isms -contemporary or historical as basis for comparison.

In reference to the above research the following interviews have been published and projects and panels have been presented by the artists.

1-Interview Jenny Marketou with Cornelia Sollfrank, Artist, "Hacking Sublime", SYNOPSIS 1, catalog, Museum of Contemporary Art, Athens, Greece, September 2000.

2- Interview Jenny Marketou with Claudia Giannetti, Director, MECAD, Hacktivism No 5 MECAD e-journal on-line, MECAD, Sabadell, Spain, 2001.

3- Open Source Lounge: Game Patching and Hacking Sublime and Viewers as Artists, a collective project, organised by Jenny Marketou in collaboration with Steve Dietz, curator of New Media Initiatives, Walker Art Center, USA. This project was first presented during the Medi@terra 2000, Art and Technology Festival, Athens, Greece.

4- NO CENSORS/ DYSTOPIA, 2001. A panel discussion with Marina Griznic, Natalie Bookchin and Jenny Marketou organized by Christine Wang, Curator New Media Initiatives, Alternative Museum, New York City.

The Net Alternative, or, Who's manipulating who? Corporate Sponsors, Public Relations, and Art

Natalie Bookchin

From a talk held at Künstlerhaus Bethanien Feb 2001
<http://www.bethanien.de/mal/netsplit.html>

In preparation for this talk I was sent a series of speculative questions by Gerrit Gohlke proposing issues to be covered on this panel. He suggests that thus far, net art has failed to deliver what it had originally promised. It has not destabilized and offered a way out of the traditional art system or provided access to a social reality through the networks. Proposing a "net split" he argues that many of net art's protagonists have either turned away from art and towards political activism or entered a mainstream art world with worn-out strategies, and he ends by suggesting that perhaps the Internet has been overrated as an aesthetic medium.

I wanted to begin with this summery because it contains some common assumptions about net art that I would like to call into question. First, I should begin by saying that there is no doubt the net is here to stay and artists are and will continue using it. The question proposed as the topic for the panel can not begin to account for the fact that the net has become an indispensable tool and material for numerous artists. Moreover, as audiences on the net get larger so do the possibilities for artists to tap into them. As activities on the net become more formalized, so do the possibilities for artists to manipulate those same forms. Thus, the more relevant question for me is less whether net art is making enough innovative strides at the moment, or if net art failed, but rather how has the net altered artistic production?

I also wonder how useful it is to qualify and limit our understanding of the diverse ways that artists are using now the net by applying the label net art to all these different artistic activities. Such practices include the regular emergence of international collectives and networks of artists developing projects across distances, performative network manipulations (such as this past

summer's borderhack project in Tijuana which was as much of an international net performance as it was a live local event), or even the ways in which the net still functions as a cheap and easy method for artists to have direct contact with audiences, regardless of whether they choose to be or are accepted in the traditional art system.

It is not uncommon today in some circles to harp back nostalgically to the early days of net art when there was an apparent wave of creativity that has now subsided, those days when a small international group of people named and produced a lot of "net dot art". Where have they all gone?

But there is another way to think about this. I think the fact that art production on the net was thrust into the limelight very quickly and for a short period of time had more to do with both very creative manipulation of networks and with a growing awareness of how information could travel over the net, than with a rush of artists' websites sweeping the net. These creative manipulations were used in such a way that propelled a particular group of people into a highly visible place, and this activity was then, quite self consciously labeled net.art.

This is not to dismiss early net.art as mere self promotion. Rather I am arguing that the "art" was located less in the individual web sites and more in the fierce collective manipulation of all aspects of the networks: mailing lists, spam, email, websites, links, web rings and mirrored sites: all devices for trespassing into and parasiting networks for alternative ends. This concerted effort created the earliest net art "movement", a first wave of artists who knew how to work the net.

As Health Bunting wrote to me in an email in 1997,

"i think self promotion is a viable tactic for infiltration in this current art star system. many of my european friends who have not yet suffered advanced capitalism (thatcherism) still have an aversion to these methods."

By focusing primarily on network manipulation, these works took on and engaged the materials of the net. Their self referentiality was an important aspect of an art grappling with new materials and a new medium.

Artists are of course still manipulating the net, but in the most compelling works, the focus is no longer just on the process itself, nor on artists simply directing attention to themselves. For example, it is not enough just to highjack people to your site, as it was in 1995. (Moreover so called hijacking has since been appropriated by the porn industry. Last year a porn company was sued for "highjacking" unwitting audiences who claimed they were taken to porn sites against their will, and their jobs were put into jeopardy when they were discovered by their bosses viewing this same porn). The question for artists now is what to do with your captive audience once you have their attention.

I would like to refer back now to another speculation that I received in the preliminary email about this panel, which suggested that many net artists have moved away from art into political activism. This position assumes that one is either making art or making politics and sets up a great divide between the two spheres. In fact, I think that the net has facilitated just the opposite - that is, an ease in which one can move between different spheres and contexts in the same work, not just referring to, but actually entering into them. It is of little effect for artists to refer to the political only from privileged spaces dedicated to the viewing of art nor the expected social spaces delegated to political activism. The net has made it simple to shuffle between these different areas, permitting artists to show up where they are neither expected nor particularly wanted.

As artists have become more adapt at working the material of the net, questions of how to use this manipulation to engage in different levels and subjects have become more critical. Early net artists' investigations into alternative distribution systems are now being put to use by newer art collectives, but the subject is now not distribution itself, but rather a distributed political or social critique.

Today there are artists whose creative and subversive uses of the net intentionally rub themselves against the grain not just of the art system but of the larger mainstream in a way that produces a quite visible effect. This work reaches sizable audiences unthinkable before the net, stretching as far and wide as the offices of major political candidates, the Pentagon, the director general of the WTO, and frequently showing up in the channels of mainstream media. One recent example is the project voteauction.com, which used all the conventions of the online auction house to highlight and provoke a corrupt system posing as a democracy, and in turn, created a

not insignificant ripple in art, mainstream media and political realms.

There is an important legacy of artists who have been concerned not just with the depiction of political content, but with the politics of distribution and display. Since we are in Berlin, I will mention Berlin's own John Heartfield. A proto-net artist of sorts, he made political performance out of the manipulation of his public identity by cutting his name Helmut Herzfeld and pasting a new anglicized one, John Heartfield, in a show of disgust for the nationalist proto-fascist regime under which he was living. Perhaps more relevant to today's conversation were his innovative methods of distribution, whereby he used the new mass media to disseminate his subversive and political photomontages, aiming for and reaching not the galleries and museums, but the streets.

Finally I would like turn to a brief discussion of a project I am currently developing, first because it attempts use the methods I have been outlining and second because it is a project that would be unthinkable without the Internet. It first requires a little bit of background information .

There are a series of shows and commissions on the subject of genetics currently underway in the States. As part of this initiative, I was invited by a NY public art organization to develop a public art project.

Along the way, I made an intermediary piece (with Jin Lee), a power point presentation called Biotaylorism, which addresses how, by combining Taylorist and Fordist methods with biotechnology, organic life is now being internally optimized for better business solutions. The project was included in a traveling exhibit called "Paradise Now, Picturing the Genetic Revolution" in NY this past fall. As it turned out, the show had a range of biotechnology corporate sponsorship, backing an unusually extensive amount of promotion, included full page ads in the NY Times and a panel discussion featuring no artists, but instead biotechnology industry luminaries such as Craig Venter. (CEO of Celera).

This show is not unique. As I mentioned, there are currently underway a number of other such well funded shows and grants to artists to produce work in this area. Regardless of the good intentions of the curators, the bill is being partially footed by biotech companies and their PR firms. And in Europe, Ars Electronica has had biotechnology as its theme for the last 2 years. One of its main sponsors is none other than the Swiss biotech giant, Novartis.

Although corporate sponsored shows on biotechnology are by now nothing new, (see Yvonne Volkart's essay "Art Strategies of the New World Order, or, What do resistant art works look like?") this new burst of sponsorship for "gene-art" coincides with a major PR campaign begun last year by a consortium of the world's seven top biotechnology companies called "Good Ideas are Growing". The industry saw it as a critical time to push for public acceptance of genetic research and development, particularly in the States. While there had been general complacency on the part of Americans in the past in regards to genetically modified foods and research, the mood was starting to change. The aim was thus to avoid a public relations disaster such as the one that had taken place in Europe over the past few years, where biotechnology was met with fierce public resistance. The campaign consists of so called educational science exhibitions, ads, and the sponsorship of genetics-theme based cultural programs such as art exhibitions, conferences and art commissions.

The question was then what do these corporations want from artists, and how can we possibly avoid giving it to them?

Corporate sponsors are pretty certain that artists will serve as a comfortable buffer offering the public non-threatening points of entry into these otherwise threatening industries. With artists making biotechnology and genetics the subject of aesthetic contemplation and creative visual representation, what might have seemed disturbing becomes engaging, accessible and easier to accept as our present reality. Colorful and so called "open discussions" on the complex ethical dilemmas are likely to assuage public anxieties, conveying the impression that democratic discussion is taking place. The very question of whether biotechnology or genetics should continue in their present tracks is not even broached. This instead becomes a given - an inevitability. Less aesthetic questions concerning economic interests are generally not discussed. And by keeping these discussions in the safe spaces delegated to art, even the most critical of questions will not threaten the industry.

In developing a project, it has been essential for me to think tactically about how to negate the instant neutralization of this highly politicized subject. All the issues discussed above - context, distribution, and form - have been essential considerations. For this reason, I realized that I need to make a project that can function autonomously - and move easily in or outside of the sphere of "art". Second, it is critical to make central to the project the issues of economic and corporate

interests and how they shape and define the science. Thirdly because images are always easier to co-opt than action, I will set up a structure that will encourage participants to become both invested in and involved with politicized and socially charged actions.

I decided to make an on-line game-called Superpetz (also with Jin Lee) modeled on a virtual Tamagotchi game, where the virtual pet is a human worker and you, the player, become a manager. You begin the game by selecting traits that you think are most desirable for your worker/pet. Next you must run your pet through a genetic screening test, which although unreliable and costly, will determine whether he or she qualifies for health insurance or is employable, and at what level. The test results of course may affect your pet's happiness, anxiety and energy levels. Knowing the potential risks may motivate you to make certain lifestyle choices, should you have enough points to afford to do so.

The game takes place in a virtual work place, where you must earn points to feed, replenish and manipulate your pet. Feeding keeps up energy and happiness levels so that your pet can work efficiently and earn more points. Working your pet depletes its energy and food levels and overwork or over supervision can lower efficiency, happiness and health levels.

There are numerous options for modifying your pet's body and mood to potentially affect its value, performance and job ranking, but these modifications entail costly and at times risky procedures. Overmodification or an abuse of rejuvenators can lead to inefficiency, job demotion, job or insurance loss, and an untimely death.

If you don't have enough money - for example in the case of a pet that has not been given a job or health insurance as a result of the genetic screening test - or if you simply want to earn more points, you can leave the workplace and temporarily enter another game environment where you have other options for earning points. There, you can play a "knowledge game" on the subject of work, science, health or reproduction. Or you can venture into the thrills and challenges of real life actions and participate in a variety of on or off line interventions or subversive projects on the subject, thus earning mega-points for your pet.

One final word in on the net: the net is the only site where we could realistically develop such a project that could function with ease either as a real game, as an investigation into the interests of corporate biotechnology and genetics industries and as an art project, and that in its different faces could potentially attract a broad and not always prepared audience. Using the format of a game puts players inside the story, implicating them in this political narrative, and the net allows me to subsequently direct these same audiences/players to an extensive database of information and to activities on the subject, and potentially propel them towards various actions -all under the same umbrella. To close, I don't think it is time to either celebrate or bemoan art on the net as simply a new genre in the museums, nor is it time for artists interested in productive critical strategies to close the book (turn off the switch) on net art.

Dioses, cyborgs y monstruos (Gods, Cyborgs and Monsters)

Idoia García de Cortázar

El proyecto presentado bajo el título "Dioses, cyborgs y monstruos" es una tesis doctoral que explora la dimensión artística de las nuevas tecnologías, así como examina las articulaciones reales, posibles e imaginarias entre los seres humanos (cuerpos) y las móquinas. El trabajo está dividido en tres partes:

La primera parte está dedicada al análisis de los nuevos rituales tecnológicos en los que la dicotomía tradicional mente/cuerpo ha sido reemplazada por la tricotomía mente/cuerpo/móquina.

El ritual tecnológico funciona como las cosmologías primitivas: intenta explicar, predecir y controlar el mundo. Define una experiencia señalada por la expectativa de un placer mágico, casi se diría que por una especie de redención o catarsis controlada y, al mismo tiempo, por la compulsión y la adicción, la hipnosis o la anestesia, la frustración reiterada y permanente ante el nuevo dios, junto con una suerte de ataraxia frente a una realidad de todos modos evanescente. Espectáculo mediático que se ajusta a las definiciones clásicas del término ritual, participa de sus propiedades y funciones, y presenta peculiaridades propias.

El espectáculo tecnológico es una demostración del orden sociocultural, dramatización del triunfo de la móquina, tragedia de haber perdido el cuerpo y la naturaleza, de ser y no ser humanos, simulacro, escena ritual, donde un hecho puntual permite la observación de la cultura global.

La segunda parte trata del uso del cuerpo, no como objeto de deseo, sino como objeto de diseño. Un cuerpo invadido por la tecnología y con modificaciones (prótesis tecnológicas): los cyborgs.

Un cyborg es un organismo cibernético, un híbrido mitad móquina, mitad organismo. Pero el cyborg puede ser también una ficción capaz de construir nuestra realidad social y biológica como un recurso imaginario que trabaja con la noción de híbrido, buscando superar los dualismos omnipresentes en el pensamiento tradicional.

La tecnología invierte las polaridades del mundo en que vivimos: las móquinas de finales del siglo XX han tornado totalmente ambigua la diferencia entre lo natural y lo artificial, la mente y el cuerpo, el desarrollo interno y el diseño externo, y muchas otras distinciones que se aplicaban a los organismos y a las móquinas. Nuestras móquinas están inquietantemente vivas y nosotros mismos terriblemente inertes.

Y por último se reflexiona sobre los monstruos o los fantasmas, los cuerpos en la red.

El mundo es reducido a un ritual mediático mediante estrategias de representación electrónica de la realidad. Se produce una escenificación de lo real y de nuestra presencia simulada en ella, que define de una forma espectacular la participación social del espectador transmutando lo privado en público. El evento mediático no es una reproducción ni una extensión de los sentidos, sino que configura una prodigiosa maquinaria conceptual, iconográfica y semiológica como sustituto de la realidad.

Curiosamente, justo cuando penetramos en el espacio incorpóreo de las abstracciones binarias, el cuerpo se convierte en uno de los temas referentes a la constante intrusión en el mundo artificial del ordenador, por medio de la telepresencia, la telerrobótica y la creación de cuerpos virtuales.

En la red, el cuerpo simboliza las diversas intersecciones entre el mundo virtual y el real, es representado, reinventado, conectado e incluso alterado física y virtualmente. Se convierte en arquitectura, en un espacio navegable, en la metáfora de la entrega total.

Relaciones de Incertidumbre

Dina Roisman

"Todo había sido un problema de conexiones fallidas, de mala sincronización, de andar a ciegas. Siempre perdiendo la ocasión de encontrarnos por muy poco. Siempre a unos centímetros de descubrirlo todo. A eso es a lo que se reduce la historia, creo. A una serie de oportunidades perdidas. Teníamos todas las piezas desde el principio, pero nadie supo encajarlas..."

Paul Auster, *El palacio de la luna* 1

Relación número uno: nociones generales

Los puntos de partida de este proyecto han sido el concepto de **azar**, como generador de sensaciones, y la **relación entre incertidumbre y certeza** (como dicotomía dialéctica).

Con estos dos elementos como ejes fundamentales, el trabajo no pretende brindar respuestas, sino plantear el problema y sus múltiples (quizá infinitas) posibilidades. Por este motivo, la estructura que lo rige está compuesta por preguntas:

¿Qué es el azar? ¿Es un producto de nuestra ignorancia o un derecho propio de la naturaleza? ¿El azar es una necesidad intrínseca del hombre (un imaginario) o existe realmente? ¿Es una búsqueda voluntaria? ¿Es posible que exista un principio "armonizador", que organice los eventos azarosos dentro de una grilla ordenada? ¿Puede definirse el grado de probabilidad de un acontecimiento?

Estos interrogantes han generado una larga historia de estudios, hipótesis y discusiones: Por qué las cosas son como son, y no de otra manera completamente distinta. Un enigma que han querido desvelar las ciencias exactas, la religión y la filosofía, pero hasta ahora nadie ha llegado a resolver.

• Relación número dos: objetivos propuestos

Se trata de poner en crisis, mediante la interactividad y la posibilidad de un *efecto random* (no predecible), la sensación de seguridad frente a lo esperado.

A través de situaciones azarosas, o *aparentemente* azarosas (de eso se trata), se busca activar el sentimiento de incertidumbre o de certeza ante diferentes condiciones propuestas, y provocar de esta forma reacciones diversas en cada individuo.

• Relación número tres: el otro

La interacción del usuario es fundamental. El proyecto perdería sentido si no existiera este vínculo. El propósito consiste en lograr una participación activa en cada página (ingresando textos y números, armando rompecabezas) y no sólo una navegación hacia adelante o hacia atrás. En cada momento se deben tomar decisiones que influyen inevitablemente en el recorrido, de manera de que cada navegante elige caminos diferentes de los de los demás, e incluso de los que él mismo ya realizó con anterioridad.

Cada uno hace su propia navegación, construye su recorrido. Esto significa que también construye su propia noción de orden, de azar: su realidad, que implica, como fin último, la construcción de su identidad.

• Relación número cuatro: el soporte electrónico

Al trabajar en el medio digital, el concepto de azar se traduce en la experiencia de la aleatoriedad (tanto en la imagen como en el sonido) en la posibilidad de crear un espacio con un recorrido no-lineal, que al ser atravesado permite el descubrimiento de nuevas piezas.

Cada página del proyecto fue planteada como un pseudo juego, una invitación a navegar detenidamente y a investigar sus elementos (siempre hay objetos y enlaces ocultos).

El ordenador adquiere en ciertos momentos *personalidad propia* (piensa un número, concede un deseo); esta personificación se relaciona con lo inesperado, con la sorpresa, con la angustia frente a la posibilidad de ser dirigidos por un *ordenador* que predetermine nuestras elecciones.

Relación número cinco: el juego

Es un elemento fundamental de este trabajo. Para ahondar en el concepto de lo lúdico, se ha tomado el texto del teórico James Carse, que define **dos tipos de juego: finito e infinito**:

"Un **juego finito** es un juego que tiene reglas fijas y límites, que se juega con el propósito de ganar y terminar la partida."

"Un **juego infinito** no tiene reglas fijas ni límites. En este juego, cada uno juega con las reglas y el objetivo es continuar la partida."

"Los que participan de juegos finitos tratan de controlar el juego, de predecir todo lo que va a ocurrir, y aventajarse. Tratan de determinar el futuro basándose en el pasado.

Los jugadores de juegos infinitos disfrutan sorprendiéndose. Continuamente se sumergen en lo desconocido, con tal de que esto garantice la continuidad del juego. El significado de los cambios del pasado cambia dependiendo de lo que ocurra en el futuro.

Todos los juegos son voluntarios. Siempre habrá consecuencias si uno no juega o no sigue las reglas, y siempre será necesaria una elección previa. Hay ciertas reglas definidas, aparentemente externas, que debemos elegir si respetamos o no. Si no se respetan, se abandona el juego."

"Pero: no hay ninguna regla que diga que hay que seguir las reglas." **2**

En [**relaciones de incertidumbre**] se propone un juego infinito, pero precisamente porque todos los juegos son voluntarios, depende de cada uno el tipo de juego en el que quiera participar, o la decisión de abandonarlo en cualquier momento.

El *puzzle* o rompecabezas representa aquí un enigma, invita a actuar, a mover las piezas, con la particularidad de que está siempre presente la posibilidad de que no pueda llegar a armarse nunca (no hay ninguna pauta que indique cuál es la forma correcta de armarlo).

• Relación número seis: el proceso

Para la realización del trabajo se comenzó con una primera etapa de investigación teórica, recopilación y selección de textos. Se tomaron 4 ejes como guía estructural:

a) Filosófico y psicológico (se analizaron textos de Carl Jung, Paul Watzlawik y Henri Bergson, entre otros).

b) Lúdico (en relación a los *juegos de azar*, sobre textos de James P. Carse, John Conway).

c) Artístico (textos y métodos de William Burroughs, la aleatoriedad en la música desde

producciones de John Cage, la cinematografía de Kristof Kieslowski y la producción literaria de Paul Auster, entre otros).

d) Científico (las ciencias exactas y las múltiples corrientes relacionadas con el azar y sus derivados a través de Gregory Chaitin, Jorge Wagensberg, François Jacob).

El paso siguiente consistió en materializar las teorías y los conceptos más fuertes de los distintos ejes en la gráfica.

Se trabajó sobre una iconografía relacionada con los juegos de azar, específicamente los dados (utilizados para apuestas y juegos de este tipo desde hace por lo menos 5000 años), y con símbolos matemáticos.

Las imágenes utilizadas son de creación propia, y el sonido fue generado y editado por la autora, paralelamente al desarrollo gráfico.

• Relación número siete: una conclusión posible

Como se planteó desde el inicio, el objetivo de este proyecto no es brindar una respuesta, una única visión acerca del tema: se propone, por el contrario, multiplicar las preguntas.

La idea consiste en que se puedan investigar las páginas y detenerse en ellas, sin una trayectoria establecida, de forma tal que el camino se genere en cada uno, en cada navegación individual.

Conexiones fallidas. Sucesos arbitrarios.
La necesidad inevitable de elegir
el tres, (y no el cuatro)
y sentarse a ver qué pasa.

• Conceptos y aclaraciones

El título: la fórmula elegida para el título del proyecto forma parte de una serie de fórmulas presentadas por Werner Heisenberg en 1927.

En este ejemplo **p** y **q** representan el **momento** (o velocidad) y **posición**, respectivamente, de un electrón o partícula. La fórmula señala que si se mide con máxima precisión una de las dos coordenadas (velocidad o posición) de una partícula, no se puede obtener simultáneamente un valor preciso para la otra coordenada.

Por lo tanto: cuanto más exactamente se determina la velocidad de una partícula, tanto menos exactamente puede determinarse la posición de la misma partícula y viceversa. Esta relación se ha considerado muchas veces como prueba de que hay indeterminismo en el universo físico.

Sincronía: de acuerdo a las investigaciones y los textos de Carl Jung, se define como un principio explicativo. Implica una conexión entre eventos que parecen sin sentido para el observador: precognición, coincidencias de sueños independientes, la recurrente aparición de números en un corto período en una larga secuencia.

Pero su encuentro no es casual.

En general, las sincronías, en lugar de brindar una sensación de tranquilidad y armonía, generan exactamente lo opuesto: angustia, repulsión, desesperación.

Sistema: grupo de piezas que, en el interior de un mecanismo, trabajan en función una con la otra para asegurar el (*buen*) funcionamiento del mecanismo completo.

En el campo científico: conjunto de principios y teorías destinadas a brindar una explicación que permita aclarar un fenómeno.

Algunas nociones sobre el azar

-*juego de azar*: que no requiere ni cálculo ni dirección.

-*números al azar*: números estocásticos.

-acontecimiento particular e inexplicable.

-causa de algo que se produce sin razón aparente, fuerza que produce acontecimientos que no obedecen a ninguna regla. Un acontecimiento depende del azar (o es aleatorio), cuando su realización, o no realización, en circunstancias precisas, no puede predecirse con certeza.

-un acontecimiento se produce al azar cuando no existe ningún vínculo entre la naturaleza de su categoría y la causa determinante de esa categoría.

[Home](#) > [Ubermorgen](#)

ubermorgen is an artist group created in Vienna / [Austria](#) 1999 by Hans Bernhard (founder of [etoy](#)) and Lizvlx . Behind ubermorgen we can find one of the most uncatchable identities - controversial and iconoclast - of the contemporary European techno-fineart avantgarde. ubermorgen is a German word for "the day after tomorrow" and "super-tomorrow" / "uber-tomorrow".

Projects: [Voteauction](#), NAZI~LINE [in collaboration with Christoph Schlingensief , [Injunction generator](#) [1], [THE_WHITE_WEBSITE](#) [2], esof Ltd. Sofia/Bulgaria, etoyholding AG, hansbernhard.com, BMDI.de [3], bartnlisa.com, The [Yes Men](#) WTO Salzburg [4], "Sleeping Baby - Playing Baby" [5], AGENCY FOR MANUAL ELECTION RECOUNTS and shopping baskets [6].

Group exhibitions: Aldrich Contemporary Art Museum 2001, Madrettor Gallery Rotterdam 2002, Museu d'Art Contemporani de Barcelona 2003, Ars Electronica 2003, Read_me 2.4 Helsinki 2003, Konsthall Malmoe 2004. Solo-Shows: The Premises Gallery Johannesburg 2002, Kunsthaus Graz 2004.

Hans Bernhard was awarded with the golden Nica [Prix Ars Electronica](#) 1996 and ubermorgen received a "honorary mention" 2003 from the Ars Electronica Media Festival in Linz / [Austria](#).

El Boletín de DOMINIURIS - Nº 27 (5 de diciembre de 2.000)

Sumario:

- EDITORIAL

- Sobre la jurisdicción especial de los dominios. Eclavos ya había en Roma.
- La Ley de acompañamiento de presupuestos generales para el año 2.001 y los dominios.

- CASOS DE LA OMPI. viajesecuador.com

- La franquicia de Viajes Ecuador de Lugo gana el litigio en la OMPI por el dominio VIAJESECUADOR.COM

- CASOS JUDICIALES. ARGENTINA. Caso "lagallega.com.ar".

- CASOS JUDICIALES. DINAMARCA

- INJEF.COM

- EVOLUCION DE LOS NOMBRES DE DOMINIO

- ICANN (FAQ). Traducción al español

- ICANN. ¿Pueden cambiar las cosas?

Elección de Andy Mueller-Maguhn del "Chaos Computer Club"

- OMPI.

Segunda solicitud de comentarios para el Segundo Proceso de la OMPI relativo a los Nombres de Dominio de Internet

- ANALISIS DE LA APLICACION DE LAS NORMAS DE RESOLUCION DE CONFLICTOS DE LA ICANN.

Estudio del Profesor Milton Mueller de la "Syracuse University".

- LA ICANN ES DEMANDADA EN TEXAS

- COMPENDIO DE CASOS JUDICIALES EN ARGENTINA.

Este Boletín es un poco largo. Esa es la verdad. Por tanto sugiero sosiego en su degustación, pues de una tirada entera, sobre todo si se tienen ganas de investigar, puede causar una cierta indigestión. De aquí a las próximas Navidades, nuestros lectores podrán procesar adecuadamente y con suficiente reflexión la información proporcionada, de cara a la entrada en la nueva era, pues, como explicaré ahora,

EDITORIAL: Los esclavos de Roma y la Ley de acompañamiento

Por ventura o desgracia, lo cierto es que en la prensa tradicional tan sólo suelen aparecer los casos que son ganados por los titulares de marca, aunque, a la vista de lo acontecido en el caso "barcelona.com", hay algunos

que a cualquier cosa le llaman marca, teniendo en cuenta la redacción actual de las normas en que los árbitros de la OMPI han de basar sus decisiones. Casos como éste, pese a que se empeñe quien se empeñe, lo único que hacen es empañar la honrada actuación de muchos de los miembros de la OMPI; institución que casi monopoliza la naciente jurisdicción especial "cibernética", porque llamar arbitraje a eso, hoy por hoy, es todo un despropósito.

Pocos, o más bien nadie, dudan ya de la necesidad de contar con un sistema ágil de resolución de conflictos, sobre todo para los dominios en que no se ejerce comprobación previa alguna antes del registro. Igualmente, la redacción que hoy en día tienen estas normas, concebidas con el fin de terminar con los aprovechamientos fraudulentos y flagrantes de signos distintivos empresariales ajenos, también goza de un amplio consenso.

Ahora bien, la interpretación que se está haciendo de estas normas en algunos casos, o más bien, la utilización de las mismas a modo de pretexto para "crónicas de resoluciones anunciadas", es, ciertamente, lo que puede llegar a deslegitimar una iniciativa que habría que mimar y cuidar como si de un niño pequeño se tratara. No en vano, estamos definiendo los caminos que en los próximos años se poblarán de viajeros, y las instituciones y personas que se sitúan al frente de estos derroteros, reconozcámoslo, han de ser consecuentes con la responsabilidad que se pone en sus manos y respetuosos con los principios y valores que hicieron posible Internet. Pero claro, si esas personas se encuentran ya compradas por unos intereses concretos y, consecuentemente, se ven obligados por sus dueños a despreciar estos valores que posibilitaron la aparición del Internet, ésta, ciertamente, tiene poco futuro para ellos.
